Exam Questions MD-100

Windows 10

https://www.2passeasy.com/dumps/MD-100/

NEW QUESTION 1
- (Exam Topic 4)
Your network contains an Active Directory domain. The domain contains computers that run Windows 10. You need to provide a user with the ability to remotely create and modify shares on the computers. The solution must use the principle of least privilege.
To which group should you add the user?

A. Power Users
B. Remote Management Users
C. Administrators
D. Network Configuration Operators

Answer: C

NEW QUESTION 2
- (Exam Topic 4)
Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.
When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.
Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.
Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.
Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.
Username and password

Use the following login credentials as needed:
To enter your password, place your cursor in the Enter password box and click on the password below.
Username: Contoso/Administrator
Password: Passw0rd!
The following information is for technical support purposes only:
Lab Instance: 10921597

You need to create a group named Group2 on Client2. The members of Group2 must be able to change the system time. The solution must use the principle of least privilege.
To complete this task, sign in to the required computer or computers.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
See explanation below.
On Client2, Press Windows+R
Type lusrmgr.msc
Right click Groups and click New Group.
Type in the Group name and a description.
Click Add to add members to this group. Specify the name of the user or group or computer to be added.
Click Create and Close.
Press the Win + R keys to open Run, type secpol.msc into Run, and click/tap on OK to open Local Security Policy.
Expand open Local Policies in the left pane of Local Security Policy, click/tap on User Rights Assignment, and double click/tap on the Change the system time policy in the right pane.
Click/tap on the Add User or Group button.
Click/tap on the Object Types button.
Check all the boxes for Object types, and click/tap on the OK.
Click/tap on the Advanced button.
Click/tap on the Find Now button, select the name of the user or group
Click/tap on OK.
Click/tap on OK.
When finished, you can close Local Users and Groups.

NEW QUESTION 3

- (Exam Topic 4)
You have a computer named Computer1 that runs Windows 10. Computer1 connects to multiple wireless networks.
You need to view the wireless networks to which Computer1 connects. What should you use?

A. the System log in Event Viewer
B. Wi-Fi in the Settings app
C. the properties of the wireless adapter in Network Connections in Control Panel
D. the Details tab for the wireless adapter in Device Manager

Answer: B

Explanation:

Reference:
https://www.windowscentral.com/how-connect-wi-fi-network-windows-10

NEW QUESTION 4
- (Exam Topic 4)
Your network contains an Active Directory domain named adatum.com, a workgroup, and computers that run Windows 10. The computers are configured as shown in the following table.

The local Administrator accounts on Computer1, Computer2, and Computer3 have the same user name and password.
On Computer1, Windows Defender Firewall is configured as shown in the following exhibit.

The services on Computer1 have the following states.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: No
Because the firewall is blocking Remote Volume Management.
Box 2: No
Because the Remote Registry Service is stopped.
Box 3: No
Because the Remote Registry Service is stopped. Perfmon needs both the RPC service and the Remote Registry service to be running.

NEW QUESTION 5
- (Exam Topic 4)
You deploy Windows 10 to several computers. The computers will be used by users who frequently present their desktop to other users.
You need to prevent applications from generating toast notifications in the notification area. Which settings should you configure from the Settings app?

A. Shared experiences
B. Privacy
C. Focus assist
D. Tablet mode

Answer: C

Explanation:
Focus Assist will automatically hide incoming notifications, so they don't pop up and distract you while you're playing a game, giving a presentation, or using a full-screen application.

NEW QUESTION 6
- (Exam Topic 4)
You have a computer that runs Windows 10. You can start the computer but cannot sign in.
You need to start the computer into the Windows Recovery Environment (WinRE). What should you do?

A. Turn off the compute
B. Turn on the computer, and then press F8.
C. Turn off the compute
D. Turn on the computer, and then press F10.
E. From the sign-in screen, hold the Shift key, and then click Restart.
F. Hold Alt+Ctrl+Delete for 10 seconds.

Answer: C

Explanation:

References:
https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/windows-recovery-environment--win

NEW QUESTION 7
- (Exam Topic 4)
You have a computer that runs Windows 10. The computer contains a folder named C:\ISOs that is shared in ISOs.
You run several commands on the computer as shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.
NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 8
- (Exam Topic 4)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You have two computers named Computer1 and Computer2 that run Windows 10.
You have an Azure Active Directory (Azure AD) user account named admin@contoso.com that is in the local Administrators group on each computer.
You sign in to Computer1 by using admin@contoso.com.
You need to ensure that you can use Event Viewer on Computer1 to connect to the event logs on Computer2. Solution: On Computer2, you create a Windows Defender Firewall rule that allows eventwr.exe.
Does this meet the goal?

A. Yes
B. No

Answer: B

Explanation:
Reference:
https://docs.microsoft.com/en-us/previous-versions/windows/it-pro/windows-server-2008-R2-and-2008/cc76643

NEW QUESTION 9
- (Exam Topic 4)
Note: This question is part of series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question In this section, you will NOT be able to return to It. As a result these question will not appear In the review screen.
You have two computers named Computer1 and Computer2 that run Windows 10.
You have an Azure Active Directory (Azure AD) user account named admin®contoso.com that is m the local Administrators group on each computer.
You sign m to Compute1 by using admin@contoso.com.
You need to ensure that you can use Event Viewer on Computer1 to connect to the event logs on Computer?.
Solution: On Computer2, you create a Windows Defender Firewall rule that allows eventwr.exe. Does this meet the goal?

A. Yes
B. No

Answer: B

NEW QUESTION 10
- (Exam Topic 3)
Which users can sign in to Computer3 when the computer starts in Safe Mode?

A. User31 only
B. User31 and User32 only
C. User31 andAdmin1 only
D. User31, User 32, User33, and Admin1
E. User31,User32, and User33 only

Answer: A

Explanation:
Only users with membership of the local Administrators group can log on to a computer in safe mode. Admin1 cannot log in because Computer3 is not joined to the domain.
References:
https://support.microsoft.com/en-us/windows/advanced-startup-options-including-safe-mode-b90e7808-80b5-a2

NEW QUESTION 10
- (Exam Topic 3)
You implement the planned changes for Computer1.
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
A screenshot of a computer Description automatically generated with low confidence
Box 1: Yes
User1 already has full control access through membership of Group1. Therefore, User1 can write to the file. Box 2: No
The planned changes will grant User2 full control access to the file. However, User2 is a member of Group2 which has Deny/Write access. The Deny permission will always take precedence. Therefore, User2 will not be able to write to the file.
Box 3: No
The planned changes will grant User3 full control access to the folder. That permission will be inherited by the file. However, User3 is a member of Group2 which has Deny/Write access. The Deny permission will always take precedence. Therefore, User3 will not be able to write to the file.

NEW QUESTION 12
- (Exam Topic 3)
You need to ensure that you can manage Computer2 by using Windows Admin Center on Server1. What should you do on Computer2?

A. Install the Remote Server Administration Tool (RSAT) optional features.
B. Run the winrm quickconfig command.
C. Set the Windows Management Service Startup type to Automatic and start the service.
D. Run the Sec-Location cmdlet.

