## About ExamBible

### *Your Partner of IT Exam*

## Found in 1998

ExamBible is a company specialized on providing high quality IT exam practice study materials, especially Cisco CCNA, CCDA, CCNP, CCIE, Checkpoint CCSE, CompTIA A+, Network+ certification practice exams and so on. We guarantee that the candidates will not only pass any IT exam at the first attempt but also get profound understanding about the certificates they have got. There are so many alike companies in this industry, however, ExamBible has its unique advantages that other companies could not achieve.

## Our Advances

### \* 99.9% Uptime

All examinations will be up to date.

### \* 24/7 Quality Support

We will provide service round the clock.

### \* 100% Pass Rate

Our guarantee that you will pass the exam.

### \* Unique Gurantee

If you do not pass the exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

**NEW QUESTION 1**

- (Exam Topic 5)

You have a Microsoft 365 subscription that contains the users shown in the following table.

Name	Group
User1	Group1
User2	Group1, Group2

You have the named locations shown in the following table.

Named location	IP range
Montreal	133.107.0.0/16
Toronto	193.77.10.0/24

You create a conditional access policy that has the following configurations:

Users and groups:

- > Include: Group1
- > Exclude: Group2

Cloud apps: Include all cloud apps

Conditions:

- > Include: Any location
- > Exclude: Montreal

Access control: Grant access, Require multi-factor authentication User1 is on the multi-factor authentication (MFA) blocked users list.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can access Microsoft Office 365 from a device that has an IP address of 133.107.10.20.	<input type="radio"/>	<input type="radio"/>
User1 can access Microsoft Office 365 from a device that has an IP address of 193.77.10.15.	<input type="radio"/>	<input type="radio"/>
User2 can access Microsoft Office 365 from a device that has an IP address of 193.77.10.20.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

The Blocked User list is used to block specific users from being able to receive Multi-Factor Authentication requests. Any authentication attempts for blocked users are automatically denied. Users remain blocked for 90 days from the time that they are blocked.

Box 1: Yes

\* 133.107.10.20 is in the Montreal named location. The conditional access policy excludes Montreal so the policy does not apply. Therefore, User1 can access Microsoft Office 365.

Box 2: No

\* 193.77.10.15 is in the Toronto named location. The conditional access policy applies to Group1 which User1 is a member of and all locations except for Montreal. Therefore, the conditional access policy applies in this case. The policy requires MFA but User1 is on the MFA blocked list so he is unable to use MFA. Therefore, User1 cannot access Microsoft 365.

Box 3: Yes

User2 is in Group1 and Group2. The conditional access policy applies to Group1 but excludes Group2.

Therefore, the conditional access policy does not apply in this case so User2 can access Microsoft Office 365. Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/authentication/howto-mfa-mfasettings>

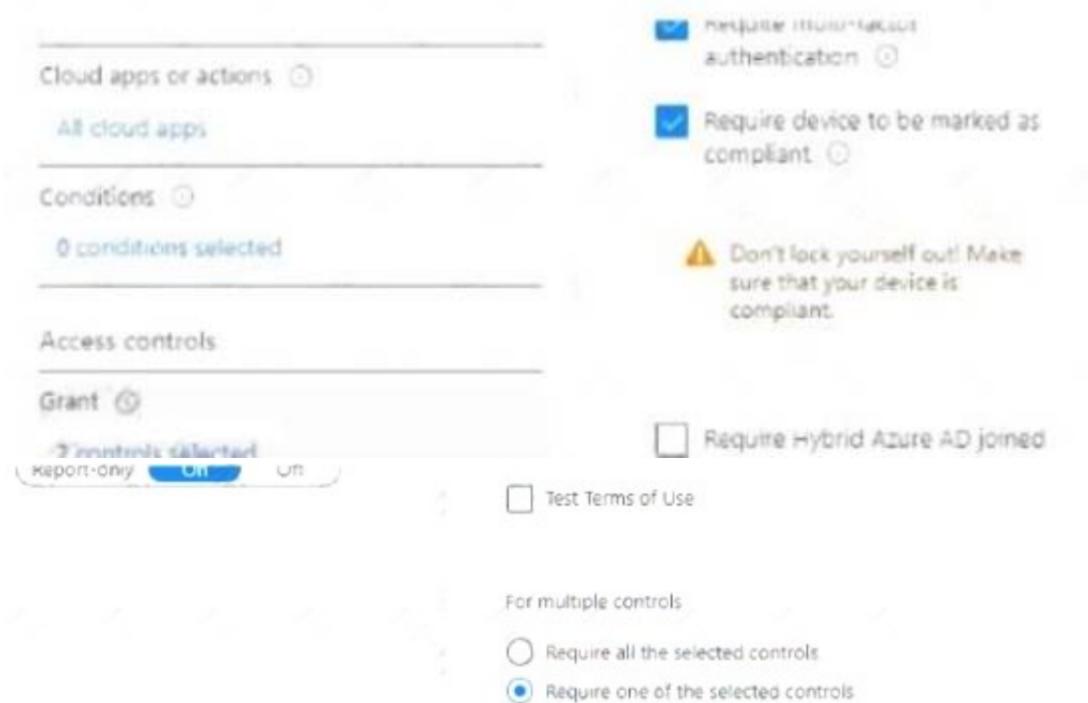

**NEW QUESTION 2**

- (Exam Topic 5)

You have a Microsoft 365 subscription that has Conditional Access policy named Policy1. Policy1 is configured as shown in the following exhibit.

The screenshot shows the configuration for a Conditional Access policy named 'Policy1'. The policy is set to 'Grant access' (selected with a radio button) and 'Require multi-factor authentication' (checked with a checkbox). The 'Control access enforcement' section is visible, with a link to 'Learn more'.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

If a user signs in from a compliant device, the sign in will [answer choice].

be allowed  
 be blocked  
**prompt for multi-factor authentication (MFA)**

If a user signs in from an unmanaged device, the sign in will [answer choice].

be allowed  
 be blocked  
**prompt for multi-factor authentication (MFA)**

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Graphical user interface, text, application Description automatically generated

**NEW QUESTION 3**

- (Exam Topic 5)

Your company has 20 employees, Each employees has a mailbox hosted in Outlook.com. The company purchases a Microsoft 365 subscription. You plan to migrate all the mailboxes to Microsoft 365.

You need to recommend which type of migration to use for the mailboxes. What should recommend?

- A. Cutover migration
- B. Staged migration
- C. IMAP migration
- D. Minimal hybrid migration

**Answer:** C

**Explanation:**

To migrate mailboxes from Outlook.com to Office 365, you need to use the IMAP migration method.

After you've added your users to Office 365, you can use Internet Message Access Protocol (IMAP) to migrate email for those users from their IMAP-enabled email servers.

In the Microsoft 365 admin center, go to Setup

>Data migration

to start migrating IMAP enabled emails.

The email migrations page is pre-configured for migrations from Gmail, Outlook, Hotmail and Yahoo. You can also enter your own IMAP server name and connection parameters to migrate from an email service that is not listed.

References:

<https://docs.microsoft.com/en-us/exchange/mailbox-migration/migrating-imap-mailboxes/imap-migration-in-the>

**NEW QUESTION 4**

- (Exam Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result these questions will not appear in the review screen.

Your company has a main office and three branch offices. All the branch offices connect to the main office by using a WAN link. The main office has a high-speed Internet connection. All the branch offices connect to the Internet by using the main office connection.

Users use Microsoft Outlook 2016 to connect to 4 Microsoft Exchange Server mailbox hosted in the main office. The users report that when the WAN link in their office becomes unavailable, they cannot access their mailbox. You create a Microsoft 365 subscription, and then migrate all the user data to Microsoft 365. You need to ensure that all the users can continue to use Outlook to receive email messages if a WAN link fails. Solution: You deploy a site-to-site VPN from each branch office to Microsoft Azure. Does this meet the goal?

- A. Yes
- B. NO

**Answer: B**

#### NEW QUESTION 5

- (Exam Topic 5)

You have a DNS zone named contoso.com that contains the following records.

```
@           IN      SOA    dns1.contoso.com. hostmaster.contoso.com. (
                        539          ; serial number
                        900          ; refresh
                        600          ; retry
                        86400         ; expire
                        3600         ) ; default TTL

@           NS      dns1.contoso.com.

@           MX     10    server1.contoso.com.
@           TXT    ( "v=spf1 a include:server1.contoso.com -all" )
Server1     A      193.77.10.15
```

You purchase a Microsoft 365 subscription. You plan to migrate mailboxes to Microsoft Exchange Online. You need to configure Sender Policy Framework (SPF) to support Exchange Online. What should you do?

- A. Add an additional TXT record.
- B. Modify the TXT record.
- C. Modify the expire interval of the SOA record.
- D. Modify the default TTL of the SOA record.

**Answer: B**

#### Explanation:

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/security/office-365-security/set-up-spf-in-office-365-to-help-pre>

#### NEW QUESTION 6

- (Exam Topic 5)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

You may now click next to proceed to the lab. Lab information

Use the following login credentials as needed:

To enter your username, place your cursor in the Sign in box and click on the username below.

To enter your password, place your cursor in the Enter password box and click on the password below.

Microsoft 365 Username: admin@M365x981607.onmicrosoft.com Microsoft 365 Password: \*yfLo7lr2&yIf the Microsoft 365 portal does not load successfully in the browser, press CTRL-K to reload the portal in a new browser tab.

The following information is for technical support purposes only:

Lab Instance: 10811525

Your organization plans to open an office in New York, and then to add 100 users to the office. The city attribute for all new users will be New York.

You need to ensure that all the new users in the New York office are licensed for Microsoft Office 365 automatically.

- A. Mastered
- B. Not Mastered

**Answer: A**

#### Explanation:

You need create a dynamic group based on the city attribute. You then need to assign a license to the group. User accounts with the city attribute set to 'New York' will automatically be added to the group. Anyone who is added to the group will automatically be assigned the license that is assigned to the group.

- \* 1. Go to the Azure Active Directory admin center.
- \* 2. Select Azure Active Directory then select Groups.
- \* 3. Click on the New Group link.
- \* 4. Give the group a name such as New York Users.

- \* 5. Select Users as the membership type.
- \* 6. Select 'Add dynamic query'.
- \* 7. Select 'City' in the Property drop-down box.
- \* 8. Select 'Equals' in the Operator drop-down box.
- \* 9. Enter 'New York' as the Value. You should see the following text in the Expression box: user.city -eq "New York"
- \* 10. Click Save to create the group.
- \* 11. In the Groups list, select the new group to open the properties page for the group.
- \* 12. Select 'Licenses'.
- \* 13. Select the '+ Assignments' link.
- \* 14. Tick the box to select the license.
- \* 15. Click the Save button to save the changes. References:

<https://docs.microsoft.com/en-us/azure/active-directory/users-groups-roles/groups-dynamic-membership> <https://docs.microsoft.com/en-us/azure/active-directory/users-groups-roles/licensing-groups-assign>

#### NEW QUESTION 7

- (Exam Topic 5)

You plan to migrate to SharePoint Online by using the SharePoint Migration Tool. Which list can be migrated to SharePoint Online?

Name	List template
List1	PictureLibrary
List2	Report Library
List3	Agenda
List4	AdminTasks

- A. List1
- B. List2
- C. List3
- D. List4

**Answer: D**

#### NEW QUESTION 8

- (Exam Topic 5)

You have a Microsoft 365 subscription.

You use the Microsoft Office Deployment tool to install Office 365 ProPlus. You create a configuration file that contains the following settings.

```
<Configuration>
  <Add SourcePath="\\Server1\Office"
    OfficeClientEdition="32"
    Channel="Broad"
    AllowCdnFallback="False">
    <Product ID="0365ProPlusRetail">
      <Language ID="en-us" />
      <Language ID="ja-jp" />
    </Product>
    <Product ID="VisioProRetail">
      <Language ID="en-us" />
      <Language ID="ja-jp" />
    </Product>
  </Add>
  <Remove All="TRUE">
    <Product ID="0365ProPlusRetail">
      <Language ID="en-us" />
    </Product>
    <Product ID="VisioProRetail">
      <Language ID="en-us" />
    </Product>
  </Remove>
  <Updates Enabled="TRUE"
    UpdatePath="\\Server1\Office"
    Channel="Broad" />
  <Display Level="None" AcceptEULA="TRUE" />
  <Logging Level="Standard" Path="%temp%" />
</Configuration>
```

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

The [answer choice] will be uninstalled from the computers.

MSI version of Microsoft Visio only
C2R version of Microsoft Visio only
MSI and C2R versions of Microsoft Visio

If the Office share on Server1 is missing the Japanese language pack, Office 365 ProPlus will [answer choice].

be installed in English only
be installed in a randomly selected language
NOT be installed

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1:  
 The C2R (click-to-run) version of Microsoft Visio only will be uninstalled from the computers. To remove the MSI version of Microsoft Visio, you would need to specify the RemoveMSI parameter. The RemoveMSI parameter is not configured in the configuration file in this question. Therefore, only the C2R version will be installed.

Box 2:  
 If the Office share on Server1 is missing the Japanese language pack, Office 365 ProPlus will be installed in English only. In the configuration file, English is the first in the list above Japanese. Therefore, English is the primary language and the installation will continue in English only.

<https://docs.microsoft.com/en-us/deployoffice/configuration-options-for-the-office-2016-deployment-tool>

**NEW QUESTION 9**

- (Exam Topic 5)  
 You have a Microsoft 365 subscription you use Active Directory (Azure AD) tenant named contoso.com. The tenant contains the Windows 10 devices shown in the following table.

