

## Exam Questions C2150-606

IBM Security Guardium V10.0 Administration

<https://www.2passeasy.com/dumps/C2150-606/>

#### NEW QUESTION 1

A Guardium administrator installed the BUNDLE-STAP module and is monitoring the state of the install. Which state requires a database server reboot to complete the installation process?

- A. Ip
- B. IP-PR
- C. FAILED
- D. PENDING-UPDATE

**Answer:** B

#### NEW QUESTION 2

A Guardium administrator noticed that while the data activity monitoring is working fine, the Guardium appliance is slower than usual. The administrator wants to check the current CPU load of the Guardium appliance.

Which predefined Guardium report(s) allows the administrator to determine the current system CPU load of the Guardium Appliance?

- A. CPU Util report
- B. CPU Tracker report
- C. Unit summary and CPU Util report
- D. Buff Usage Monitor and System monitor report

**Answer:** D

#### NEW QUESTION 3

The Quick Search window does not show up on the GUI of a standalone Collector What technical feature should the Guardium administrator check first?

- A. That the Collector has at least 24 GB.
- B. That the Collector has at least 32 GB.
- C. That the Collector has at least 64 GB.
- D. Check the contract and verify whether that feature was purchased.

**Answer:** A

#### NEW QUESTION 4

A Guardium administrator is preparing commands to install or upgrade an S-TAP using the command line method. Which operating system can use the ktap\_allow\_module\_combos parameter for the installation and upgrade?

- A. AIX
- B. Linux
- C. Solaris
- D. HP-UX

**Answer:** B

#### NEW QUESTION 5

A Guardium administrator is creating a policy to alert on actions by users that are stored on an LDAP server. How can the administrator populate a group to use in the policy?

- A. Schedule the LDAP user import into the group.
- B. Schedule the LDAP user import from accessmgr and run portal user sync.
- C. Schedule the LDAP user import from accessmgr and populate the group from a query.
- D. Populate the group from a query in access domain with a condition on the LDAP server as the Server IP.

**Answer:** C

#### NEW QUESTION 6

During a Guardium deployment planning meeting, a database administrator indicated that the mission critical databases were clustered. How should the Guardium administrator handle S-TAP installation and configuration with respect to clustered databases?

- A. Install S-TAP agents on all active node
- B. Set ALL\_CAN\_CONTROL=I to failover the S-TAP process to the passive nodes when a database failover occurs.
- C. install S-TAP agents on all active nodes Set WAIT\_FOR\_DB\_EXEC=I to set the agent process to failover to the passive node when a database failover occurs.
- D. Install S-TAP agents on all active and passive node
- E. Set ALL\_CAN\_CONTROL=0 to disable all passive nodes until a database failover occurs.
- F. Install S-TAP agents on all active and passive nodes: Set WAIT\_FOR\_DB\_EXEC>0 on all nodes to start S-TAP processes without waiting for a correct DB home.

**Answer:** A

#### NEW QUESTION 7

An administrator previously had an issue with a Guardium system. This was resolved with the assistance from the IBM Guardium support team, who provided the shell script, a CLI command and the encrypted key to execute the uploaded shell script.

Which CLI command should the administrator use to review the commands that were previously run?

- A. fjieserver

- B. support execute showlog
- C. show log external state
- D. support must\_gather system\_db\_info

**Answer:** B

#### NEW QUESTION 8

The guard\_tap.ini of a UNIX S-TAP is configured with the following parameters:

```
firewall_installed=1
firewall_fail_close=1
firewall_default_state=1
firewall_timeout=10
```

The collector that this S-TAP is sending data to has become unavailable and there is no failover option configured. A Guardium administrator must communicate the impact of this outage to users of the monitored database.

What should the administrator advise is the expected behavior for a database session?

- A. The session will not experience any latency or termination.
- B. No SQL can be executed and after 10 seconds the session will be terminated.
- C. in the first 10 seconds of the session SQL can be executed, then the session is terminated.
- D. in the first 10 seconds of the session no SQL can be executed, then the session will work as normal.

**Answer:** C

#### NEW QUESTION 9

Guardium reports are showing multiple records with client ip as 0.0.0.0. Users are unable to identify which client the connections came from. The Guardium administrator has identified that the databases are using encryption.

Which column can the administrator add that would help users to better identify the client?

- A. Client OS
- B. Client MAC
- C. Access ID
- D. Analyzed Client IP

**Answer:** B

#### NEW QUESTION 10

A Guardium administrator manages an environment containing four standalone Collectors. The administrator has been asked to provide a weekly report showing all Data Manipulation Language (DML) SQL statements performed by all database administrators on all databases. The administrator does not want to run the report on each Collector. What should the administrator do to simplify this task and run the report in only one place every week?

- A. Replace the 4 Collectors with one Aggregator.
- B. Create an Enterprise Report on one Collector combining the data.
- C. Add a Guardium Aggregator to the environmen
- D. Create and run the report on the Aggregator.
- E. install a Configuration Auditing System (CAS) on each Database Serve
- F. Configure the CAS Client to send data to a Collecto
- G. Create and run the report on the Collector.

**Answer:** C

#### NEW QUESTION 10

After a successful purge, a Guardium administrator observes that the full percentage of the Guardium internal database is not decreasing. The administrator uses support show db-top-tables all and finds the size of the largest tables has decreased significantly.

What should the administrator do?

- A. Increase the retention period and rerun the purge.
- B. Rebuild the appliance and restore from the backup.
- C. Login to CLI and execute stop inspection-core.
- D. Optimize the internal TURBINE database using diag CLI command.

**Answer:** D

#### NEW QUESTION 11

An administrator has a new standalone Guardium appliance that will be placed into production next week. The appliance will monitor traffic from a number of databases with a high volume of traffic. The administrator needs to configure the schedule to ensure the appliance internal database does not get full with incoming data.

Which data management function does the administrator need to configure?

- A. Purge
- B. Data Export
- C. Data Restore
- D. System Backup

**Answer:** A

#### NEW QUESTION 14

A Guardium administrator has rebuilt an appliance, and wants now to restore a backup image of the entire database, audit data, and all definitions from Data backup. Which CLI command should the administrator use to accomplish this?

- A. restore config
- B. restore system
- C. restore pre-patch-backup
- D. restore certificate sniffer backup

**Answer: B**
