NEW QUESTION 1

Identify two statements that are true about the cost-organization relationship.

- A. Costing Item Validation Organization can only be Item Master Organization of the underlying inventory organizations.
- B. Only Inventory organizations belonging to different Item Master Organizations can be part of a cost organization.
- C. Costing Item Validation Organization is used to default the Unit of Measure for costing calculations.
- D. The inventory organizations that are assigned to a cost organization must all belong to the same legal entity.

Answer: CD

NEW QUESTION 2

Your organization is planning for a periodic counting of individual items automatically throughout the course of the year. As part of this activity, the user has loaded items to the cycle count but some of the items are not being considered when count schedules and count sequences are not generated. Identify two reasons that explain why the items are not being considered.

- A. The ABC assignment group is not defined.
- B. The Include in Schedule option is not selected to include the item for auto-scheduling.
- C. The Cycle Count Enabled flag is not selected for the inventory organization.
- D. The Cycle Count Enabled flag is not selected for the item.
- E. The approval controls are not set up.

Answer: DE

NEW QUESTION 3

You set up an item organization and an inventory organization as part of your customer's requirement. Your customer has, by mistake, performed a receipt transaction in the item organization instead of the inventory organization. How will you rectify this error?

- A. Perform a correct receipt transaction and receive the item in the correct organization.
- B. Perform a return of item and receive the item again in the correct organization.
- C. It is not possible to receive item in the item organization.
- D. Perform a new receipt in the correct organization and retain the stock in item organization because it does not affect any other operation.

Answer: C

NEW QUESTION 4

Which two statements are true in regard to using the Enterprise Structures Configuration? (Choose two.)

- A. It recommends job and position structures.
- B. It allows you to create your Enterprise, Business Units, and Warehouses in a single step.
- C. You cannot modify the recommendation from the too
- D. You must do it after you perform the initial configuration.
- E. The guided interview-based process helps you set up the enterprise with best practices.
- F. It creates the chart of accounts.

Answer: BD

NEW QUESTION 5

Which code snippet indicates that the page you are designing is capable of handling errors?

- A. <%@page errorPage="errorHandler.jsp"%>
- B. <%= requestScope['javax.servlet.error'] !=null %>
- C. <%@page isErrorPage="true"%>
- D. <c:set var="errorHandler" value="true"/>

Answer: C

NEW QUESTION 6

Which two tasks must be defined to a set up the Facilities Schedule? (Choose two.)

- A. Manage Facility Workday Patterns
- B. Manage Facility Operations
- C. Manage Facility Holidays
- D. Manage Facility Time Cards
- E. Manage Facility Shifts

Answer: AE

NEW QUESTION 7

What does the system do if you have not entered a count for a tag during physical inventory process?

- A. It will adjust your on-hand balances down to zero quantity.
- B. You will not be able to post without a quantity for every tag.
- C. Any adjustment will be rejected.
- D. It will consider the current system quantity.

E. A warehouse person will be notified.

Answer: A

NEW QUESTION 8

The physical inventory process is carried out for a particular inventory organization with the following parameters:

- ▶ Negative quantity Tolerance Percentage is set to 10%
- ▶ Approval Type = 'Always'

The system says that there are 100 on band, but you only counted 95. What will happen?

- A. The setup is invalid; it will give an error message.
- B. Because the 95 is within the 10% tolerance, it will post without approval.
- C. The system will ask a user to recount before posting.
- D. An approval will be required before posting.

Answer: B

NEW QUESTION 9

Given the code fragments:

```
@Stateless
public class HRService {
    @PersistenceContext(unitName="HRApp-PU")
    private Employee findEmployee(String badgeId) {
        return entityManager.find(Employee.class, badgeId);
    }
    public void updateEmployee(Employee emp) {
        //add code here
    }
}

@WebServlet(name="HR", urlPatterns={"/hr"})
public class HRServlet extends HttpServlet {
    @EJB
    private HRService hrService;
    public void doGet(HttpServletRequest req, HttpServletResponse res)
        throws ServletException, IOException {
        String badgeId = req.getParameter("badge");
        String name = req.getParameter("name");
        Employee emp = hrService.findEmployee(badgeId);
        emp.setName(name);
        hrService.updateEmployee(emp);
    }
}
```

What code should you add to the body of the updateEmployee method in order to save pending changes to the database?