Name	Version	Language
Device1	x86	German
Device2	x64	English
Device3	x64	French

All the devices are managed by using Microsoft Endpoint Manager and are members of a group named Group1. From the Microsoft Endpoint Manager admin center, you create an app suite named App1 for Microsoft Office 365 apps. You configure the App1 settings as shown in the exhibit. (Click the Exhibit tab.)

### App Suite Settings □ X

These settings apply to all apps you have selected in the suite.  
[Learn more](#)

**Architecture \***

32-bit  64-bit

**Update channel \***

**Version to install on end user devices. [Learn more](#)**

Latest  Specific

Specific version

**Remove other versions of Office (MSI) from end user devices.**

[Learn more](#)

Yes  No

**Automatically accept the app end user license agreement**

Yes  No

**Use shared computer activation**

Yes  No

**Languages**

German, OS Languages

You assign App1 to Group1.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

Note: Each correct selection is worth one point.

Statements	Yes	No
On Device1, Office 365 ProPlus will be installed and the display language will be German.	<input type="radio"/>	<input type="radio"/>
On Device2, Office 365 ProPlus will be installed and both the German and English display languages will be installed.	<input type="radio"/>	<input type="radio"/>
On Device3, Office 365 ProPlus will be installed and both the German and French display languages will be installed.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: No

Device1 is x86 (32-bit) so Office 365 will not be installed. Box 2: Yes

Device2 is x64 (64-bit) so Office 365 will be installed. The German language pack will be installed and the OS language pack (English) will be installed.

Box 3: Yes

Device2 is x64 (64-bit) so Office 365 will be installed. The German language pack will be installed and the OS language pack (French) will be installed.

The following information is for technical support purposes only:  
Lab Instance: 11098651

You need to prevent users in your organization from receiving an email notification when they save a document that contains credit card numbers. To answer the question, sign in to the Microsoft 365 portal.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

You need to edit the Data Loss Prevention Policy to disable the email notifications.

- \* 1. Go to <https://protection.office.com> or navigate to the Security & Compliance admin center.
- \* 2. In the left navigation pane, expand Data Loss Protection and select Policy.
- \* 3. Select the Data Loss Prevention policy and click the Edit Policy button.
- \* 4. Click Policy Settings in the left navigation pane of the policy.
- \* 5. Select the policy rule and click the Edit Rule button.
- \* 6. Scroll down to the 'User notifications' section.
- \* 7. Toggle the slider labelled "Use Notifications to inform users...." to Off.
- \* 8. Click Save to save the changes to the policy rule.
- \* 9. Click Save to save the changes to the policy.

**NEW QUESTION 10**

- (Exam Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain.

You deploy a Microsoft Azure Active Directory (Azure AD) tenant. Another administrator configures the domain to synchronize to Azure AD.

You discover that 10 user accounts in an organizational unit (OU) are NOT synchronized to Azure AD. All the other user accounts synchronized successfully.

You review Azure AD Connect Health and discover that all the user account synchronizations completed successfully.

You need to ensure that the 10 user accounts are synchronized to Azure AD. Solution: You run idfix.exe and report the 10 user accounts.

Does this meet the goal?

- A. Yes
- B. No

**Answer:** B

**Explanation:**

The question states that "all the user account synchronizations completed successfully". If there were problems with the 10 accounts that needed fixing with idfix.exe, there would have been synchronization errors in Azure AD Connect Health.

It is likely that the 10 user accounts are being excluded from the synchronization cycle by a filtering rule. Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/hybrid/how-to-connect-sync-configure-filtering>

**NEW QUESTION 11**

- (Exam Topic 5)

Your network contains an on premises Active Directory domain named contoso.com. The domain contains five domain controllers.

Your company purchases Microsoft 365 and creates a Microsoft Azure Active Directory (Azure AD) tenant named contoso.onmicrosoft.com.

You plan to establish federation authentication between on premises Active Directory and the Azure AD tenant by using Active Directory Federation Services (AD FS).

You need to establish the federation.

What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point

Action to perform before establishing the federation:

From the Azure portal, add a custom domain name.
From the Azure portal, configure an authentication method.
From a domain controller, install a Pass-through Authentication Agent.
From a domain controller, install Windows Identity Foundation 3.5.

Tool to use to establish the federation:

Active Directory Domains and Trusts
Azure AD Connect
The AD FS console
The Azure portal

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

The on-premises Active Directory domain is named contoso.com. Before you can configure federation authentication between on-premises Active Directory and the Azure AD tenant, you need to add the domain contoso.com to Microsoft 365. You do this by adding a custom domain name.

The next step is to establish the federation. You can configure AD FS by using Azure AD Connect. Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/hybrid/how-to-connect-install-custom#configuring-feder>

**NEW QUESTION 15**

- (Exam Topic 5)

Your network contains an on-premises Active Directory domain. The domain contains 2,000 computers that run Windows 10.

You purchase a Microsoft 365 subscription.

You implement password hash synchronization and Azure Active Directory (Azure AD) Seamless Single Sign-On (Seamless SSO).

You need to ensure that users can use Seamless SSO from the Windows 10 computers. What should you do?

- A. Create a conditional access policy in Azure AD.
- B. Deploy an Azure AD Connect staging server.
- C. Join the computers to Azure AD.
- D. Modify the Intranet zone settings by using Group Policy

**Answer:** D

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/hybrid/how-to-connect-sso-quick-start>

**NEW QUESTION 19**

- (Exam Topic 5)

Your network contains an Active Directory domain. The domain contains a server named Server1 that runs Windows Server 2016. Server1 has a share named Share1. You have a hybrid deployment of Microsoft 365.

You need to migrate the content in Share1 to Microsoft OneDrive. What should you use?

- A. Windows Server Migration Tools
- B. Microsoft SharePoint Migration Tool
- C. Storage Migration Service

**Answer:** B

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/sharepointmigration/migrating-content-to-onedrive-for-business>

**NEW QUESTION 20**

- (Exam Topic 5)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will

be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

You may now click next to proceed to the lab. Lab information

Use the following login credentials as needed:

To enter your username, place your cursor in the Sign in box and click on the username below.

To enter your password, place your cursor in the Enter password box and click on the password below.

Microsoft 365 Username: admin@LODSe426243.onmicrosoft.com Microsoft 365 Password: 3&YWyjse-6-d

If the Microsoft 365 portal does not load successfully in the browser, press CTRL-K to reload the portal in a new browser tab.

The following information is for technical support purposes only:

Lab Instance: 10887751

You plan to create 1,000 users in your Microsoft 365 subscription.

You need to ensure that all the users can use the @contoso.com suffix in their username.

Another administrator will perform the required information to your DNS zone to complete the operation.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

You need to add the contoso.com domain to Microsoft 365 then set the domain as the default.

- \* 1. In the Admin Center, click Setup then click Domains.
- \* 2. Click the 'Add Domain' button.
- \* 3. Type in the domain name (contoso.com) and click the 'Use this domain' button.
- \* 4. The question states that another administrator will perform the required information to your DNS zone. Therefore, you just need to click the 'Verify' button to verify domain ownership.
- \* 5. Click Finish.
- \* 6. In the domains list, select the contoso.com domain.
- \* 7. Select 'Set as default'. References:

<https://docs.microsoft.com/en-us/office365/admin/setup/add-domain?view=o365-worldwide>

**NEW QUESTION 24**

- (Exam Topic 5)

Your network contains an on-premises Active Directory domain. The domain contains the users shown in the following table.

Name	Country	Organizational unit (OU)
User1	United States	OU1
User2	Canada	OU1
User3	United States	OU2

You have a Microsoft 365 subscription that is linked to an Azure Active Directory (Azure AD) tenant named contoso.com. You configure Azure AD Connect to sync the on-premises domain to contoso.com as shown in the following exhibit.

**Answer Area**

Statements	Yes	No
User1 syncs to Azure AD.	<input type="radio"/>	<input type="radio"/>
User2 syncs to Azure AD.	<input type="radio"/>	<input type="radio"/>
User3 syncs to Azure AD.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Answer Area

Statements	Yes	No
User1 syncs to Azure AD.	<input checked="" type="radio"/>	<input type="radio"/>
User2 syncs to Azure AD.	<input checked="" type="radio"/>	<input type="radio"/>
User3 syncs to Azure AD.	<input checked="" type="radio"/>	<input type="radio"/>

**NEW QUESTION 27**

- (Exam Topic 5)

Your company recently purchased a Microsoft 365 subscription.

You enable Microsoft Azure Multi-Factor Authentication (MFA) for all 500 users in the Azure Active Directory (Azure tenant)

You need to generate a report that lists all the users who Azure registration process.

What is the best approach to achieve the goal? More than one answer choice achieve the goal. Select the Best answer.

- A. From Azure Cloud Shell, run the Get-Msoluser cmdlet.
- B. From the Azure Active Directory admin center, use the Risky sign-ins blade.
- C. From the Azure Active Directory admin center, use the Multi-factor Authentication – Server Status blade.
- D. From Azure Cloud Shell, run the Get-AzureADUser cmdlet.

**Answer:** A

**NEW QUESTION 31**

- (Exam Topic 5)

You have a Microsoft 365 E5 subscription and a hybrid deployment of Microsoft Exchange. The deployment contains 100 users who have on-premises mailboxes and 100 users who have mailboxes in Exchange Online.

You enable Microsoft Teams and assign a Microsoft Teams license to each user.

You need to ensure that the users who have on-premises mailboxes can use Microsoft Teams. All Microsoft Teams chat data must be searchable by using Content search in the Security and Compliance admin center.

What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

License to assign to the users who have on-premises mailboxes:

Data Investigations

Exchange Online

Microsoft Communications Compliance

Task to perform to enable Content search for the on-premises mailboxes:

Add an email alias

Create a supervision policy

Enable a Unified Messaging (UM) IP gateway

Submit a request to Microsoft Support

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

License to assign to the users who have on-premises mailboxes:

Data Investigations

Exchange Online

Microsoft Communications Compliance

Task to perform to enable Content search for the on-premises mailboxes:

Add an email alias

Create a supervision policy

Enable a Unified Messaging (UM) IP gateway

Submit a request to Microsoft Support

**NEW QUESTION 32**

- (Exam Topic 5)

You have a Microsoft Teams app that contains a conversational bot. The bot uses task modules to reply to users. When the bot receives a new message, the following code is executed before a response is sent back to the user to decide whether the bot should continue the conversation.

```

80 | case "task/submit": {
81 |     if (invokeValue.data !== undefined) {
82 |         switch (invokeValue.data.taskResponse) {
83 |             case "message":
84 |                 session.send("***task/submit results from the Adaptive card:**\n***" + JSON.stringify(invokeValue) + "****");
85 |                 break;
86 |             case "continue":
87 |                 let fetchResponse = fetchTemplates.submitResponse;
88 |                 fetchResponse.task.value.card = renderACAttachment(cardTemplates.acSubmitResponse, { results: JSON.stringify(invokeValue.data) });
89 |                 cb(null, fetchResponse, 200);
90 |                 break;

```

Answer Area

If invokeValue.data.taskResponse equals "message", the user will [answer choice]

- stop interacting with the bot.
- continue interacting with the bot.
- receive a webpage pop-up window.
- receive a final message from the bot.

These are the selections for the statement if invokeValue.data.taskResponse equals "message" the user will [answer choice]

If invokeValue.data.taskResponse equals "final", the user will [answer choice]

- stop interacting with the bot.
- continue interacting with the bot.
- receive a webpage pop-up window.
- receive a final message from the bot.

These are the selections for the statement if invokeValue.data.taskResponse equals "final" the user will [answer choice]

- A. Mastered
- B. Not Mastered

Answer: A

**Explanation:**

Reference:

<https://github.com/OfficeDev/microsoft-teams-sample-task-module-nodejs>

**NEW QUESTION 37**

- (Exam Topic 5)

You have three devices enrolled in Microsoft Intune as shown in the following table.

Name	Platform	BitLocker Drive Encryption (BitLocker)	Member of
Device1	Windows 10	Disabled	Group3
Device2	Windows 10	Disabled	Group2, Group3
Device3	Windows 10	Disabled	Group2

The device compliance policies in Intune are configured as shown in the following table.

Name	Platform	Require BitLocker	Assigned
Policy1	Windows 10 and later	Require	Yes
Policy2	Windows 10 and later	Not configured	Yes
Policy3	Windows 10 and later	Require	No

The device compliance policies have the assignment shown in the following table.

Name	Assigned to
Policy1	Group3
Policy2	Group2

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
Device1 is compliant.	<input type="radio"/>	<input type="radio"/>
Device2 is compliant.	<input type="radio"/>	<input type="radio"/>
Device3 is compliant.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Device 1:

No because Device1 is in group3 which has Policy1 assigned which requires BitLocker. Device 2:

No because Device2 is in group3 which has Policy1 assigned which requires BitLocker. Device2 is also in Group2 which has Policy2 assigned but the BitLocker requirement is not configured in Policy2.

Device3:

Yes because Device3 is in Group2 which has Policy2 assigned but the BitLocker requirement is not configured in Policy2.

