

Exam Questions CISSP-ISSAP

Information Systems Security Architecture Professional

<https://www.2passeasy.com/dumps/CISSP-ISSAP/>

NEW QUESTION 1

Which of the following elements of planning gap measures the gap between the total potential for the market and the actual current usage by all the consumers in the market?

- A. Project gap
- B. Product gap
- C. Competitive gap
- D. Usage gap

Answer: D

NEW QUESTION 2

You work as a Network Administrator for NetTech Inc. The company wants to encrypt its e-mails. Which of the following will you use to accomplish this?

- A. PGP
- B. PPTP
- C. IPSec
- D. NTFS

Answer: A

NEW QUESTION 3

Peter works as a Network Administrator for Net World Inc. The company wants to allow remote users to connect and access its private network through a dial-up connection via the Internet. All the data will be sent across a public network. For security reasons, the management wants the data sent through the Internet to be encrypted. The company plans to use a Layer 2 Tunneling Protocol (L2TP) connection. Which communication protocol will Peter use to accomplish the task?

- A. IP Security (IPSec)
- B. Microsoft Point-to-Point Encryption (MPPE)
- C. Pretty Good Privacy (PGP)
- D. Data Encryption Standard (DES)

Answer: A

NEW QUESTION 4

Which of the following is a method for transforming a message into a masked form, together with a way of undoing the transformation to recover the message?

- A. Cipher
- B. CrypTool
- C. Steganography
- D. MIME

Answer: A

NEW QUESTION 5

Mark works as a Network Administrator for NetTech Inc. He wants users to access only those resources that are required for them. Which of the following access control models will he use?

- A. Policy Access Control
- B. Mandatory Access Control
- C. Discretionary Access Control
- D. Role-Based Access Control

Answer: D

NEW QUESTION 6

A user is sending a large number of protocol packets to a network in order to saturate its resources and to disrupt connections to prevent communications between services. Which type of attack is this?

- A. Denial-of-Service attack
- B. Vulnerability attack
- C. Social Engineering attack
- D. Impersonation attack

Answer: A

NEW QUESTION 7

Which of the following types of attack can be used to break the best physical and logical security mechanism to gain access to a system?

- A. Social engineering attack
- B. Cross site scripting attack
- C. Mail bombing
- D. Password guessing attack

Answer: A

NEW QUESTION 8

You are the Security Consultant advising a company on security methods. This is a highly secure location that deals with sensitive national defense related data. They are very concerned about physical security as they had a breach last month. In that breach an individual had simply grabbed a laptop and ran out of the building. Which one of the following would have been most effective in preventing this?

- A. Not using laptop
- B. Keeping all doors locked with a guar
- C. Using a man-tra
- D. A sign in lo

Answer: C

NEW QUESTION 9

Which of the following does PEAP use to authenticate the user inside an encrypted tunnel? Each correct answer represents a complete solution. Choose two.

- A. GTC
- B. MS-CHAP v2
- C. AES
- D. RC4

Answer: AB

NEW QUESTION 10

Which of the following terms refers to a mechanism which proves that the sender really sent a particular message?

- A. Integrity
- B. Confidentiality
- C. Authentication
- D. Non-repudiation

Answer: D

NEW QUESTION 10

Maria works as a Network Security Officer for Gentech Inc. She wants to encrypt her network traffic. The specific requirement for the encryption algorithm is that it must be a symmetric key block cipher. Which of the following techniques will she use to fulfill this requirement?

- A. IDEA
- B. PGP
- C. DES
- D. AES

Answer: C

NEW QUESTION 15

Which of the following are the examples of technical controls? Each correct answer represents a complete solution. Choose three.

- A. Auditing
- B. Network acchitecture
- C. System access
- D. Data backups

Answer: ABC

NEW QUESTION 19

Which of the following authentication methods prevents unauthorized execution of code on remote systems?

- A. TACACS
- B. S-RPC
- C. RADIUS
- D. CHAP

Answer: B

NEW QUESTION 21

Andrew works as a Network Administrator for Infonet Inc. The company's network has a Web server that hosts the company's Web site. Andrew wants to increase the security of the Web site by implementing Secure Sockets Layer (SSL). Which of the following types of encryption does SSL use? Each correct answer represents a complete solution. Choose two.

