

## **Microsoft**

### **Exam Questions MD-100**

Windows 10

### NEW QUESTION 1

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

Use the following login credentials as needed:

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only:

Lab Instance: 10921597

You need to create a group named Group2 on Client2. The members of Group2 must be able to change the system time. The solution must use the principle of least privilege.

To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

**Answer:** A

#### Explanation:

See explanation below.

On Client2, Press Windows+R

Type lusrmgr.msc

Right click Groups and click New Group.

Type in the Group name and a description.

Click Add to add members to this group. Specify the name of the user or group or computer to be added.

Click Create and Close.

Press the Win + R keys to open Run, type secpol.msc into Run, and click/tap on OK to open Local Security Policy.

Expand open Local Policies in the left pane of Local Security Policy, click/tap on User Rights Assignment, and double click/tap on the Change the system time policy in the right pane.

Click/tap on the Add User or Group button.

Click/tap on the Object Types button.

Check all the boxes for Object types, and click/tap on the OK.

Click/tap on the Advanced button.

Click/tap on the Find Now button, select the name of the user or group

Click/tap on OK.

Click/tap on OK.

When finished, you can close Local Users and Groups.

### NEW QUESTION 2

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. Computer1 connects to multiple wireless networks.

You need to view the wireless networks to which Computer1 connects. What should you use?

- A. the System log in Event Viewer
- B. Wi-Fi in the Settings app
- C. the properties of the wireless adapter in Network Connections in Control Panel
- D. the Details tab for the wireless adapter in Device Manager

**Answer:** B

#### Explanation:

Reference:

<https://www.windowcentral.com/how-connect-wi-fi-network-windows-10>

### NEW QUESTION 3

- (Exam Topic 4)

Your network contains an Active Directory domain named adatum.com, a workgroup, and computers that run Windows 10. The computers are configured as shown in the following table.

The local Administrator accounts on Computer1, Computer2, and Computer3 have the same user name and password.

On Computer1, Windows Defender Firewall is configured as shown in the following exhibit.

The services on Computer1 have the following states.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: No

Because the firewall is blocking Remote Volume Management.

Box 2: No

Because the Remote Registry Service is stopped.

Box 3: No

Because the Remote Registry Service is stopped. Perfmon needs both the RPC service and the Remote Registry service to be running.

**NEW QUESTION 4**

- (Exam Topic 4)

You have a Microsoft Azure Active Directory (Azure AD) tenant named contoso.com that contain the users shown in the following table.

You have a computer named Computer1 that runs Windows 10.

User1 joins Computer1 to Azure AD by using user1@contoso.com.

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

#### **NEW QUESTION 5**

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains a group named Group1.

All the computers in the domain run Windows 10. Each computer contains a folder named C:\Documents that has the default NTFS permissions set.

You add a folder named C:\Documents\Templates to each computer.

You need to configure the NTFS permissions to meet the following requirements: All domain users must be able to open the files in the Templates folder.

Only the members of Group1 must be allowed to edit the files in the Templates folder.

How should you configure the NTFS settings on the Templates folder? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

**NEW QUESTION 6**

- (Exam Topic 4)

You have a computer that runs Windows 10. The computer contains a folder named C:\ISOs that is shared in ISOs. You run several commands on the computer as shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.  
NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

**NEW QUESTION 7**

- (Exam Topic 4)

You have a workgroup computer named Computer1 that runs Windows 10 and has the users shown in the following table.

You have a file named File1.reg that contains the following content.

You need to identify what occurs when User1 and User2 double-click File1.reg.  
What should you identify? To answer, select the appropriate options in the answer area.  
NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1:

User1 is a member of the Administrators group so has permission to add keys to both registry hives.

Box 2:

User2 is a standard user so does not have permission to add a key to the HKEY\_LOCAL\_MACHINE registry hive so Key2 will not be imported.

**NEW QUESTION 8**

- (Exam Topic 4)

Note: This question is part of series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question In this section, you will NOT be able to return to it. As a result these question will not appear In the review screen.

You have two computers named Computer1 and Computer2 that run Windows 10.

You have an Azure Active Directory (Azure AD) user account named admin@contoso.com that is m the local Administrators group on each computer.

You sign m to Compute1 by using admin@contoso.com.

You need to ensure that you can use Event Viewer on Computer1 to connect to the event logs on Computer?.

Solution: On Computer2, you create a Windows Defender Firewall rule that allows eventvwr.exe. Does this meet the goal?

- A. Yes
- B. No

**Answer:** B

**NEW QUESTION 9**

- (Exam Topic 2)

You need to meet the technical requirements for EFS on ComputerA. What should you do?

- A. Run certutil.exe, and then add a certificate to the local computer certificate store.
- B. Run cipher.exe, and then add a certificate to the local computer certificate store.
- C. Run cipher.exe, and then add a certificate to the local Group Policy.
- D. Run certutil.exe, and then add a certificate to the local Group Policy.

**Answer:** D

**Explanation:**

References:

<https://docs.microsoft.com/en-us/windows/security/information-protection/windows-information-protection/crea>

**NEW QUESTION 10**

- (Exam Topic 1)

You need to implement a solution to configure the contractors' computers.

What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

B. Not Mastered

**Answer:** A

**Explanation:**

References:

<https://docs.microsoft.com/en-us/windows/configuration/provisioning-packages/provisioning-install-icd>

#### NEW QUESTION 10

- (Exam Topic 1)

You need to sign in as LocalAdmin on Computer11. What should you do first?

- A. From the LAPS UI tool, view the administrator account password for the computer object of Computer11.
- B. From Local Security Policy, edit the policy password settings on Computer11.
- C. From the LAPS UI tool, reset the administrator account password for the computer object of Computer11.
- D. From Microsoft Intune, edit the policy password settings on Computer11.

**Answer:** A

**Explanation:**

References:

<https://technet.microsoft.com/en-us/mt227395.aspx>

#### NEW QUESTION 11

- (Exam Topic 4)

You have a computer named Computer 1 that runs Windows 10.

You turn on System Protection and create a restore point named Point1. You perform the following changes:

Add four files named File1.txt, File2.dll, File3.sys, and File4.exe to the desktop.