- A. entityManager.merge(emp);
- B. Context
- C. Ctx = new InitialContext(); UserTransaction utx = (UserTransaction)ctx.lookup("java:comp/UserTransaction"); utx.begin(); entityManager.merge(emp); utx.c
entityManager.lock(emp); EntityManager.merge(emp);
- D. entityManager.getTransaction().begin(); entityManager.merge(emp); entityManager.getTransaction().comm

Answer: B

NEW QUESTION 10

Your customer has defined three business units: two of the them require the same set of receivables payment terms whereas the third needs a separate set of receivables payment terms.

How will you receive this requirement?

- A. Define one data set with common payment terms and exclude the payment terms feature from the third business unit.
- B. Define one reference data set and modify the business unit security.
- C. Define two reference data sets, assign the first set to the two business units which will share the same payment terms and second set to the business unit which need separate payment terms.
- D. Define three reference data sets and assign each data set to each business unit.

Answer: C

NEW QUESTION 10

Given:

```
1:  @Stateless
2:  public class AlarmManager {
3:      @Resource
4:      private TimerService timerService;
5:      public void createAlarm(Date alarmDate) {
6:          Alarm myAlarm = new Alarm();
7:          TimerConfig config = new TimerConfig();
8:          config.setInfo(myAlarm.getId());
9:
10:     }
11:     @Timeout
12:     public void handleTimeout(Timer myTimer) {
13:         int alarmId = {int}myTimer.getInfo();
14:         showAlarmMessage(alarmId);
15:     }
16: }
```

You are creating an Alarm management system. When you create a new alarm, you want it to create an alert that is triggered once at the specified time. Which method should you call on Line 9 to create the timer?

- A. timerService.createCalendarTimer(alarmDate, config);
- B. timerService.createSingleActionTimer(alarmDate, config);
- C. timerService.createIntervalTimer(alarmDate, -1, config);
- D. timerService.createTimer(alarmDate, -1, config);

Answer: D

NEW QUESTION 11

You defined an Inventory Organization that is meant to track the contract manufacturing process outsourced to a supplier. Where do you mention that this Inventory Organization is meant for one particular supplier?

- A. Manage Inventory Organization Locations
- B. Manage Subinventories
- C. Manage Inventory Organizations
- D. Manage Contract Manufacturing Relationships
- E. Manage Item Organizations

Answer: C

NEW QUESTION 13

Your client is about to define their primary ledger. Which set of three primary attributes do they need to know in order to complete this?

- A. Chart of Accounts, Description, and Accounting Method
- B. Chart of Accounts, Ledger Balance, and Accounting Method
- C. Chart of Accounts, Accounting Calendar, and Currency
- D. Currency, Description, and Accounting Method

Answer: C

NEW QUESTION 16

On the Supply Lines Overview page, the deviations in supply type chart show a supply line status of exception. What action must you take?

- A. This indicates that supply line quantities are available but the quality is not up to the mark, so the quality issue must be resolved.
- B. The indicates that supply line has an exception in manufacturing goods, so the supply line must be changed.
- C. This indicates that supply line quantities are less than required, so additional quantities must be procured to meet the requirement.
- D. This indicates that supply line quantities are not available, so inventory must be procured.

Answer: C

NEW QUESTION 21

Which of these can be a JPA entity?

- A. Enum type
- B. Abstract class
- C. Interface type
- D. Final class

Answer: A

NEW QUESTION 25

Your organization is using min-max planning to replenish stock and the planning parameters are set at item organization level with a default subinventory.