Reference:

<https://blogs.technet.microsoft.com/cbernier/2017/07/11/windows-10-intune-windows-bitlocker-management-ye>

**NEW QUESTION 39**

- (Exam Topic 5)

Your company has a Microsoft 365 subscription that contains the following domains: Contoso.onmicrosoft.com

Contoso.com

You plan to add the following domains to Microsoft 365 and to use them with Exchange Online:

- > Sub1.contoso.onmicrosoft.com
- > Sub2.contoso.com
- > Fabrikam.com

You need to identify the minimum number of DNS records that must be added for Exchange Online to receive inbound email messages for the three domains.

How many DNS records should you add? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

MX records:

<input type="checkbox"/>	0
<input checked="" type="checkbox"/>	1
<input type="checkbox"/>	2
<input type="checkbox"/>	3

CNAME records:

<input type="checkbox"/>	0
<input checked="" type="checkbox"/>	1
<input type="checkbox"/>	2
<input type="checkbox"/>	3

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: 2

You don't need to verify Sub1.contoso.onmicrosoft.com because the onmicrosoft.com domain and DNS is managed by Microsoft. You also don't need to configure an MX record for Sub1.contoso.onmicrosoft.com because that will be done by Microsoft.

For sub2.contoso.com, you don't need to verify the domain because you have already verified its parent domain contoso.com. However, you do need an MX record to direct email for that domain to Exchange Online.

For Fabrikam.com, you will need to verify the domain. You will need an MX record to direct email for that domain to Exchange Online.

Box 2: 0

You 'should' create CNAME records for autodiscover to point your email clients to Exchange Online to connect to the mailboxes. However, you don't have to. You could configure the email client manually. Therefore, the minimum number of CNAME records required is zero.

**NEW QUESTION 41**

- (Exam Topic 5)

You have a Microsoft 365 subscription.

Your company deploys an Active Directory Federation Services (AD FS) solution. You need to configure the environment to audit AD FS user authentication. Which two actions should you perform? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. From all the AD FS servers, run audltpol.exe.
- B. From all the domain controllers, run the set-AdminAuditLogConfig cmdlet and specify the -LogiLevel parameter.
- C. On a domain controller install Azure AD Connect Health for AD DS.
- D. From the Azure AO Connect server, run the Register-AzureADConnectHealthSyncAgent cmdlet.
- E. On an server, install Azure AD Connect Health for AD FS.

**Answer:** DE

**Explanation:**

To audit AD FS user authentication, you need to install Azure AD Connect Health for AD FS. The agent should be installed on an AD FS server. After the installation, you need to register the agent by running the Register-AzureADConnectHealthSyncAgent cmdlet.

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/hybrid/how-to-connect-health-agent-install> <https://docs.microsoft.com/en-us/azure/active-directory/hybrid/how-to-connect-health-adfs>

**NEW QUESTION 42**

- (Exam Topic 5)

You have a data loss prevention (DLP) policy.

You need to increase the likelihood that the DLP policy will apply to data that contains medical terms from the International Classification of Diseases (ICD-9-CM). The solution must minimize the number of false positives.

Which two settings should you modify? To answer, select the appropriate settings in the answer area. NOTE: Each correct selection is worth one point.

Content contains \*

Any of these ▾

**PII Identifiers** ✎

Sensitive information type	Instance count		Match accuracy	
	min	max	min	max
U.S. Social Security Number (SSN)	1	any	50	100

Add ▾

and ▾

Any of these ▾

**Medical Terms** ✎

Sensitive information type	Instance count		Match accuracy	
	min	max	min	max
International Classification of Diseases (ICD-9-CM)	1	any	50	100

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

You can tune your rules by adjusting the instance count and match accuracy to make it harder or easier for content to match the rules. Each sensitive information type used in a rule has both an instance count and match accuracy.

To make the rule easier to match, decrease the min count and/or increase the max count. You can also set the max count to any by deleting the numerical value.

To minimize the number of false positives, we need to increase the minimum match accuracy.

A sensitive information type is defined and detected by using a combination of different types of evidence. Commonly, a sensitive information type is defined by multiple such combinations, called patterns. A pattern that requires less evidence has a lower match accuracy (or confidence level), while a pattern that requires more evidence has a higher match accuracy (or confidence level).

Reference:

<https://docs.microsoft.com/en-us/office365/securitycompliance/data-loss-prevention-policies>  
<https://docs.microsoft.com/en-us/office365/securitycompliance/what-the-sensitive-information-types-look-for#i>

**NEW QUESTION 43**

- (Exam Topic 5)

In Microsoft 365, you configure a data loss prevention (DLP) policy named Policy1. Policy1 detects the sharing of United States (US) bank account numbers in email messages and attachments.

Policy1 is configured as shown in the exhibit. (Click the Exhibit tab.)

Use actions to protect content when the conditions are met.

**Restrict access or encrypt the content**

- Block people from sharing and restrict access to shared content
 

By default, users are blocked from sending email messages to people. You can choose who has access to shared SharePoint and OneDrive content.

Block these people from accessing SharePoint and OneDrive content

  - Everyone. Only the content owner, the lastmodifier, and the site admin will continue to have access.
  - Only people outside your organization. People inside your organization will continue to have access.
  - Encrypt email messages (applies only to content to Exchange)

You need to ensure that internal users can email documents that contain US bank account numbers to external users who have an email suffix of contoso.com. What should you configure?

- A. an action
- B. a group
- C. a condition
- D. an exception

**Answer: D**

**Explanation:**

You need to add an exception. In the Advanced Settings of the DLP policy, you can add a rule to configure the Conditions and Actions. There is also an 'Add Exception' button. This gives you several options that you can select as the exception. One of the options is 'except when recipient domain is'. You need to select that option and enter the domain name contoso.com.

Reference:

<https://docs.microsoft.com/en-us/office365/securitycompliance/data-loss-prevention-policies#how-dlp-policies>

**NEW QUESTION 47**

- (Exam Topic 5)

You receive the following JSON document when you use Microsoft Graph to query the current signed-in user.

```
{
  "@odata.context": "https://graph.microsoft.com/v1.0/$metadata#users/$entity",
  "businessPhones": [
    "+1 555 444 222"
  ],
  "displayName": "BenSmith",
  "givenName": "Ben",
  "jobTitle": "Developer",
  "mail": "ben.smith@contoso.com",
  "mobilePhone": "+1 555 444 222",
}
```

**Answer Area**

Statements	Yes	No
If you query a URI of <code>https://graph.microsoft.com/v1.0/me/photo/\$value</code> , you will get the profile picture.	<input type="radio"/>	<input type="radio"/>
If you query a URI of <code>https://graph.microsoft.com/v1.0/users/ben.smith@contoso.com/photo/\$value</code> , you will get the profile picture.	<input type="radio"/>	<input type="radio"/>
If you query a URI of <code>https://graph.microsoft.com/v1.0/users/5fa74bb7-b45b-426d-8ac7-446f890feeb5/photo/\$value</code> , you will get the profile picture.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

Answer Area

Statements	Yes	No
If you query a URI of <code>https://graph.microsoft.com/v1.0/me/photo/\$value</code> , you will get the profile picture.	<input checked="" type="radio"/>	<input type="radio"/>
If you query a URI of <code>https://graph.microsoft.com/v1.0/users/ben.smith@contoso.com/photo/\$value</code> , you will get the profile picture.	<input checked="" type="radio"/>	<input type="radio"/>
If you query a URI of <code>https://graph.microsoft.com/v1.0/users/5fa74bb7-b45b-426d-8ac7-446f090feeb5/photo/\$value</code> , you will get the profile picture.	<input checked="" type="radio"/>	<input type="radio"/>

**NEW QUESTION 49**

- (Exam Topic 5)

Your network contains an Active Directory domain and a Microsoft Azure Active Directory (Azure AD) tenant.

The network uses a firewall that contains a list of allowed outbound domains. You began to implement directory synchronization.

You discover that the firewall configuration contains only the following domain names in the list of allowed domains:

- \*.microsof.com
- \*.office.com

Directory synchronization fails.

You need to ensure that directory synchronization completes successfully.

What is the best approach to achieve the goal? More than one answer choice may achieve the goal. Select the BEST answer.

- A. From the firewall, allow the IP address range of the Azure data center for outbound communication.
- B. From Azure AD Connect, modify the Customize synchronization options task.
- C. Deploy an Azure AD Connect sync server in staging mode.
- D. From the firewall, create a list of allowed inbound domains.
- E. From the firewall, modify the list of allowed outbound domains.

**Answer: E**

**Explanation:**

Azure AD Connect needs to be able to connect to various Microsoft domains such as `login.microsoftonline.com`. Therefore, you need to modify the list of allowed outbound domains on the firewall.

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/hybrid/reference-connect-ports>

**NEW QUESTION 54**

- (Exam Topic 5)

You are developing a single-page application (SPA) that authenticates users by using MSAL.js. The SPA must meet the following requirements:

- Only allow access to the users in an organization named `contoso.onmicrosoft.com`.
- Support single sign-on (SSO) across tabs and user sessions.

How should you complete the code for the SPA? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

```
const config = {
  auth: {
    clientId: "c10639eb-16ca-452b-a94d-ad8c43682819",
    authority: [
      "https://login.microsoftonline.com/consumers/",
      "https://login.microsoftonline.com/organizations/",
      "https://login.microsoftonline.com/contoso.onmicrosoft.com",
    ],
    cacheLocation: "localStorage"
  }
}

const myMSALObj = new UserAgentApplication(config);
```

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

Answer Area

```
const config = {
  auth: {
    clientId: "c10639eb-16ca-452b-a94d-ad8c43682819",
    authority: "https://login.microsoftonline.com/consumers/",
    cacheLocation: "https://login.microsoftonline.com/organizations/",
    // https://login.microsoftonline.com/contoso.onmicrosoft.com
  }
}

const myMSALObj = new UserAgentApplication(config);
```

**NEW QUESTION 58**

- (Exam Topic 5)

Your company has a sales system that emails an alert to all the members of the sales department when a new sale is made. You need to ensure that a notification is posted to a team channel when a new sale is made. The solution must minimize development effort. Which two actions should you perform? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. Post XML to the webhook URL from the existing sales system.
- B. Set the configurationUrl property of a connector in the manifest
- C. Get an incoming webhook for the channel
- D. Post JSON to the webhook URL from the existing sales system.

**Answer:** AC

**NEW QUESTION 63**

- (Exam Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has a Microsoft Office 365 tenant.

You suspect that several Office 365 features were recently updated.

You need to view a list of the features that were recently updated in the tenant. Solution: You review the Windows release health in the Microsoft 365 admin center. Does this meet the goal?

- A. Yes
- B. No

**Answer:** A

**Explanation:**

Reference:

<https://techcommunity.microsoft.com/t5/windows-it-pro-blog/windows-release-health-now-available-in-the-adm>

**NEW QUESTION 68**

- (Exam Topic 5)

Your company has a Microsoft 365 E5 subscription. Users in the research department work with sensitive data.

You need to prevent the research department users from accessing potentially unsafe websites by using hyperlinks embedded in email messages and documents.

Users in other departments must not be restricted. What should you do from the Security & Compliance admin center?

- A. Create a data loss prevention (DLP) policy that has a Content contains condition.
- B. Create a data loss prevention (DLP) policy that has a Content is shared condition.
- C. Modify the default safe links policy.
- D. Create a new safe links policy.

**Answer:** D

**Explanation:**

ATP Safe Links, a feature of Office 365 Advanced Threat Protection (ATP), can help protect your organization from malicious links used in phishing and other attacks. If you have the necessary permissions for the Office 365 Security & Compliance Center, you can set up ATP Safe Links policies to help ensure that when people click web addresses (URLs), your organization is protected. Your ATP Safe Links policies can be configured to scan URLs in email and URLs in Office documents.

Reference:

<https://docs.microsoft.com/en-us/office365/securitycompliance/set-up-atp-safe-links-policies#policies-that-apply>

**NEW QUESTION 71**

- (Exam Topic 5)

Your company uses Gmail as a corporate email solution.

You purchase a Microsoft 365 subscription and plan to move all email data to Microsoft Exchange Online.

You plan to perform the migration by using the Exchange admin center.

You need to recommend which type of migration to use and which type of data to migrate. What should you recommend? To answer, select the appropriate

options in the answer area. NOTE: Each correct selection is worth one point.

Migration type to use:

▼
Cutover migration
Staged migration
Remote move migration
IMAP migration

Data to include in the migration:

▼
Email only
Email and calendar only
Email, calendar and contacts only
Email, calendar, contacts, and tasks

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

You'll need to use the IMAP migration method. You can use the setup wizard in the Microsoft 365 admin center for an IMAP migration to migrate mailboxes from Gmail to Microsoft 365.

IMAP migration will only migrate emails, not calendar and contact information. Users can import their own email, contacts, and other mailbox information to Office 365 after the mailboxes have been migrated.

Reference:

<https://docs.microsoft.com/en-us/exchange/mailbox-migration/migrating-imap-mailboxes/migrate-g-suite-mailb>

**NEW QUESTION 76**

- (Exam Topic 5)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

You may now click next to proceed to the lab. Lab information

Use the following login credentials as needed:

To enter your username, place your cursor in the Sign in box and click on the username below.

To enter your password, place your cursor in the Enter password box and click on the password below.

Microsoft 365 Username: admin@LODSe878763.onmicrosoft.com

Microsoft 365 Password: m3t^We\$Z7&xy

If the Microsoft 365 portal does not load successfully in the browser, press CTRL-K to reload the portal in a new browser tab.

You need to create a policy that allows a user named Lee Gu to use Outlook Web App to review 50 percent of the outbound email messages sent by a user named Joni Sherman.

To answer, sign in to the Microsoft 365 portal.