Answer: B

Explanation:

References:
https://docs.microsoft.com/en-us/windows-server/manage/windows-admin-center/azure/manage-azure-vms

NEW QUESTION 13
- (Exam Topic 3)
Which Windows 10 computers can you ping successfully from Computer1 and Computer2? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Graphical user interface, text, application, chat or text message Description automatically generated
Box 1: Computer3 only.
Computer1 and Computer2 are domain joined so both will be using the Domain profile. The firewall rules on Computer1 allow outbound ICMP on all profiles so outbound ICMP will be allowed on the Domain profile.
The firewall rules on Computer2 allow inbound ICMP on the Public profile only, so it will be blocked on the domain profile. Therefore, Computer2 cannot be pinged.
The firewall rules on Computer3 allow inbound ICMP on all profiles. Therefore, Computer3 will not block the inbound pings.
Box 2: No Windows 10 computers.
The firewall rules on Computer2 allow outbound ICMP on the Private profile only, so it will be blocked on the domain profile. Therefore, Computer2 cannot ping any computers.

NEW QUESTION 15
- (Exam Topic 2)
You need to meet the technical requirement for Computer1.
What should you do? To answer, select the appropriate options in the answer area.

A. Mastered
B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 20
- (Exam Topic 2)
You need to meet the quality update requirement for ComputerA. For how long should you defer the updates?

A. 14 days
B. 10 years
C. 5 years
D. 180 days
E. 30 days

Answer: E

Explanation:
 References:
https://www.thewindowsclub.com/delay-defer-feature-updates-365-days-windows-10

NEW QUESTION 25
- (Exam Topic 2)
You need to meet the technical requirement for User6. What should you do?

A. Add User6 to the Remote Desktop Users group in the domain.
B. Remove User6 from Group2 in the domain.
C. Add User6 to the Remote Desktop Users group on Computer2.
D. And User6 to the Administrators group on Computer2.

Answer: B

NEW QUESTION 27
- (Exam Topic 2)
You need to meet the technical requirement for the IT department users. What should you do first?

A. Issue computer certificates
B. Distribute USB keys to the IT department users.
C. Enable screen saver and configure a timeout.
D. Turn on Bluetooth.

Answer: D

Explanation:
 References:
https://support.microsoft.com/en-za/help/4028111/windows-lock-your-windows-10-pc-automatically-when-you

NEW QUESTION 28
- (Exam Topic 1)
You need to reduce the amount of time it takes to restart Application1 when the application crashes. What should you include in the solution? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Reference:
https://www.howto-connect.com/how-to-attach-a-task-to-this-event-in-event-viewer-in-windows-10/

NEW QUESTION 31
- (Exam Topic 1)
An employee reports that she must perform a BitLocker recovery on her laptop. The employee does not have her BitLocker recovery key but does have a Windows 10 desktop computer.
What should you instruct the employee to do from the desktop computer?

A. Run the manage-bde.exe –status command
B. From BitLocker Recovery Password Viewer, view the computer object of the laptop
C. Go to https://account.activedirectory.windowsazure.com and view the user account profile
D. Run the Enable-BitLockerAutoUnlock cmdlet

Answer: C

Explanation:
References:
https://celedonpartners.com/blog/storing-recovering-bitlocker-keys-azure-active-directory/

NEW QUESTION 33
- (Exam Topic 1)
You need to sign in as LocalAdmin on Computer11. What should you do first?

A. From the LAPS UI tool, view the administrator account password for the computer object of Computer11.
B. From Local Security Policy, edit the policy password settings on Computer11.
C. From the LAPS UI tool, reset the administrator account password for the computer object of Computer11.
D. From Microsoft Intune, edit the policy password settings on Computer11.

Answer: A

Explanation:

References:
https://technet.microsoft.com/en-us/mt227395.aspx

NEW QUESTION 37
- (Exam Topic 4)
You have a computer named Computer1 that runs Windows 10. On Computer1, you turn on File History.
You need to protect a folder named D:\Folder1 by using File History. What should you do?

A. From File Explorer, modify the General settings of D:\Folder1
B. From File Settings app, configure the Backup settings
C. From the Settings app, configure the Recovery settings
D. From File History in Control Panel, configure the Select drive settings

Answer: B

Explanation:
To configure File History, click More options on the Backup screen. The Backup options screen allows you to set how often File History backs up your files and how long versions are saved.
References:
https://www.groovypost.com/howto/configure-windows-10-file-history/

NEW QUESTION 39
- (Exam Topic 4)
Use the drop-down menus to select the answer choice that completes each statement based on the information presented on the graphic.

NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 41
- (Exam Topic 4)
Your network contains an Active Directory domain. The domain contains a computer named Computer1 that runs Windows 10.
You need to view the settings to Computer1 by Group Policy objects (GPOs) in the domain and local Group Policies.
Which command should you run?

A. gpresult
B. secedit
C. gpupdate
D. gpfixup

Answer: A

Explanation:
 References:
https://docs.microsoft.com/en-us/windows-server/administration/windows-commands/gpresult

NEW QUESTION 44
- (Exam Topic 4)
You have a Microsoft 365 Enterprise E3 license.
You have a computer named Computer1 that runs Windows 10.
You need to ensure that you can access the files on Computer1 by using a web browser on another computer. What should you configure?

A. Sync your settings in the Settings app
B. the File Explorer desktop app
C. the Microsoft OneDrive desktop app
D. Default apps in the Settings app

Answer: C

NEW QUESTION 45
- (Exam Topic 4)
Your network contains an Active Directory domain. The domain contains a computer named Computer1 that runs Windows 10.
You need to ensure that Computer1 will respond to ping requests.
How should you configure Windows Defender Firewall on Computer1? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 50
- (Exam Topic 4)
Your network contains an Active Directory domain. the domain contains a computer named Computer1 that runs Windows 10. The domain contains the users shown in the following table.

Computer contains the shared folders shown in the following table.

The shared folders have the permissions shown in the following table.

For each of the following statements, select Yes if the statement is true. Otherwise select No. NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: No
Share1$ is a hidden share (dollar sign appended) so the share will never be visible.
Box 2: Yes
User2 is in Group1 and Group2. Both groups have access to Share1$. Therefore, the contents of the shared folder will be visible.
Box 3: No
User1 is in Group1. Group1 does not have the necessary security permission to access Share2. You need both security permissions (NTFS permissions) AND share permissions to view the contents of a shared folder. User1 has the necessary share permissions (Everyone: Read), but not the security permission.

NEW QUESTION 52
- (Exam Topic 4)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You have a computer named Computer1 that runs Windows 10.
You test Windows updates on Computer1 before you make the updates available to other computers. You install a quality update that conflicts with a customer device driver.
You need to remove the update from Computer1.
Solution: From an elevated command prompt, you run the vmic qfe delete command. Does this meet the goal?

A. Yes
B. No

Answer: B

NEW QUESTION 54
- (Exam Topic 4)
Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.
When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.
Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.
Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.
Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.
Username and password

Use the following login credentials as needed:
To enter your password, place your cursor in the Enter password box and click on the password below.
Username: Contoso/Administrator
Password: Passw0rd!
The following information is for technical support purposes only: Lab Instance: 11145882

Administrators report that they cannot use Event Viewer to remotely view the event logs on Client3.
You need to ensure that the administrators can access the event logs remotely on Client3. The solution must ensure that Windows Firewall remains enabled.
To complete this task, sign in to the required computer or computers.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
* 1. Go to Control Panel -> System and Security -> Windows Firewall.
* 2. Click on the Advanced settings link in the left-hand side.

* 3. Enable COM+ Network Access (DCOM-In).

* 4. Enable all the rules in the Remote Event Log Management group.