Item: A, Min Qty: 25, Max Qty: 150 and Current Level: 20

The item above is purchased from a supplier. Although there is subinventory on hand, the subinventory is below the minimum required level. This should trigger a Min-Max report entry, but the requisition is not generated. Why?

- A. Fixed lot multiplier is not set.
- B. No value has been set for the "Min-Max Replenishment Reorder Approval" profile.
- C. Min-Max planning can be performed at the Organization level.
- D. Rounding the Reorder Quantity is disabled.
- E. Item is not defined in Manage Item Subinventories.

Answer: E

NEW QUESTION 29

Given a JSL document describing a batch job:

```
<job id="ProductLoadJob"
xmlns=http://xmlns.jcp.org/xml/ns/javaee version="1.0">
<step id="ProcessProduct">
    <chunk item-count="10">
        <reader ref="ProductReader"/>
        <processor ref="ProductProcessor"/>
        <writer ref="ProductWriter"/>
    </chunk>
</step>
</job>
```

How do you initiate a batch job?

- A. Get the JobExecution object from BatchRuntime and call its start() method.
- B. Get the JobExecution object from BatchRuntime and set its status to JobStatus.INITIATED.
- C. Get the JobOperator object from BatchRuntime and call its start() method.
- D. Call BatchRunTime.initialize("ProductLoadJob");

Answer: A

NEW QUESTION 32

Your supplier sent you stock against a consigned agreement. You transferred at the stock to owned and generated a consumption advice. An invoice was raised by the supplier and the payment made. A few days after using some of the quantities of the stock, you realized that some of the stock sent by the supplier is not of suitable quality and you need to send the stock back.

What is the process of returning the material?

- A. You have to cancel the invoice and send the material back without changing the ownership.
- B. Return the material and create a debit memo for the supplier.
- C. You cannot return consigned items that are invoiced and paid.
- D. Treat the material as scrap.
- E. You have to transfer the ownership of item and perform the return transaction.

Answer: B

NEW QUESTION 35

Given the code fragment:

```
@Path ("Employees")
public class EmployeesResource {
    @Inject private EmployeeManager em;
    @Get
    @Path("{id:[A-Z] [0-9]+}")
    public Employee getEmployee(@PathParam("id") String id) {
        return em.findEmployee(id);
    }
}
```

Which URL triggers the invocation of the getEmployee () method?

- A. <base url>/Employees/89724
- B. <base url>/Employees/J6349
- C. <base url>/Employees/id:a7280
- D. <base url>/Employees/id/J6349

Answer: B

NEW QUESTION 38

Which interface should you implement if you want to be alerted to the lifecycle events surrounding your task being executed by a ManagedExecutorService?

- A. the Runnable Interface
- B. the ManagedExecutorTask interface
- C. the TaskEventListener interface
- D. the ManagedTaskListener interface

Answer: D

NEW QUESTION 39

Given the set of navigation rules:

```
<navigation-rule>
  <from-view-id>list-widgets</from-view-id>
  <navigation-case>
    <from-outcome>add</from-outcome>
    <to-view-id>add-widget</to-view-id>
  </navigation-case>
</navigation-rule>
<navigation-rule>
  <from-view-id>*</from-view-id>
  <navigation-case>
    <from-outcome>home</from-outcome>
    <to-view-id>home</to-view-id>
  </navigation-case>
  <navigation-case>
    <from-outcome>logout</from-outcome>
    <to-view-id>goodbye</to-view-id>
  </navigation-case>
</navigation-rule>
<navigation-rule>
  <from-view-id>home</from-view-id>
  <navigation-case>
    <from-outcome>dashboard</from-outcome>
    <to-view-id>dashboard</to-view-id>
  </navigation-case>
  <navigation-case>
    <from-outcome>list</from-outcome>
    <to-view-id>list-widgets</to-view-id>
  </navigation-case>
</navigation-rule>
```

Which two define a valid flow of view IDs through the application? (Choose two.)