- A. Mastered

B. Not Mastered

**Answer:** A

**Explanation:**

You need to configure a Supervision Policy.

- \* 1. Go to <https://protection.office.com> or navigate to the Security & Compliance admin center.
- \* 2. In the left navigation pane, select Supervision.
- \* 3. Click the '+Create' button to create a new supervision policy.
- \* 4. Give the policy a name such as 'Joni Sherman' and click Next.
- \* 5. In the 'Supervised users' section, click '+Add users or groups'.
- \* 6. Select Joni Sherman from the users list and click the Add button.
- \* 7. Deselect the 'Teams chats' and 'Skype for Business Conversations' checkboxes leaving only the 'Exchange Email' checkbox ticked and click Next.
- \* 8. Under 'Direction is', deselect Inbound leaving only Outbound selected and click Next.
- \* 9. In the 'Percentage to review' section, enter 50 and click Next.
- \* 10. In the 'Reviewers' section, start typing Lee Gu then select his account when it appears.
- \* 11. Click Next.
- \* 12. On the 'Review your settings' page, check the settings are correct the click the Finish button to create the policy.

**NEW QUESTION 79**

- (Exam Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has a Microsoft Office 365 tenant.

You suspect that several Office 365 features were recently updated.

You need to view a list of the features that were recently updated in the tenant. Solution: You use the View service requests option in the Microsoft 365 admin center. Does this meet the goal?

- A. Yes
- B. NO

**Answer:** B

**Explanation:**

A service request is a support ticket. Therefore, the View service requests option in the Microsoft 365 admin center displays a list of support tickets. It does not display a list of the features that were recently updated in the tenant so this solution does not meet the goal.

To meet the goal, you need to use Message center in the Microsoft 365 admin center.

Reference:

<https://docs.microsoft.com/en-us/office365/admin/manage/message-center?view=o365-worldwide>

**NEW QUESTION 80**

- (Exam Topic 5)

You plan to deploy Microsoft Teams to 2,500 users.

You need to estimate the internet bandwidth required for the deployment. What should you use?

- A. Advisor for Teams
- B. Network planner
- C. Skype for Business Server Remote Connectivity Test
- D. Microsoft Remote Connectivity Analyzer

**Answer:** B

**Explanation:**

From: <https://docs.microsoft.com/en-us/microsoftteams/network-planner>

Network Planner is a new tool that is available in the Teams admin center. It can be found by going to Planning > Network planner. In just a few steps, the Network Planner can help you determine and organize network requirements for connecting Microsoft Teams users across your organization. When you provide your network details and Teams usage, the Network Planner calculates your network requirements for deploying Teams and cloud voice across your organization's physical locations.

**NEW QUESTION 84**

- (Exam Topic 5)

Your company is based in the United Kingdom (UK).

Users frequently handle data that contains Personally Identifiable Information (PII).

You create a data loss prevention (DLP) policy that applies to users inside and outside the company. The policy is configured as shown in the following exhibit.

**Review your settings**

**Template name** U.K. Personally Identifiable Information (PII) Data Edit

**Policy name** U.K. Personally Identifiable Information (PII) Data Edit

**Applies to content in these locations** Edit  
 Exchange email  
 SharePoint sites  
 OneDrive accounts

**Policy settings** Edit  
 In the content contains these types of sensitive info: U.K. National Insurance Number (NINO), U.S. / U.K. Passport Number then notify people with a policy tip and email message.  
 If there are at least 10 instances of the same type of sensitive info, block access to the content and send an incident report with a high severity level but allow people to override.

**Turn policy on after it's created?** Edit  
 Yes

Back Create Cancel

Use the drop-down menus to select the answer choice that completes each statement based in the information presented in the information presented in the graphic.

NOTE: Each correct selection is worth one point.

If a user attempts to upload a document to a Microsoft SharePoint site, and the document contains one UK passport number, the document will be [answer choice].

▼
allowed
blocked without warning
blocked, but the user can override the policy

If a user attempts to email 100 UK passport numbers to a user in the same company, the email message will be [answer choice].

▼
allowed
blocked without warning
blocked, but the user can override the policy

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

The text in the Policy Settings section of the exhibit explains what will happen.

If a user sends between 1 and 10 instances of the sensitive info (passport number), then a notification email and will be sent to the user and a policy tip will be displayed. The email will not be blocked though. Therefore, it will be allowed.

If a user sends more than 10 instances of the sensitive info (passport number), the email will be blocked and a high-severity alert generated. However, the user can override the block.

Reference:

<https://docs.microsoft.com/en-us/office365/securitycompliance/data-loss-prevention-policies>

**NEW QUESTION 87**

- (Exam Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft 365 subscription.

You need to prevent users from accessing your Microsoft SharePoint Online sites unless the users are connected to your on-premises network.

Solution: From the Azure Active Directory admin center, you create a trusted location and a conditional access policy.

Does this meet the goal?

- A. Yes
- B. No

**Answer:** A

**Explanation:**

Conditional Access in SharePoint Online can be configured to use an IP Address white list to allow access. References:

<https://docs.microsoft.com/en-us/azure/active-directory/conditional-access/location-condition> <https://techcommunity.microsoft.com/t5/Microsoft-SharePoint-Blog/Conditional-Access-in-SharePoint-Onlinea>

**NEW QUESTION 90**

- (Exam Topic 5)

Your company has a Microsoft 365 tenant named litwareinc.com.

The Guest access settings in Microsoft Teams are configured as shown in the following exhibit.

**Guest access**

Guest access in Teams lets people outside your organization access teams and channels. When you turn on Guest Access, you can turn on or off features guest users can or can't use. Make sure to follow the steps in this [checklist](#) to set up the prerequisites and so Team owners can add guest users to their teams. [Learn more](#)

Allow guest access in Teams  On

**Calling**

Manage calling specific controls for guest users.

Make private calls  On

**Meeting**

Turn on or turn off settings for guests in meetings.

Allow IP video  On

Screen sharing mode

Allow Meet Now  On

The External access settings in Microsoft Teams are configured as shown in the following exhibit.

**External access**

External access lets your Teams and Skype for Business users communicate with other users that are outside of your organization. By default, your organization can communicate with all external domains. If you add blocked domains, all other domains will be allowed but if you add allowed domains, all other domains will be blocked. [Learn more](#)

Users can communicate with other Skype for Business and Teams users  Off

Users can communicate with Skype users  Off

[+ Add a domain](#)

✓	Name	Status
	contoso.com	Allowed

The company has a third-party supplier named adventureworks.com. Users in litwareinc.com collaborate with the following users by using Microsoft Teams:

- > User1@contoso.com
- > User2@adventureworks.com

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
User2@adventureworks.com can share files by using a Microsoft Teams channel of litwareinc.com.	<input type="radio"/>	<input type="radio"/>
User1@contoso.com can use Meet now in Microsoft Teams.	<input type="radio"/>	<input type="radio"/>
Litwareinc.com users can block user1@contoso.com in Microsoft Teams.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Graphical user interface, text, application Description automatically generated

The answer to this question depends on whether User1 and User2 have been added as guests. The question does not say that they are guests so we would have to assume they're not.

External Access is turned off. Even with the Contoso.com domain added as an allowed domain, the Off settings override this. If the external access settings were 'On', they would be on for only the Contoso.com domain.

Box 1: No

If External Access was On, the answer to this would still be No. If User2 was a guest, the answer to this would be Yes.

Box 2: No

If External Access was On, the answer to this would still be No. External Access does not enable Meet Now for the external user. If User1 was a guest, the answer to this would be Yes.

Box 3: No

If External Access was On, the answer to this would still be No. External Access does not allow blocking. If User1 was a guest, the answer to this would be Yes.

<https://docs.microsoft.com/en-us/microsoftteams/set-up-guests>

<https://docs.microsoft.com/en-us/microsoftteams/communicate-with-users-from-other-organizations>

**NEW QUESTION 93**

- (Exam Topic 5)

You manage multiple devices by using Microsoft Endpoint Manager. The devices run on the following operating systems:

- > Android 8.0, Android 8.1.0, and Android 9
- > iOS 12 and iOS 13
- > MacOS 10.14
- > Windows 10

You need to deploy Microsoft 365 apps to the devices.

From the Microsoft Endpoint Manager admin center, what is the minimum number of apps you should create?

- A. 1
- B. 3
- C. 4
- D. 7

**Answer:** C

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/mem/intune/apps/apps-add>

**NEW QUESTION 95**

- (Exam Topic 5)

You create a Microsoft 365 subscription.

You plan to deploy Microsoft Office 365 ProPlus applications to all the client computers at your company. You prepare the following XML file for the planned deployment.

```
<Configuration>
  <Add OfficeClientEdition="32"
    Channel="Broad">
    <Product ID="0365ProPlusRetail">
      <Language ID="en-us" />
    </Product>
  </Add>
  <Updates Enabled="TRUE"
    UpdatePath=""
    Channel="Targeted" />
  <Display Level="None"
    AcceptEULA="TRUE" />
</Configuration>
```

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.  
 NOTE: Each correct selection is worth one point.

Office 365 ProPlus feature updates will be installed [answer choice].

▼
once a month
once every six months
once a year

Office 365 ProPlus security updates will be installed [answer choice].

▼
once a month
every six months in January and July
every six months in March and September

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

References:

<https://docs.microsoft.com/en-us/deployoffice/configuration-options-for-the-office-2016-deployment-tool#update> <https://docs.microsoft.com/en-us/deployoffice/overview-of-update-channels-for-office-365-proplus>

**NEW QUESTION 96**

- (Exam Topic 5)

You have a Microsoft 365 subscription that contains several Microsoft SharePoint Online sites. You discover that users from your company can invite external users to access files on the SharePoint sites. You need to ensure that the company users can invite only authenticated guest users to the sites. What should you do?

- A. From the Microsoft 365 admin center, configure a partner relationship.
- B. From SharePoint Online Management Shell, run the set-SPOSite cmdlet.
- C. From the Azure Active Directory admin center, configure a conditional access policy.
- D. From the SharePoint admin center, configure the sharing settings.

**Answer:** D

**Explanation:**

You need to set the Sharing settings to 'Existing Guests'. This setting allows sharing only with guests who are already in your directory. These guests may exist in your directory because they previously accepted sharing invitations or because they were manually added.

Reference:

<https://docs.microsoft.com/en-us/sharepoint/turn-external-sharing-on-or-off>

**NEW QUESTION 100**

- (Exam Topic 5)

You have a Microsoft 365 E5 subscription that contains a group named Group 1.

You need to ensure that all the members of Group1 are notified when Microsoft 365 outages occur. The solution must minimize administrative effort. What should you do?

- A. From the Microsoft 365 admin center, configure a Service health email notification
- B. From the Exchange admin center, create an alert policy and configure an email notification.
- C. From the Microsoft 365 admin center, configure a Message center email notification.
- D. From the Microsoft 365 Defender portal create an alert policy and configure an email notification.

**Answer:** C

**NEW QUESTION 101**

- (Exam Topic 5)

You have a Microsoft 365 subscription and a hybrid Microsoft Exchange Online deployment.

You plan to deploy iOS devices that will use Outlook for iOS and Hybrid Modem Authentication (HMA). You need to ensure that HMA is configured correctly.

What should you use?

- A. Microsoft Diagnostics and Recovery Toolset (DaRT)
- B. Microsoft Remote Connectivity Analyzer
- C. Microsoft Support and Recovery Assistant
- D. Apple Configurator

**Answer:** D

#### NEW QUESTION 103

- (Exam Topic 5)

You have a Microsoft 365 tenant that contains Microsoft Exchange Online.

You plan to enable calendar sharing with a partner organization named adatum.com. The partner organization also has a Microsoft 365 tenant.

You need to ensure that the calendar of every user is available to the users in adatum.com immediately. What should you do?

- A. From the Exchange admin center, create a sharing policy.
- B. From the Exchange admin center, create a new organization relationship
- C. From the Microsoft 365 admin center, modify the Organization profile settings.
- D. From the Microsoft 365 admin center, configure external site sharing.

**Answer:** B

#### Explanation:

You need to set up an organization relationship to share calendar information with an external business partner. Office 365 admins can set up an organization relationship with another Office 365 organization or with an Exchange on-premises organization.

Reference:

<https://docs.microsoft.com/en-us/exchange/sharing/organization-relationships/create-an-organization-relationships>

#### NEW QUESTION 107

- (Exam Topic 5)

You have a Microsoft 365 subscription that contains an Azure Active Directory (Azure AD) tenant named contoso.com.

Corporate policy states that user passwords must not include the word Contoso. What should you do to implement the corporate policy?

- A. From the Azure Active Directory admin center, configure the Password protection settings.
- B. From the Microsoft 365 admin center, configure the Password policy settings.
- C. From Azure AD Identity Protection, configure a sign-in risk policy.
- D. From the Azure Active Directory admin center, create a conditional access policy.

**Answer:** A

#### Explanation:

The Password protection settings allows you to specify a banned password list of phrases that users cannot use as part of their passwords.

References:

<https://docs.microsoft.com/en-us/azure/active-directory/authentication/howto-password-ban-bad-on-premises> <https://docs.microsoft.com/en-us/azure/active-directory/authentication/howto-password-ban-bad-configure> <https://docs.microsoft.com/en-us/azure/active-directory/authentication/concept-password-ban-bad#custombanne>

#### NEW QUESTION 109

- (Exam Topic 5)

Your company has a Microsoft Azure Active Directory (Azure AD) directory tenant named contoso.onmicrosoft.com.