- A. Synchronous
- B. Secret
- C. Asymmetric
- D. Symmetric

Answer: CD

NEW QUESTION 26

John works as a professional Ethical Hacker. He has been assigned the project of testing the security of www.we-are-secure.com. John notices that the We-are-secure network is vulnerable to a man-in-the-middle attack since the key exchange process of the cryptographic algorithm it is using does not thenticate participants. Which of the following cryptographic algorithms is being used by the We-are-secure server?

- A. Blowfish
- B. Twofish
- C. RSA
- D. Diffie-Hellman

Answer: D

NEW QUESTION 29

You have decided to implement video surveillance in your company in order to enhance network security. Which of the following locations must have a camera in order to provide the minimum level of security for the network resources? Each correct answer represents a complete solution. Choose two.

- A. Parking lot
- B. All hallways
- C. Server Rooms
- D. All offices
- E. All entrance doors

Answer: CE

NEW QUESTION 30

Which of the following disaster recovery tests includes the operations that shut down at the primary site, and are shifted to the recovery site according to the disaster recovery plan?

- A. Structured walk-through test
- B. Simulation test
- C. Full-interruption test
- D. Parallel test

Answer: C

NEW QUESTION 34

You are the Network Administrator for a small business. You need a widely used, but highly secure hashing algorithm. Which of the following should you choose?

- A. AES
- B. SHA
- C. EAP
- D. CRC32

Answer: B

NEW QUESTION 35

Sam is creating an e-commerce site. He wants a simple security solution that does not require each customer to have an individual key. Which of the following encryption methods will he use?

- A. Asymmetric encryption
- B. Symmetric encryption
- C. S/MIME
- D. PGP

Answer: B

NEW QUESTION 38

Computer networks and the Internet are the prime mode of Information transfer today. Which of the following is a technique used for modifying messages, providing Information and Cyber security, and reducing the risk of hacking attacks during communications and message passing over the Internet?

- A. Risk analysis
- B. Firewall security
- C. Cryptography
- D. OODA loop

Answer: C

NEW QUESTION 41

Which of the following are the primary components of a discretionary access control (DAC) model? Each correct answer represents a complete solution. Choose two.

- A. User's group
- B. File and data ownership
- C. Smart card
- D. Access rights and permissions

Answer:

BD

NEW QUESTION 45

You work as a technician for Trade Well Inc. The company is in the business of share trading. To enhance security, the company wants users to provide a third key (apart from ID and password) to access the company's Web site. Which of the following technologies will you implement to accomplish the task?

- A. Smart cards
- B. Key fobs
- C. VPN
- D. Biometrics

Answer: B

NEW QUESTION 49

Which of the following layers of the OSI model corresponds to the Host-to-Host layer of the TCP/IP model?

- A. The transport layer
- B. The presentation layer
- C. The session layer
- D. The application layer

Answer: A

NEW QUESTION 50

You are the Network Administrator for a college. You watch a large number of people (some not even students) going in and out of areas with campus computers (libraries, computer labs, etc.). You have had a problem with laptops being stolen. What is the most cost effective method to prevent this?

- A. Smart card access to all areas with computer
- B. Use laptop lock
- C. Video surveillance on all areas with computer
- D. Appoint a security guar

Answer: B

NEW QUESTION 52

Which of the following is an electrical event shows that there is enough power on the grid to prevent from a total power loss but there is no enough power to meet the current electrical demand?

- A. Power Surge
- B. Power Spike
- C. Blackout
- D. Brownout

Answer: D

NEW QUESTION 54

Which of the following protocols is designed to efficiently handle high-speed data over wide area networks (WANs)?

- A. PPP
- B. X.25
- C. Frame relay
- D. SLIP

Answer: C

NEW QUESTION 57

In your office, you are building a new wireless network that contains Windows 2003 servers. To establish a network for secure communication, you have to implement IPSec security policy on the servers. What authentication methods can you use for this implementation? Each correct answer represents a complete solution. Choose all that apply.