Reference:
https://www.zubairalexander.com/blog/unable-to-access-event-viewer-on-a-remote-computer/

NEW QUESTION 59
- (Exam Topic 4)
You have a workgroup computer named Computer1 that runs Windows 10.
You need to configure Windows Hello for sign-in to Computer1 by using a physical security key. What should you use?

A. a USB 3.0 device that supports BitLocker Drive Encryption (BitLocker)
B. a USB device that supports FIDO2
C. a USB 3.0 device that has a certificate from a trusted certification authority (CA)

D. a USB device that supports RSA SecurID

Answer: B

Explanation:
Reference:
https://docs.microsoft.com/en-us/azure/active-directory/user-help/security-info-setup-security-key

NEW QUESTION 60
- (Exam Topic 4)
You need to enable BitLocker Drive Encryption (BitLocker) on a computer named Computer1 that runs Windows 10. Computer1 has the following configurations:

 Contains only one 200-GB NTFS volume named C:\
 Contains 50 GB of unallocated disk space
 Is the member of a workgroup
 Has TPM enabled
What should you do first?

A. Create a VHD.
B. Disable TPM.
C. Create an additional volume.
D. Join Computer1 to an Azure Active Directory (Azure AD) tenant.

Answer: C

Explanation:
Two partitions are required to run BitLocker because pre-startup authentication and system integrity verification must occur on a separate partition from the encrypted operating system drive. This configuration helps protect the operating system and the information in the encrypted drive.
Reference:
https://docs.microsoft.com/en-us/windows/security/information-protection/bitlocker/bitlocker-overview-and-req

NEW QUESTION 61
- (Exam Topic 4)
You have a computer named Computer1 that runs Windows 10.
You need to modify the Security Settings of Computer1 to meet the following requirements:
 A local group named Branch_Admins must be able to view and clear the Security log.
 Local users must be prompted to change their password three days before the password expires.
Which two nodes of the Local Group Policy Editor should you access to configure the settings? To answer, select the appropriate nodes in the answer area.
NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Graphical user interface, text, application, chat or text message Description automatically generated
User Rights Assignment > Manage auditing and security log.
Security Options > Interactive Logon: Prompt user to change password before expiration: 3 days.

NEW QUESTION 66
- (Exam Topic 4)
Your network an Active Directory domain named adatum.com. The domain contains 50 computers that runs Windows 8.1. The computer has locally installed desktop application that are compatible with Windows 10.
You need to upgrade the computers to windows 10, The solution must preserver the locally installed desktop applications.
Solution: You use Microsoft Deployment Toolkit (MDT) and create a task sequence. One each compute, you run the task sequence.
Does the meet the goal?

A. Yes
B. No

Answer: B

NEW QUESTION 67
- (Exam Topic 4)
SIMULATION
Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.
When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. NEW QUESTION 68
- (Exam Topic 4)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You have a laptop named Computer1 that runs Windows 10.
When in range, Computer1 connects automatically to a Wi-Fi network named Wireless1. You need to prevent Computer1 from automatically connecting to Wireless1.
Solution: From a command prompt, you run netsh wlan delete profile name="Wireless1". Does this meet the goal?

A. Yes
B. No

Answer: A

Explanation:
Reference:
https://lifehacker.com/remove-wi-fi-profiles-from-windows-8-1-from-the-command-1449954864

NEW QUESTION 70
- (Exam Topic 4)
Your network an Active Directory domain named adatum.com. The domain contains 50 computers that runs Windows 8.1. The computer has locally installed desktop application that are compatible with Windows 10.
You need to upgrade the computers to windows 10, The solution must preserver the locally installed desktop applications.
Solution: You use Windows Autopilot and create a deployment profile. You generalize each computer, and the you restart the computers.
Does this meet the goal?

A. Yes
B. No

Answer: B

NEW QUESTION 73
- (Exam Topic 4)
Your network contains an Active Directory domain named adatum.com that uses Key Management Service (KMS) for activation.
You deploy a computer that runs Windows 10 to the domain. The computer fails to activate.
You suspect that the activation server has an issue. You need to identify which server hosts KMS.
How should you complete the command? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:

The following information is for technical support purposes only: Lab Instance: 11145882

You have already prepared Client1 for remote management.
You need to forward all events from the Application event log on Client1 to DC1.
To complete this task, sign in to the required computer or computers.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Configuring the event source computer
* 1. Run the following command from an elevated privilege command prompt on the Windows Server domain controller to configure Windows Remote Management:
winrm qc -q
* 2. Start group policy by running the following command:
%SYSTEMROOT%\System32\gpedit.msc
* 3. Under the Computer Configuration node, expand the Administrative Templates node, then expand the
Windows Components node, then select the Event Forwarding node.
* 4. Right-click the SubscriptionManager setting, and select Properties. Enable the SubscriptionManager setting, and click the Show button to add a server address to the setting. Add at least one setting that specifies the event collector computer. The SubscriptionManager Properties window contains an Explain tab that describes the syntax for the setting.
* 5. After the SubscriptionManager setting has been added, run the following command to ensure the policy is applied: gpupdate /force
Configuring the event collector computer
* 1. Run the following command from an elevated privilege command prompt on the Windows Server domain controller to configure Windows Remote Management:
winrm qc -q
* 2. Run the following command to configure the Event Collector service:
wecutil qc /q
* 3. Create a source initiated subscription. This can either be done programmatically, by using the Event Viewer, or by using Wecutil.exe. If you use Wecutil.exe, you must create an event subscription XML file and use the following command:
wecutil cs configurationFile.xml
Reference:
https://docs.microsoft.com/en-us/windows/win32/wec/setting-up-a-source-initiated-subscription#forwarding-the

NEW QUESTION 78
- (Exam Topic 4)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You have a computer named Computer1 that runs Windows 10.
A service named Application1 is configured as shown in the exhibit.

You discover that a user used the Service1 account to sign in to Computer1 and deleted some files.
You need to ensure that the identity used by Application1 cannot be used by a user to sign in to sign in to the desktop on Computer1. The solution must use the principle of least privilege.
Solution: On Computer1, you assign Service1 the deny log on as a service user right. Does this meet the goal?

A. Yes
B. No

Answer: B

Explanation:
References:
https://docs.microsoft.com/en-us/windows/security/threat-protection/security-policy-settings/deny-log-on-as-a-s

NEW QUESTION 81
- (Exam Topic 4)
You install Windows 10 Pro on a computer named CLIENT1.
You need to ensure that all per-user services are disabled on CLIENT1. The solution must minimize administrative effort.
What should you use?

A. a Group Policy administrative template
B. Device Manager
C. Task Manager
D. Group Policy preferences

Answer: D

Explanation:

References:
https://docs.microsoft.com/en-us/windows/application-management/per-user-services-in-windows

NEW QUESTION 84
- (Exam Topic 4)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You have a computer that runs Windows 10. The computer contains a folder named D:\Scripts. D:\Scripts contains several PowerShell scripts.
You need to ensure that you can run the PowerShell scripts without specifying the full path to the scripts. The solution must persist between PowerShell sessions.

Solution: At a command prompt, you run set.exe path=d:\scripts. Does this meet the goal?

A. Yes
B. No

Answer: B

NEW QUESTION 87
- (Exam Topic 4)
You plan to deploy Windows 10 to 100 secure computers.
You need to select a version of Windows 10 that meets the following requirements:

Uses Microsoft Edge as the default browser
Minimizes the attack surface on the computer
Supports joining Microsoft Azure Active Directory (Azure AD)
Only allows the installation of applications from the Microsoft Store
What is the best version to achieve the goal? More than one answer choice may achieve the goal. Select the BEST answer.

