

MS-500 Dumps

Microsoft 365 Security Administrator

<https://www.certleader.com/MS-500-dumps.html>

NEW QUESTION 1

- (Exam Topic 1)

You need to recommend a solution for the user administrators that meets the security requirements for auditing. Which blade should you recommend using from the Azure Active Directory admin center?

- A. Sign-ins
- B. Azure AD Identity Protection
- C. Authentication methods
- D. Access review

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/azure/active-directory/reports-monitoring/concept-sign-ins>

NEW QUESTION 2

- (Exam Topic 1)

You need to resolve the issue that targets the automated email messages to the IT team. Which tool should you run first?

- A. Synchronization Service Manager
- B. Azure AD Connect wizard
- C. Synchronization Rules Editor
- D. IdFix

Answer: B

Explanation:

References:

<https://docs.microsoft.com/en-us/office365/enterprise/fix-problems-with-directory-synchronization>

NEW QUESTION 3

- (Exam Topic 1)

An administrator configures Azure AD Privileged Identity Management as shown in the following exhibit.

Exchange Administrator - Members

+ Add member X Remove member ✓- Access reviews ↓ Export ↻ Refresh

Assignment type

All

Search

Search by members name

Member	Email	ASSIGNMENT TYPE	EXPIRATION
Admin1	Admin1@M365x901434.onmicrosoft.com	Permanent	-
Admin2	Admin2@M365x901434.onmicrosoft.com	Eligible	-

What should you do to meet the security requirements?

- A. Change the Assignment Type for Admin2 to Permanent
- B. From the Azure Active Directory admin center, assign the Exchange administrator role to Admin2
- C. From the Azure Active Directory admin center, remove the Exchange administrator role to Admin1
- D. Change the Assignment Type for Admin1 to Eligible

Answer: D

NEW QUESTION 4

- (Exam Topic 2)

You need to create Group3.

What are two possible ways to create the group?

- A. an Office 365 group in the Microsoft 365 admin center
- B. a mail-enabled security group in the Microsoft 365 admin center
- C. a security group in the Microsoft 365 admin center
- D. a distribution list in the Microsoft 365 admin center
- E. a security group in the Azure AD admin center

Answer: AD

NEW QUESTION 5

- (Exam Topic 2)

How should you configure Group3? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Group type:

	▼
An Office 365 group in the Microsoft 365 admin center	
A security group in Active Directory Users and Computers	
A security group in the Azure Active Directory admin center	

Group membership criteria:

	▼
A dynamic distribution list	
A dynamic membership rule with an Advanced rule set to All users	
A dynamic membership rule with a Simple rule set to userType Equals User	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Group type:

	▼
An Office 365 group in the Microsoft 365 admin center	
A security group in Active Directory Users and Computers	
A security group in the Azure Active Directory admin center	

Group membership criteria:

	▼
A dynamic distribution list	
A dynamic membership rule with an Advanced rule set to All users	
A dynamic membership rule with a Simple rule set to userType Equals User	

NEW QUESTION 6

- (Exam Topic 2)

You need to implement Windows Defender ATP to meet the security requirements. What should you do?

- A. Configure port mirroring
- B. Create the ForceDefenderPassiveMode registry setting
- C. Download and install the Microsoft Monitoring Agent
- D. Run WindowsDefenderATPOnboardingScript.cmd

Answer: C

NEW QUESTION 7

- (Exam Topic 2)

Which IP address space should you include in the MFA configuration?

- A. 131.107.83.0/28
- B. 192.168.16.0/20
- C. 172.16.0.0/24
- D. 192.168.0.0/20

Answer: B

NEW QUESTION 8

- (Exam Topic 3)

You are evaluating which devices are compliant in Intune.

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Statements	Yes	No
Device2 is compliant.	<input type="radio"/>	<input type="radio"/>
Device5 is compliant.	<input type="radio"/>	<input type="radio"/>
Device6 is compliant.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Statements	Yes	No
Device2 is compliant.	<input checked="" type="radio"/>	<input type="radio"/>
Device5 is compliant.	<input type="radio"/>	<input checked="" type="radio"/>
Device6 is compliant.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 9

- (Exam Topic 4)

You have a hybrid Microsoft 365 environment.

All computers run Windows 10 Enterprise and have Microsoft Office 365 ProPlus installed. All the computers are joined to Active Directory.

You have a server named Server1 that runs Windows Server 2016. Server1 hosts the telemetry database. You need to prevent private details in the telemetry data from being transmitted to Microsoft. What should you do?

- A. On Server1, run readinessreportcreator.exe
B. Configure a registry on Server1
C. Configure a registry on the computers
D. On the computers, run tdadm.exe

Answer: C

Explanation:

"To allow yourself and other administrators to identify the owners of Office files that have compatibility issues without revealing file names or specific locations, you can enable file obfuscation, which disguises Office file names, titles, and file paths. This setting is configured on the agent, which performs the obfuscation task before uploading data to the shared folder. The data that is stored on the local computer is not obfuscated."

<https://docs.microsoft.com/en-us/deployoffice/compat/manage-the-privacy-of-data-monitored-by-telemetry-in-o>

NEW QUESTION 10

- (Exam Topic 4)

You have an Azure Active Directory (Azure AD) tenant that has a Microsoft 365 subscription You recently configured the tenant to require multi factor authentication (MFA) for risky sign ins You need to review the users who required MFA. What should you do?

- A. From the Microsoft 365 admin center, review a Security & Compliance report.
B. From the Azure Active Directory admin center, download the sign-ms to a CSV file
C. From the Microsoft 365 Compliance admin center, run an audit log search and download the results to a CSV file
D. From the Azure Active Directory admin center, review the Authentication methods activities.

Answer: D

NEW QUESTION 10

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription that contains the users shown in the following table.

Name	Role
Admin1	Global Administrator
Admin2	Customer Lockbox access approver
Admin3	Security admin

You enable Customer Lockbox.

Which users will be notified when a Microsoft support engineer requests access to the organization?

- A. Admin1, Admin2. and Admin3
- B. Admin2only
- C. Admin2 and Admin3 only
- D. Admin1 and Admin2 only

Answer: D

NEW QUESTION 12

- (Exam Topic 4)

You have a Microsoft SharePoint Online site named Site1 that has the users shown in the following table.

Name	Role
User1	Owner
User2	Member

You create the retention labels shown in the following table.

Name	Retention period	Retention action	Based on
Retention1	4 years	Retain only	When a file was labeled
Retention2	2 years	Retain and delete	When a file was labeled

Answer Area

	Statements	Yes	No
	User1 can delete File1 on March 10, 2021.	<input type="radio"/>	<input type="radio"/>
	User2 can delete File1 on March 10, 2025.	<input type="radio"/>	<input checked="" type="radio"/>
	User2 can edit File2 on March 15, 2023.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

	Statements	Yes	No
	User1 can delete File1 on March 10, 2021.	<input type="radio"/>	<input checked="" type="radio"/>
	User2 can delete File1 on March 10, 2025.	<input checked="" type="radio"/>	<input type="radio"/>
	User2 can edit File2 on March 15, 2023.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 13

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription that has Microsoft 365 Defender enabled.