- A. Public-key cryptography
- B. Kerberos
- C. Preshared keys
- D. Digital certificates

Answer: BCD

NEW QUESTION 58

Kerberos is a computer network authentication protocol that allows individuals communicating over a non-secure network to prove their identity to one another in a secure manner. Which of the following statements are true about the Kerberos authentication scheme? Each correct answer represents a complete solution. Choose all that apply.

- A. Kerberos requires continuous availability of a central serve
- B. Dictionary and brute force attacks on the initial TGS response to a client may reveal the subject's password
- C. Kerberos builds on Asymmetric key cryptography and requires a trusted third part
- D. Kerberos requires the clocks of the involved hosts to be synchronize

Answer: ABD

NEW QUESTION 62

You work as a CSO (Chief Security Officer) for Tech Perfect Inc. You want to perform the following tasks: Develop a risk-driven enterprise information security architecture. Deliver security infrastructure solutions that support critical business initiatives. Which of the following methods will you use to accomplish these tasks?

- A. Service-oriented architecture
- B. Sherwood Applied Business Security Architecture
- C. Service-oriented modeling framework
- D. Service-oriented modeling and architecture

Answer: B

NEW QUESTION 65

A network is configured on a Bus topology. Which of the following conditions could cause a network failure? Each correct answer represents a complete solution. Choose all that apply.

- A. A break in a network cable
- B. 75 ohm terminators at open ends
- C. A powered off workstation
- D. An open-ended cable without terminators

Answer: ABD

NEW QUESTION 68

Which of the following is an input device that is used for controlling machines such as cranes, trucks, underwater unmanned vehicles, wheelchairs, surveillance cameras, and zero turning radius lawn mowers?

- A. PS/2
- B. Joystick
- C. Microphone
- D. AGP

Answer: B

NEW QUESTION 73

You work as an Incident handling manager for Orangesect Inc. You detect a virus attack incident in the network of your company. You develop a signature based on the characteristics of the detected virus. Which of the following phases in the Incident handling process will utilize the signature to resolve this incident?

- A. Eradication
- B. Identification
- C. Recovery
- D. Containment

Answer: A

NEW QUESTION 77

Which of the following protocols provides connectionless integrity and data origin authentication of IP packets?

- A. ESP
- B. AH
- C. IKE
- D. ISAKMP

Answer: B

NEW QUESTION 80

Which of the following devices is a least expensive power protection device for filtering the electrical stream to control power surges, noise, power sags, and power spikes?

- A. Line Conditioner
- B. Surge Suppressor
- C. Uninterrupted Power Supply (UPS)
- D. Expansion Bus

Answer: C

NEW QUESTION 81

You work as a Project Manager for Tech Perfect Inc. You are creating a document which emphasizes the formal study of what your organization is doing currently and where it will be in the future. Which of the following analysis will help you in accomplishing the task?

- A. Cost-benefit analysis
- B. Gap analysis
- C. Requirement analysis

D. Vulnerability analysis

Answer: B

NEW QUESTION 86

Which of the following statements about incremental backup are true? Each correct answer represents a complete solution. Choose two.

- A. It is the fastest method of backing up data
- B. It is the slowest method for taking a data backup
- C. It backs up the entire database, including the transaction log
- D. It backs up only the files changed since the most recent backup and clears the archive bit

Answer: AD

NEW QUESTION 87

You work as a Network Administrator for Blue Bell Inc. The company has a TCP-based network. The company has two offices in different cities. The company wants to connect the two offices by using a public network. You decide to configure a virtual private network (VPN) between the offices. Which of the following protocols is used by VPN for tunneling?

- A. L2TP
- B. HTTPS
- C. SSL
- D. IPSec

Answer: A

NEW QUESTION 92

Which of the following encryption algorithms are based on block ciphers?