- A. home > goodbye > list-widgets
- B. dashboard > home > add-widget > list-widgets
- C. list-widgets > add-widget > home > dashboard > home
- D. home > list-widgets > add-widget > goodbye

Answer: CD

NEW QUESTION 41

A customer has one Business Unit, two Legal Entities, and each have eight warehouses (defined as Inventory Orgs). While trying to set up Cost Organizations for each of these Legal Entities you were unable to perform the mandatory step of assigning the Profit Center Business Unit for one set of eight Inventory Organizations; however, you could do it for the other set.

What is the reason for this?

- A. The Legal Entity Setup is incomplete.
- B. There is no Inventory Validation Organization defined.
- C. The General Ledger is not associated with Business Unit.
- D. The Business Unit is not enabled for Costing.
- E. There is no Business Unit associated with the Legal Entity.

Answer: E

NEW QUESTION 44

You face a supply request exception due to some reason. You realize that you need to make some changes to the Manage Supply Request Exceptions page. Which action will you perform?

- A. The supply request cannot be update
- B. The only way is to resolve the error in the source application and resubmit the request.

- C. The supply request can be updated using a third-party application only.
- D. Update the supply request and submit it.
- E. The errors will be resolved automatically.
- F. Update the supply request and make sure errors are resolved before resubmitting it.

Answer: A

NEW QUESTION 49

During Cloud Inventory implementation your customer requires you to enable the Oracle Transactional Business Intelligence (OTBI) KPI to review the list of standard reports which is useful for their current business scenario. When navigating to reports and analytics, the warehouse dashboard doesn't show any KPI watchlist.

Identify two causes. (Choose two.)

- A. Logistics Business Intelligence Analytics is enabled.
- B. Logistics Business Intelligence Analytics is not implemented.
- C. Organization is not enabled for warehousing.
- D. Data permissions for the organization being referenced are not set up.
- E. Supply Chain and Order Management Business Intelligence Analytics is not enabled.

Answer: BE

NEW QUESTION 54

Given the following class definition with numbered lines:

```
@Alternative
public class ShoppingCartMock implements ShoppingCart {
    @Override
    public void checkout() {...}
}
```

How do you specify to use this mock CDI bean implementation instead of the regular implementation class?

- A. Use the alternatives element in the beans.xml file and specify the class name in the class element within it.
- B. Start up the server with the optional `-alternative` command-line option, specifying any alternative class names in a comma-separated list.
- C. Reorder the implementation names in the beans.xml file such that the desired alternative is listed earlier.
- D. Delete the regular implementation class from the WAR.

Answer: B

NEW QUESTION 55

Which three replenishment count types are used for Periodic Automated Replenishment (PAR)?

- A. Order Economic Quantity (EQQ): Generates a replenishment request for the calculated quantities based on inventory policies to maintain the PAR quantity.
- B. Reorder Point: Generates a replenishment request for the order quantity based on days of cover for the item lead time.
- C. Order Quantity: Generates a replenishment request for the order quantity entered for the replenishment count.
- D. Order RAR: Generates a replenishment requisition for the RAR-level quantity.
- E. On-hand Quantity: Generates a replenishment requisition for the difference between the on-hand quantity and the RAR-level.

Answer: CDE

NEW QUESTION 59

You have orders that were due for shipping last week, but as for now they have not been shipped. Which dashboard should you check at the end of the day to determine which orders have been shipped?

- A. Past Due Shipments
- B. Orders Completed in Full
- C. Past Due, Completed Today
- D. Due Today, Not Completed
- E. Past Due, Not Completed

Answer: B

NEW QUESTION 62

Given:

```
public class SomeClass {
    @Resource (name="java:comp/env/concurrent/TaskExecutor")
    ManagedExecutorService mes;
    public void createTask() {
        Future<Integer> result=
            mes.submit(new MyCallable<Integer>());
    }
}
```

How often does the submitted task run?

- A. need more details to determine
- B. once

- C. as many times as you like
- D. based on a schedule

Answer: A

NEW QUESTION 65

Your web application requires logic to remember items that a user placed into a shopping cart. Which two mechanisms should you use to associate that information with the user? (Choose two.)