You plan to deploy a third-party app named App1 that will receive alert data from Microsoft 365 Defender. Which format will Microsoft 365 Defender use to send the alert data to App1?

- A. JSON
- B. ZIP
- C. XML
- D. CSV

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/security/defender-endpoint/alerts?view=o365-worldwide>

NEW QUESTION 14

- (Exam Topic 4)

Your company has a main office and a Microsoft 365 subscription.

You need to enforce Microsoft Azure Multi-Factor Authentication (MFA) by using conditional access for all users who are NOT physically present in the office.

What should you include in the configuration?

- A. a user risk policy

- B. a sign-in risk policy
- C. a named location in Azure Active Directory (Azure AD)
- D. an Azure MFA Server

Answer: C

Explanation:

References:
<https://docs.microsoft.com/en-us/azure/active-directory/conditional-access/location-condition>

NEW QUESTION 15

- (Exam Topic 4)

You have a Microsoft Azure Active Directory (Azure AD) tenant named contoso.com that contains the users shown in the following table.

Name	Member	Multi-factor authentication (MFA) status
User1	Group1	Disabled
User2	Group1, Group2	Enabled

You create and enforce an Azure AD Identity Protection user risk policy that has the following settings:

- Assignments: Include Group1, Exclude Group2
- Conditions: Sign in risk of Low and above
- Access: Allow access, Require password change

You need to identify how the policy affects User1 and User2.

What occurs when User1 and User2 sign in from an unfamiliar location? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Must change their password:

	▼
User1 only	
User2 only	
Both User1 and User2	
Neither User1 not User2	

Prompted for MFA:

	▼
User1 only	
User2 only	
Both User1 and User2	
Neither User1 not User2	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Must change their password:

	▼
User1 only	
User2 only	
Both User1 and User2	
Neither User1 not User2	

Prompted for MFA:

	▼
User1 only	
User2 only	
Both User1 and User2	
Neither User1 not User2	

NEW QUESTION 20

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription that contains a Microsoft SharePoint Online site named Site1 and the data loss prevention (DLP) policies in following table.

Name	Priority	Rule
DLP1	0	Rule1
DLP2	1	Rule2
DLP3	2	Rule3
DLP4	3	Rule4

The DLP rules are configured as shown in the following table.

Rule	User notifications	Policy tip	If there's a match for this rule, stop processing additional DLP policies and rules
Rule1	On	Tip 1	Enabled
Rule2	On	Tip 2	Disabled
Rule3	On	Tip 3	Enabled
Rule4	On	Tip 4	Disabled

All the policies are assigned to Site1.

You need to ensure that if a user uploads a document to Site1 that matches all the rules, the user will be shown the Tip 2 policy tip.

What should you do?

- A. Enable additional processing Of the policies if is a match for Rule1.
- B. Change the priority Of DLP2 to 3.
- C. Change the priority of DLP2 to 0
- D. Prevent additional processing of the policies if there is a match for Rule2.

Answer: C

NEW QUESTION 21

- (Exam Topic 4)

You need to ensure that a user named Grady Archie can monitor the service health of your Microsoft 365 tenant. The solution must use the principle of least privilege.

To complete this task, sign in to the Microsoft 365 portal.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

You need to assign the Service Administrator role to Grady Archie.

- In the Microsoft 365 Admin Center, type Grady Archie into the Search for users, groups, settings or tasks search box.
- Select the Grady Archie user account from the search results.
- In the Roles section of the user account properties, click the Edit link.
- Select the Customized Administrator option. This will display a list of admin roles.
- Select the Service admin role.
- Click Save to save the changes. Reference:

<https://docs.microsoft.com/en-us/office365/enterprise/view-service-health>

NEW QUESTION 24

- (Exam Topic 4)

You have a Microsoft 365 subscription.

The Global administrator role is assigned to your user account. You have a user named Admin1. You create an eDiscovery case named Case1.

You need to ensure that Admin1 can view the results of Case1. What should you do first?

- A. From the Azure Active Directory admin center, assign a role group to Admin1.
- B. From the Microsoft 365 admin center, assign a role to Admin1.
- C. From Security & Compliance admin center, assign a role group to Admin1.

Answer: C

Explanation:

Reference:

<https://docs.microsoft.com/en-us/office365/securitycompliance/assign-ediscovery-permissions>

NEW QUESTION 29

- (Exam Topic 4)

You have a Microsoft 365 E3 subscription.

You plan to audit all Microsoft Exchange Online user and admin activities.

You need to ensure that all the Exchange audit log records are retained for one year. What should you do?

- A. Modify the retention period of the default audit retention policy.
- B. Create a custom audit retention policy.
- C. Assign Microsoft 365 Enterprise E5 licenses to all users.

D. Modify the record type of the default audit retention policy.

Answer: C

Explanation:

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/compliance/audit-log-retention-policies?view=o365-worldwide>

NEW QUESTION 30

- (Exam Topic 4)

You have a Microsoft 365 subscription that uses a default domain name of contoso.com. Microsoft Azure Active Directory (Azure AD) contains the users shown in the following table.

Name	Member of
User1	Group1
User2	Group1, Group2
User3	Group3

Microsoft Intune has two devices enrolled as shown in the following table:

Name	Platform
Device1	Android
Device2	Windows 10

Both devices have three apps named App1, App2, and App3 installed.

You create an app protection policy named ProtectionPolicy1 that has the following settings:

- Protected apps: App1
- Exempt apps: App2
- Windows Information Protection mode: Block

You apply ProtectionPolicy1 to Group1 and Group3. You exclude Group2 from ProtectionPolicy1. For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Yes No

From Device1, User1 can copy data from App1 to App3.

☐
☐

From Device2, User1 can copy data from App1 to App2.

☐
☐

From Device2, User1 can copy data from App1 to App3.

☐
☐

A. Mastered

B. Not Mastered

Answer: A

Explanation:

Answer Area

Yes No

From Device1, User1 can copy data from App1 to App3.

☐
☐

From Device2, User1 can copy data from App1 to App2.

☐
☐

From Device2, User1 can copy data from App1 to App3.

☐
☐

NEW QUESTION 35

- (Exam Topic 4)

Your company has a Microsoft 365 subscription.

The company does not permit users to enroll personal devices in mobile device management (MOM). Users in the sales department have personal iOS devices.

You need to ensure that the sales department users can use the Microsoft Power BI app from iOS devices to access the Power BI data in your tenant. The users must be prevented from backing up the app's data to iCloud.

What should you create?

- A. a device compliance policy in Microsoft Endpoint Manager
- B. a conditional access policy in Microsoft Azure Active Directory (Azure AD) that has a device state condition
- C. a conditional access policy in Microsoft Azure Active Directory (Azure AD) that has a client apps condition
- D. an app protection policy in Microsoft Endpoint Manager

Answer: D

NEW QUESTION 36

- (Exam Topic 4)

You have an Azure Acme Directory (Azure AD) tenant named contoso.com that contains the users shown in the following table.