- A. RC4
- B. Twofish
- C. Rijndael
- D. RC5

Answer: BCD

NEW QUESTION 97

John works as a security manager for SoftTech Inc. He is working with his team on the disaster recovery management plan. One of his team members has a doubt related to the most cost effective DRP testing plan. According to you, which of the following disaster recovery testing plans is the most cost-effective and efficient way to identify areas of overlap in the plan before conducting more demanding training exercises?

- A. Evacuation drill
- B. Walk-through drill
- C. Structured walk-through test
- D. Full-scale exercise

Answer: C

NEW QUESTION 99

Which of the following security protocols provides confidentiality, integrity, and authentication of network traffic with end-to-end and intermediate-hop security?

- A. IPSec
- B. SET
- C. SWIPE
- D. SKIP

Answer: C

NEW QUESTION 104

You are calculating the Annualized Loss Expectancy (ALE) using the following formula: $ALE = AV * EF * ARO$ What information does the AV (Asset Value) convey?

- A. It represents how many times per year a specific threat occurs
- B. It represents the percentage of loss that an asset experiences if an anticipated threat occurs
- C. It is expected loss for an asset due to a risk over a one year period
- D. It represents the total cost of an asset, including the purchase price, recurring maintenance, expenses, and all other costs

Answer: D

NEW QUESTION 106

You work as a Network Administrator for NetTech Inc. When you enter <http://66.111.64.227> in the browser's address bar, you are able to access the site. But, you are unable to access the site when you enter <http://www.company.com>. What is the most likely cause?

- A. The site's Web server is offline
- B. The site's Web server has heavy traffic
- C. WINS server has no NetBIOS name entry for the server

D. DNS entry is not available for the host nam

Answer: D

NEW QUESTION 107

Which of the following processes identifies the threats that can impact the business continuity of operations?

- A. Function analysis
- B. Risk analysis
- C. Business impact analysis
- D. Requirement analysis

Answer: C

NEW QUESTION 112

What are the benefits of using AAA security service in a network? Each correct answer represents a part of the solution. Choose all that apply.

- A. It provides scalabilit
- B. It supports a single backup syste
- C. It increases flexibility and control of access configuratio
- D. It supports RADIUS, TACACS+, and Kerberos authentication method

Answer: ACD

NEW QUESTION 117

Which of the following authentication methods support mutual authentication? Each correct answer represents a complete solution. Choose two.

- A. MS-CHAP v2
- B. NTLM
- C. EAP-MD5
- D. EAP-TLS

Answer: AD

NEW QUESTION 118

Which of the following schemes is used by the Kerberos authentication?

- A. Public key cryptography
- B. One time password
- C. Private key cryptography
- D. OPIE

Answer: C

NEW QUESTION 123

You are advising a school district on disaster recovery plans. In case a disaster affects the main IT centers for the district they will need to be able to work from an alternate location. However, budget is an issue. Which of the following is most appropriate for this client?

- A. Warm site
- B. Cold site
- C. Off site
- D. Hot site

Answer: B

NEW QUESTION 128

You are implementing some security services in an organization, such as smart cards, biometrics, access control lists, firewalls, intrusion detection systems, and clipping levels. Which of the following categories of implementation of the access control includes all these security services?

- A. Administrative access control
- B. Logical access control
- C. Physical access control
- D. Preventive access control

Answer: B

NEW QUESTION 130

Which of the following protocols work at the Network layer of the OSI model?

- A. Routing Information Protocol (RIP)
- B. File Transfer Protocol (FTP)
- C. Simple Network Management Protocol (SNMP)
- D. Internet Group Management Protocol (IGMP)

Answer: AD

NEW QUESTION 132

Which of the following are used to suppress paper or wood fires? Each correct answer represents a complete solution. Choose two.

- A. Soda acid
- B. Kerosene
- C. Water
- D. CO2

Answer: AC

NEW QUESTION 133

You work as a Chief Security Officer for Tech Perfect Inc. The company has a TCP/IP based network. You want to use a firewall that can track the state of active connections of the network and then determine which network packets are allowed to enter through the firewall. Which of the following firewalls has this feature?