A. Windows 10 Pro in S mode
B. Windows 10 Home in S mode
C. Windows 10 Pro
D. Windows 10 Enterprise

Answer: A

Explanation:
References:
Uses Microsoft Edge as the default browser Minimizes the attack surface on the computer Supports joining Microsoft Azure Active Directory (Azure AD) Only allows the installation of applications from the Microsoft Store https://docs.microsoft.com/es-es/windows/deployment/s-mode

NEW QUESTION 88
- (Exam Topic 4)
Your company has a wireless access point that uses WPA2-Enterprise. You need to configure a computer to connect to the wireless access point. What should you do first?

A. Create a provisioning package in Windows Configuration Designer.
B. Request a passphrase.
C. Request and install a certificate.
D. Create a Connection Manager Administration Kit (CMAK) package.

Answer: B

Explanation:
References:
https://support.microsoft.com/en-za/help/17137/windows-setting-up-wireless-network

NEW QUESTION 93
- (Exam Topic 4)
Your network contains an Active Directory domain. The domain contains three computers named Computer1, Computer2, and Computer3 that run Windows 10. The computers are on the same network and have network connectivity.
Windows Defender Firewall on Computer1 has the server-to-server connection security rule shown in the following table.

Windows Defender Firewall on Computer2 has the server-to-server connection security rule shown in the following table.

Windows Defender Firewall on Computer3 has the server-to-server connection security rule shown in the following table.

All the connection security rules are enabled and configured to use only the Computer (Kerberos VS) authentication method.
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Graphical user interface, text, application Description automatically generated
References:
https://docs.microsoft.com/en-us/windows/security/threat-protection/windows-firewall/create-an-authentication

NEW QUESTION 96
- (Exam Topic 4)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the
stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You have a workgroup computer that runs Windows 10. The computer contains the local user accounts shown in the following table.

You need to configure the desktop background for User1 and User2 only.
Solution: You create a new local group to which you add User1 and User2. You create a local Group Policy Object (GPO) and configure the Desktop Wallpaper
setting in the GPO. At a command prompt, you run the gpupdate.exe/Force command.
Does this meet the goal?

A. Yes
B. No

Answer: A

Explanation:

References:
https://www.windowscentral.com/how-apply-local-group-policy-settings-specific-users-windows-10

NEW QUESTION 100
- (Exam Topic 4)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You manage devices that run Windows 10.
Ten sales users will travel to a location that has limited bandwidth that is expensive. The sales users will be at the location for three weeks.
You need to prevent all Windows updates from downloading for the duration of the trip. The solution must not prevent access to email and the Internet.
Solution: From Update & Security in the Settings app, you turn on Pause Updates. Does this meet the goal?

A. Yes
B. No

Answer: A

Explanation:
References:
https://www.makeuseof.com/tag/5-ways-temporarily-turn-off-windows-update-windows-10/

NEW QUESTION 103
- (Exam Topic 4)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these
questions will not appear in the review screen.
You deploy Windows 10 to a computer named Computer1.
Computer1 contains a folder named C:\Folder1. Folder1 contains multiple documents.
You need to ensure that you can recover the files in Folder1 by using the Previous Versions tab. Solution: You enable File History and add Folder1 in the Documents library.
Does this meet the goal?

A. Yes
B. No

Answer: A

Explanation:
Reference:
https://support.microsoft.com/en-za/help/17128/windows-8-file-history

NEW QUESTION 107
- (Exam Topic 4)
You have 200 computers that run Windows 10 and are joined to an Active Directory domain.
You need to enable Windows Remote Management (WinRM) on all the computers by using Group Policy.
Which three actions should you perform? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

A. Set the Startup Type of the Windows Remote Management (WS-Management) service to Automatic.
B. Enable the Windows Firewall: Allow inbound remote administration exception setting.
C. Enable the Allow remote server management through WinRM setting.
D. Enable the Windows Firewall: Allow inbound Remote Desktop exceptions setting.
E. Enable the Allow Remote Shell access setting.
F. Set the Startup Type of the Remote Registry service to Automatic.

Answer: ABC

Explanation:

References:
https://support.auvik.com/hc/en-us/articles/204424994-How-to-enable-WinRM-with-domain-controller-Group-P

NEW QUESTION 108
- (Exam Topic 4)
You have a Microsoft 365 tenant that contains 70 remote users. The remote users work from various locations.
Recently, each remote user purchased a personal computer that runs Windows 10 Home.
You need to configure the VPN settings on the computers automatically by using the least amount of administrative effort.
What should you use?

A. an unattend answer file
B. a Group Policy Object (GPO)
C. Windows Autopilot
D. a provisioning package

Answer: D

Explanation:
Reference:

https://docs.microsoft.com/en-us/windows/configuration/provisioning-packages/provisioning-packages

NEW QUESTION 110
- (Exam Topic 4)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
Your network contains an Active Directory domain. The domain contains a computer named Computer1 that runs Windows 8.1.
Computer1 has apps that are compatible with Windows 10.
You need to perform a Windows 10 in-place upgrade on Computer1.
Solution: You add Windows 10 startup and install images to a Windows Deployment Services (WDS) server. You start Computer1 by using WDS and PXE, and then you initiate the Windows 10 installation.
Does this meet the goal?

A. Yes
B. No

Answer: B

Explanation:
Use Microsoft Deployment Toolkit (MDT) instead.

NEW QUESTION 115
- (Exam Topic 4)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
Your network contains an Active Directory domain named contoso.com. The domain contains the users shown in the following table.

You have a computer named Computer1 that runs Windows 10 and is in a workgroup.
A local standard user on Computer1 named User1 joins the computer to the domain and uses the credentials of User2 when prompted.
You need to ensure that you can rename Computer1 as Computer33. Solution: You use the credentials of User2 on Computer1.
Does this meet the goal?

A. Yes
B. No

Answer: B

Explanation:
Renaming a domain-joined computer will also rename the computer account in the domain. To do this, you need domain administrator privileges.
User2 is a domain user, not an administrator. Use User3's credentials instead. References:
https://docs.microsoft.com/en-us/windows/security/identity-protection/access-control/active-directory-security-g

NEW QUESTION 120
- (Exam Topic 4)
You are a network administrator at your company.
A user attempts to start a computer and receives the following error message: "Bootmgr is missing." You need to resolve the issue.
You start the computer in the recovery mode.
Which command should you run next? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
References: https://neosmart.net/wiki/bootmgr-is-missing/

NEW QUESTION 122
- (Exam Topic 4)
Your network contains an Active Directory domain. The domain contains the users shown in the following table.

The Authenticated Users group has the Add workstations to domain user right in the Default Domain Controllers Policy.
The Device Managers and Help Desk groups are granted the Create Computer objects permission for the Computers container of the domain.
You have 15 workgroup computers that run Windows 10. Each computer contains a local user account named LocalAdmin1 that is a member of the following groups:
 Administrators
 Device Owners
 Authenticated Users
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: No
User1 is a member of the Authenticated Users group which has the Add workstations to domain user right. However, with the Add workstations to domain user right, you are restricted to joining a maximum of 10 computers to the domain.
Box 2: No
User2 is a member of the Authenticated Users group which has the Add workstations to domain user right. User2 is also a member of the Device Managers group which is granted the Create Computer objects permission for the Computers container of the domain. The Create Computer objects permission overrides the 10-computer limit imposed by the Add workstations to domain user right so User2 can join more than 10 computers to the domain.
Box 3. Yes
User3 is a member of the Authenticated Users group which has the Add workstations to domain user right. User3 is also a member of the Help Desk group which is granted the Create Computer objects permission for the Computers container of the domain. The Create Computer objects permission overrides the 10-computer limit imposed by the Add workstations to domain user right so User3 can join all the computers to the domain.