Name	Group	Role
User1	Microsoft Defender for Identity Contoso Users	None
User2	Microsoft Defender for Identity Contoso Viewers	None
User3	Not applicable	Security administrator
User4	Not applicable	Security operator

You discover several security alerts are visible from the Microsoft Defender for Identity portal. You need to identify which users m contoso.com can dose the security Alerts. Which users should you identify?

- A. User1 only
- B. User1 and User3 only
- C. User1 and User2 only
- D. User4 only
- E. User3 and User4 only

Answer: E

NEW QUESTION 40

- (Exam Topic 4)

You have a Microsoft 365 sensitivity label that is published to all the users in your Azure Active Directory (Azure AD) tenant as shown in the following exhibit.

Label name Rebranding	Edit
Tooltip Used for all documents containing information about the rebranding effort	Edit
Description	Edit
Encryption Advanced protection for content with this label	Edit
Content marking Watermark: INTERNAL	Edit
Endpoint data loss prevention	Edit
Auto labeling	Edit

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Statements	Yes	No
All the documents stored on each user's computer will include a watermark automatically.	<input type="radio"/>	<input type="radio"/>
If the sensitivity label is applied to a document, the document will have a header that contains the word "INTERNAL".	<input type="radio"/>	<input type="radio"/>
The sensitivity label can be applied only to documents that contain the word rebranding.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/compliance/sensitivity-labels-office-apps?view=o365-worldwid>

NEW QUESTION 41

- (Exam Topic 4)

You have a Microsoft 365 subscription.

You have a Microsoft SharePoint Online site named Site1.

The files in Site1 are protected by using Microsoft Azure Information Protection.

From the Security & Compliance admin center, you create a label that designates personal data. You need to auto-apply the new label to all the content in Site1.

What should you do first?

- A. From PowerShell, run Set-ManagedContentSettings.
- B. From PowerShell, run Set-ComplianceTag.
- C. From the Security & Compliance admin center, create a Data Subject Request (DSR).
- D. Remove Azure Information Protection from the Site1 files.

Answer: D

Explanation:

References:

<https://docs.microsoft.com/en-us/office365/securitycompliance/apply-labels-to-personal-data-in-office-365>

NEW QUESTION 44

- (Exam Topic 4)

You have a Microsoft Sentinel workspace that has an Azure Active Directory (Azure AD) connector and an Office 365 connector.

From the workspace, you plan to create an analytics rule that will be based on a custom query and will run a security play.

You need to ensure that you can add the security playbook and the custom query to the rule. What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