- A. Stateful packet inspection firewall
- B. Proxy-based firewall
- C. Dynamic packet-filtering firewall
- D. Application gateway firewall

Answer: C

NEW QUESTION 136

Fill in the blank with the appropriate security device. ____ is a device that contains a physical mechanism or electronic sensor that quantifies motion that can be either integrated with or connected to other devices that alert the user of the presence of a moving object within the field of view.

- A. Motion detector

Answer: A

NEW QUESTION 141

Which of the following uses a Key Distribution Center (KDC) to authenticate a principle?

- A. CHAP
- B. PAP
- C. Kerberos
- D. TACACS

Answer: C

NEW QUESTION 145

Which of the following is a network service that stores and organizes information about a network users and network resources and that allows administrators to manage users' access to the resources?

- A. SMTP service
- B. Terminal service
- C. Directory service
- D. DFS service

Answer: C

NEW QUESTION 150

Which of the following are types of asymmetric encryption algorithms? Each correct answer represents a complete solution. Choose two.

- A. RSA
- B. AES
- C. ECC
- D. DES

Answer: AC

NEW QUESTION 152

Which of the following components come under the network layer of the OSI model? Each correct answer represents a complete solution. Choose two.

- A. Routers
- B. MAC addresses
- C. Firewalls
- D. Hub

Answer: AC

NEW QUESTION 153

Which of the following are examples of physical controls used to prevent unauthorized access to sensitive materials?

- A. Thermal alarm systems

- B. Security Guards
- C. Closed circuit cameras
- D. Encryption

Answer: ABC

NEW QUESTION 157

At which of the following layers of the Open System Interconnection (OSI) model the Internet Control Message Protocol (ICMP) and the Internet Group Management Protocol (IGMP) work?

- A. The Physical layer
- B. The Data-Link layer
- C. The Network layer
- D. The Presentation layer

Answer: C

NEW QUESTION 162

Which of the following statements about Discretionary Access Control List (DACL) is true?

- A. It specifies whether an audit activity should be performed when an object attempts to access a resource
- B. It is a unique number that identifies a user, group, and computer account
- C. It is a list containing user accounts, groups, and computers that are allowed (or denied) access to the object
- D. It is a rule list containing access control entries

Answer: C

NEW QUESTION 167

Which of the following methods will allow data to be sent on the Internet in a secure format?

- A. Serial Line Interface Protocol
- B. Point-to-Point Protocol
- C. Browsing
- D. Virtual Private Networks

Answer: D

NEW QUESTION 171

Which of the following are used to suppress electrical and computer fires? Each correct answer represents a complete solution. Choose two.

- A. Halon
- B. Water
- C. CO2
- D. Soda acid

Answer: AC

NEW QUESTION 175

Which of the following are natural environmental threats that an organization faces? Each correct answer represents a complete solution. Choose two.

- A. Strikes
- B. Floods
- C. Accidents
- D. Storms

Answer: BD

NEW QUESTION 176

Which of the following SDLC phases consists of the given security controls: Misuse Case Modeling Security Design and Architecture Review Threat and Risk Modeling Security Requirements and Test Cases Generation

- A. Design
- B. Maintenance
- C. Deployment
- D. Requirements Gathering

Answer: A

NEW QUESTION 180

Shoulder surfing is a type of in-person attack in which the attacker gathers information about the premises of an organization. This attack is often performed by looking surreptitiously at the keyboard of an employee's computer while he is typing in his password at any access point such as a terminal/Web site. Which of the following is violated in a shoulder surfing attack?

- A. Integrity
- B. Availability

- C. Authenticity
- D. Confidentiality

Answer: D

NEW QUESTION 182

You work as a Security Manager for Tech Perfect Inc. A number of people are involved with you in the DRP efforts. You have maintained several different types of plan documents, intended for different audiences. Which of the following documents will be useful for you as well as public relations personnel who require a non-technical perspective on the entire organization's disaster recovery efforts?

- A. Technical guide
- B. Executive summary
- C. Checklist
- D. Department-specific plan

Answer: B

NEW QUESTION 187

Which of the following backup types backs up files that have been added and all data that have been modified since the most recent backup was performed?