Run a configuration script that adds the following four registry keys:

- Key1 to HKEY\_CURRENT\_USER
- Key2 to HKEY\_CLASSES\_ROOT
- Key3 to HKEY\_LOCAL\_MACHINE\SYSTEM
- Key4 to HKEY\_CURRENT\_CONFIG

You restore Point1.

Which files and registry keys are removed? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

References:

<https://www.maketecheasier.com/what-system-restore-can-and-cannot-do-to-your-windows-system/> <https://superuser.com/questions/343112/what-does-windows-system-restore-exactly-back-up-and-restore>

#### NEW QUESTION 13

- (Exam Topic 4)

You are troubleshooting the network connectivity of a computer that runs Windows 10. The computer is connected physically to the network but rejects network traffic from an external source.

You need to reinstall the TCP/IP stack on the computer. What should you run?

- A. the `netsh int ip reset` command
- B. the `Resec-NetAdapcerAdvancedPropercy` cmdlet
- C. the `netcf g -d` command
- D. the `Debug-NetworkController` cmdlet

**Answer:** A

**Explanation:**

Reference: <https://howtofix.guide/reset-tcp-ip/>

**NEW QUESTION 14**

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

Use the following login credentials as needed:

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only: Lab Instance: 11145882

You need to ensure that Windows feature updates on Client1 are deferred for 15 days when the updates become generally available.

To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

See explanation below.

Select the Start button, then select Settings > Update & Security > Windows Update.

Under Update settings, select Advanced options.

From the boxes under Choose when updates are installed, select the number of days you would like to defer a feature update or a quality update. Reference:

<https://support.microsoft.com/en-us/help/4026834/windows-10-defer-feature-updates>

**NEW QUESTION 16**

- (Exam Topic 4)

You have two workgroup computers named Computer1 and Computer2 that run Windows 10. The Guest account is enabled on both computers.

The computers contain the users shown in the following table.

The computers contain the shared folders shown in the following table.

Computer1 has password-protected sharing turned on. Computer2 has password-protected sharing turned off. For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

When password protected sharing is turned on, only people who have a user account and password on your computer can access shared files.

Box 1: Yes

Password protected sharing is turned off on Computer2 so User1 can access Share2 from Computer1.

Box 2: Yes

Password protected sharing is turned on on Computer1. User2 has an account on Computer1 so User2 can access Share1 from Computer2.

Box 3: Yes

The answer to this question depends on which version of Windows 10 is running on the computers. This isn't specified in the question so it's likely that the question will be updated in future.

Password protected sharing is turned on on Computer1. User3 does not have an account on Computer1 so User3 cannot access Share1 from Computer2.

However, the Guest account is enabled which could provide access depending on which version of Windows 10 is running. If it is Windows 10 Home or Pro, then the

answer to this question is Yes. The Guest account does provide access. However, in later versions of Windows 10 Enterprise and Windows 10 Education (from build 1709 onwards), the Guest account does not enable access to the shared folder.

Reference:

<https://docs.microsoft.com/en-us/troubleshoot/windows-server/networking/guest-access-in-smb2-is-disabled-by>

**NEW QUESTION 18**

- (Exam Topic 4)

You have 100 computers that run Windows 10. The computers are in a workgroup. The computers have a low-bandwidth metered Internet connection.

You need to reduce the amount of Internet bandwidth consumed to download updates. What should you configure?

- A. BranchCache in hosted mode
- B. BranchCache in distributed cache mode
- C. Delivery Optimization
- D. Background intelligent Transfer Service (BITS)

**Answer:** C

**Explanation:**

References:

<https://support.microsoft.com/en-us/help/4468254/windows-update-delivery-optimization-faq>

**NEW QUESTION 19**

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

Use the following login credentials as needed:

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only: Lab Instance: 11145882

Administrators report that they cannot use Event Viewer to remotely view the event logs on Client3.

You need to ensure that the administrators can access the event logs remotely on Client3. The solution must ensure that Windows Firewall remains enabled.

To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

\* 1. Go to Control Panel -> System and Security -> Windows Firewall.

\* 2. Click on the Advanced settings link in the left-hand side.

\* 3. Enable COM+ Network Access (DCOM-In).

\* 4. Enable all the rules in the Remote Event Log Management group.

Reference:

<https://www.zubairalexander.com/blog/unable-to-access-event-viewer-on-a-remote-computer/>

### NEW QUESTION 23

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You deploy Windows 10 to a computer named Computer1.

Computer1 contains a folder named C:\Folder1. Folder1 contains multiple documents.

You need to ensure that you can recover the files in Folder1 by using the Previous Versions tab. Solution: You enable File History and add Folder1 to File History.

Does this meet the goal?

A. Yes

B. No

**Answer:** A

#### **Explanation:**

adding c:\Folder1 to File History WILL allow you to use the Previous Versions on that folder. Assuming you are able to turn File History on in the first place.

Reference:

<https://support.microsoft.com/en-za/help/17128/windows-8-file-history>

### NEW QUESTION 26

- (Exam Topic 4)

You have the computers shown in the following table.

You apply the 20H2 feature update as soon as the update is available.

How many months of servicing does each computer support without installing another feature update? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

A. Mastered

B. Not Mastered

**Answer:** A

#### **Explanation:**

Table Description automatically generated with medium confidence

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/update/get-started-updates-channels-tools>

### NEW QUESTION 28

- (Exam Topic 4)

Your network an Active Directory domain named adatum.com. The domain contains 50 computers that runs Windows 8.1. The computer has locally installed desktop application that are compatible with Windows 10.

You need to upgrade the computers to windows 10, The solution must preservr the locally installed desktop applications.

Solution: You use Microsoft Deployment Toolkit (MDT) and create a task sequence. One each compute, you run the task sequence.

Does the meet the goal?

A. Yes

B. No

**Answer:** B

### NEW QUESTION 33

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a laptop named Computer1 that runs Windows 10.

When in range, Computer1 connects automatically to a Wi-Fi network named Wireless1. You need to prevent Computer1 from automatically connecting to Wireless1.

Solution: From the properties of the Wi-Fi adapter, you disable Link-Layer Topology Discovery Responder. Does this meet the goal?

A. Yes

B. No

**Answer:** B

### NEW QUESTION 36

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains two computers named Computer1 and Computer2 that run Windows 10.