NEW QUESTION 127
- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A user named User1 has a computer named Computer1 that runs Windows 10. Computer1 is joined to an Azure Active Directory (Azure AD) tenant named contoso.com. User1 joins Computer1 to contoso.com by using user1@contoso.com.

Computer1 contains a folder named Folder1. Folder1 is in drive C and is shared as Share1. Share1 has the permission shown in the following table.

A user named User2 has a computer named Computer2 that runs Windows 10. User2 joins Computer2 to contoso.com by using user2@contoso.com.

User2 attempts to access Share1 and receives the following error message: "The username or password is incorrect."

You need to ensure that User2 can connect to Share1.

Solution: In Azure AD, you create a group named Group1 that contains User1 and User2. You grant Group1 Modify access to Folder1.

Does this meet the goal?

A. Yes
B. No

Answer: A

Explanation:
References:
https://docs.microsoft.com/en-us/previous-versions/windows/it-pro/windows-server-2008-R2-and-2008/cc75417

NEW QUESTION 132
- (Exam Topic 4)
You have a computer named Computer1 that runs Windows 10 and contains the following files:
C:\Folder1\File1.bat
C:\Folder1\File1.exe
C:\Folder1\File1.cmd
A user named User1 is assigned Read & execute to all the files. Computer1 is configured as shown in the exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.
NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
References:
https://stackoverflow.com/questions/148968/windows-batch-files-bat-vs-cmd

NEW QUESTION 133
- (Exam Topic 4)
You have a computer named Computer1 that runs Windows 10. Computer1 has an IP address of 10.10.1.200 and a subnet mask of 255.255.255.0.
You configure the proxy settings on Computer1 as shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.
NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
References:
https://www.howtogeek.com/tips/how-to-set-your-proxy-settings-in-windows-8.1/

NEW QUESTION 136
- (Exam Topic 4)
You have a workgroup computer named Computer1 that runs Windows 10. Computer1 has the user accounts shown in the following table.

User3, User4, and Administrator sign in and sign out on Computer1. User1 and User2 have never signed in to Computer1.
You are troubleshooting policy issues on Computer1. You sign in to Computer1 as Administrator. You add the Resultant Set of Policy (RsoP) snap-in to an MMC console.
Which users will be able to sign in on Computer1?

A. User1, User3, and User4 only
B. Administrator only
C. Use1, User2, User3, User4, and Administrator
D. User3, User4, and Administrator only

Answer: D

Explanation:
The Interactive logon: Number of previous logons to cache (in case domain controller is not available) policy setting determines whether a user can log on to a Windows domain by using cached account information. Logon information for domain accounts can be cached locally so that, if a domain controller cannot be contacted on subsequent logons, a user can still log on.
References:
https://docs.microsoft.com/en-us/windows/security/threat-protection/security-policy-settings/interactive-logon-n

NEW QUESTION 141

- (Exam Topic 4)
Your network contains an Active Directory domain. The domain contains 10 computers that run Windows 10. On a different computer named Computer1, you plan to create a collector-initiated subscription to gather the event logs from the Windows 10 computers.
You need to configure the environment to support the event log collection.
Which two actions should you perform? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.

A. Add Computer1 to the Event Log Readers group on the Windows 10 computers
B. Add Computer1 to the Event Log Readers group on Computer1
C. On the Windows 10 computers, change the Startup Type of Windows Event Collector to Automatic
D. Enable Windows Remote Management (WinRM) on the Windows 10 computers
E. Enable Windows Remote Management (WinRM) on Computer1

Answer: AD

Explanation:
 References:
https://docs.microsoft.com/en-us/previous-versions/windows/it-pro/windows-server-2008-R2-and-2008/ cc748890(v=ws.11)

NEW QUESTION 144
- (Exam Topic 4)
A user purchases a new computer that has Windows 10 Home preinstalled. The computer has a biometric fingerprint reader.
You need to ensure that the user can use the fingerprint reader to sign in to the computer by using an Azure Active Directory (Azure AD) account.
What should you do first?

A. Register the computer to Azure AD.
B. Install the latest feature updates on the computer.
C. Upgrade the computer to Windows 10 Enterprise.
D. Upgrade the computer to Windows 10 Pro.

Answer: B

NEW QUESTION 145
- (Exam Topic 4)
You have several computers that run Windows 10.
All users have Microsoft OneDrive for Business installed. Users frequently save files to their desktop.
You need to ensure that all the users can recover the files on their desktop from OneDrive for Business. Which two actions should you perform? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.

A. Copy ADMX and ADML files to C:\Users\PublicDesktop\
B. From Backup in the Settings app, add a drive
C. Configure the Silently move Windows known folders to OneDrive settings
D. Copy ADMX and ADML files to C:\Windows\PolicyDefinitions
E. Configure the Save documents to OneDrive by default setting

Answer: CD

Explanation:
 References:
https://docs.microsoft.com/en-us/onedrive/plan-onedrive-enterprise https://docs.microsoft.com/en-us/onedrive/use-group-policy#KFMOptInNoWizard

NEW QUESTION 150
- (Exam Topic 4)
Your network contains an Active Directory domain named Contoso.com.
A user named User1 has a personal computer named Computer that runs Windows 10 Pro. User1 has a VPN connection to the corporate network.
You need to ensure that when User1 connection to the corporate network.
You need to ensure that when user1 connects to the VPN, network traffic uses a proxy located in the corporate network. The solution must ensure that User1 can access the internet when disconnected from the VPN.
What should you do?

A. From the Settings app, modify the properties of the VPN connection.
B. From the Setting app, modify proxy settings for the local computer.
C. From Control panel, modify the properties of the VPN connection
D. From Control Panel, modify the Windows Defender Firewall settings

Answer: A

NEW QUESTION 152
- (Exam Topic 4)
Your network contains an Active Directory domain that contains the objects shown in the following table.

Computer1 contains the shared folders shown in the following table.

The computers have the network configurations shown in the following table.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Yes
User1 is in Group1 which has permission to access the share so the share will be visible.
Box 2: No
User2 is in Group2 which does not have permission to access Share1. Access-based enumeration is enabled so Share1 will not be listed as User2 does not have permission to access it.
Box 3: No
Share2$ is a hidden share (dollar sign appended) so the share will never be listed.

NEW QUESTION 153
- (Exam Topic 4)
Your network contains an Active Directory domain named adatum.com. The domain contains two computers named Computer1 and Computer2 that run Windows 10.
The domain contains the user accounts shown in the following table.

Computer2 contains the local groups shown in the following table.

The relevant user rights assignments for Computer2 are shown in the following table.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Yes
User1 is an administrator and has the Allow log on through Remote Desktop Services.
Box 2: No
User2 is a member of Group2 which has the Deny log on through Remote Desktop Services.
Box 3: Yes
User3 is a member of the administrators group and has the Allow log on through Remote Desktop Services.
Note: Deny permissions take precedence over Allow permissions. If a user belongs to two groups, and one of them has a specific permission set to Deny, that user is not able to perform tasks that require that permission even if they belong to a group that has that permission set to Allow.
References:
https://docs.microsoft.com/en-us/azure/devops/organizations/security/about-permissions?view=azure-devops&ta

NEW QUESTION 157
- (Exam Topic 4)
You have a workgroup computer named Computer1 that runs Windows 10 and has the users shown in the following table.