All users have client computers that run Windows 10 Pro and are joined to Azure AD. The company purchases a Microsoft 365 E3 subscription.

You need to upgrade all the computers to Windows 10 Enterprise. The solution must minimize administrative effort.

You assign licenses from the Microsoft 365 admin center. What should you do next?

- A. Add a custom domain name to the subscription.
- B. Deploy Windows 10 Enterprise by using Windows Autopilot.
- C. Create provisioning package, and then deploy the package to all the computers.
- D. Instruct all the users to log off of their computer, and then to log in again.

**Answer:** B

#### Explanation:

With Windows Autopilot the user can set up pre-configure devices without the need consult their IT administrator.

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/windows-10-deployment-scenarios> <https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/windows-autopilot>

#### NEW QUESTION 112

- (Exam Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft 365 subscription.

You discover that some external users accessed content on a Microsoft SharePoint site. You modify the SharePoint sharing policy to prevent sharing outside your organization.

You need to be notified if the SharePoint policy is modified in the future. Solution: From the SharePoint admin center, you modify the sharing settings. Does this meet the goal?

- A. Yes

B. No

**Answer:** B

**Explanation:**

You need to create a threat management policy in the Security & Compliance admin center.

**NEW QUESTION 116**

- (Exam Topic 5)

You are developing a single-page application (SPA) named App1 that will be used by the public. Many users of App1 restrict pop-up windows from opening in their browser.

You need to authenticate the users by using the Microsoft identity platform. The solution must meet the following requirements:

- Ensure that App1 can read the profile of a user.
- Minimize user interaction during authentication.
- Prevent App1 from requiring admin consent for any permissions.

How should you complete the code? To answer, select the appropriate options in the answer area.

**Answer Area**

```

function authCallback(error, response) {
}

userAgentApplication.handleRedirectCallback(authCallback);

const accessTokenRequest: AuthenticationParameters = {
    scopes: ["user.read"]
}

use

scopes: ["user.read.all"]
scopes: ["people.read"]
scopes: ["people.read.all"]

}

let accessToken = acc

}).catch(function (error)

(acccessTokenRequest).then(function(accessTokenResponse) {

userAgentApplication.

(acccessTokenRequest);

});
    
```

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Answer Area

```

function authCallback(error, response) {
}

userAgentApplication.handleRedirectCallback(authCallback);

const accessTokenRequest: AuthenticationParameters = {
  scopes: ["user.read"]
};

use {
  scopes: ["user.read.all"]
};

scopes: ["people.read"]
scopes: ["people.read.all"]
}

let accessToken = acc
}).catch(function (error) {
  acquireTokenRedirect
  acquireTokenSilent
  acquireTokenPopup
});

userAgentApplication.
  (accessTokenRequest);
  acquireTokenRedirect
  acquireTokenSilent
  acquireTokenPopup
});

```

**NEW QUESTION 119**

- (Exam Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an on-premises Active Directory forest named contoso.com. The forest contains the following domains:

- > Contoso.com
- > East.contoso.com

An Azure AD Connect server is deployed to contoso.com. Azure AD Connect syncs to an Azure Active Directory (Azure AD) tenant.

You deploy a new domain named west.contoso.com to the forest.

You need to ensure that west.contoso.com syncs to the Azure AD tenant.

Solution: You install a new Azure AD Connect server in west.contoso.com and set AD Connect to staging mode.

Does this meet the goal?

- A. Yes
- B. No

**Answer: B**

**NEW QUESTION 120**

- (Exam Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has a Microsoft Office 365 tenant.

You suspect that several Office 365 features were recently updated.

You need to view a list of the features that were recently updated in the tenant. Solution: You use Dashboard in Security & Compliance.

Does this meet the goal?

- A. Yes
- B. NO

**Answer: B**

**Explanation:**

Depending on what your organization's Office 365 subscription includes, the Dashboard in Security & Compliance includes several widgets, such as Threat Management Summary, Threat Protection Status, Global Weekly Threat Detections, Malware, etc. It does not display a list of the features that were recently updated in the tenant so this solution does not meet the goal.

To meet the goal, you need to use Message center in the Microsoft 365 admin center.

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/security/office-365-security/security-dashboard> <https://docs.microsoft.com/en-us/office365/admin/manage/message-center?view=o365-worldwide>

**NEW QUESTION 125**

- (Exam Topic 5)

Your Network contains an on-premises Active Directory domain named contoso.local. The domain contains five domain controllers.

Your company purchases Microsoft 365 and creates a Microsoft Active Directory (Azure AD) tenant named .contoso.onmicrosoft.com.

You plan to implement pass-through authentication.

You need to prepare the environment for the planned implementation of pass-through authentication. Which three actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Modify the email address attribute for each user account.
- B. From the Azure portal, add a custom domain name.
- C. From Active Directory Domains and Trusts, add a UPN suffix.
- D. Modify the User logon name for each user account.
- E. From the Azure portal, configure an authentication method.
- F. From a domain controller, install an authentication Agent.

**Answer:** BCF

**Explanation:**

To implement pass-through authentication, you need to install and configure Azure AD Connect.

The on-premise Active Directory domain is named contoso.local. Before you can configure Azure AD Connect, you need to purchase a routable domain, for example, contoso.com.

You then need to add the domain contoso.com to Microsoft as a custom domain name.

The user accounts in the Active Directory domain need to be configured to use the domain name contoso.com as a UPN suffix. You need to add contoso.com to the Active Directory first by using Active Directory Domains and Trusts to add contoso.com add a UPN suffix. You can then configure each account to use the new UPN suffix.

An Authentication Agent is required on a domain controller to perform the authentication when pass-through authentication is used. When the custom domain and user accounts are configured, you can install and configure Azure AD Connect. An Authentication Agent is installed when you select the pass-through authentication option in the Azure AD Connect configuration or you can install the Authentication Agent manually.

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/hybrid/how-to-connect-pta-quick-start>

**NEW QUESTION 130**

- (Exam Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has a Microsoft Office 365 tenant.

You suspect that several Office 365 features were recently updated.

You need to view a list of the features that were recently updated in the tenant. Solution: You use the Service health option in the Microsoft 365 admin center.

Does this meet the goal?

- A. Yes
- B. No

**Answer:** B

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/enterprise/view-service-health?view=o365-worldwide>

**NEW QUESTION 135**

- (Exam Topic 5)

You have a hybrid deployment of Microsoft 365 and an Azure Active Directory (Azure AD) tenant. The tenant contains the users shown in the following table.

Name	Type	Source
User1	Member	Azure AD
User2	Member	Windows Server Active Directory
User3	Guest	Microsoft account

Password protection in Azure AD is configured as shown in the following exhibit.

### Custom smart lockout

Lockout threshold ⓘ  ✓

Lockout duration in seconds ⓘ  ✓

### Custom banned passwords

Enforce custom list ⓘ  Yes  No

Custom banned password list ⓘ  ✓

### Password protection for Windows Server Active Directory

Enable password protection on Windows Server Active Directory ⓘ  Yes  No

Mode ⓘ  Enforced  Audit

Which users will be prevented from using the word "Contoso" as part of their password?

- A. User1 only
- B. User1 and User2 only
- C. User1 and User3 only
- D. User1, User2, and User3

**Answer:** D

**Explanation:**

Reference:  
<https://docs.microsoft.com/en-us/azure/active-directory/authentication/concept-password-ban-bad>

**NEW QUESTION 137**

- (Exam Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen. Your network contains an on-premises Active Directory domain named contoso.com. The domain contains the users shown in the following table.

Name	UPN suffix
User1	Contoso.com
User2	Fabrikam.com

The domain syncs to an Azure Active Directory (Azure AD) tenant named contoso.com as shown in the exhibit. (Click the Exhibit tab.)

## PROVISION FROM ACTIVE DIRECTORY

### Azure AD Connect cloud provisioning

This feature allows you to manage provisioning from the cloud.

[Manage provisioning \(Preview\)](#)

### Azure AD Connect sync

Sync Status	Enabled
Last Sync	Less than 1 hour ago
Password Hash Sync	Enabled

## USER SIGN-IN

Federation	Disabled	0 domains
Seamless single sign-on	Enabled	1 domain
Pass-through authentication	Enabled	2 agents

User2 fails to authenticate to Azure AD when signing in as user2@fabrikam.com. You need to ensure that User2 can access the resources in Azure AD. Solution: From the on-premises Active Directory domain, you set the UPN suffix for User2 to @contoso.com. You instruct User2 to sign in as user2@contoso.com. Does this meet the goal?

- A. Yes
- B. No

**Answer:** A

#### Explanation:

The on-premises Active Directory domain is named contoso.com. You can enable users to sign on using a different UPN (different domain), by adding the domain to Microsoft 365 as a custom domain. Alternatively, you can configure the user account to use the existing domain (contoso.com).

### NEW QUESTION 140

- (Exam Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain.

You deploy a Microsoft Azure Active Directory (Azure AD) tenant. Another administrator configures the domain to synchronize to Azure AD.

You discover that 10 user accounts in an organizational unit (OU) are NOT synchronized to Azure AD. All the other user accounts synchronized successfully.

You review Azure AD Connect Health and discover that all the user account synchronizations completed successfully.

You need to ensure that the 10 user accounts are synchronized to Azure AD. Solution: From Azure AD Connect, you modify the filtering settings.

Does this meet the goal?

- A. Yes
- B. No

**Answer:** A

#### Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/hybrid/how-to-connect-sync-configure-filtering>

### NEW QUESTION 145

- (Exam Topic 5)

Your on-premises network contains five file servers. The file servers host shares that contain user data. You plan to migrate the user data to a Microsoft 365 subscription.

You need to recommend a solution to import the user data into Microsoft OneDrive. What should you include in the recommendation?

- A. Configure the Migrate of the OneDrive client on your Windows 10 device
- B. Configure the Sync settings in the OneDrive admin center.
- C. Run the SharePoint Hybrid Configuration Wizard.
- D. Run the SharePoint Migration Tool.

**Answer:** D

#### Explanation:

The SharePoint Migration Tool lets you migrate content to SharePoint Online and OneDrive from the following locations:

- > SharePoint Server 2013
- > SharePoint Server 2010
- > Network and local file shares Reference:  
<https://docs.microsoft.com/en-us/sharepointmigration/introducing-the-sharepoint-migration-tool>

**NEW QUESTION 146**

- (Exam Topic 5)

You have a Microsoft Power Platform production environment that contains a custom model-driven Microsoft Power Apps app. How many days will system backups be retained for the environment?

- A. 7
- B. 14
- C. 28
- D. 90

**Answer: C**

**Explanation:**

All your environments, except Trial environments (standard and subscription-based), are backed up. System backups for production environments that have been created with a database and have one or more Dynamics 365 applications installed are retained up to 28 days. System backups for production environments which do not have Dynamics 365 applications deployed in them will be retained for 7 days. System backups for sandbox environments will be retained for 7 days.

Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/backup-restore-environments>

**NEW QUESTION 147**

- (Exam Topic 5)

Your company has a Microsoft Azure Active Directory (Azure AD) tenant named contoso.com that includes the users shown in the following table.

Name	Usage location	Membership
User1	United States	Group1, Group2
User2	<i>Not applicable</i>	Group2
User3	<i>Not applicable</i>	Group1
User4	Canada	Group1

Group2 is a member of Group1.

You assign a Microsoft Office 365 Enterprise E3 license to Group1. You need to identify how many Office 365 E3 licenses are assigned. What should you identify?

- A. 1
- B. 2
- C. 3
- D. 4

**Answer: C**

**Explanation:**

Group-based licensing currently does not support groups that contain other groups (nested groups). If you apply a license to a nested group, only the immediate first-level user members of the group have the licenses applied. Therefore, User2 will not be assigned a license.

When Azure AD assigns group licenses, any users without a specified usage location inherit the location of the directory. Therefore, User3 will be assigned a license and his usage location will be set to the location of the directory.

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/users-groups-roles/licensing-groups-assign> <https://docs.microsoft.com/en-us/azure/active-directory/users-groups-roles/licensing-group-advanced>

**NEW QUESTION 149**

- (Exam Topic 5)

Your network contains a single Active Directory domain and two Microsoft Azure Active Directory (Azure AD) tenants.

You plan to implement directory synchronization for both Azure AD tenants. Each tenant will contain some of the Active Directory users.

You need to recommend a solution for the planned directory synchronization. What should you include in the recommendation?

- A. Deploy two servers that run Azure AD Connect, and then filter the users for each tenant by using organizational unit (OU)-based filtering.
- B. Deploy one server that runs Azure AD Connect, and then specify two sync groups.
- C. Deploy one server that runs Azure AD Connect, and then filter the users for each tenant by using organizational unit (OU)-based filtering.
- D. Deploy one server that runs Azure AD Connect, and then filter the users for each tenant by using domain-based filtering.

**Answer: A**

**Explanation:**

There's a 1:1 relationship between an Azure AD Connect sync server and an Azure AD tenant. For each Azure AD tenant, you need one Azure AD Connect sync server installation.

Therefore, we need to deploy two servers that run Azure AD Connect for the two Azure AD tenants.

Each user account can only be synchronized to one Azure AD tenant. Therefore, we need a way of splitting the users between the two Azure AD tenants. Azure AD Connect offers three ways to filter which users get synchronized to an Azure AD tenant. You can use domain-based filtering if you have multiple domains in a forest, attribute-based filtering or OU-based filtering.