You need to modify the registry of Computer1 by using Registry Editor from Computer2. Which two registry hives can you modify? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. HKEY\_CURRENT\_USER
- B. HKEY\_LOCAL\_MACHINE
- C. HKEY\_USERS
- D. HKEY\_CLASSES\_ROOT
- E. HKEY\_CURRENT\_CONFIG

**Answer:** BC

### NEW QUESTION 41

- (Exam Topic 4)

SIMULATION

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

Use the following login credentials as needed:

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only:

Lab Instance: 10921597

You need to ensure that Client3 starts in safe mode automatically the next time the computer restarts. After completing the task, you must NOT restart Client3.

To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

**Answer:** A

#### Explanation:

\* 1. From Client3, open the System Configuration utility by pressing the Windows & R keys simultaneously to display the Run box .

\* 2. Type "msconfig" into the box, and then click OK.

\* 3. In the "System Configuration" window, switch to the "Boot" tab.

\* 4. Enable the "Safe Boot" check box, and then make sure the "Minimal" option below that is selected. Click the "OK" button when you're done.

\* 5. You will be prompted to Restart or Exit without restart. Click Exit without restart.

Reference:

<https://www.howtogeek.com/howto/windows-vista/force-windows-to-boot-into-safe-mode-without-using-the-f8>

### NEW QUESTION 42

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. Computer1 contains a folder named Data on drive C. The Advanced Security Settings for the Data folder are shown in the exhibit. (Click the Exhibit tab.)

You share C:\Data as shown in the following table.

User1 is a member of the Users group.

Administrators are assigned Full control NTFS permissions to C:\Data.

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

NO, NO, YES

"For example, for a resource, if you assign a user the Read permission and assign the Modify permission on a group that the same user is member of, the effective access permissions are a combination of the Read permissions and the modify permissions, which is modify permission. When you combine Permissions that include Deny permissions, NTFS will evaluate the the deny permissions before the allow permissions that are set on the same resource with explicit deny taking precedence over all Allow Permissions"

**NEW QUESTION 44**

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

Use the following login credentials as needed:

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only: Lab Instance: 11145882

You have already prepared Client1 for remote management.

You need to forward all events from the Application event log on Client1 to DC1.

To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Configuring the event source computer

\* 1. Run the following command from an elevated privilege command prompt on the Windows Server domain controller to configure Windows Remote Management:

`winrm qc -q`

\* 2. Start group policy by running the following command:

`%SYSTEMROOT%\System32\gpedit.msc`

\* 3. Under the Computer Configuration node, expand the Administrative Templates node, then expand the Windows Components node, then select the Event Forwarding node.

\* 4. Right-click the SubscriptionManager setting, and select Properties. Enable the SubscriptionManager setting, and click the Show button to add a server address to the setting. Add at least one setting that specifies the event collector computer. The SubscriptionManager Properties window contains an Explain tab that describes the syntax for the setting.

\* 5. After the SubscriptionManager setting has been added, run the following command to ensure the policy is applied: `gpupdate /force`

Configuring the event collector computer

\* 1. Run the following command from an elevated privilege command prompt on the Windows Server domain controller to configure Windows Remote Management:

`winrm qc -q`

\* 2. Run the following command to configure the Event Collector service:

`wecutil qc /q`

\* 3. Create a source initiated subscription. This can either be done programmatically, by using the Event Viewer, or by using Wecutil.exe. If you use Wecutil.exe, you must create an event subscription XML file and use the following command:

`wecutil cs configurationFile.xml`

Reference:

<https://docs.microsoft.com/en-us/windows/win32/wec/setting-up-a-source-initiated-subscription#forwarding-the>

**NEW QUESTION 48**

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer named Computer1 that runs Windows 10.

A service named Application1 is configured as shown in the exhibit.

You discover that a user used the Service1 account to sign in to Computer1 and deleted some files.

You need to ensure that the identity used by Application1 cannot be used by a user to sign in to sign in to the desktop on Computer1. The solution must use the principle of least privilege.

Solution: On Computer1, you assign Service1 the deny log on as a service user right. Does this meet the goal?

- A. Yes
- B. No

**Answer:** B

**Explanation:**

References:

<https://docs.microsoft.com/en-us/windows/security/threat-protection/security-policy-settings/deny-log-on-as-a-s>

**NEW QUESTION 50**

- (Exam Topic 4)

You install Windows 10 Pro on a computer named CLIENT1.

You need to ensure that all per-user services are disabled on CLIENT1. The solution must minimize administrative effort.

What should you use?

- A. a Group Policy administrative template
- B. Device Manager
- C. Task Manager
- D. Group Policy preferences

**Answer:** D

**Explanation:**

References:

<https://docs.microsoft.com/en-us/windows/application-management/per-user-services-in-windows>

**NEW QUESTION 51**

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain named contoso.com. The domain contains the users shown in the following table.

You have a computer named Computer1 that runs Windows 10 and is in a workgroup.

A local standard user on Computer1 named User1 joins the computer to the domain and uses the credentials of User2 when prompted.

You need to ensure that you can rename Computer1 as Computer33. Solution: You use the credentials of User3 on Computer1.

Does this meet the goal?

- A. Yes
- B. No

**Answer:** A

**Explanation:**

Renaming a domain-joined computer will also rename the computer account in the domain. To do this, you need domain administrator privileges.

User3 is a domain administrator. References:

<https://docs.microsoft.com/en-us/windows/security/identity-protection/access-control/active-directory-security-g>

**NEW QUESTION 54**

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. Computer1 is in a workgroup. Computer1 contains the local users shown in the following table.

You create a folder named Folder1 that has the permissions shown in the following table.

You create a file named File1.txt in Folder1 and allow Group2 Full control permissions to File1.txt. For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

References:

<https://www.dell.com/support/article/za/en/zadhs1/sln156352/understanding-file-and-folder-permissions-in-win>

**NEW QUESTION 57**

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows10. Computer1 is in a workgroup. Computer1 contains the users shown in the following table.

You need to apply the same Group Policy settings to only User1, User2 and User3. The solution must use a minimum number of local Group Policy objects (GPOs).

How many local GPOs should you create?

- A. 1
- B. 2
- C. 3

**Answer:** A

**Explanation:**

You can use security filtering to restrict the GPO to the required users. Only users with the Read and Apply Group Policy permissions will have the GPO applied to them.

**NEW QUESTION 61**

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. Computer1 is in a workgroup. Computer1 contains the local users shown in the following table.