User Account Control (UAC) on Computer1 is configured as shown in the following exhibit.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Yes
User Account Control: Behavior of the elevation prompt for administrators in Admin Approval Mode is set to Prompt for consent When an operation requires elevation of privilege, the user is prompted to select either Permit or Deny. If the user selects Permit, the operation continues with the user's highest available privilege.
Box 2: Yes
User1 is a member of Administrators group.
User Account Control: Behavior of the elevation prompt for administrators in Admin Approval Mode is set to Prompt for consent When an operation requires elevation of privilege, the user is prompted to select either Permit or Deny. If the user selects Permit, the operation continues with the user's highest available privilege.
Box 3: Yes
User Account Control: Behavior of the elevation prompt for standard users is set to Prompt for credentials (Default) When an operation requires elevation of privilege, the user is prompted to enter an administrative user name and password. If the user enters valid credentials, the operation continues with the applicable privilege.
References:
https://docs.microsoft.com/en-us/windows/security/identity-protection/user-account-control/user-account-contro

NEW QUESTION 161
- (Exam Topic 4)
You install Windows 10 Enterprise on a new computer. You need to force activation on the computer.
Which command should you run?

A. slmgr /upk
B. Sec-RDLicenseConfiguration -Force
C. Sec-MsolLicense -AddLicense
D. slmgr /ato

Answer: D

Explanation:
 References:
https://docs.microsoft.com/en-us/windows/deployment/volume-activation/activate-using-key-management-servi

NEW QUESTION 166
- (Exam Topic 4)
You plan to install Windows 10 Pro by using an answer file. You open Windows System Image Manager.
You need to create an answer file. What should you do first?

A. Open the Install.wim file from the Windows 10 installation media.
B. Open the Boot.wim file from the Windows 10 installation media.
C. Install the WinPE add-on for the Windows Assessment and Deployment Kit (Windows ADK).
D. Install the Windows Assessment and Deployment Kit (Windows ADK).

Answer: C

NEW QUESTION 167
- (Exam Topic 4)
You have a computer named Computer1 that runs Windows 10. On Computer1, you turn on File History.
You need to protect a folder named D:\Folder1 by using File History. What should you do?

A. From File Explorer, modify the Security settings of D:\Folder1
B. From File Explorer, add D:\Folder1 to the Documents library
C. From the Settings app, configure the Recovery settings
D. From File History in Control Panel, configure the Select drive settings

Answer: B

NEW QUESTION 168
- (Exam Topic 4)
Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.
When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.
Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.
Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.
Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.
Username and password

Use the following login credentials as needed:
To enter your password, place your cursor in the Enter password box and click on the password below.
Username: Contoso/Administrator

Password: Passw0rd!
The following information is for technical support purposes only: Lab Instance: 11145882

You need to create an HTML report that shows which policies and policy settings are applied to CONTOSO\User1 on Client1. You must save the output to a file named Report.html in a folder named Folder1 on the C drive of Client1.
To complete this task, sign in to the required computer or computers.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
On Client1, log in as administrator. Open command prompt and type:
gpresult /h CONTOSO\User1\C:\Folder1\Report.html

NEW QUESTION 173
- (Exam Topic 4)
You have a computer that is configured as shown in the following exhibit.

What can the computer connect to?

A. all the local computers and the remote computers within your corporate network only
B. all the local computers and the remote computers, including Internet hosts
C. only other computers on the same network segment that have automatic private IP addressing (APIPA)
D. only other computers on the same network segment that have an address from a class A network ID

Answer: B

NEW QUESTION 178
- (Exam Topic 4)
You are troubleshooting Windows 10 updates that fail to install on a computer that runs Windows 10. You delete the contents of the SoftwareDistribution folder.
You need to delete the signatures of the Windows Update packages. Which folder should you delete?

A. %systemdrive%\recovery
B. %systemroot%\WinSxS
C. %systemdrive%\System Volume Information

Answer: A

Explanation:

References:
https://tipsmake.com/how-to-delete-pending-updates-on-windows-10

NEW QUESTION 182
- (Exam Topic 4)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more
than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
A user named User2 has a computer named Computer2 that runs Windows 10. User2 joins Computer2 to contoso.com by using user2@contoso.com.
Computer1 contains a folder named Folder1. Folder1 is in drive C and is shared as Share1. Share1 has the permission shown in the following table.

A user named User2 has a computer named Computer2 that runs Windows 10. User2 joins Computer2 to contoso.com by using user2@contoso.com.
User2 attempts to access Share1 and receives the following error message: "The username or password is incorrect."
You need to ensure that User2 can connect to Share1.
Solution: You create a local user account on Computer1 and instruct User2 to use the local account to connect to Share1.
Does this meet the goal?

A. Yes
B. No

Answer: B

NEW QUESTION 184
- (Exam Topic 4)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You have two computers named Computer1 and Computer2 that run Windows 10.
You have an Azure Active Directory (Azure AD) user account named admin@contoso.com that is in the local Administrators group on each computer.
You sign in to Computer1 by using admin@contoso.com.
You need to ensure that you can use Event Viewer on Computer1 to connect to the event logs on Computer2. Solution: On Computer2, you run the winrm quickconfig command.
Does this meet the goal?

A. Yes
B. No

Answer: B

Explanation:
Windows Remote Management is a component of the Windows Hardware Management features that manage server hardware locally and remotely.
References:
https://docs.microsoft.com/en-us/windows/win32/winrm/about-windows-remote-management

NEW QUESTION 186
- (Exam Topic 4)
Your network contains an Active Directory forest. The forest contains a root domain named contoso.com and a child domain named corp.contoso.com.
You have a computer named Computer1 that runs Windows 10. Computer1 is joined to the corp.contoso.com domain.
Computer1 contains a folder named Folder1. In the Security settings of Folder1, Everyone is assigned the Full control permissions.
On Computer1, you share Folder1 as Share1 and assign the Read permissions for Share1 to the Users group. For each of the following statements, select Yes if

the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
References:
https://www.techrepublic.com/article/learn-the-basic-differences-between-share-and-ntfs-permissions/

NEW QUESTION 189
- (Exam Topic 4)
You have several computers that run Windows 10. The computers are in a workgroup and have BitLocker Drive Encryption (BitLocker) enabled.
You join the computers to Microsoft Azure Active Directory (Azure AD).
You need to ensure that you can recover the BitLocker recovery key for the computers from Azure AD. What should you do first?

A. Disable BitLocker.
B. Add a BitLocker key protector.
C. Suspend BitLocker.
D. Disable the TMP chip.

Answer: B

Explanation:
 References:
https://docs.microsoft.com/en-us/windows/security/information-protection/bitlocker/prepare-your-organization-f

NEW QUESTION 191
- (Exam Topic 4)
Your company has an isolated network used for testing. The network contains 20 computers that run Windows 10. The computers are in a workgroup. During testing, the computers must remain in the workgroup.
You discover that none of the computers are activated.
You need to recommend a solution to activate the computers without connecting the network to the Internet. What should you include in the recommendation?