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/hybrid/plan-connect-topologies#multiple-azure-ad-tenant>

<https://docs.microsoft.com/en-us/azure/active-directory/hybrid/how-to-connect-sync-configure-filtering>

### NEW QUESTION 151

- (Exam Topic 5)

You network contains an on-premises Active Directory domain named contoso.com. The domain contains a Microsoft Exchange Server 2019 organization.

You plan to sync the domain to Azure Active Directory (Azure AD) and to enable device writeback and group writeback.

You need to identify which group types will sync from Azure AD.

Which two group types should you identify? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point. NOTE: Each correct selection is worth one point.

- A. A security groups that uses the Dynamic Device membership type.
- B. An Office 365 group that uses the assigned membership type
- C. A security group that uses the Dynamic User membership type
- D. A security group uses the Assigned membership type
- E. An Office 365 group that uses the Dynamic User membership type

**Answer:** BE

#### Explanation:

Group writeback in Azure AD Connect synchronizes Office 365 groups only from Azure Active Directory back to the on-premise Active Directory.

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/hybrid/how-to-connect-preview>

### NEW QUESTION 153

- (Exam Topic 5)

You are developing a Microsoft Teams app that will use an Azure function to send scheduled messages from a bot to users. What is required for the Teams app to send a proactive message to the users?

- A. The users must send at least one message to the bot.
- B. The bot must be approved in Azure Active Directory (Azure AD).
- C. The bot must be granted admin access to the users.
- D. The Teams app must be added for each user.

**Answer:** A

### NEW QUESTION 154

- (Exam Topic 5)

Your company has a Microsoft 365 subscription.

You upload several archive PST files to Microsoft 365 by using the Security & Compliance admin center. A month later, you attempt to run an import job for the PST files.

You discover that the PST files were deleted from Microsoft 365.

What is the most likely cause of the files being deleted? More than one answer choice may achieve the goal. Select the BEST answer.

- A. The PST files were corrupted and deleted by Microsoft 365 security features.
- B. PST files are deleted automatically from Microsoft 365 after 30 days.
- C. The size of the PST files exceeded a storage quota and caused the files to be deleted.
- D. Another administrator deleted the PST files.

**Answer:** B

#### Explanation:

References:

<https://docs.microsoft.com/en-us/office365/securitycompliance/faqimporting-pst-files-to-office-365> You can use the Office 365 Import Service to bulk-import PST files to Office 365 mailboxes.

When you use the network upload method to import PST files, you upload them to an Azure blob container named ingestiondata. If there are no import jobs in progress on the Import page in the Security & Compliance Center), then all PST files in the ingestiondata container in Azure are deleted 30 days after the most recent import job was created in the Security & Compliance Center.

Reference:

<https://docs.microsoft.com/en-us/office365/securitycompliance/faqimporting-pst-files-to-office-365>

### NEW QUESTION 159

- (Exam Topic 5)

You have a Microsoft 365 subscription that contains a Microsoft Azure Active Directory (Azure AD) tenant named contoso.com. The tenant includes a user named User1. You enable Azure AD Identity Protection.

You need to ensure that User1 can review the list in Azure AD Identity Protection of users flagged for risk. The solution must use the principle of least privilege. To which role should you add User1?

- A. Security reader
- B. User administrator
- C. Service administrator
- D. Reports reader

**Answer:** A

#### Explanation:

Either one of the following three roles can review the list in Azure AD Identity Protection of users flagged for risk:

- Security Administrator
- Global Administrator
- Security Reader

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/reports-monitoring/concept-risky-sign-ins>

**NEW QUESTION 164**

- (Exam Topic 5)

Your network contains an on-premises Active Directory domain named contoso.com. The domain contains the objects shown in the following table.

Name	Configuration
Group1	Global security group
User1	Enabled user account
User2	Disabled user account

You configure Azure AD Connect to sync contoso.com to Azure Active Directory. Which objects will sync to Azure AD?

- A. Group1, User1, and User2
- B. Group1 and User1 only
- C. User1 and User2 only
- D. Group1 only

**Answer:** A

**Explanation:**

Global Security Group is a scope for the group and is set for created groups:

<https://docs.microsoft.com/en-us/windows/security/identity-protection/access-control/active-directory-security-g>

**NEW QUESTION 169**

- (Exam Topic 5)

You have Windows 10 devices that are managed by using Microsoft Endpoint Manager as shown in the following table.

Name	CPU	Member of	Installed apps
Device1	x86	Group1	Microsoft Office 2016
Device2	x86	Group1	None
Device3	x64	Group1	Microsoft Office 2019
Device4	x64	Group1	None

You create a Microsoft 365 Suite app as shown in the exhibit (Click the Exhibit Tab.) and assign The app to Group1. On which devices will Microsoft 365 Apps be installed?

- A. Device2 and Device4 only
- B. Device1, Device2, and Device4 only
- C. Device2 only
- D. Device 1 and Device2 only
- E. Device1, Device2, Device3, and Device4

**Answer:** E

**NEW QUESTION 174**

- (Exam Topic 5)

Your company has a Microsoft Azure Active Directory (Azure AD) tenant named contoso.com. You sign up for Microsoft Store for Business.

The tenant contains the users shown in the following table.

Name	Microsoft Store for Business role	Azure AD role
User1	Purchaser	None
User2	Basic Purchaser	None
User3	None	Application administrator
User4	None	Cloud application administrator
User5	None	None

Microsoft Store for Business has the following Shopping behavior settings:

- > Allow users to shop is set to On.
- > Make everyone a Basic Purchaser is set to Off.

You need to identify which users can install apps from the Microsoft for Business private store. Which users should you identify?

- A. user1, User2, User3, User4, and User5
- B. User1 only
- C. User1 and User2 only
- D. User3 and User4 only
- E. User1, User2, User3, and User4 only

**Answer:** C

**Explanation:**

Allow users to shop controls the shopping experience in Microsoft Store for Education. When this setting is on, Purchasers and Basic Purchasers can purchase products and services from Microsoft Store for Education.

References:

<https://docs.microsoft.com/en-us/microsoft-store/acquire-apps-microsoft-store-for-business>

**NEW QUESTION 175**

- (Exam Topic 5)

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has a Microsoft 365 tenant.

You suspect that several Office 365 features were recently updated.

You need to view a list of the features that were recently updated in the tenant Solution: You review the Product Feedback in the Microsoft 365 admin center Does this meet the goal?

- A. Yes
- B. No

**Answer: B**

**NEW QUESTION 177**

- (Exam Topic 5)

You have a Microsoft 365 subscription that uses an Azure Active Directory (Azure AD) tenant named contoso.com. The tenant contains the users shown in the following table.

Name	Device type	License
User1	Windows 10	None
User2	Windows 10	Microsoft Office 365 E5
User3	Android	Microsoft Office 365 E5

You configure the Office software download settings as shown in the exhibit. (Click the Exhibit tab.)

**Office software download settings**

Choose whether your users can install Office apps on their own devices.  
 If you choose not to allow this, you can [manually deploy apps to users](#) instead.

**Apps for Windows and mobile devices**

Office (includes Skype for Business)

**How often do you want users to get feature updates for Office apps?**

- Every month (Monthly channel)
- Every 6 months (Semi-Annual channel)

**Apps for Mac**

Office

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

**Statements**

**Yes No**

User1 can use Microsoft Word Online to edit documents when he signs in to <https://www.office.com>.

User2 can install Office 365 apps on his device when he signs in to <https://www.office.com>.

User3 can install Microsoft Word on his device when he signs in to <https://www.office.com>.

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

Box 1: No.

User1 does not have an Office 365 license so will be unable to use edit documents in Word online. Box 2: Yes.

User2 has a Windows device and an Office 365 license. Box 3: No

Although, User 3 has an Office 365 license, you cannot download Android apps from the Office 365 portal. You need to download the apps from the Android app store.

**NEW QUESTION 182**

- (Exam Topic 5)

You are developing a mobile application that will display the current signed-in user's display name and the application settings. The application settings are stored

as a Microsoft Graph extension of the user profile.  
 Users of the application have intermittent network connectivity  
 You need to retrieve the least amount of data by using a single REST request. The solution must minimize network traffic.  
 Which URI should you use to retrieve the data?

- A. [https://graph.microsoft.com/v1.0/me?Select=displayName,ids\\$expand=extensions](https://graph.microsoft.com/v1.0/me?Select=displayName,ids$expand=extensions)
- B. <https://graph.microsoft.com/v1.0/me>
- C. [https://graph.microsoft.com/v1.0/me?select=displayName,userType\\$expand=extensions](https://graph.microsoft.com/v1.0/me?select=displayName,userType$expand=extensions)
- D. <https://graph.microsoft.com/v1.0/me?Expand=extensions>

**Answer: B**

**NEW QUESTION 183**

- (Exam Topic 5)  
 You have a Microsoft 365 Enterprise E5 subscription.  
 You need to enforce multi-factor authentication on all cloud-based applications for the users in the finance department.  
 What should you do?

- A. Create an activity policy.
- B. Create a Sign-in risk policy.
- C. Create a session policy.
- D. Create an app permission policy.

**Answer: B**

**Explanation:**

You can configure a sign-in risk policy that applies to the Finance department users. The policy can be configured to 'Allow access' but with multi-factor authentication as a requirement.

Reference:  
<https://docs.microsoft.com/en-us/azure/active-directory/identity-protection/howto-sign-in-risk-policy>

**NEW QUESTION 186**

- (Exam Topic 5)  
 You are developing a Microsoft Office Add-in for Microsoft Word. Which Office UI element can contain commands from the add-in?

- A. the title bar
- B. context menus
- C. taskpaoes
- D. the File menu

**Answer: B**

**NEW QUESTION 190**

- (Exam Topic 5)  
 You have a hybrid deployment of Microsoft 365 that contains the users shown in the following table.

Name	Azure Active Directory (Azure AD) role	On-premises Active Directory group membership
User1	Cloud application administrator	None
User2	Application administrator	None
User3	Service administrator	None
User4	None	Domain Admins

You plan to provide access to an on-premises app named App1 by using Azure AD Application Proxy. App1 will be managed by User4.  
 You need to identify which user can install the Application Proxy connector. Which user should you identify?

- A. User1
- B. User2
- C. User3
- D. User4

**Answer: B**

**Explanation:**

<https://docs.microsoft.com/en-us/azure/active-directory/manage-apps/application-proxy-add-on-premisesapplica>

**NEW QUESTION 194**

- (Exam Topic 5)  
 Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.  
 When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.  
 Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.  
 Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

You may now click next to proceed to the lab. Lab information

Use the following login credentials as needed:

To enter your username, place your cursor in the Sign in box and click on the username below.

To enter your password, place your cursor in the Enter password box and click on the password below.

Microsoft 365 Username: admin@M365x981607.onmicrosoft.com Microsoft 365 Password: \*yfLo7lr2&yIf the Microsoft 365 portal does not load successfully in the browser, press CTRL-K to reload the portal in a new browser tab.

The following information is for technical support purposes only:

Lab Instance: 10811525

Alex Wilber must be able to reset the password of each user in your organization. The solution must prevent Alex Wilber from modifying the password of global administrators.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

You need to assign the 'Password Administrator' role to Alex Wilber. A user assigned the Password Administrator role can reset passwords for non-administrators and Password administrators.

- \* 1. Go to the Azure Active Directory admin center.
- \* 2. Select Users.
- \* 3. Select the Alex Wilber account to open the account properties page.
- \* 4. Select 'Assigned roles'.
- \* 5. Click the 'Add Assignments' button.
- \* 6. Select Password Administrator then click the Add button. References:  
<https://docs.microsoft.com/en-us/office365/admin/add-users/about-admin-roles?view=o365-worldwide>

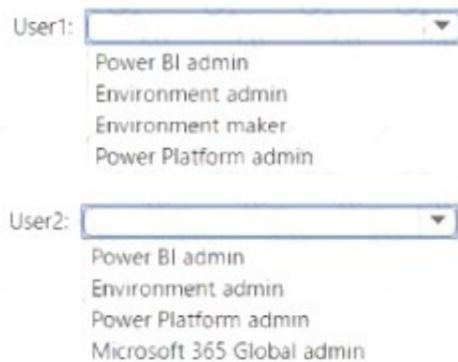

**NEW QUESTION 197**

- (Exam Topic 5)

You have a Microsoft 365 tenant that contains a Microsoft Power Platform development environment named Dev1, a Power Platform production environment named Prod1, and two users named User1 and User2.

You need to assign roles to the users to meet the following requirements:

- User1 must have full access permissions to Dev1 and Prod1.
- User2 must be able to acquire and assign Microsoft Power BI licenses. The solution must use the principle of least privilege

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Graphical user interface, application Description automatically generated

**NEW QUESTION 198**

- (Exam Topic 5)

Your network contains an on-premises Active Directory domain named contoso.com that syncs to Azure Active Directory (Azure AD).

You have users in contoso.com as shown in the following table.

Name	Source
User1	Azure Active Directory
User2	Azure Active Directory
User3	Windows Active Directory

The users have the passwords shown in the following table.

Name	Password
User1	Contoso123
User2	N3w3rT0Gue33
User3	ComplexPassword33

You implement password protection as shown in the following exhibit.