The Users group has Modify permissions to a folder named D:\Folder1. User3 creates a file named File1.docx in Folder1.

Which users can take ownership of File1.docx?

- A. Administrator and User1 only
- B. Administrator only
- C. Administrator, User1, and User2
- D. Administrator and User2 only

**Answer:** B

**Explanation:**

Only a member of the Administrator's group can take ownership of a file or folder.

**NEW QUESTION 63**

- (Exam Topic 4)

You have 10 computers that run Windows 10 and have BitLocker Drive Encryption (BitLocker) enabled. You plan to update the firmware of the computers.

You need to ensure that you are not prompted for the BitLocker recovery key on the next restart. The drive must be protected by BitLocker on subsequent restarts.

Which cmdlet should you run?

- A. Unlock-BitLocker
- B. Disable-BitLocker
- C. Add-BitLockerKeyProtector
- D. Suspend-BitLocker

**Answer:** D

**Explanation:**

References:

<https://support.microsoft.com/en-us/help/4057282/bitlocker-recovery-key-prompt-after-surface-uefi-tpm-firmwa>

**NEW QUESTION 68**

- (Exam Topic 4)

You have a workgroup computer that runs Windows 10.

You need to set the minimum password length to 12 characters. What should you use?

- A. Local Group Policy Editor
- B. User Accounts in Control Panel
- C. System Protection in System Properties
- D. Sign-in options in the Settings app

**Answer:** A

### NEW QUESTION 72

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a workgroup computer that runs Windows 10. The computer contains the local user accounts shown in the following table.

You need to configure the desktop background for User1 and User2 only.

Solution: You create a new local group to which you add User1 and User2. You create a local Group Policy Object (GPO) and configure the Desktop Wallpaper setting in the GPO. At a command prompt, you run the gpupdate.exe/Force command.

Does this meet the goal?

- A. Yes
- B. No

**Answer:** A

#### Explanation:

References:

<https://www.windowscentral.com/how-apply-local-group-policy-settings-specific-users-windows-10>

### NEW QUESTION 73

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You deploy Windows 10 to a computer named Computer1.

Computer1 contains a folder named C:\Folder1. Folder1 contains multiple documents.

You need to ensure that you can recover the files in Folder1 by using the Previous Versions tab. Solution: You enable File History and add Folder1 in the Documents library.

Does this meet the goal?

- A. Yes
- B. No

**Answer:** A

#### Explanation:

Reference:

<https://support.microsoft.com/en-za/help/17128/windows-8-file-history>

### NEW QUESTION 76

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10.

You need to prevent standard users from changing the wireless network settings on Computer1. The solution must allow administrators to modify the wireless network settings.

What should you use?

- A. Windows Configuration Designer
- B. MSConfig
- C. Local Group Policy Editor
- D. an MMC console that has the Group Policy Object Editor snap-in

**Answer:** C

### NEW QUESTION 79

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a workgroup computer that runs Windows 10. The computer contains the local user accounts shown in the following table.

You need to configure the desktop background for User1 and User2 only.

Solution: From the local computer policy, you configure the Filter Options settings for the user policy. At a command prompt, you run the gpupdate.exe/Target:user command.

Does this meet the goal?

- A. Yes
- B. No

**Answer:** B

#### NEW QUESTION 82

- (Exam Topic 4)

Your network contains an Active Directory domain named contoso.com. The domain contains named Computer1 that runs Windows 10. On Computer1, you create an NTFS folder and assign Full control permissions to Everyone. You share the folder as Share1 and assign the permissions shown in the following table.

When accessing Share1, which two actions can be performed by User1 but not by User2? Each correct answer presents part of the solution.  
NOTE: Each correct selection is worth one point.

- A. Delete a file created by another user.
- B. Set the permissions for a file.
- C. Rename a file created by another user.
- D. Take ownership of file.
- E. Copy a file created by another user to a subfolder.

**Answer:** BD

#### Explanation:

References:  
<https://www.varonis.com/blog/ntfs-permissions-vs-share/>

#### NEW QUESTION 86

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains the users shown in the following table.

The Authenticated Users group has the Add workstations to domain user right in the Default Domain Controllers Policy. The Device Managers and Help Desk groups are granted the Create Computer objects permission for the Computers container of the domain. You have 15 workgroup computers that run Windows 10. Each computer contains a local user account named LocalAdmin1 that is a member of the following groups:

- Administrators
- Device Owners
- Authenticated Users

For each of the following statements, select Yes if the statement is true. Otherwise, select No.  
NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: No

User1 is a member of the Authenticated Users group which has the Add workstations to domain user right. However, with the Add workstations to domain user right, you are restricted to joining a maximum of 10 computers to the domain.

Box 2: No

User2 is a member of the Authenticated Users group which has the Add workstations to domain user right. User2 is also a member of the Device Managers group which is granted the Create Computer objects permission for the Computers container of the domain. The Create Computer objects permission overrides the 10-computer limit imposed by the Add workstations to domain user right so User2 can join more than 10 computers to the domain.

Box 3: Yes

User3 is a member of the Authenticated Users group which has the Add workstations to domain user right. User3 is also a member of the Help Desk group which is granted the Create Computer objects permission for the Computers container of the domain. The Create Computer objects permission overrides the 10-computer limit imposed by the Add workstations to domain user right so User3 can join all the computers to the domain.

**NEW QUESTION 88**

- (Exam Topic 4)

You have a computer that runs Windows 10 and is joined to Azure Active Directory (Azure AD). You attempt to open Control Panel and receive the error message shown on the following exhibit.

You need to be able to access Control Panel. What should you modify?

- A. the PowerShell execution policy
- B. the Local Group Policy
- C. the Settings app
- D. a Group policy preference

**Answer: B**

**Explanation:**

References:

<https://windows10skill.com/this-operation-has-been-cancelled-due-to-restrictions-in-effect-on-this-pc/>

**NEW QUESTION 91**

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains 10 computers that run Windows 10. On a different computer named Computer1, you plan to create a collector-initiated subscription to gather the event logs from the Windows 10 computers.