A. Volume Activation Management Tool (VAMT)
B. Key Management Service (KMS)
C. Active Directory-based activation
D. the Get-WindowsDeveloperLicense cmdlet

Answer: A

Explanation:
https://docs.microsoft.com/en-us/windows/deployment/volume-activation/introduction-vamt

NEW QUESTION 196
- (Exam Topic 4)
You have four computers that run Windows 10. The computers are configured as shown in the following table.

On Computer1, you create a user named User1. In the domain, you create a user named User2. You create the groups shown in the following table.

You need to identify to which computers User1 can sign in, and to which groups you can add User2. What should you identify? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Computer 1 only.
User1's account was created on Computer1. The account is a local account on Computer1. Therefore, User1 can only sign in to Computer1.
Box 2: Group5 only.
User2's account was created in the domain. A domain is a security boundary. Therefore, you can only add User2 to groups in the domain.

NEW QUESTION 200
- (Exam Topic 4)
You have a computer named Computer1 that runs Windows 10.
On Computer1, you create the local users shown in the following table.

Which three user profiles will persist after each user signs out? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.

A. User1
B. User2
C. User3
D. User4
E. User5

Answer: ADE

NEW QUESTION 205
- (Exam Topic 4)
You have a workgroup computer named Computer1 that runs Windows 10. Computer1 contains five local user accounts. You need to ensure that all users who sign in to Computer1 see a picture named image1 jpg as the desktop background.
What should you do?

A. Desktop.jpg and copy the picture to the C:\Users\Default\Desktop folder
B. From the Settings app, modify the Background settings.
C. From the local Group Policy Edito
D. modify the Desktop settings.
E. Rename Image1.jpg as Desktop jpg and copy the picture to the C:\Windows\system32\ folder.

Answer: B

NEW QUESTION 207
- (Exam Topic 4)
You have a computer that runs Windows 10 and has BitLocker Drive Encryption (BitLocker) enabled on all volumes.
You start the computer from Windows Recovery Environment (WinRE). You need to read the data on the system drive.
What should you do?

A. Run cipher.exe and specify the /rekey parameter
B. Run cipher.exe and specify the /adduser parameter
C. Run manange-bde.exe and specify the -off parameter
D. Run manage-bde.exe and specify the -unlock parameter

Answer: D

Explanation:
https://www.repairwin.com/how-to-disable-bitlocker-in-windows-recovery-environment-winre/

NEW QUESTION 211
- (Exam Topic 4)
You deploy 100 computers that run Windows 10. Each computer has a cellular connection and a Wi-Fi connection.
You need to prevent the computers from using the cellular connection unless a user manually connects to the cellular network.
What should you do?

A. Set the Use cellular instead of Wi-Fi setting for the cellular connection to Never
B. Run the netsh wlan set hostednetwork mode=disallow command
C. Clear the Let Windows manage this connection check box for the cellular connection
D. Select the Let Windows manage this connection check box for the Wi-Fi connection

Answer: C

Explanation:
 References:
https://support.microsoft.com/en-za/help/10739/windows-10-cellular-settings

NEW QUESTION 214
- (Exam Topic 4)
You have computers that run Windows 10 Enterprise as shown in the following table.

Both computers have applications installed and contain user data.
You plan to configure both computers to run Windows 10 Enterprise LTSC 2019 and to retain all the existing applications and data.
You need to recommend a method to deploy Windows 10 Enterprise LTSC 2019 to the computers. The solution must minimize effort to install and configure the applications.
What should you include in the recommendation for each computer? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

A. Mastered

B. Not Mastered

Answer: A

Explanation:
Graphical user interface, text, application, chat or text message Description automatically generated
References:
https://docs.microsoft.com/en-us/windows/deployment/upgrade/windows-10-upgrade-paths

NEW QUESTION 217
- (Exam Topic 4)
You have the computers shown in the following table.

You need to identify which computers support the features.
 BitLocker Drive Encryption (BitLocker)
 Microsoft Application Virtualization (App-V)
Which computers support the features? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Graphical user interface, text, application Description automatically generated
References:
https://www.microsoft.com/en-us/windowsforbusiness/compare

NEW QUESTION 218
- (Exam Topic 4)
You deploy Windows 10 to a new computer named Computer1. You sign in to Computer1 and create a user named User1.
You create a file named LayoutModification.xml in the C:\Users\Default\AppData\Local\Microsoft\Windows\Shell\folder. LayoutModification.xml contains the following markup.

What is the effect of the configuration? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
References:
https://docs.microsoft.com/en-us/windows/configuration/configure-windows-10-taskbar

NEW QUESTION 219
- (Exam Topic 4)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
Your network contains an Active Directory domain named contoso.com. The domain contains the users shown in the following table.

You have a computer named Computer1 that runs Windows 10 and is in a workgroup.
A local standard user on Computer1 named User1 joins the computer to the domain and uses the credentials of User2 when prompted.
You need to ensure that you can rename Computer1 as Computer33. Solution: You use the credentials of User4 on Computer1.
Does this meet the goal?

A. Yes
B. No

Answer: B

Explanation:
Renaming a domain-joined computer will also rename the computer account in the domain. To do this, you need domain administrator privileges.
User4 is a server operator, not an administrator. Members of the Server Operators group can sign in to a server interactively, create and delete network shared resources, start and stop services, back up and restore files, format the hard disk drive of the computer, and shut down the computer.
Use User3's credentials instead.
References:
https://docs.microsoft.com/en-us/windows/security/identity-protection/access-control/active-directory-security-g

NEW QUESTION 222
- (Exam Topic 4)
You have a computer that runs Windows 10. The computer contains a folder. The folder contains sensitive data.
You need to log which user reads the contents of the folder and modifies and deletes files in the folder. You need to log which user reads the contents of the folder and modifies and deletes files in the folder.
Solution: from the properties of the folder, you configure the Auditing settings and from the Audit Policy in the local Group Policy, you configure Audit system events.
Does this meet the goal?

A. Yes
B. No

Answer: B

Explanation:
Files and folders are objects and are audited through object access, not though system events. References:
https://www.netwrix.com/how_to_detect_who_changed_file_or_folder_owner.html

NEW QUESTION 225
- (Exam Topic 4)
You have the computer shown in the following table.

You plan to configure deployment rings for Windows 10 quality and feature updates.
What is the maximum number of days you can defer installing quality updates, and which computers support installing feature updates from Windows Update? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Graphical user interface, text, application, email Description automatically generated
Reference:
https://docs.microsoft.com/en-us/windows/deployment/update/waas-configure-wufb

NEW QUESTION 229
- (Exam Topic 4)
You have a computer that runs Windows 10.
You need to be able to recover the computer by using System Image Recovery. What should you use to create a system image?

A. Windows System Image Manager (Windows SIM)
B. Backup and Restore (Windows 7)
C. File History
D. System Protection

Answer: B

Explanation:
Reference:
https://answers.microsoft.com/en-us/windows/forum/windows_10/how-to-create-a-system-image-in-windows-1

NEW QUESTION 234
- (Exam Topic 4)
You have an Azure Active Directory (Azure AD) tenant named contoso.com. You have a workgroup computer named Computer1 that runs Windows 10. You need

to add Computer1 to contoso.com.
What should you use?