NEW QUESTION 46

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

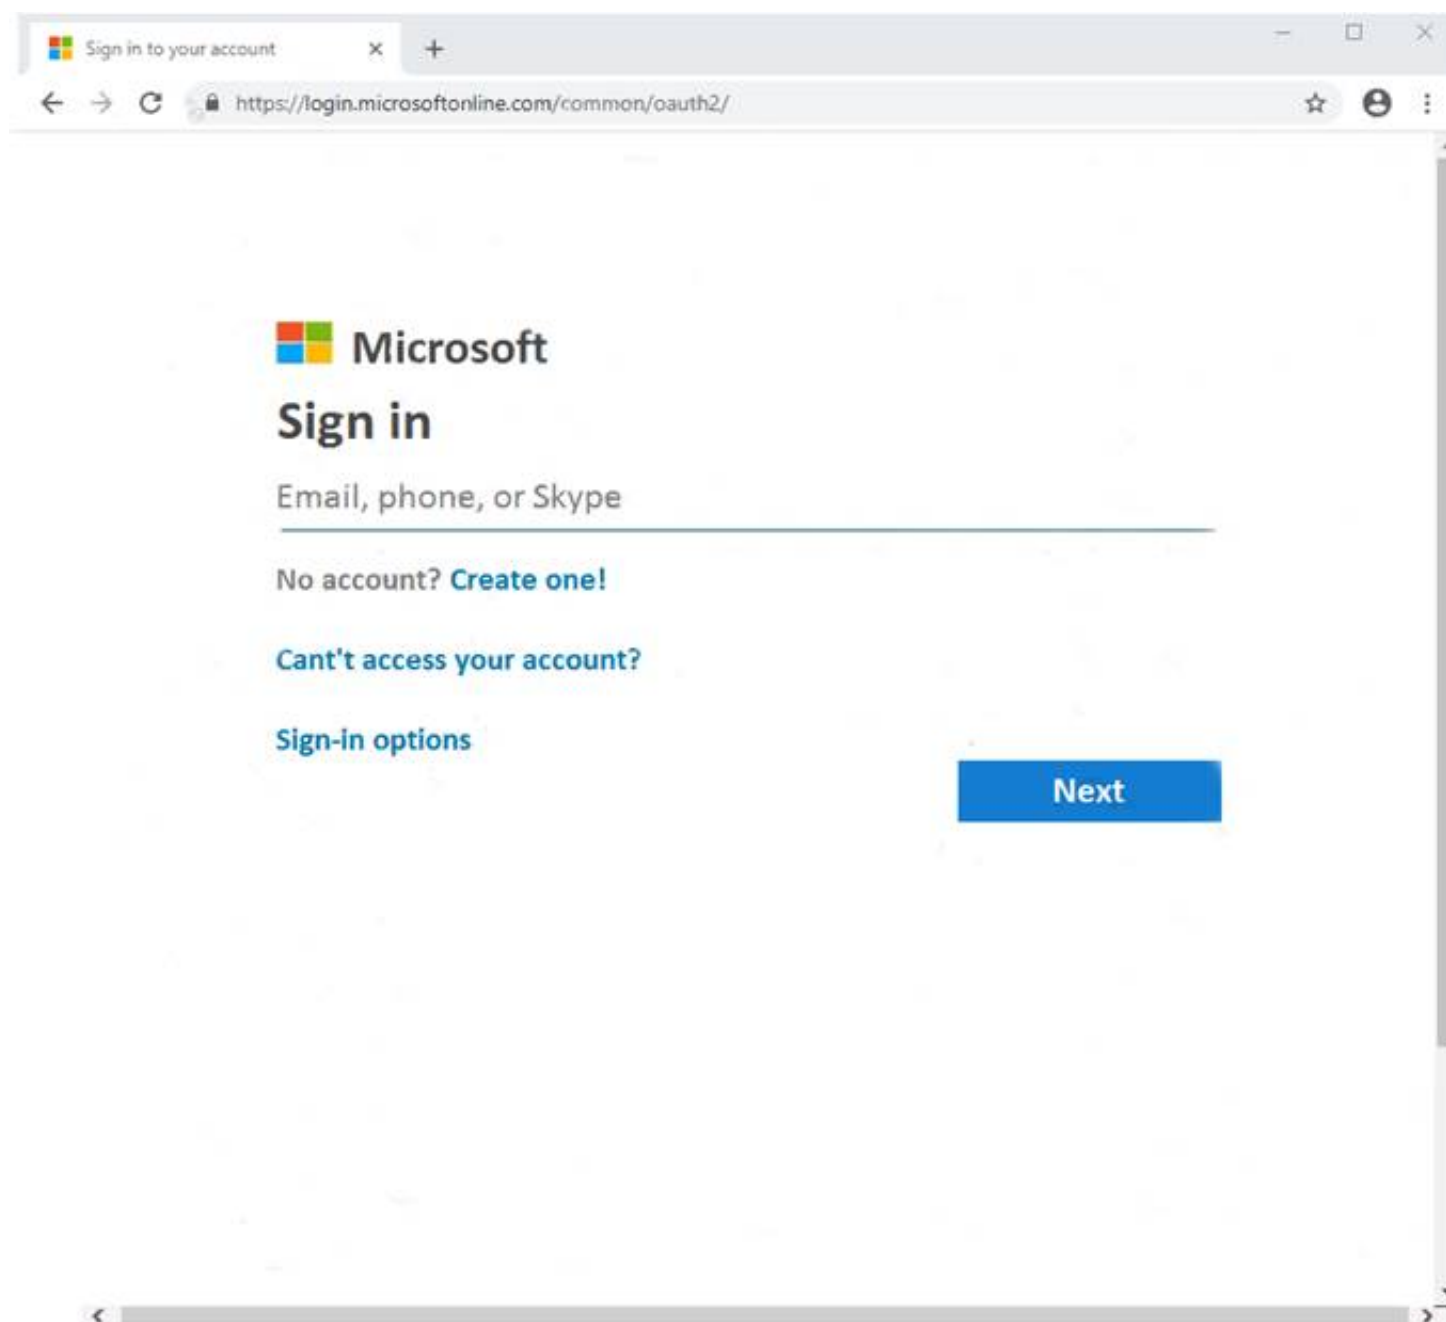

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

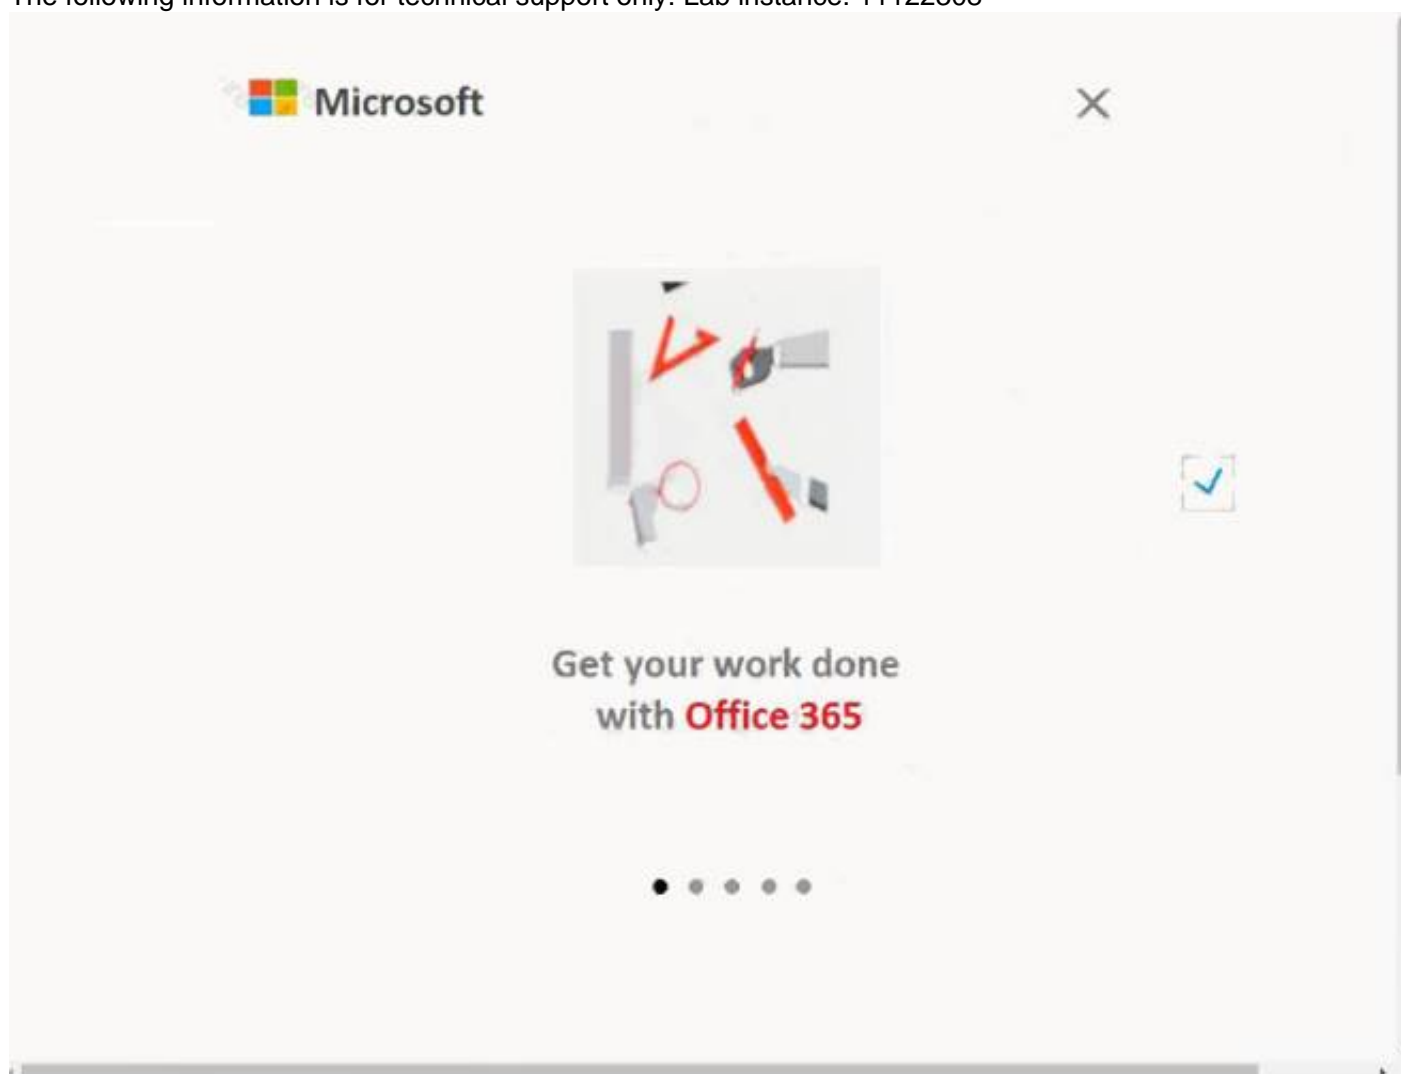

Use the following login credentials as needed:

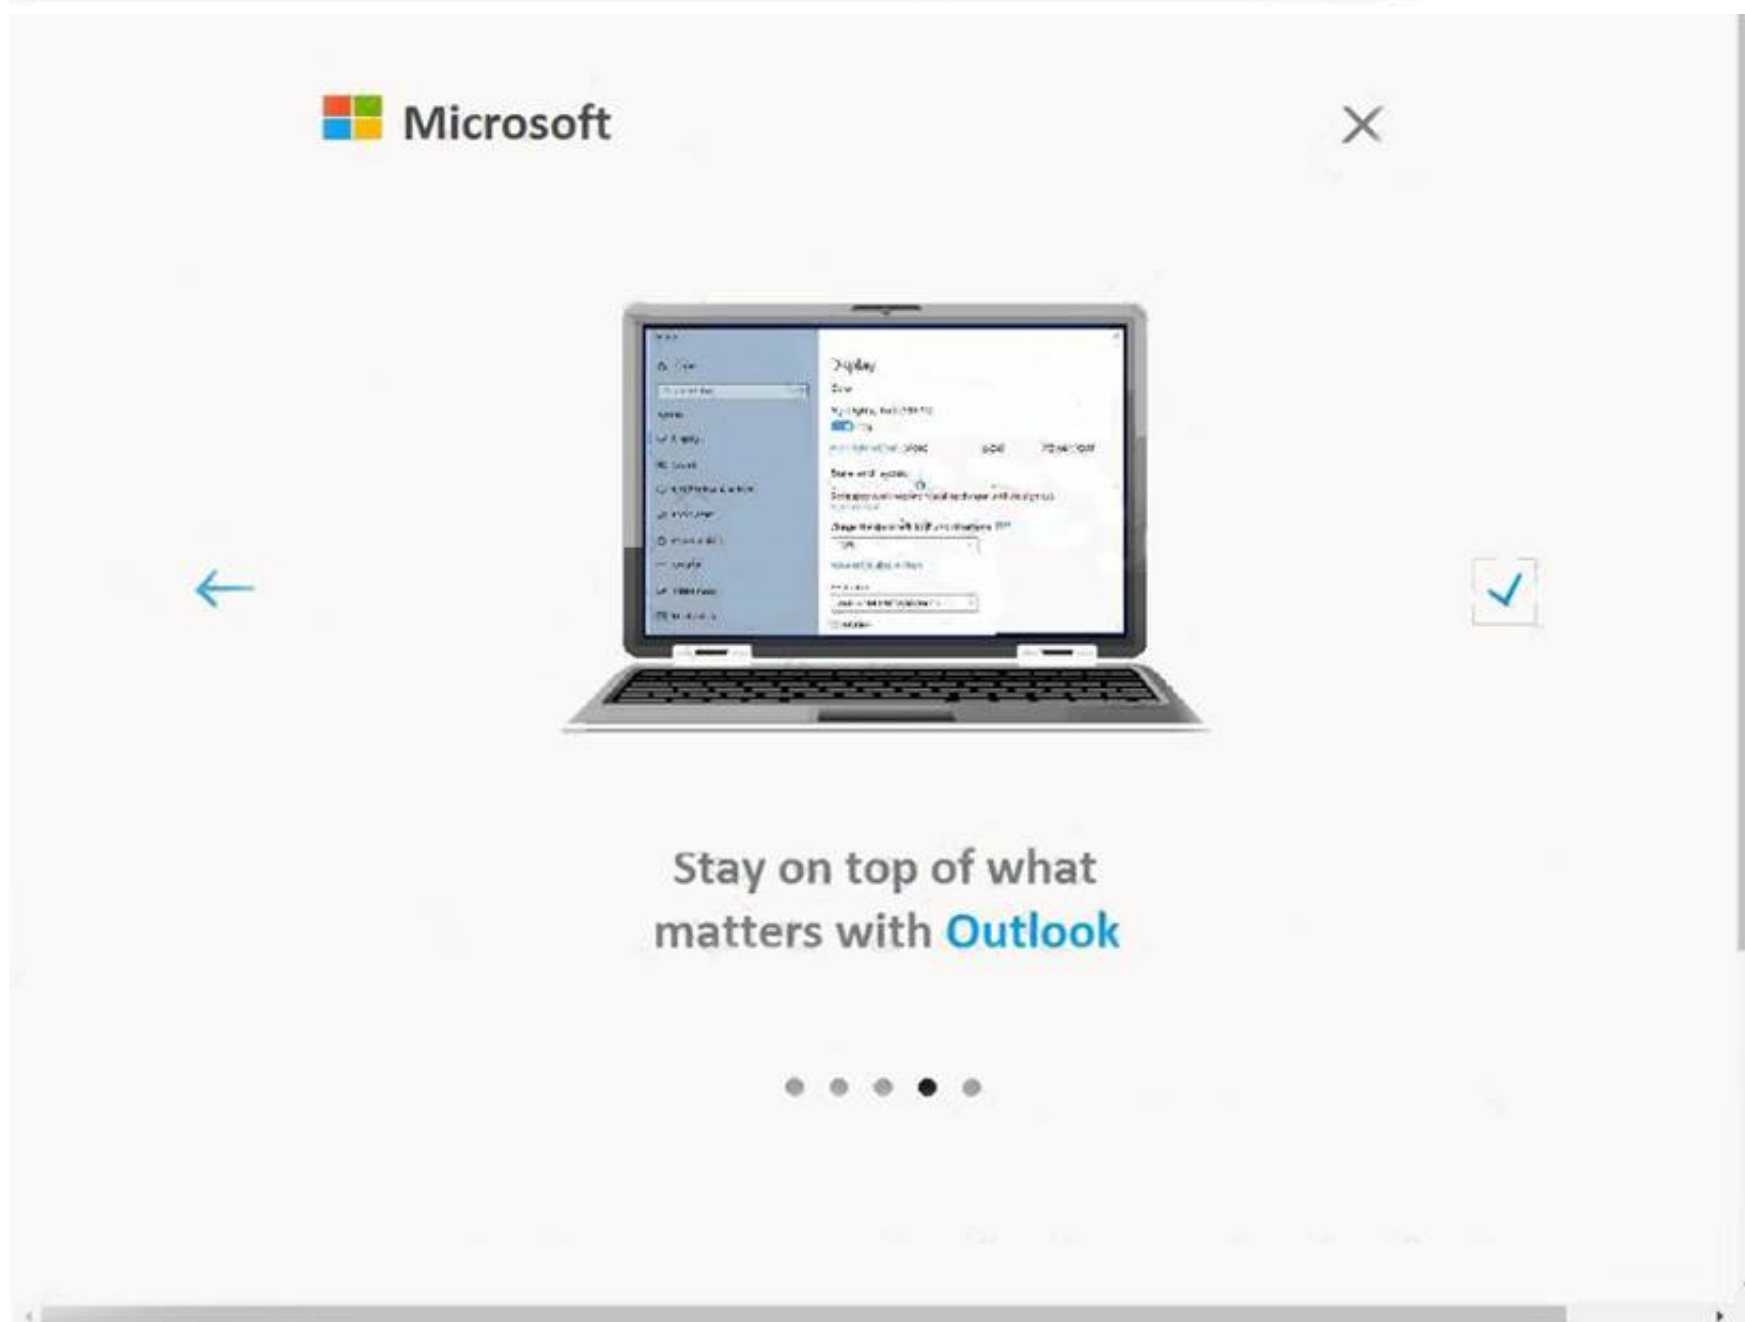

To enter your username, place your cursor in the Sign in box and click on the username below.