You need to configure the environment to support the event log collection.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Add Computer1 to the Event Log Readers group on the Windows 10 computers
- B. Add Computer1 to the Event Log Readers group on Computer1
- C. On the Windows 10 computers, change the Startup Type of Windows Event Collector to Automatic
- D. Enable Windows Remote Management (WinRM) on the Windows 10 computers
- E. Enable Windows Remote Management (WinRM) on Computer1

**Answer: AD**

**Explanation:**

References:

[https://docs.microsoft.com/en-us/previous-versions/windows/it-pro/windows-server-2008-R2-and-2008/cc748890\(v=ws.11\)](https://docs.microsoft.com/en-us/previous-versions/windows/it-pro/windows-server-2008-R2-and-2008/cc748890(v=ws.11))

**NEW QUESTION 96**

- (Exam Topic 4)

You have a computer named Computer5 that runs Windows 10 that is used to share documents in a workgroup.

You create three users named User-a, User-b, User-c. The users plan to access Computer5 from the network only.

You have a folder named Data. The Advanced Security Settings for the Data folder are shown in the Security exhibit. (Click the Security Exhibit tab).

You share the Data folder. The permission for User-a are shown in the User-a exhibit (Click the User-a tab.)

The permissions for user-b are shown in the User-b exhibit. (Click the User-b tab.)

The permissions for user-c are shown in the User-c exhibit. (Click the User-c tab.)

For each of the following statements, select Yes if the statements is true. Otherwise, select No.

NOTE: Reach correct selection is worth one point.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

No No Yes

**NEW QUESTION 97**

- (Exam Topic 4)

A user purchases a new computer that has Windows 10 Home preinstalled. The computer has a biometric fingerprint reader. You need to ensure that the user can use the fingerprint reader to sign in to the computer by using an Azure Active Directory (Azure AD) account. What should you do first?

- A. Register the computer to Azure AD.
- B. Install the latest feature updates on the computer.
- C. Upgrade the computer to Windows 10 Enterprise.
- D. Upgrade the computer to Windows 10 Pro.

**Answer:** B

**NEW QUESTION 101**

- (Exam Topic 4)

You have a VPN server that accepts PPTP and L2TP connections and is configured as shown in the following exhibit.

A user named User1 has a computer that runs Windows 10 and has a VPN connection configured as shown in the following exhibit.

User1 fails to establish a VPN connection when connected to a home network. You need to identify which VPN client setting must be modified. What should you identify?

- A. ServerAddress
- B. TunnelType
- C. AuthenticationMethod
- D. L2tpPsecAuth
- E. EncryptionLevel

**Answer:** A

**Explanation:**

The server address is a private IP address. This needs to be the public IP address of the VPN server.

**NEW QUESTION 102**

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer that runs Windows 10. The computer contains a folder named D:\Scripts. D:\Scripts contains several PowerShell scripts.

You need to ensure that you can run the PowerShell scripts without specifying the full path to the scripts. The solution must persist between PowerShell sessions.

Solution: From a command prompt, you run set.exe PATHEXT=d:\scripts. Does this meet the goal?

- A. Yes
- B. No

**Answer:** B

**NEW QUESTION 104**

- (Exam Topic 4)

You have 15 computers that run Windows 10. Each computer has two network interfaces named Interface1 and Interface2.

You need to ensure that network traffic uses Interface1, unless Interface1 is unavailable. What should you do?

- A. Run the Set-NetIPInterface -InterfaceAlias Interface1 -InterfaceMetric 1 command.
- B. Run the Set-NetAdapterBinding -Name Interface2 -Enabled \$true -ComponentID ms\_tcpip - ThrottleLimit 0 command.
- C. Set a static IP address on Interface 1.
- D. From Network Connections in Control Pane, modify the Provider Order.

**Answer:** A

**Explanation:**

References:

<https://tradingtechnologies.atlassian.net/wiki/spaces/KB/pages/27439127/How+to+Change+Network+Adapter+> <https://docs.microsoft.com/en-us/powershell/module/nettcpip/set-netipinterface?view=win10-ps>

**NEW QUESTION 109**

- (Exam Topic 4)

You have a computer named LON-CL1.Adatum.com that runs Windows 10.

From Event Viewer, you create a custom view named View1 that has the following filter:

User: User1

Logged: Any time

Event logs: System  
Computer: LON-CL1  
Event IDs: 10000 – 11000  
Event level: Error, Verbose  
You open Event Viewer and discover the event shown in the exhibit. (Click the Exhibit tab.)

The event does not appear in View1.  
You need to ensure that the event appears in View1. What should you do?

- A. Add a Task Category setting to the filter.
- B. Add the computer account to the Event Log Readers group.
- C. Create an event subscription.
- D. Modify the Computer setting in the filter.

**Answer:** D

**Explanation:**

References:  
<https://www.techrepublic.com/article/how-to-use-custom-views-in-windows-10s-event-viewer/>

**NEW QUESTION 111**

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have two computers named Computer1 and Computer2 that run Windows 10.

You have an Azure Active Directory (Azure AD) user account named admin@contoso.com that is in the local Administrators group on each computer.

You sign in to Computer1 by using admin@contoso.com.

You need to ensure that you can use Event Viewer on Computer1 to connect to the event logs on Computer2. Solution: On Computer2, you run the Enable-PSRemoting cmdlet.

Does this meet the goal?

- A. Yes
- B. No

**Answer:** A

**Explanation:**

The Enable-PSRemoting cmdlet configures the computer to receive PowerShell remote commands that are sent by using the WS-Management technology.

References:  
<https://docs.microsoft.com/en-us/powershell/module/microsoft.powershell.core/enable-psremoting?view=power>

**NEW QUESTION 116**

- (Exam Topic 4)

You install Windows 10 Enterprise on a new computer. You need to force activation on the computer.

Which command should you run?

- A. slmgr /upk
- B. Sec-RDLicenseConfiguration -Force
- C. Sec-MsolLicense -AddLicense
- D. slmgr /ato

**Answer:** D

**Explanation:**

References:  
<https://docs.microsoft.com/en-us/windows/deployment/volume-activation/activate-using-key-management-servi>

**NEW QUESTION 121**

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. Computer1 is in a workgroup. Computer1 contains the folders shown in the following table.

On Computer1, you create the users shown in the following table.

User1 encrypts a file named File1.txt that is in a folder named C:\Folder1.

What is the effect of the configuration? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

References:

<https://support.microsoft.com/en-za/help/310316/how-permissions-are-handled-when-you-copy-and-move-files>

**NEW QUESTION 123**

- (Exam Topic 4)

Your company deploys Windows 10 Enterprise to all computers. All the computers are joined to Microsoft Azure Active Directory (Azure AD).