- A. HttpServletResponse objects
- B. ServletContext objects
- C. HttpSession objects
- D. a database

Answer: BC

NEW QUESTION 67

Your client has not been managing Supply Request Exceptions on a regular basis. What issue does this cause?

- A. No issues would be caused; these are just warnings.
- B. After the errors reach a set threshold in profile options, no new supply requests can be created.
- C. If exceptions are not resolved within a set threshold days, it alerts the manager and continues to escalate up the Supply Request Exception Chain.
- D. The request will be denied automatically if not resolved within two days.

Answer: C

NEW QUESTION 68

Given:

```
// line 1
public class Mymapper {
    @PrePassivate
    public void setPinDrop() {}
    @PostActivate
    public void checkLocation() {}
}
```

What code needs to be added to line 1 for MyMapper bean instances to be correctly passivated?

- A. @Stateless @PassivationCapable
- B. @Stateless
- C. @Stateful @PassivationCapable
- D. @Stateful

Answer: D

NEW QUESTION 69

Which three applications originate a buy request that is received by supply chain orchestration?

- A. Purchasing
- B. Inventory
- C. Order Management
- D. Planning
- E. Self Service Procurement
- F. Accounts Payable

Answer: BCD

NEW QUESTION 73

Give the code fragment:

```
1: @Stateless
2:
3: public class Warehouse {
4:     public void sendConfirmation(String msg) {}
5:     public String reverse(Product pro) {}
6: }
7:
```

And the code fragment:

```

8: @Stateless
9:
10: public class Shop {
11:     @EJB private Warehouse war;
12:
13:     public void purchase(Product pro) {
14:         String confirmationCode = war.reserve(pro);
15:         war.sendConfirmation(confirmationCode);
16:     }
17: }

```

The sendConfirmation() and reserve() methods should be executed in the same transactional context. Which transaction attributes do you ensure this?

- A. Add annotations: @TransactionAttribute (TransactionAttributeType.REQUIRES_NEW) at line 2, @Transactional at line 9 and @TransactionAttribute ((TransactionAttributeType.MANDATORY) atline 12
- B. No additional annotations are required.
- C. Add annotations: @TransactionAttribute (TransactionAttributeType.REQUIRED) at line 2, @Transactional at line 9 and @TransactionAttribute ((TransactionAttributeType.REQUIRES_NEW) at line 12
- D. Add annotations: @TransactionAttribute (TransactionAttributeType.MANDATORY) at line 2, @Transactional at line 9 and @TransactionAttribute ((TransactionAttributeType.REQUIRES_NEW) at line 12

Answer: D

NEW QUESTION 75

As part of implementing Oracle Cloud for your customer, you defined multiple Business Units. The customer wants you to define an Inventory Organization that is associated with all the business units and not just one particular business unit. How do you achieve this?

- A. Define the Inventory Organization without associating it with any location.
- B. Leave the Management Business Unit field blank in the Inventory Organization definition.
- C. Leave the Profit Center Business Unit field blank in the Inventory Organization definition.
- D. It is not possible to define an Inventory Organization that is associated with more than one business unit.

Answer: D

NEW QUESTION 77

Your company is an automobile spares manufacturing organization, which follows a discrete process. It has its own manufacturing and distribution centers located globally.

It has these business units: US - USA business unit

CAN - Canadian business unit UK - UK business unit

MX - Mexican business unit IND - India business unit SPA - Spain business unit FRA - France business unit

NL - Netherlands business unit GER - Germany business unit

These are the inventory organizations that exist in each business unit:

Inventory Org - business unit

```

-----
GM      (Master Org) - US
US1     (Child Org)  - US
US2     (Child Org)  - US
CA1     (Child Org)  - CAN
MX1     (Child Org)  - MX
IN1     (Child Org)  - IND
SP1     (Child Org)  - SPA
FR1     (Child Org)  - FRA
NL1     (Child Org)  - NL
DE1     (Child Org)  - GER

```

Which two statements are true?