- A. Differential backup
- B. Incremental backup
- C. Daily backup
- D. Full backup

Answer: B

NEW QUESTION 189

Which of the following are the goals of a public key infrastructure (PKI)? Each correct answer represents a part of the solution. Choose all that apply.

- A. Authenticity
- B. Globalization
- C. Mobility
- D. Integrity
- E. Confidentiality
- F. Nonrepudiation

Answer: ADEF

NEW QUESTION 192

In which of the following phases of the SDLC does the software and other components of the system faithfully incorporate the design specifications and provide proper documentation and training?

- A. Initiation
- B. Programming and training
- C. Design
- D. Evaluation and acceptance

Answer: B

NEW QUESTION 194

You have just set up a wireless network for customers at a coffee shop. Which of the following are good security measures to implement? Each correct answer represents a complete solution. Choose two.

- A. MAC filtering the router
- B. Not broadcasting SSID
- C. Using WEP encryption
- D. Using WPA encryption

Answer: CD

NEW QUESTION 198

Which of the following encryption methods comes under symmetric encryption algorithm? Each correct answer represents a complete solution. Choose three.

- A. DES
- B. Blowfish
- C. RC5
- D. Diffie-Hellman

Answer: ABC

NEW QUESTION 201

You are the Network Administrator for a bank. In addition to the usual security issues, you are concerned that your customers could be the victim of phishing attacks that use fake bank Web sites. Which of the following would protect against this?

- A. MAC
- B. Mutual authentication
- C. Three factor authentication
- D. Two factor authentication

Answer: B

NEW QUESTION 204

Which of the following are man-made threats that an organization faces? Each correct answer represents a complete solution. Choose three.

- A. Theft
- B. Employee errors
- C. Strikes
- D. Frauds

Answer: ABD

NEW QUESTION 207

In which of the following access control models, owner of an object decides who is allowed to access the object and what privileges they have?

- A. Access Control List (ACL)
- B. Mandatory Access Control (MAC)
- C. Role Based Access Control (RBAC)
- D. Discretionary Access Control (DAC)

Answer: D

NEW QUESTION 211

Which of the following encryption algorithms is used by the Clipper chip, which supports the escrowed encryption standard?

- A. Skipjack
- B. Blowfish
- C. AES
- D. IDEA

Answer: A

NEW QUESTION 213

An organization has implemented a hierarchical-based concept of privilege management in which administrators have full access, HR managers have less permission than the administrators, and data entry operators have no access to resources. Which of the following access control models is implemented in the organization?

- A. Role-based access control (RBAC)
- B. Network-based access control (NBAC)
- C. Mandatory Access Control (MAC)
- D. Discretionary access control (DAC)

Answer: A

NEW QUESTION 216

Access control systems enable an authority to control access to areas and resources in a given physical facility or computer-based information system. Which of the following services provided by access control systems is used to determine what a subject can do?

- A. Authentication
- B. Authorization
- C. Accountability
- D. Identification

Answer: B

NEW QUESTION 219

You work as an administrator for Techraft Inc. Employees of your company create 'products', which are supposed to be given different levels of access. You need to configure a security policy in such a way that an employee (producer of the product) grants accessing privileges (such as read, write, or alter) for his product. Which of the following access control models will you use to accomplish this task?

- A. Discretionary access control (DAC)
- B. Role-based access control (RBAC)
- C. Mandatory access control (MAC)
- D. Access control list (ACL)

Answer: A

NEW QUESTION 223

Which of the following decides access control on an object in the mandatory access control (MAC) environment?

- A. Sensitivity label
- B. Event log
- C. System Access Control List (SACL)
- D. Security log

Answer: A

NEW QUESTION 224

Fill in the blank with the appropriate encryption system. The ____ encryption system is an asymmetric key encryption algorithm for the public-key cryptography, which is based on the Diffie- Hellman key agreement.

- A. ElGamal

Answer: A

NEW QUESTION 225

You are the Network Administrator for a large corporate network. You want to monitor all network traffic on your local network for suspicious activities and receive a notification when a possible attack is in process. Which of the following actions will you take for this?