The company purchases a new computer for a new user and creates an Azure AD account for the user. The user signs in to the computer by using the Azure AD account. The user discovers the activation error shown in the following exhibit.

You need to activate Windows 10 Enterprise on the computer. What should you do?

- A. In Azure A
- B. assign a Windows 10 Enterprise license to the user.
- C. At the command prompt, run `slmgr /lrc`.
- D. Reinstall Windows as Windows 10 Enterprise.
- E. At the command prompt, run `slmgr /ato`.

**Answer:** A

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/windows-10-subscription-activation>

**NEW QUESTION 125**

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a laptop named Computer1 that runs Windows 10.

When in range, Computer1 connects automatically to a Wi-Fi network named Wireless1. You need to prevent Computer1 from automatically connecting to Wireless1.

Solution: From the Settings app, you modify the properties of the Wireless1 known Wi-Fi network. Does this meet the goal?

- A. Yes
- B. No

**Answer:** A

**Explanation:**

Removing Wireless1 as a known Wi-Fi network on Computer1 will prevent it from automatically connecting. Note: You can also type `netsh wlan show profiles` in the Command Prompt to manage and delete wireless network profiles.

References:

<https://kb.netgear.com/29889/How-to-delete-a-wireless-network-profile-in-Windows-10>

**NEW QUESTION 130**

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the

stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen. You have two computers named Computer1 and Computer2 that run Windows 10. You have an Azure Active Directory (Azure AD) user account named admin@contoso.com that is in the local Administrators group on each computer. You sign in to Computer1 by using admin@contoso.com. You need to ensure that you can use Event Viewer on Computer1 to connect to the event logs on Computer2. Solution: On Computer2, you run the winrm quickconfig command. Does this meet the goal?

- A. Yes
- B. No

**Answer:** B

**Explanation:**

Windows Remote Management is a component of the Windows Hardware Management features that manage server hardware locally and remotely.

References:

<https://docs.microsoft.com/en-us/windows/win32/winrm/about-windows-remote-management>

**NEW QUESTION 134**

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains a user named User1. User1 creates a Microsoft account.

User1 needs to sign in to cloud resources by using the Microsoft account without being prompted for credentials.

Which settings should User1 configure?

- A. User Accounts in Control Panel
- B. Email & app accounts in the Settings app
- C. Users in Computer Management
- D. Users in Active Directory Users and Computers

**Answer:** B

**Explanation:**

References:

<https://support.microsoft.com/en-za/help/4028195/microsoft-account-how-to-sign-in>

**NEW QUESTION 139**

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains the users shown in the following table.

The domain contains a computer named Computer1 that runs Windows 10. Computer1 contains a folder named Folder1 that has the following permissions:

User2: Deny Write

Group1: Allow Read

Group2: Allow Modify

Folder1 is shared as Share1\$. Share1\$ has the following configurations:

Everyone: Allow Full control

Access-based enumeration: Enabled

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

YES, YES, NO

References:

<https://www.varonis.com/blog/ntfs-permissions-vs-share/>

<http://www.ntfs.com/ntfs-permissions-file-advanced.htm>

<https://docs.microsoft.com/en-us/windows-server/storage/dfs-namespaces/enable-access-based-enumeration-on>

**NEW QUESTION 144**

- (Exam Topic 4)

Your network contains an Active Directory domain named contoso.com. The domain contains a server named Server1 that runs Windows Server 2016 and a computer named Computer1 that runs Windows 10.

Server1 contains a share named Backup. All users can read and write data in Backup.

On Monday at 13:00, you configure Backup and Restore (Windows 7) on Computer1 to use the following settings:

Backup Destination: \\Server1\Backup

What do you want to back up?: Local Disk (D:), Include a system image of drives: System Reserved, (C:)

Schedule: Daily at 23:00

You need to identify how many backups will be available on Thursday at 17:00.

What should you identify? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

References:

[https://www.windowscentral.com/how-make-full-backup-windows-10#create\\_system\\_image\\_windows10](https://www.windowscentral.com/how-make-full-backup-windows-10#create_system_image_windows10)[https://](https://www.windowscentral.com/how-make-full-backup-windows-10#create_system_image_windows10)

**NEW QUESTION 148**

- (Exam Topic 4)

You have several computers that run Windows 10. The computers are in a workgroup and have BitLocker Drive Encryption (BitLocker) enabled.

You join the computers to Microsoft Azure Active Directory (Azure AD).

You need to ensure that you can recover the BitLocker recovery key for the computers from Azure AD. What should you do first?

- A. Disable BitLocker.
- B. Add a BitLocker key protector.
- C. Suspend BitLocker.
- D. Disable the TPM chip.

**Answer:** B

**Explanation:**

References:

<https://docs.microsoft.com/en-us/windows/security/information-protection/bitlocker/prepare-your-organization-f>

**NEW QUESTION 152**

- (Exam Topic 4)

You have a computer that runs Windows 10.

You discover that Windows updates are failing to install on the computer.

You need to generate a log file that contains detailed information about the failures. Which cmdlet should you run?

- A. Get-LogProperties
- B. Get-WindowsErrorReporting
- C. Get-WindowsUpdateLog
- D. Get-WinEvent

**Answer:** C

**Explanation:**

References:

<https://docs.microsoft.com/en-us/powershell/module/windowsupdate/get-windowsupdate-log?view=win10-ps>

**NEW QUESTION 156**

- (Exam Topic 4)

You have a workgroup computer named Computer1 that runs Windows 10. Computer1 has the users accounts shown in the following table:

Computer1 has the local Group Policy shown in the following table.

You create the Local Computer\Administrators policy shown in the following table.

You create the Local Computer\Non-Administrators policy shown in the following table.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Reference:

[https://docs.microsoft.com/en-us/previous-versions/windows/it-pro/windows-vista/cc766291\(v=ws.10\)](https://docs.microsoft.com/en-us/previous-versions/windows/it-pro/windows-vista/cc766291(v=ws.10))

**NEW QUESTION 159**

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10.

Log: System

Source: Kernel-General

Event ID: 16

You need to modify the settings of Action1. What should you use?