A. Computer Management
B. dsregcmd.exe
C. the Settings app
D. netdom.exe

Answer: C

Explanation:
You join a computer to a domain, including an Azure AD domain in the Settings panel in Windows 10, under System->About
References: https://aadguide.azurewebsites.net/aadjoin/

NEW QUESTION 238
- (Exam Topic 4)
You have 100 computers that run Windows 10. You have no servers. All the computers are joined to Microsoft Azure Active Directory (Azure AD).
The computers have different update settings, and some computers are configured for manual updates. You need to configure Windows Update. The solution must meet the following requirements:

 The configuration must be managed from a central location.
 Internet traffic must be minimized.
 Costs must be minimized.
How should you configure Windows Update? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
References:
https://docs.microsoft.com/en-us/windows/deployment/update/waas-optimize-windows-10-updates https://docs.microsoft.com/en-us/windows/deployment/update/waas-delivery-optimization

NEW QUESTION 240
- (Exam Topic 4)
Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.
When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.
Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.
Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.
But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.
Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.
Username and password

Use the following login credentials as needed:
To enter your password, place your cursor in the Enter password box and click on the password below.
Username: Contoso/Administrator
Password: Passw0rd!
The following information is for technical support purposes only: Lab Instance: 11145882

A web service installed on Client1 is used for testing.

You discover that users cannot connect to the web service by using HTTP. You need to allow inbound HTTP connections to Client1.
To complete this task, sign in to the required computer or computers.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
To create an inbound port rule

In the navigation pane, click Inbound Rules.
 Click Action, and then click New rule.
 On the Rule Type page of the New Inbound Rule Wizard, click Custom, and then click Next.
 On the Program page, click All programs, and then click Next.
 On the Protocol and Ports page, select the protocol type that you want to allow. To restrict the rule to a specified port number, you must select either TCP or UDP.
Because this is an incoming rule, you typically configure only the local port number. TCP port 80. When you have configured the protocols and ports, click Next.
 On the Scope page, you can specify that the rule applies only to network traffic to or from the IP addresses entered on this page. Configure as appropriate for your design, and then click Next.
 On the Action page, select Allow the connection, and then click Next.
 On the Profile page, select the network location types to which this rule applies, and then click Next.
 On the Name page, type a name and description for your rule, and then click Finish.
Reference:
https://docs.microsoft.com/en-us/windows/security/threat-protection/windows-firewall/create-an-inbound-port-r
https://en.wikipedia.org/wiki/List_of_TCP_and_UDP_port_numbers

NEW QUESTION 244
- (Exam Topic 4)
You have a Microsoft Azure Active Directory (Azure AD) tenant.
Some users sign in to their computer by using Windows Hello for Business.
A user named User1 purchases a new computer and joins the computer to Azure AD.
User1 attempts to configure the sign-in options and receives the error message shown in the exhibit.

You open Device Manager and confirm that all the hardware works correctly.
You need to ensure that User1 can use Windows Hello for Business facial recognition to sign in to the computer.
What should you do first?

A. Purchase an infrared (IR) camera.
B. Upgrade the computer to Windows 10 Enterprise.
C. Enable UEFI Secure Boot.
D. Install a virtual TPM driver.

Answer: B

Explanation:
 References:
https://docs.microsoft.com/en-us/windows/security/identity-protection/hello-for-business/hello-planning-guide

NEW QUESTION 246
- (Exam Topic 4)
Your office has a dedicated wireless network for guests.

You plan to provide access cards that will have a QR code for guests. The QR code will link to a network
configuration file stored on a publicly accessible website and provide the wireless network settings for Windows 10 devices.
Which tool should you use to create the configuration file and which file type should you use for the configuration file? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Reference:
https://docs.microsoft.com/en-us/windows/configuration/provisioning-packages/provisioning-packages

NEW QUESTION 249
- (Exam Topic 4)
Your company uses Microsoft Deployment Toolkit (MDT) to deploy Windows 10 to new computers. The company purchases 1,000 new computers.
You need to ensure that the Hyper-V feature is enabled on the computers during the deployment. What are two possible ways to achieve the goal? Each correct
answer presents part of the solution. NOTE: Each correct selection is worth one point.

A. Add a task sequence step that adds a provisioning package.
B. In a Group Policy object (GPO), from Computer Configuration, configure Application Control Policies.
C. Add a custom command to the Unattend.xml file.
D. Add a configuration setting to Windows Deployment Services (WDS).
E. Add a task sequence step that runs dism.exe.

Answer: AE

Explanation:
 References:
Provisioning package works with Windows Configuration Designer to provision win10 features and runtime settings. WCD (provisioning Package) is GUI based
while DISM is command line based and dose same function. Unattend.xml / answer files are used with installation media. It contains settings, definitions and
values to use during Windows Setup. In an answer file, you specify various setup options. These options include how to partition disks, where to find the Windows
image that will be installed, and which product key to apply.
https://docs.microsoft.com/en-us/windows/deployment/deploy-windows-mdt/create-a-windows-10-reference-im

NEW QUESTION 250
- (Exam Topic 4)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the
stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You have a workgroup computer that runs Windows 10. The computer contains the local user accounts shown in the following table.

You need to configure the desktop background for User1 and User2 only.
Solution: From the local computer policy, you configure the Filter Options settings for the computer policy. Does this meet the goal?

A. Yes
B. No

Answer: B

NEW QUESTION 252
- (Exam Topic 4)
You have 20 computers that run Windows 10. The computers are in a workgroup.
You need to create a local user named Admin1 on all the computers. Admin1 must be a member of the Remote Management Users group.
What should you do?

A. From Windows Configuration Designer, create a provisioning package, and then run the provisioning package on each computer.
B. Create a script that runs the New-ADUser cmdlet and the Set-AdGroup cmdlet.
C. Create a Group Policy object (GPO) that contains the Local User Group Policy preference.
D. Create a script that runs the New-MsolUser cmdlet and the Add-ADComputerServiceAccount cmdlet.

Answer: A

Explanation:
 References:
https://blogs.technet.microsoft.com/askpfeplat/2017/11/06/use-group-policy-preferences-to-manage-the-local-ad

NEW QUESTION 255
- (Exam Topic 4)
Your network contains an Active Directory domain that is synced to a Microsoft Azure Active Directory (Azure AD) tenant.
Your company purchases a Microsoft 365 subscription.
You need to migrate the Documents folder of users to Microsoft OneDrive for Business.
What should you configure?

A. One Drive Group Policy settings
B. roaming user profiles
C. Enterprise State Roaming
D. Folder Redirection Group Policy settings

Answer: A

Explanation:
 References:
https://docs.microsoft.com/en-us/onedrive/redirect-known-folders?redirectSourcePath=%252fen-us% 252farticle%252fredirect-windows-known-folders-to-onedrive-e1b3963c-7c6c-4694-9f2f-fb8005d9ef12

NEW QUESTION 256
- (Exam Topic 4)
You have a computer named Computer1 that runs Windows 10.
You complete a full back up of Computer1 to an external USB drive. You store the USB drive offsite.
You delete several files from your personal Microsoft OneDrive account by using File Explorer, and then you empty the Recycle Bin on Computer1.
You need to recover the files 60 days after you deleted them in the least amount of time possible. What should you use?

A. the OneDrive recycle bin
B. the full backup on the external USB drive
C. Recovery in the Settings app

Answer: B

Explanation:
 References:
https://support.office.com/en-us/article/restore-deleted-files-or-folders-in-onedrive-949ada80-0026-4db3-a953-c

NEW QUESTION 258
- (Exam Topic 4)
You have a workgroup computer named Computer1 that runs Windows 10. From File Explorer, you open OneDrive as shown in the following exhibit.

Use the drop-down menus to select the answer choice that answers each question based on the information presented on the graphic.
NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