- A. Install a network-based IDS
- B. Install a host-based IDS
- C. Install a DMZ firewall
- D. Enable verbose logging on the firewall

Answer: A

NEW QUESTION 227

John works as an Ethical Hacker for company Inc. He wants to find out the ports that are open in company's server using a port scanner. However, he does not want to establish a full TCP connection. Which of the following scanning techniques will he use to accomplish this task?

- A. TCP FIN
- B. Xmas tree
- C. TCP SYN/ACK
- D. TCP SYN

Answer: D

NEW QUESTION 230

Which of the following categories of access controls is deployed in the organization to prevent all direct contacts with systems?

- A. Detective access control
- B. Physical access control
- C. Technical access control
- D. Administrative access control

Answer: B

NEW QUESTION 235

Which of the following is an infrastructure system that allows the secure exchange of data over an unsecured network?

- A. PMK
- B. PTK
- C. PKI
- D. GTK

Answer: C

NEW QUESTION 240

Which of the following authentication methods is based on physical appearance of a user?

- A. Key fob
- B. Biometrics
- C. ID/password combination
- D. Smart card

Answer: B

NEW QUESTION 244

Which of the following is a correct sequence of different layers of Open System Interconnection (OSI) model?

- A. Physical layer, data link layer, network layer, transport layer, presentation layer, session layer, and application layer
- B. Physical layer, network layer, transport layer, data link layer, session layer, presentation layer, and application layer
- C. application layer, presentation layer, network layer, transport layer, session layer, data link layer, and physical layer
- D. Physical layer, data link layer, network layer, transport layer, session layer, presentation layer, and application layer

Answer: D

NEW QUESTION 246

Which of the following are used to suppress gasoline and oil fires? Each correct answer represents a complete solution. Choose three.

- A. Water
- B. CO2
- C. Halon
- D. Soda acid

Answer: BCD

NEW QUESTION 247

Fill in the blank with the appropriate phrase. The is a simple document that provides a high-level view of the entire organization's disaster recovery efforts.

- A. Executive summary

Answer: A

NEW QUESTION 252

You work as a Chief Security Officer for Tech Perfect Inc. You have configured IPSec and ISAKMP protocol in the company's network in order to establish a secure communication infrastructure. ccording to the Internet RFC 2408, which of the following services does the ISAKMP protocol offer to the network? Each correct answer represents a part of the solution. Choose all that apply.

- A. It relies upon a system of security association
- B. It provides key generation mechanism
- C. It authenticates communicating peer
- D. It protects against threats, such as DoS attack, replay attack, et

Answer: BCD

NEW QUESTION 253

Which of the following methods offers a number of modeling practices and disciplines that contribute to a successful service-oriented life cycle management and modeling?

- A. Service-oriented modeling framework (SOMF)
- B. Service-oriented modeling and architecture (SOMA)
- C. Sherwood Applied Business Security Architecture (SABSA)
- D. Service-oriented architecture (SOA)

Answer: A

NEW QUESTION 256

Which of the following are types of access control attacks? Each correct answer represents a complete solution. Choose all that apply.

- A. Dictionary attack
- B. Mail bombing
- C. Spoofing
- D. Brute force attack

Answer: BCD

NEW QUESTION 259

Which of the following authentication protocols sends a user certificate inside an encrypted tunnel?

- A. PEAP
- B. EAP-TLS
- C. WEP
- D. EAP-FAST

Answer: B

NEW QUESTION 263

You work as a Network Administrator for NetTech Inc. The company's network is connected to the Internet. For security, you want to restrict unauthorized access to the network with minimum administrative effort. You want to implement a hardware-based solution. What will you do to accomplish this?

- A. Connect a brouter to the network
- B. Implement a proxy server on the network
- C. Connect a router to the network
- D. Implement firewall on the network

Answer: D

NEW QUESTION 266

Which of the following security architectures defines how to integrate widely disparate applications for a world that is Web-based and uses multiple implementation platforms?

- A. Sherwood Applied Business Security Architecture