- A. the Settings app
- B. Task Scheduler
- C. Event Viewer
- D. System Configuration

**Answer:** C

**Explanation:**

An Event Viewer task is created and modified in Event Viewer. References:

<https://www.techrepublic.com/article/how-to-use-custom-views-in-windows-10s-event-viewer/>

**NEW QUESTION 164**

- (Exam Topic 4)

Your domain contains a computer named Computer1 that runs Windows 10. Computer1 does not have a TPM.

You need to be able to encrypt the C drive by using BitLocker Drive Encryption (BitLocker). The solution must ensure that the recovery key is stored in Active Directory.

Which two Group Policy settings should you configure? To answer, select the appropriate settings in the answer area.

NOTE: Each correct selection is worth one point.

From Event Viewer on Computer1, you have a task named Action1 that is attached to the following event:

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

References:

<https://docs.microsoft.com/en-us/windows/security/information-protection/bitlocker/bitlocker-group-policy-setti>

**NEW QUESTION 166**

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. Several users have signed in to Computer1 and have a profile.

You create a taskbar modification file named LayoutModification.xml.

You need to ensure that LayoutModification.xml will apply to all users who sign in to Computer1.

To which folder should you copy LayoutModification.xml?

- A. C:\Users\Public\Public Desktop
- B. C:\Windows\ShellExperiences
- C. C:\Users\Default\AppData\Local\Microsoft\Windows\Shell\
- D. C:\Windows\System32\Configuration

**Answer:** C

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/windows/configuration/start-layout-xml-desktop>

**NEW QUESTION 171**

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains a computer named Computer1 that runs Windows 10.

The domain contains the users shown in the following table.

Computer1 has the local users shown in the following table.

All users have Microsoft accounts.

Which two users can be configured to sign in by using their Microsoft account? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. User1
- B. User2
- C. User3
- D. User4
- E. User5

**Answer:** DE

**NEW QUESTION 176**

- (Exam Topic 4)

Your network contains an Active Directory domain named contoso.com. The domain contains two computers named Computer1 and Computer2 that run Windows 10 and are joined to the domain.

On Computer1, you create an event subscription named Subscription1 for Computer2 as shown in the Subscription1 exhibit. (Click the Subscription1 tab.)

Subscription1 is configured to use forwarded events as the destination log.

On Computer1, you create a custom view named View1 as shown in the View1 exhibit. (Click the View1 tab.)

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

#### NEW QUESTION 177

- (Exam Topic 4)

HOTSPOT

You have a computer named Computer1 that runs Windows 10.

You are troubleshooting Group Policy objects (GPOs) on Computer1.

You run `gpresult /user user1 /v` and receive the output shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

#### NEW QUESTION 181

- (Exam Topic 4)

You have the computers shown in the following table.

You need to identify which computers support the features.

BitLocker Drive Encryption (BitLocker)

Microsoft Application Virtualization (App-V)

Which computers support the features? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Graphical user interface, text, application Description automatically generated

References:

<https://www.microsoft.com/en-us/windowsforbusiness/compare>

**NEW QUESTION 186**

- (Exam Topic 4)

You manage devices that run Windows 10.

Ten sales users will travel to a location that has limited bandwidth that is expensive. The sales users will be at the location for three weeks.

You need to prevent all Windows updates from downloading for the duration of the trip. The solution must not prevent access to email and the Internet.

What should you do?

- A. From Network & Internet in the Settings app, set a data limit.
- B. From Accounts in the Settings app, turn off Sync settings.
- C. From Network & Internet in the Settings app, set the network connections as metered connections.
- D. From Update & Security in the Settings app, pause updates.

**Answer:** D

**NEW QUESTION 191**

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. Computer1 is in a workgroup. Computer1 contains the local users shown in the following table.

Computer1 contains the folders shown in the following table.

The Users group has Full control permissions to Folder1, Folder2, and Folder3. User1 encrypts two files named File1.docx and File2.docx in Folder1 by using EFS.

Which users can move each file? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

EFS works by encrypting a file with a bulk symmetric key. The symmetric key that is used to encrypt the file is then encrypted with a public key that is associated with the user who encrypted the file. Because the encryption & decryption operations are performed at a layer below NTFS, it is transparent to the user and all their applications.

Box 1: User1, User2, and Administrator Box 2: User1, User2, and Administrator

All three are members of the Users group that has Full control permissions to Folder1, Folder2, and Folder3.

**NEW QUESTION 194**

- (Exam Topic 4)

You have the computer shown in the following table.

You plan to configure deployment rings for Windows 10 quality and feature updates.

What is the maximum number of days you can defer installing quality updates, and which computers support installing feature updates from Windows Update? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Graphical user interface, text, application, email Description automatically generated

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/update/waas-configure-wufb>

**NEW QUESTION 198**

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10.

On Computer1, you create a VPN connection as shown in the following exhibit.

The corporate network contains a single IP subnet.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

**NEW QUESTION 201**

- (Exam Topic 4)

You have an Azure Active Directory (Azure AD) tenant named contoso.com. You have a workgroup computer named Computer1 that runs Windows 10. You need to add Computer1 to contoso.com.

What should you use?

- A. Computer Management
- B. dsregcmd.exe
- C. the Settings app
- D. netdom.exe

**Answer:** C

**Explanation:**

You join a computer to a domain, including an Azure AD domain in the Settings panel in Windows 10, under System->About

References: <https://aadguide.azurewebsites.net/aadjoin/>

**NEW QUESTION 204**

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains 10 computers that run Windows 10. Users in the finance department use the computers.

You have a computer named Computer1 that runs Windows 10.

From Computer1, you plan to run a script that executes Windows PowerShell commands on the finance department computers.

You need to ensure that you can run the PowerShell commands on the finance department from Computer1. What should you do on the finance department computers?

- A. From the local Group Policy, enable the Allow Remote Shell Access setting.
- B. From the local Group Policy, enable the Turn on Script Execution setting.
- C. From the Windows PowerShell, run the Enable-MMAgent cmdlet.
- D. From the Windows PowerShell, run the Enable-PSRemoting cmdlet.

**Answer:** D

**Explanation:**

References:

<https://docs.microsoft.com/en-us/powershell/module/microsoft.powershell.core/enable-psremoting?view=powershell-6>

**NEW QUESTION 206**

- (Exam Topic 4)

You are preparing to deploy Windows 10.