---

**Custom smart lockout**

Lockout threshold

Lockout duration in seconds

**Custom banned passwords**

Enforce custom list  Yes  No

Custom banned password list

Contoso

**Password protection for Windows Server Active Directory**

Enable password protection on Windows Server Active Directory  Yes  No

Mode  Enforced  Audit

For each of the following statements, select Yes if the statement is true. Otherwise, select No.  
 NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 must change his password at the next sign in.	<input type="radio"/>	<input type="radio"/>
User2 can change his password to C0nt0s0_C0mplex123.	<input type="radio"/>	<input type="radio"/>
User3 can change his password to MyPasswordContoso123.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: No

User1's password contains the banned password 'Contoso'. However, User1 will not be required to change his password at next sign in. When the password expires or when User1 (or an administrator) changes the password, the password will be evaluated and will have to meet the password requirements.

Box 2: Yes

Password evaluation goes through several steps including normalization and Substring matching which is used on the normalized password to check for the user's first and last name as well as the tenant name. Normalization is the process of converting common letter substitutes into letters. For example, 0 converts to o.

\$ converts to s. etc.

The next step is to identify all instances of banned passwords in the user's normalized new password. Then: ➤ Each banned password that is found in a user's password is given one point.

➤ Each remaining unique character is given one point.

➤ A password must be at least five (5) points for it to be accepted.

'C0nt0s0' becomes 'contoso' after normalization. Therefore, C0nt0s0\_C0mplex123 contains one instance of the banned password (contoso) so that equals 1 point. After 'contoso', there are 11 unique characters. Therefore, the score for 'C0nt0s0\_C0mplex123' is 12. This is more than the required 5 points so the password is acceptable. Box 3:

The 'Password protection for Windows Server Active Directory' is in 'Audit' mode. This means that the password protection rules are not applied. Audit mode is for logging policy violations before putting the password protection 'live' by changing the mode to 'enforced'.

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/authentication/concept-password-ban-bad>

**NEW QUESTION 202**

- (Exam Topic 5)

You have a Microsoft 365 subscription.

You have a group named Support. Users in the Support group frequently send email messages to external users.

The manager of the Support group wants to randomly review messages that contain attachments.

You need to provide the manager with the ability to review messages that contain attachments sent from the Support group users to external users. The manager must have access to only 10 percent of the messages.

What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

To meet the goal for the manager, create:

▼
A label policy
A retention policy
A supervisor policy
An alert policy
MyAnalytics

To review the messages, the manager must use:

▼
A message trace
An eDiscovery case
MyAnalytics
Outlook Web App

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Supervision policies in Office 365 allow you to capture employee communications for examination by designated reviewers. You can define specific policies that capture internal and external email, Microsoft Teams, or 3rd-party communications in your organization.

You create supervision policies in the Compliance center. These policies define which communications and users are subject to review in your organization and specify who should perform reviews.

If you want to reduce the amount of content to review, you can specify a percentage of all the communications governed by a supervision policy. A real-time, random sample of content is selected from the total percentage of content that matches chosen policy conditions.

Reference:

<https://docs.microsoft.com/en-us/office365/securitycompliance/supervision-policies>

**NEW QUESTION 205**

- (Exam Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has a Microsoft Office 365 tenant.

You suspect that several Office 365 features were recently updated.

You need to view a list of the features that were recently updated in the tenant.

Solution: You review the Security & Compliance report in the Microsoft 365 admin center. Does this meet the goal?

- A. Yes
- B. No

**Answer:** B

**Explanation:**

The Security & Compliance reports in the Microsoft 365 admin center are reports regarding security and compliance for your Office 365 Services. For example, email usage reports, Data Loss Prevention reports etc. They do not display a list of the features that were recently updated in the tenant so this solution does not meet the goal.

To meet the goal, you need to use Message center in the Microsoft 365 admin center.

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/security/office-365-security/download-existing-reports>

**NEW QUESTION 206**

- (Exam Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has a Microsoft Office 365 tenant.

You suspect that several Office 365 features were recently updated.

You need to view a list of the features that were recently updated in the tenant.

Solution: You use Reports from the Microsoft 365 compliance center. Does this meet the goal?

- A. Yes
- B. No

**Answer:** B

**NEW QUESTION 209**

- (Exam Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result these questions will not appear in the review screen.

Your company has a main office and three branch offices. All the branch offices connect to the main office by using a WAN link. The main office has a high-speed Internet connection. All the branch offices connect to the Internet by using the main office connection.

Users use Microsoft Outlook 2016 to connect to 4 Microsoft Exchange Server mailbox hosted in the main office. The users report that when the WAN link in their office becomes unavailable, they cannot access their mailbox. You create a Microsoft 365 subscription, and then migrate all the user data to Microsoft 365. You need to ensure that all the users can continue to use Outlook to receive email messages if a WAN link fails. Solution: For each branch office, you add a direct connection to the Internet. Does this meet the goal?

- A. Yes
- B. NO

**Answer: A**

**NEW QUESTION 210**

- (Exam Topic 5)

You have a Microsoft 365 E5 subscription linked to an Azure Active Directory (Azure AD) tenant named contoso.onmicrosoft.com. You plan to import the Microsoft Power Platform Center of Excellence (CoE) Starter Kit. You need to configure the HTTP with Azure AD connection. Which base resource URL should you use?

- A. <https://graph.microsoft.com>
- B. <https://login.microsoftonline.com/contoso.onmicrosoft.com>
- C. <https://contoso.onmicrosoft.com>
- D. <https://login.microsoftonline.com/common/v2.0/oauth2/token>

**Answer: B**

**NEW QUESTION 211**

- (Exam Topic 5)

Your company has two offices. The offices are located in Seattle and New York. The company uses a third-party email system. You implement Microsoft 365.

You move all the users in the Seattle office to Exchange Online. You configure Microsoft 365 to successfully receive all the email messages sent to the Seattle office users.

All the users in the New York office continue to use the third-party email system. The users use the email domains shown in the following table.

Users in	Email domain
Seattle	Contoso.com
New York	Adatum.com

You need to ensure that all the email messages sent to the New York office users are delivered successfully. The solution must ensure that all the email messages for the users in both offices are routed through Microsoft 365.

You create the required DNS records and Send connectors. What should you do next from Microsoft 365?

- A. From Microsoft 365 admin center, set the default domain
- B. From the Exchange admin center, create a transport rule for all the email messages sent to adatum.com.
- C. From Microsoft 365 admin center, add the adatum.com domain
- D. From the Exchange admin center, configure adatum.com as an internal relay domain.
- E. From Microsoft 365 admin center, add the adatum.com domain
- F. From the Exchange admin center, configure adatum.com as an authoritative domain.
- G. From Microsoft 365 admin center, set the default domain
- H. From the Exchange admin center, configure adatum.com as a remote domain.

**Answer: B**

**Explanation:**

The first step is to configure Exchange Online to accept emails for the adatum.com domain. To do this, we add the domain in Microsoft 365. When you add your domain to Microsoft 365, it's called an accepted domain.

The next step is to tell Exchange Online what to do with those emails. You need to configure the adatum.com domain as either an authoritative domain or an internal relay domain.

Authoritative domain means that the mailboxes for that domain are hosted in Office 365. In this question, the mailboxes for the adatum.com domain are hosted on the third-party email system. Therefore, we need to configure the adatum.com domain as an internal relay domain. For an internal relay domain, Exchange Online will receive the email for the adatum.com domain and then 'relay' (forward) the email on to the third-party email server.

References:

<https://docs.microsoft.com/en-us/exchange/mail-flow-best-practices/manage-accepted-domains/manage-accepted-domains>

**NEW QUESTION 214**

- (Exam Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain named contoso.com that is synced to Microsoft Azure Active Directory (Azure AD).

You manage Windows 10 devices by using Microsoft System Center Configuration Manager (Current Branch).

You configure a pilot for co-management.

You add a new device named Device1 to the domain. You install the Configuration Manager client on Device1.

You need to ensure that you can manage Device1 by using Microsoft Intune and Configuration Manager. Solution: Define a Configuration Manager device collection as the pilot collection. Add Device1 to the collection.

Does this meet the goal?

- A. Yes
- B. No

**Answer: A**

**Explanation:**

Device1 has the Configuration Manager client installed so you can manage Device1 by using Configuration Manager. To manage Device1 by using Microsoft Intune, the device has to be enrolled in Microsoft Intune. In the Co-management Pilot configuration, you configure a Configuration Manager Device Collection that determines which devices are auto-enrolled in Microsoft Intune. You need to add Device1 to the Device Collection so that it auto-enrolls in Microsoft Intune. You will then be able to manage Device1 using Microsoft Intune.

Reference:  
<https://docs.microsoft.com/en-us/configmgr/comanage/how-to-enable>

**NEW QUESTION 219**

- (Exam Topic 5)

You have a Microsoft Azure Active Directory (Azure AD) tenant named contoso.com. A user named User1 has files on a Windows 10 device as shown in the following table.

Name	Text in file
File1.docx	Importing and exporting is easy. For import, you need a source, and for export, you need a destination
File2.docx	You must declare what you want to import. Dangerous items cannot be imported. If you want to import valuables, you must pay customs.
File3.docx	IM are initials for instant messaging. You can use Microsoft Skype for IM, but there are also other IM programs.

In Azure Information Protection, you create a label named Label1 that is configured to apply automatically. Label1 is configured as shown in the following exhibit.

**Condition: Condition1**

Default Directory - Azure Information Protection

 Save     Discard     Delete

Choose the type of condition

Information Types     Custom

\* Name

Condition1 

\* Match exact phrase or pattern

im 

Match as a regular expression

Off     On

Match with case sensitivity

Off     On

\* Maximum number of occurrences

2

Count occurrences with unique value only

Off     On

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
Label1 applies to File1.docx.	<input type="radio"/>	<input type="radio"/>
Label1 applies to File2.docx.	<input type="radio"/>	<input type="radio"/>
Label1 applies to File3.docx.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

The phrase to match is "im" and it is case sensitive. The phrase must also appear at least twice. Box 1: No  
 File1.docx contain the word "import" once only Box 2: Yes  
 File2.docx contains two occurrences of the word "import" as well as the word "imported" Box 3: No  
 File3.docx contains "IM" but his is not the correct letter case.

<https://docs.microsoft.com/en-us/azure/information-protection/configure-policy-classification>

**NEW QUESTION 220**

- (Exam Topic 5)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

You may now click next to proceed to the lab. Lab information

Use the following login credentials as needed:

To enter your username, place your cursor in the Sign in box and click on the username below.

To enter your password, place your cursor in the Enter password box and click on the password below.

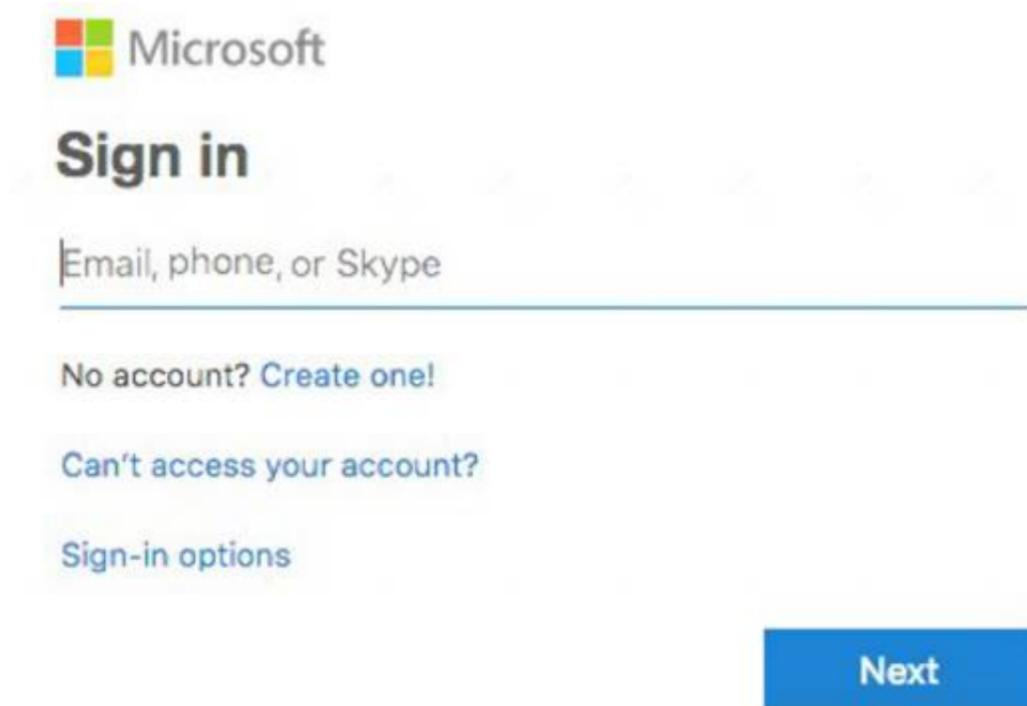

Microsoft 365 Username: admin@LODSe878763.onmicrosoft.com

Microsoft 365 Password: m3t^We\$Z7&xy

If the Microsoft 365 portal does not load successfully in the browser, press CTRL-K to reload the portal in a new browser tab.

The following information is for technical support purposes only:

Lab Instance: 11440873

You need to create a SharePoint site named Project1. Users from your organization must be able to share content from the site to external users. To answer, sign in to the Microsoft 365 portal.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

You need to create a SharePoint site and configure the sharing settings.