- A. All inventory organizations do not need to be in the same business unit to assign items.
- B. Item organizations are also supported to serve as inventory organizations.
- C. Items cannot be assigned to inventory organizations across business units.
- D. Items defined in the GM organization can be assigned to US1, US2, NL1, and MX1 inventory organizations.
- E. Operational Attributes can be controlled only at the Master Level.
- F. You can define an item in the IN1 inventory organization and assign it to the DE1 inventory organization.

Answer: AD

NEW QUESTION 81

You need to exchange large binary messages using chunks in a WebSocket application. Identify two ways in which you can receive partial messages. (Choose two.)

- A. Define an @OnMessage method with a single MimePart parameter.
- B. Use a ChunkListener interface implementation.
- C. Use a MessageHandler.Partial<ByteBuffer> interface implementation.
- D. Define an @OnMessage method with byte [] as the first parameter and a boolean as the second parameter.

Answer: CD

NEW QUESTION 82

You are working with JMS publish-subscribe operations.

What happens when a producer publishes a message to a topic for which a durable subscription exists but there are no subscribers available?

- A. The publisher waits for a subscriber, who then consumes it
- B. However, the publisher will time out if no consumer arrives within the given timeout period.
- C. The publisher sends the message
- D. However, it is never consumed because there wasn't anything listening when it arrived, regardless of the message timeout length.
- E. The publisher successfully sends a message, which will be consumed later, once there is a subscriber, assuming the message hasn't timed out.
- F. The message publisher is immediately notified about the lack of subscribers and can decide for itself if, and when, to resend.

Answer: C

NEW QUESTION 83

In the Back-to-Back (B2B) Order to Cash flow, ordered items are purchased from a supplier. The Sourcing Rules have been defined for the item and the buy flow has been initiated. The sales order line is shown as Awaiting Shipping and the supply line status is in "Purchasing" with the supply order generated but the purchase requisition not generating.

What is the reason?

- A. The sourcing rule is incorrect.
- B. Supply order is generated with exceptions.
- C. Prepare is not valid.
- D. No Blanket Purchase Agreement (BPA) exists for this supplier-item combination.
- E. Buy requests originate from Order Management.

Answer: A

NEW QUESTION 87

Your customer decides to implement Cloud Procurement and Inventory. While discussing with your customer, you come to know that they have a business that spans across multiple locations and they have warehouse situated across USA and Canada.

- ☐ All their procurement, payables, and distribution activities take place from USA.
- ☐ They have a central warehouse in USA and after the goods are delivered to this warehouse, they are distributed across multiple additional warehouses. The warehouses are managed separately from the requisitioning units.
- ☐ For requesting material they have two units. One located in USA that monitors the current stock. They are responsible for creating requisition for any material shortage in USA. They have another location in Canada for requesting material.

Which setup fulfills this scenario?

- A. BU1: USA - as procurement and requisitioning Business Unit (BU)BU2: Canada - as requisitioning Business UnitDefine Service provider relationship where Canada procurement business unit serves as procurement and payables service provider for Canada Requisitioning Business Unit.
- B. BU1: USA - as procurement business unit (BU)BU2: Canada - as requisitioning business unitBU3: USA- as requisitioning business unitDefine Service provider relationship where USA procurement business unit serves as procurement and payables service provider for Canada Requisitioning Business Unit.
- C. BU1: USA - as procurement business unit (BU)BU2: Canada - as requisitioning business unitBU3: USA- as requisitioning business unitDefine Service provider relationship where Canada procurement business unit serves as procurement and payables service provider for Canada Requisitioning Business Unit.
- D. BU1: USA - as procurement business unit (BU)BU2: Canada - as requisitioning business unitBU3: USA- as requisitioning business unitDefine Service provider relationship where USA procurement business unit serves as procurement and payables service provider for both Canada and USA requisitioning Business Units.

Answer: A