You download and install the Windows Assessment and Deployment Kit (Windows ADK). You need to create a bootable WinPE USB drive.

What should you do first?

- A. Run the MakeWinPEMedia command.
- B. Download and install Windows Configuration Designer.
- C. Run the WPEUcil command.
- D. Download and install the WinPE add-on.

**Answer: D**

**Explanation:**

WinPE used to be included in the Windows ADK. However, it is now provided as an add-on so the first step is to download and install the add-on.

References:

<https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/winpe-create-usb-bootable-drive> <https://docs.microsoft.com/en-us/windows-hardware/get-started/adk-install>

**NEW QUESTION 208**

- (Exam Topic 4)

You have a Microsoft Azure Active Directory (Azure AD) tenant.

Some users sign in to their computer by using Windows Hello for Business.

A user named User1 purchases a new computer and joins the computer to Azure AD.

User1 attempts to configure the sign-in options and receives the error message shown in the exhibit.

You open Device Manager and confirm that all the hardware works correctly.

You need to ensure that User1 can use Windows Hello for Business facial recognition to sign in to the computer.

What should you do first?

- A. Purchase an infrared (IR) camera.
- B. Upgrade the computer to Windows 10 Enterprise.
- C. Enable UEFI Secure Boot.
- D. Install a virtual TPM driver.

**Answer: B**

**Explanation:**

References:

<https://docs.microsoft.com/en-us/windows/security/identity-protection/hello-for-business/hello-planning-guide>

**NEW QUESTION 213**

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

Use the following login credentials as needed:

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only:

Lab Instance: 10921597

You need to create a file named Private.txt in a folder named Folder1 on the C drive of Client2.

You need to encrypt Private.txt and ensure that a user named User1 can view the contents of Private.txt.

To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

See explanation below.

After creating Private.txt and saving it Folder1, right-click on the Private.txt, and select Properties from the context menu.

On the General tab, click Advanced. Next, check the box "Encrypt contents to secure data" and click

OK.

A window will pop up asking you whether or not you want to encrypt the file and its parent folder.

Select the "Encrypt the file only" and click OK.

Private.txt will now show its file name in green color.

Right-click Private.txt and then select Properties.

Click Advanced on the General tab.

Click Details on the Advanced Attributes tab to open the User Access dialog box.

Click Add to open the Encrypting File System dialog box and then select User1.

Click OK to add User1 to the list of users who have access to the file.

Click OK until you've exited out of the dialog boxes.

#### NEW QUESTION 215

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a workgroup computer that runs Windows 10. The computer contains the local user accounts shown in the following table.

You need to configure the desktop background for User1 and User2 only.

Solution: From the local computer policy, you configure the Filter Options settings for the computer policy. Does this meet the goal?

A. Yes

B. No

**Answer: B**

#### NEW QUESTION 216

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains 500 computers that run Windows 10. The computers are used as shown in the following table.

You need to apply updates based on the computer usage. What should you configure?

A. Notifications & actions from System in the Settings apps.

B. the Windows Update for Business settings by using a Group Policy Object (GPO)

C. the Windows Installer settings by using a Group Policy Object (GPO)

D. Delivery Optimization from Update & Security in the Settings apps

**Answer: B**

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/update/waas-wufb-group-policy>

#### NEW QUESTION 220

- (Exam Topic 4)

You have 20 computers that run Windows 10. The computers are in a workgroup.

You need to create a local user named Admin1 on all the computers. Admin1 must be a member of the Remote Management Users group.

What should you do?

A. From Windows Configuration Designer, create a provisioning package, and then run the provisioning package on each computer.

B. Create a script that runs the New-ADUser cmdlet and the Set-AdGroup cmdlet.

C. Create a Group Policy object (GPO) that contains the Local User Group Policy preference.

D. Create a script that runs the New-MSolUser cmdlet and the Add-ADComputerServiceAccount cmdlet.

**Answer: A**

**Explanation:**

References:

<https://blogs.technet.microsoft.com/askpfplat/2017/11/06/use-group-policy-preferences-to-manage-the-local-ad>

#### NEW QUESTION 223

- (Exam Topic 4)

A user named User1 has a computer named Computer1 that runs Windows 10.

User1 connects to a Microsoft Azure virtual machine named VM1 by using Remote Desktop. User1 creates a VPN connection to a partner organization.

When the VPN connection is established, User1 cannot connect to VM1. When User1 disconnects from the VPN, the user can connect to VM1.

You need to ensure that User1 can connect to VM1 while connected to the VPN. What should you do?

- A. From the proxy settings, add the IP address of VM1 to the bypass list to bypass the proxy.
- B. From the properties of VPN1, clear the Use default gateway on remote network check box.
- C. From the properties of the Remote Desktop connection to VM1, specify a Remote Desktop Gateway (RDGateway).
- D. From the properties of VPN1, configure a static default gateway address.

**Answer:** B

#### Explanation:

References:

<https://www.stevejenkins.com/blog/2010/01/using-the-local-default-gateway-with-a-windows-vpn-connection/>

#### NEW QUESTION 224

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10.

You complete a full back up of Computer1 to an external USB drive. You store the USB drive offsite.

You delete several files from your personal Microsoft OneDrive account by using File Explorer, and then you empty the Recycle Bin on Computer1.

You need to recover the files 60 days after you deleted them in the least amount of time possible. What should you use?

- A. the OneDrive recycle bin
- B. the full backup on the external USB drive
- C. Recovery in the Settings app

**Answer:** B

#### Explanation:

References:

<https://support.office.com/en-us/article/restore-deleted-files-or-folders-in-onedrive-949ada80-0026-4db3-a953-c>

#### NEW QUESTION 225

- (Exam Topic 4)

You have a Microsoft Azure Active Directory (Azure AD) tenant.

Some users signs in to that computer by using Windows hello for Business. A user User1 purchases a new computer and joins the computer to Azure AD.

User1 attempts to configure the sign-in options and receives the error message shown in the exhibit. (Click the Exhibit tab.)

You open device Manager and confirmed that all the hardware works correctly.

You need to ensure that user1 can use Windows Hello for Business facial recognition to sign in to the computer.

What should you do first.

- A. Purchase an infrared (IR) camera.
- B. Install a virtual TPM driver.
- C. Enable UEFI Secure Boot.
- D. Upgrade the computer to windows 10 Enterprise.

**Answer:** D