- \* 1. Go to the SharePoint Admin Center.
- \* 2. In the left navigation pane, expand Sites then select 'Active Sites'.
- \* 3. Click on the '+ Create' link to add a new site.
- \* 4. Select 'Other Options' then 'Team Site' for the template.
- \* 5. Give the site the name 'Project1'.
- \* 6. In the 'Primary Administrator' field, start typing 'admin' then select the admin@LODSe878763.onmicrosoft.com account when it appears.
- \* 7. Click Finish to create the site.
- \* 8. In the Active Sites list, select the Project1 site.
- \* 9. Click the Sharing link at the top of the sites list.
- \* 10. Under 'External Sharing', select 'Anyone'.
- \* 11. Click Save to save the changes.

**NEW QUESTION 221**

- (Exam Topic 5)

You have a Microsoft 365 subscription.  
 You are configuring permissions for Security & Compliance.  
 You need to ensure that the users can perform the tasks shown in the following table.

Name	Task
User1	Download all Security & Compliance reports.
User2	Create and manage Security & Compliance alerts.

The solution must use the principle of least privilege.  
 To which role should you assign each user? To answer, select the appropriate options in the answer area.  
 NOTE: Each correct selection is worth one point.

User1:

- Records Management
- Security Administrator
- Security Reader
- Supervisory Review

User2:

- Compliance Administrator
- Organization Management
- Security Administrator
- Security Reader
- Supervisory Review

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Security Reader: Members can manage security alerts (view only), and also view reports and settings of security features.  
 Security Administrator, Compliance Administrator and Organization Management can manage alerts. However, Security Administrator has the least privilege.  
 Reference:  
<https://docs.microsoft.com/en-us/office365/securitycompliance/permissions-in-the-security-and-compliance-cen>

**NEW QUESTION 223**

- (Exam Topic 5)  
 You have a Microsoft 365 subscription that contains a user named User1.  
 You need to ensure that User1 receives Microsoft 365 feature and service updates before the updates are released to all users.  
 What should you do in the Microsoft 365 admin center?

- A. Modify the privileged access management settings.
- B. Modify Office software download settings.
- C. Modify the Release preferences settings.
- D. Submit a new service request.

**Answer:** C

**Explanation:**

Reference:  
<https://practical365.com/blog/first-steps-configure-office-365-first-release-settings/>

**NEW QUESTION 224**

- (Exam Topic 5)  
 Your company has an on-premises Microsoft Exchange Server 2013 organization. The company has 100 users.  
 The company purchases Microsoft 365 and plans to move its entire.- infrastructure to the cloud.  
 The company does NOT plan to sync the on-premises Active Directory domain to Microsoft Azure Active Directory (Azure AD).  
 You need to recommend which type of migration to use to move all email messages, contacts, and calendar items to Exchange Online.  
 What should you recommend?

- A. cutover migration
- B. IMAP migration
- C. remote move migration
- D. staged migration

**Answer:** A

**Explanation:**

References:  
<https://docs.microsoft.com/en-us/exchange/mailbox-migration/cutover-migration-to-office-365>  
 A cutover migration and an IMAP migration do not require the company to sync the on-premises Active Directory domain to Microsoft Azure Active Directory (Azure

AD). Only a cutover migration meets the requirements in this question.

With a cutover migration, user accounts will need to be created in Azure Active Directory for each user. The mailboxes are all migrated in one go and MX records configured to redirect email to Microsoft 365.

**NEW QUESTION 225**

- (Exam Topic 5)

Your network contains the servers shown in the following table.

Server name	Software	Configuration
Server1	Windows Server 2008	Domain controller
Server2	Windows Server 2012	Domain controller
Server3	Microsoft Exchange Server 2007	Not applicable
Server4	Microsoft SharePoint Server 2010	Not applicable
Server5	Microsoft Lync Server 2013	Not applicable

You purchase Microsoft 365 Enterprise E5 and plan to move all workloads to Microsoft 365 by using a hybrid identity solution and a hybrid deployment for all workloads.

You need to identify which server must be upgraded before you move to Microsoft 365. What should you identify?

- A. Server 2
- B. Server 3
- C. Server 5
- D. Server 1
- E. Server 4

**Answer: B**

**Explanation:**

Exchange Server 2007 is not supported for a hybrid deployment. Reference:  
<https://docs.microsoft.com/en-us/exchange/hybrid-deployment-prerequisites>

**NEW QUESTION 228**

- (Exam Topic 5)

You use Microsoft System Center Configuration manager (Current Branch) to manage devices. Your company uses the following types of devices:

- > Windows 10
- > Windows 8.1
- > Android
- > iOS

Which devices can be managed by using co-management?

- A. Windows 10 and Windows 8.1 only
- B. Windows 10, Android, and iOS only
- C. Windows 10 only
- D. Windows 10, Windows 8.1, Android, and iOS

**Answer: C**

**Explanation:**

You can manage only Windows 10 devices by using co-management.

When you concurrently manage Windows 10 devices with both Configuration Manager and Microsoft Intune, this configuration is called co-management. When you manage devices with Configuration Manager and enroll to a third-party MDM service, this configuration is called coexistence.

Reference:

<https://docs.microsoft.com/en-us/configmgr/comanage/overview>

**NEW QUESTION 231**

- (Exam Topic 5)

You create an incoming webhook named webhook1 for a Microsoft Teams team. You need to test webhook1. What should you do?

- A. @mention webhook1 in a channel.
- B. @mention webhook1 in a private message.
- C. @Perform an http post operation against the generated URL for webhook1.
- D. @Perform an http get operation against the generated URL for webhook1.

**Answer: A**

**NEW QUESTION 232**

- (Exam Topic 5)

You need to ensure that a user named User1 can create documents by using Office Online.

Which two Microsoft Office 365 license options should you turn on for User1? To answer, select the appropriate options in the answer area.

NOTE: Each correct section is worth one point.

## Answer Area

### License options

Microsoft Forms (Plan E5)	<input type="checkbox"/>	On
Microsoft MyAnalytics (Full)	<input type="checkbox"/>	On
Microsoft Planner	<input type="checkbox"/>	On
Microsoft StaffHub	<input type="checkbox"/>	On
Microsoft Stream for O365 E5 SKU	<input type="checkbox"/>	On
Microsoft Teams	<input type="checkbox"/>	On
Office 365 Advanced eDiscovery	<input type="checkbox"/>	On
Office 365 Advanced Threat Protection (Plan 2)	<input type="checkbox"/>	On
Office 365 Cloud App Security	<input type="checkbox"/>	On
Office 365 Privileged Access Management	<input type="checkbox"/>	On
Office 365 ProPlus	<input type="checkbox"/>	On
Office Online	<input type="checkbox"/>	On
Phone System	<input type="checkbox"/>	On
Power BI Pro	<input type="checkbox"/>	On
PowerApps for Office 365	<input type="checkbox"/>	On
SharePoint Online (Plan 2)	<input type="checkbox"/>	On
Skype for Business Online (Plan 2)	<input type="checkbox"/>	On
Sway	<input type="checkbox"/>	On
To-Do (Plan 3)	<input type="checkbox"/>	On
Yammer Enterprise	<input type="checkbox"/>	On

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

You need "Office Online" to be able to create documents by using Office Online. You also need an online location to save and store the documents. For this, you would use SharePoint online.

**NEW QUESTION 233**

- (Exam Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an on-premises Active Directory domain named contoso.com. The domain contains the users shown in the following table.

Name	UPN suffix
User1	Contoso.com
User2	Fabrikam.com

The domain syncs to an Azure Active Directory (Azure AD) tenant named contoso.com as shown in the exhibit. (Click the Exhibit tab.)

## PROVISION FROM ACTIVE DIRECTORY

### Azure AD Connect cloud provisioning

This feature allows you to manage provisioning from the cloud.

[Manage provisioning \(Preview\)](#)

### Azure AD Connect sync

Sync Status	Enabled
Last Sync	Less than 1 hour ago
Password Hash Sync	Enabled

## USER SIGN-IN

Federation	Disabled	0 domains
Seamless single sign-on	Enabled	1 domain
Pass-through authentication	Enabled	2 agents

User2 fails to authenticate to Azure AD when signing in as user2@fabrikam.com. You need to ensure that User2 can access the resources in Azure AD. Solution: From the Azure Active Directory admin center, you assign User2 the Security reader role. You instruct User2 to sign in as user2@contoso.com. Does this meet the goal?

- A. Yes
- B. No

**Answer:** B

### Explanation:

This is not a permissions issue so you do not need to assign the Security Reader role. The on-premises Active Directory domain is named contoso.com. User2 could sign on as user2@contoso.com but you would first need to change the UPN of User2 to user2@contoso.com.

## NEW QUESTION 234

- (Exam Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has a Microsoft Office 365 tenant.

You suspect that several Office 365 features were recently updated.

You need to view a list of the features that were recently updated in the tenant. Solution: You use Message center in the Microsoft 365 admin center.

Does this meet the goal?

- A. Yes
- B. NO

**Answer:** A

### Explanation:

The Message center in the Microsoft 365 admin center is where you would go to view a list of the features that were recently updated in the tenant. This is where Microsoft posts official messages with information including new and changed features, planned maintenance, or other important announcements.

Reference:

<https://docs.microsoft.com/en-us/office365/admin/manage/message-center?view=o365-worldwide>

## NEW QUESTION 236

- (Exam Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company plans to deploy several Microsoft Office 365 services.

You need to design an authentication strategy for the planned deployment. The solution must meet the following requirements:

- \* Users must be able to authenticate during business hours only.
- \* Authentication requests must be processed successfully if a single server fails.
- \* When the password for an on-premises user account expires, the new password must be enforced the next time the user signs in.
- \* Users who connect to Office 365 services from domain-joined devices that are connected to the internal network must be signed in automatically.

Solution: You design an authentication strategy that contains a pass-through authentication model. You install an Authentication Agent on three servers and configure seamless SSO.

Does this meet the goal?

- A. Yes
- B. No

**Answer:** A

**Explanation:**

This solution meets all the requirements:

- Users must be able to authenticate during business hours only. (This can be configured by using Logon Hours in Active Directory. Pass-through authentication passes authentication to the on-premise Active Directory)
- Authentication requests must be processed successfully if a single server fails. (We have Authentication Agents running on three servers)
- When the password for an on-premises user account expires, the new password must be enforced the next time the user signs in. (This can be configured in Active Directory. Pass-through authentication passes authentication to the on-premise Active Directory)
- Users who connect to Office 365 services from domain-joined devices that are connected to the internal network must be signed in automatically. (This goal is met by seamless SSO)

Reference:

<https://docs.microsoft.com/en-us/azure/security/azure-ad-choose-authn>

**NEW QUESTION 240**

- (Exam Topic 4)

You need to provide users with access to SalesApp. The solution must meet the technical requirements What should you include in the solution?

- A. Microsoft AppSource
- B. sideloading
- C. Centralized Deployment
- D. App Catalog in SharePoint Online

**Answer:** A

**NEW QUESTION 242**

- (Exam Topic 3)

You need to ensure that Litware has the appropriate licence to support the planned changes. The solution must minimize costs. Which license type should you use?

- A. Microsoft 365 Enterprise E5
- B. Office 365 Enterprise E5
- C. Office 365 Enterprise F3
- D. Microsoft 365 Enterprise E3

**Answer:** B

**NEW QUESTION 247**

- (Exam Topic 3)

You need to configure the Office 365 service status notifications and limit access to the service and feature updates. The solution must meet the technical requirements.

What should you configure in the Microsoft 365 admin center? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

To configure the notifications:

	▼
Briefing email	
Help desk information	
Organization information	

To limit access:

	▼
Privileged Access	
Release preferences	
Office installation options	

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Graphical user interface, text, table Description automatically generated

Reference:

<https://docs.microsoft.com/en-us/briefing/be-admin>

<https://docs.microsoft.com/en-us/microsoft-365/admin/manage/release-options-in-office-365?view=o365-world>

**NEW QUESTION 252**

- (Exam Topic 3)

You need to ensure that Admin4 can use SSPR.

Which tool should you use, and which action should you perform? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Action:  ▼

Enable app registrations.
Enable password writeback.
Enable password hash synchronization
Disable password hash synchronization

Tool:  ▼

Azure AD Connect
Synchronization Rules Editor
Azure Active Directory admin center

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Graphical user interface, text, application, chat or text message Description automatically generated

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/authentication/howto-sspr-deployment>

**NEW QUESTION 253**

- (Exam Topic 2)

You need to create the UserLicenses group. The solution must meet the security requirements.

Which group type and control method should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer Area**

Group type:  ▼

Distribution list
Office 365 group
Security group

Control method:  ▼

a conditional access policy
a retention policy
an access review
an alert policy

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Fabrikam plans to create a group named UserLicenses that will manage the allocation of all Microsoft 365 bulk licenses.

The memberships of UserLicenses must be validated monthly. Unused user accounts must be removed from the group automatically.

The group needs to be a Security group.

Azure Active Directory (Azure AD) access reviews enable organizations to efficiently manage group memberships, access to enterprise applications, and role assignments. User's access can be reviewed on a regular basis to make sure only the right people have continued access.

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/governance/access-reviews-overview>

**NEW QUESTION 257**

- (Exam Topic 2)

Which role should you assign to User1?

- A. Security Administrator
- B. Records Management
- C. Security Reader
- D. Hygiene Management

**Answer:** C

**Explanation:**

➤ A user named User1 must be able to view all DLP reports from the Microsoft 365 admin center. Users with the Security Reader role have global read-only access on security-related features, including all information in Microsoft 365 security center, Azure Active Directory, Identity Protection, Privileged Identity Management, as well as the ability to read Azure Active Directory sign-in reports and audit logs, and in Office 365 Security & Compliance Center.

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/users-groups-roles/directory-assign-admin-roles>