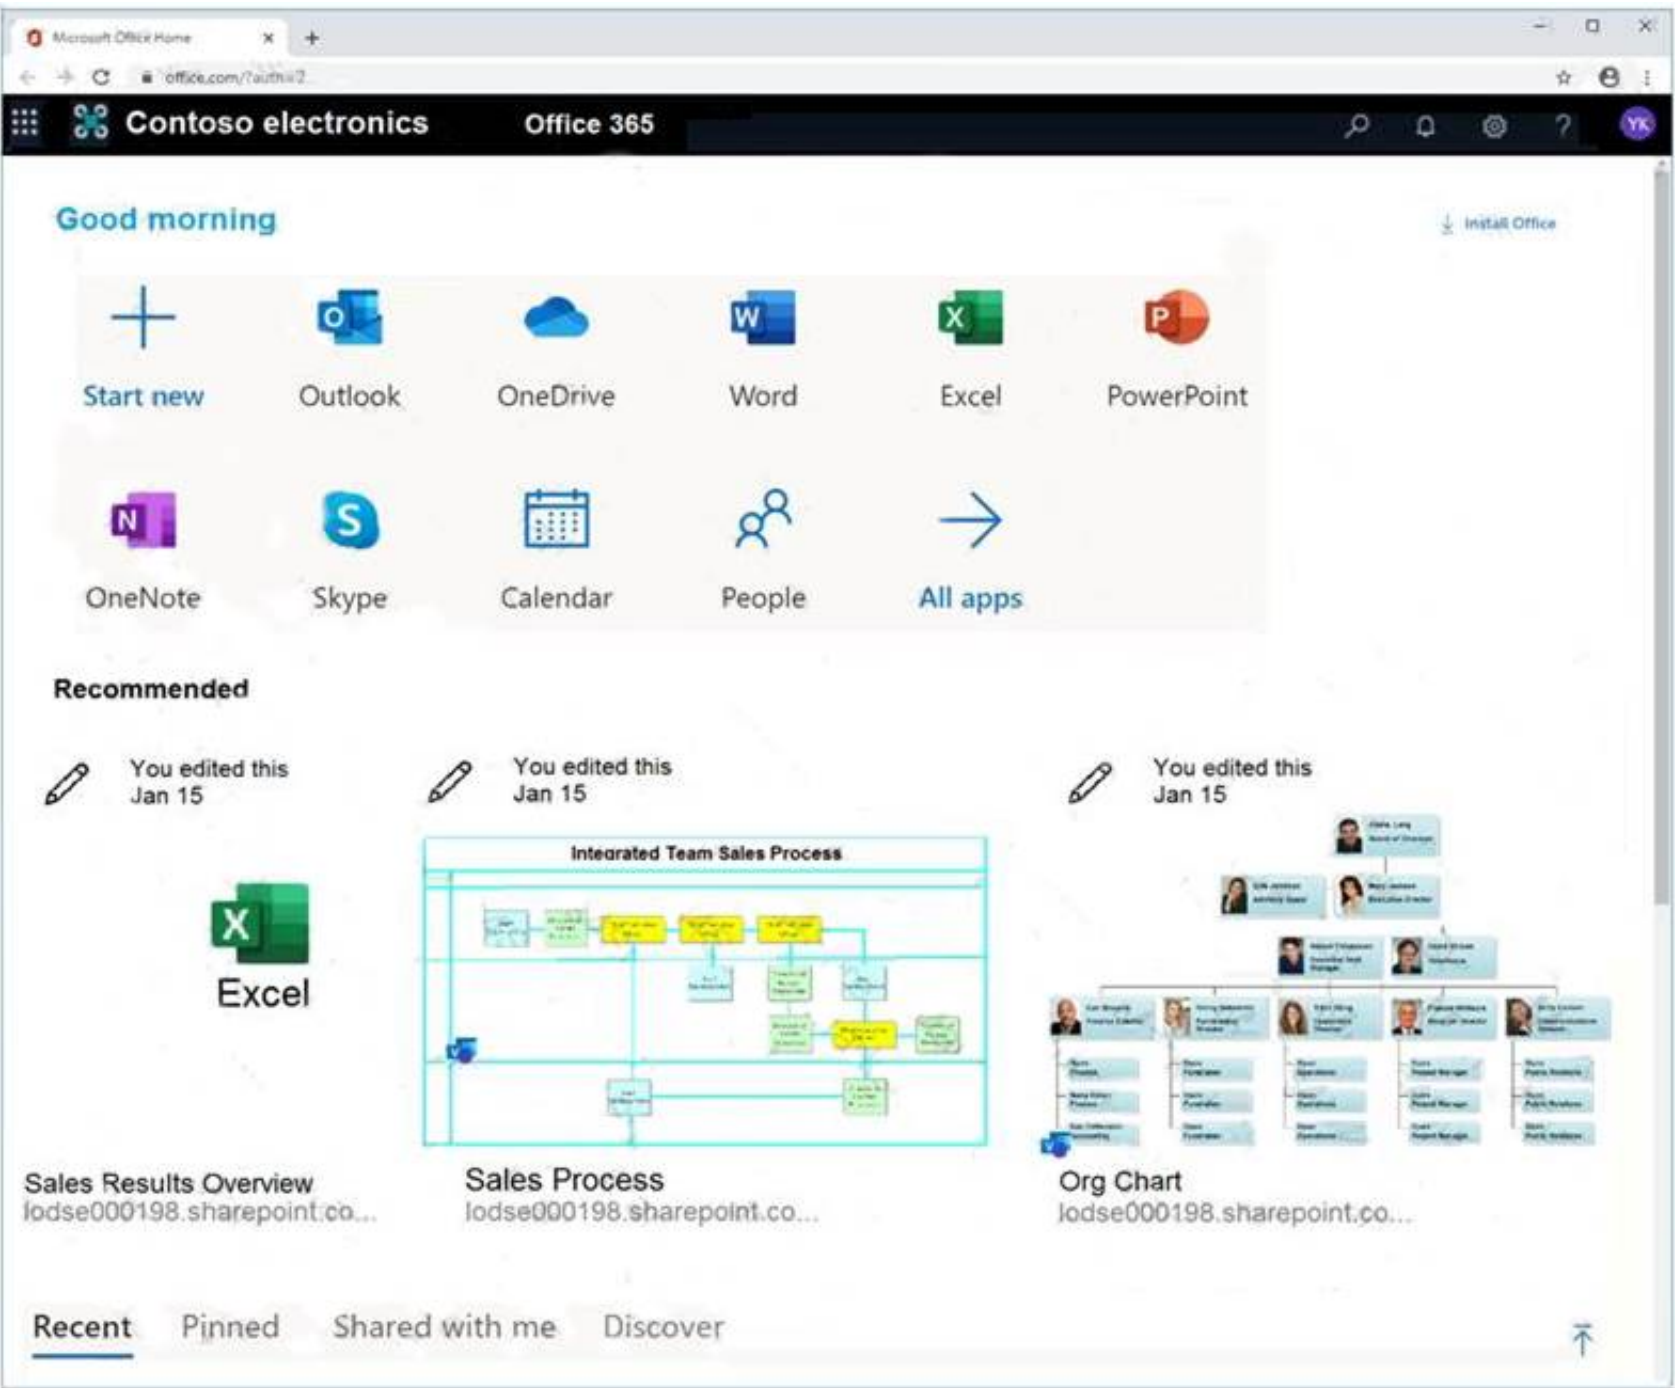

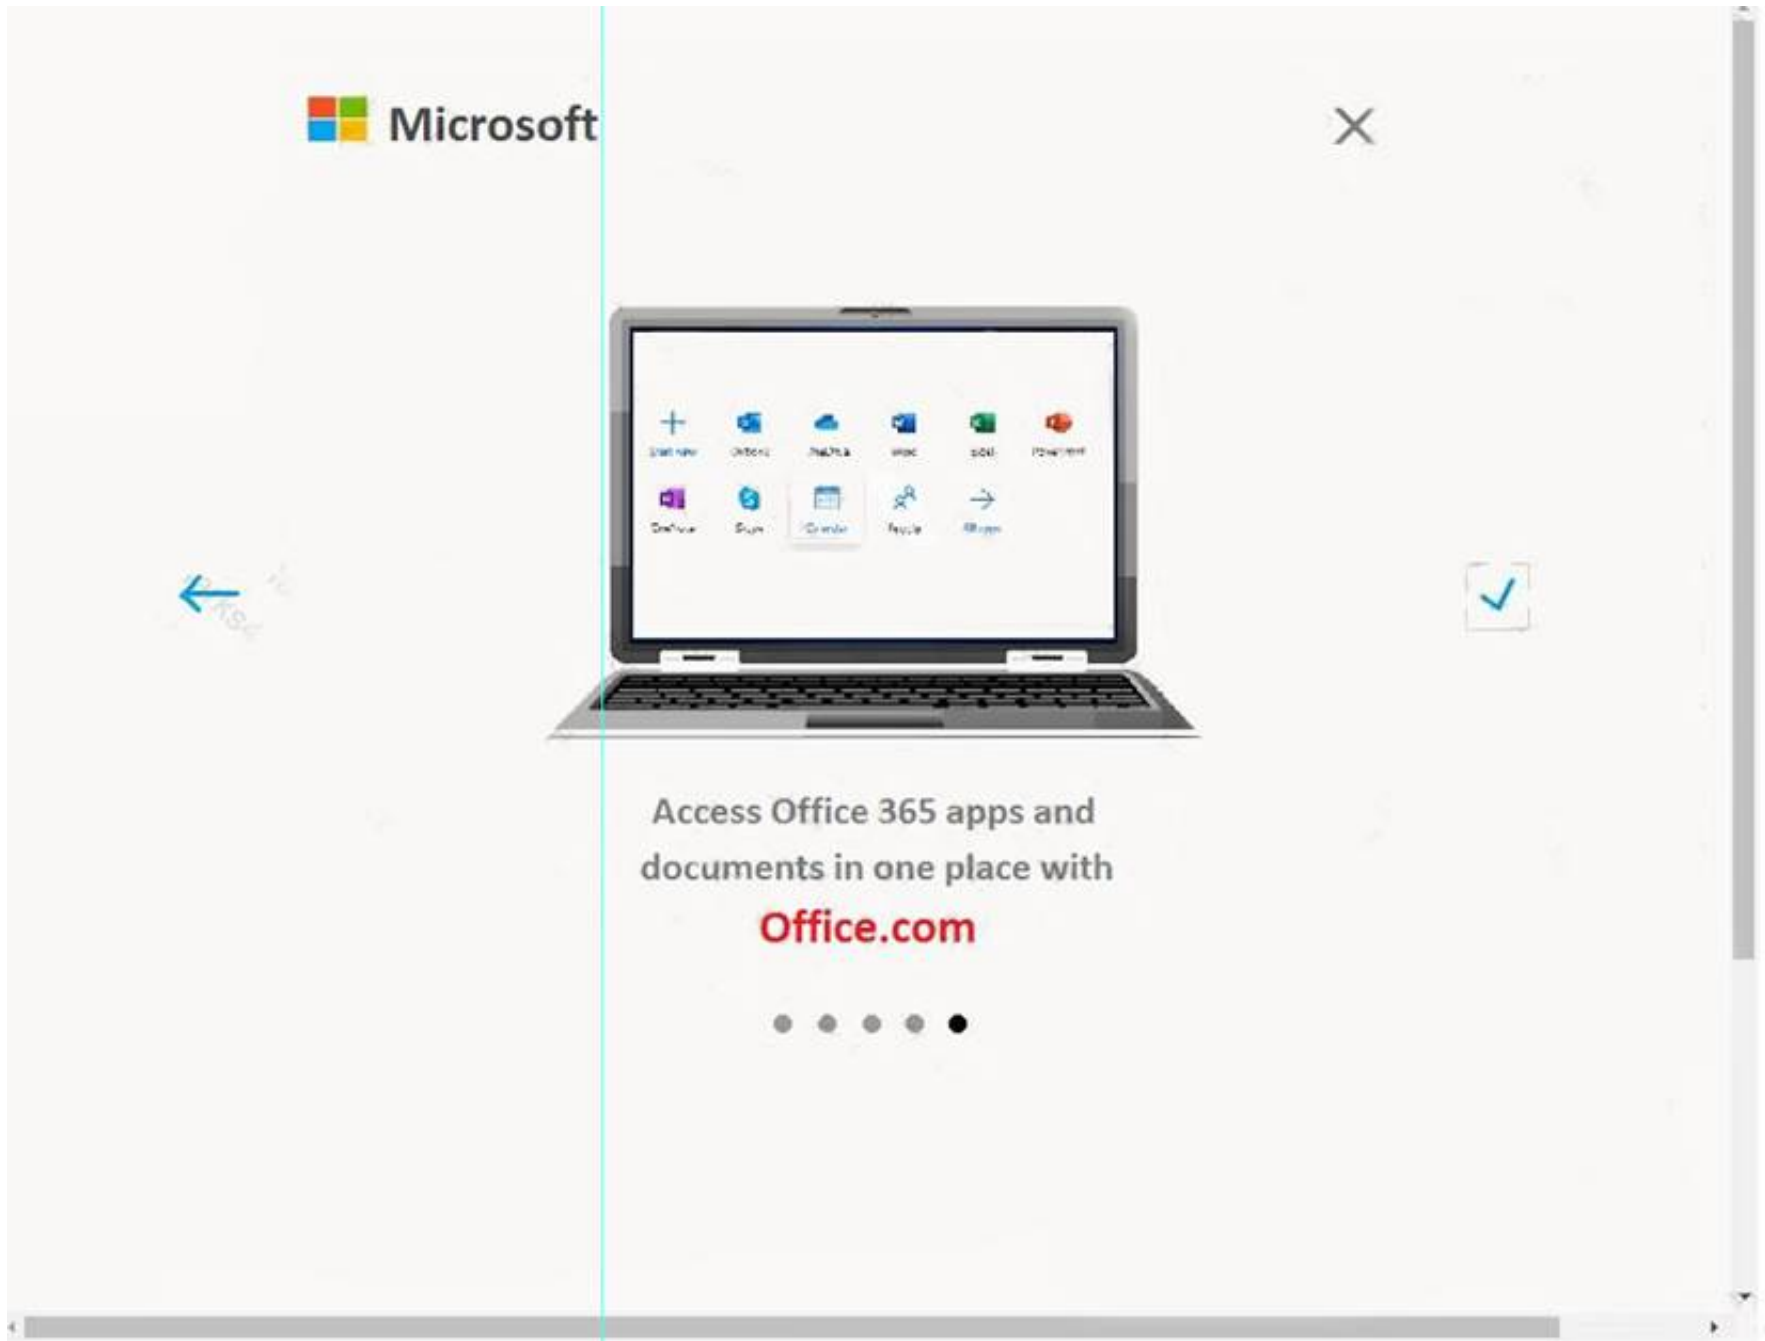

To enter your password, place your cursor in the Enter password box and click on the password below. Microsoft 365 Username: admin@LODSe00019@onmicrosoft.com Microsoft 365 Password: #HSP.ug?\$p6un

If the Microsoft 365 portal does not load successfully in the browser, press CTRL-K to reload the portal in a new browser tab.

The following information is for technical support only: Lab instance: 11122308

You need to ensure that a user named Allan Deyoung receives incident reports when email messages that contain data covered by the U.K. Data Protection Act are sent outside of your organization.
To complete this task, sign in to the Microsoft 365 admin center.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

- * 1. In the Security & Compliance Center > left navigation > Data loss prevention > Policy > + Create a policy.
- * 2. Choose the U.K. Data Protection Act template > Next.
- * 3. Name the policy > Next.
- * 4. Choose All locations in Office 365 > Next.
- * 5. At the first Policy Settings step just accept the defaults,
- * 6. After clicking Next, you'll be presented with an additional Policy Settings page Deselect the Show policy tips to users and send them an email notification

option.

Select the Detect when content that's being shared contains option, and configure the number instances to be 10.

Select the Send incident reports in email option.

Select the Choose what to include in the report and who receives it link to add Allan Deyoung as a recipient.

* 7. > Next

* 8. Select the option to turn on the policy right away > Next.

* 9. Click Create to finish creating the policy. Reference:

NEW QUESTION 50

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription that contains two users named Admin1 and User1. a Microsoft SharePoint Online site named Site1, and a retention label named Retention1. The role assignments for Site1 are shown in the following table.

Name	Role
Admin1	Owner
User1	Member

Site1 includes a file named File1. Retention1 has the following settings:

- Retain items for a specific period: Retention period: 7 years
- During the retention period: Mark Items as a record
- At the end of the retention period: Delete items automatically Retention1 is published to Site1.

User1 applies Retention1 to File1.

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can rename File1.	<input type="radio"/>	<input type="radio"/>
Admin1 can modify the contents of File1.	<input type="radio"/>	<input type="radio"/>
User1 can remove Retention1 from File1.	<input type="radio"/>	<input type="radio"/>

A. Mastered

B. Not Mastered

Answer: A

Explanation:

Statements	Yes	No
User1 can rename File1.	<input checked="" type="radio"/>	<input type="radio"/>
Admin1 can modify the contents of File1.	<input checked="" type="radio"/>	<input type="radio"/>
User1 can remove Retention1 from File1.	<input type="radio"/>	<input checked="" type="radio"/>

NEW QUESTION 54

- (Exam Topic 4)

You have the Microsoft conditions shown in the following table.

Name	Pattern	Case sensitivity
Condition1	Product1	Off
Condition2	Product2	On

You have the Azure Information Protection labels shown in the following table.

Name	Use condition	Label is applied
Label1	Condition1	Automatically
Label2	Condition2	Automatically

You have the Azure Information Protection policies shown in the following table.

Name	Applies to	Use label	Set the default label
Global	<i>Not applicable</i>	<i>None</i>	None
Policy1	User1	Label1	None
Policy2	User2	Label2	None

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

Statements	Yes	No
If a user types "Product1 and Product2" in a document and saves the document in Microsoft Word, the document will be assigned Label1 sensitivity automatically.	<input type="radio"/>	<input type="radio"/>
If a user types "Product2 and Product1" in a document and saves the document in Microsoft Word, the document will be assigned Label2 sensitivity automatically.	<input type="radio"/>	<input type="radio"/>
If a user types "product2" in a document and save the document in Microsoft Word, the document will be assigned Label2 sensitivity automatically.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Statements	Yes	No
If a user types "Product1 and Product2" in a document and saves the document in Microsoft Word, the document will be assigned Label1 sensitivity automatically.	<input type="radio"/>	<input checked="" type="radio"/>
If a user types "Product2 and Product1" in a document and saves the document in Microsoft Word, the document will be assigned Label2 sensitivity automatically.	<input checked="" type="radio"/>	<input type="radio"/>
If a user types "product2" in a document and save the document in Microsoft Word, the document will be assigned Label2 sensitivity automatically.	<input type="radio"/>	<input checked="" type="radio"/>

NEW QUESTION 58

- (Exam Topic 4)

You have a Microsoft 365 subscription. All users use Microsoft Exchange Online. Microsoft 365 is configured to use the default policy settings without any custom rules. You manage message hygiene.

Where are suspicious email messages placed by default? To answer, drag the appropriate location to the correct message types. Each location may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Locations		Answer Area
ATP quarantine	Messages that contain word-filtered content	Location
The Junk Email folder of a user's mailbox	Messages that are classified as phishing	Location
The Clutter folder a user's mailbox		

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Locations

ATP quarantine
The Junk Email folder of a user's mailbox
The Clutter folder a user's mailbox

Answer Area

Messages that contain word-filtered content:

The Junk Email folder of a user's mailbox

Messages that are classified as phishing:

The Junk Email folder of a user's mailbox

NEW QUESTION 60

- (Exam Topic 4)

You have a Microsoft 365 subscription.

You need to ensure that all users who are assigned the Exchange administrator role have multi-factor authentication (MFA) enabled by default.

What should you use to achieve the goal?

- A. Security & Compliance permissions
- B. Microsoft Azure Active Directory (Azure AD) Privileged Identity Management
- C. Microsoft Azure AD group management
- D. Microsoft Office 365 user management

Answer: B**NEW QUESTION 64**

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription that contains a user named User1.

You need to ensure that User1 can use the Microsoft 365 compliance center to search audit logs and identify which users were added to Microsoft 365 role groups.

The solution must use the principle of least privilege.

To which role group should you add User1?

- A. Security Reader
- B. View-Only Organization Management
- C. Organization Management
- D. Compliance Management

Answer: C**NEW QUESTION 67**

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription that contains a user named User1.

The Azure Active Directory (Azure AD) Identity Protection risky users report identifies User1. For User1, you select Confirm user compromised.

User1 can still sign in.

You need to prevent User1 from signing in. The solution must minimize the impact on users at a tower risk level.

Solution: From the Access settings, you select Block access for User1. Does this meet the goal?

- A. Yes
- B. No

Answer: A**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/identity-protection/howto-identity-protection-investigate>**NEW QUESTION 70**

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

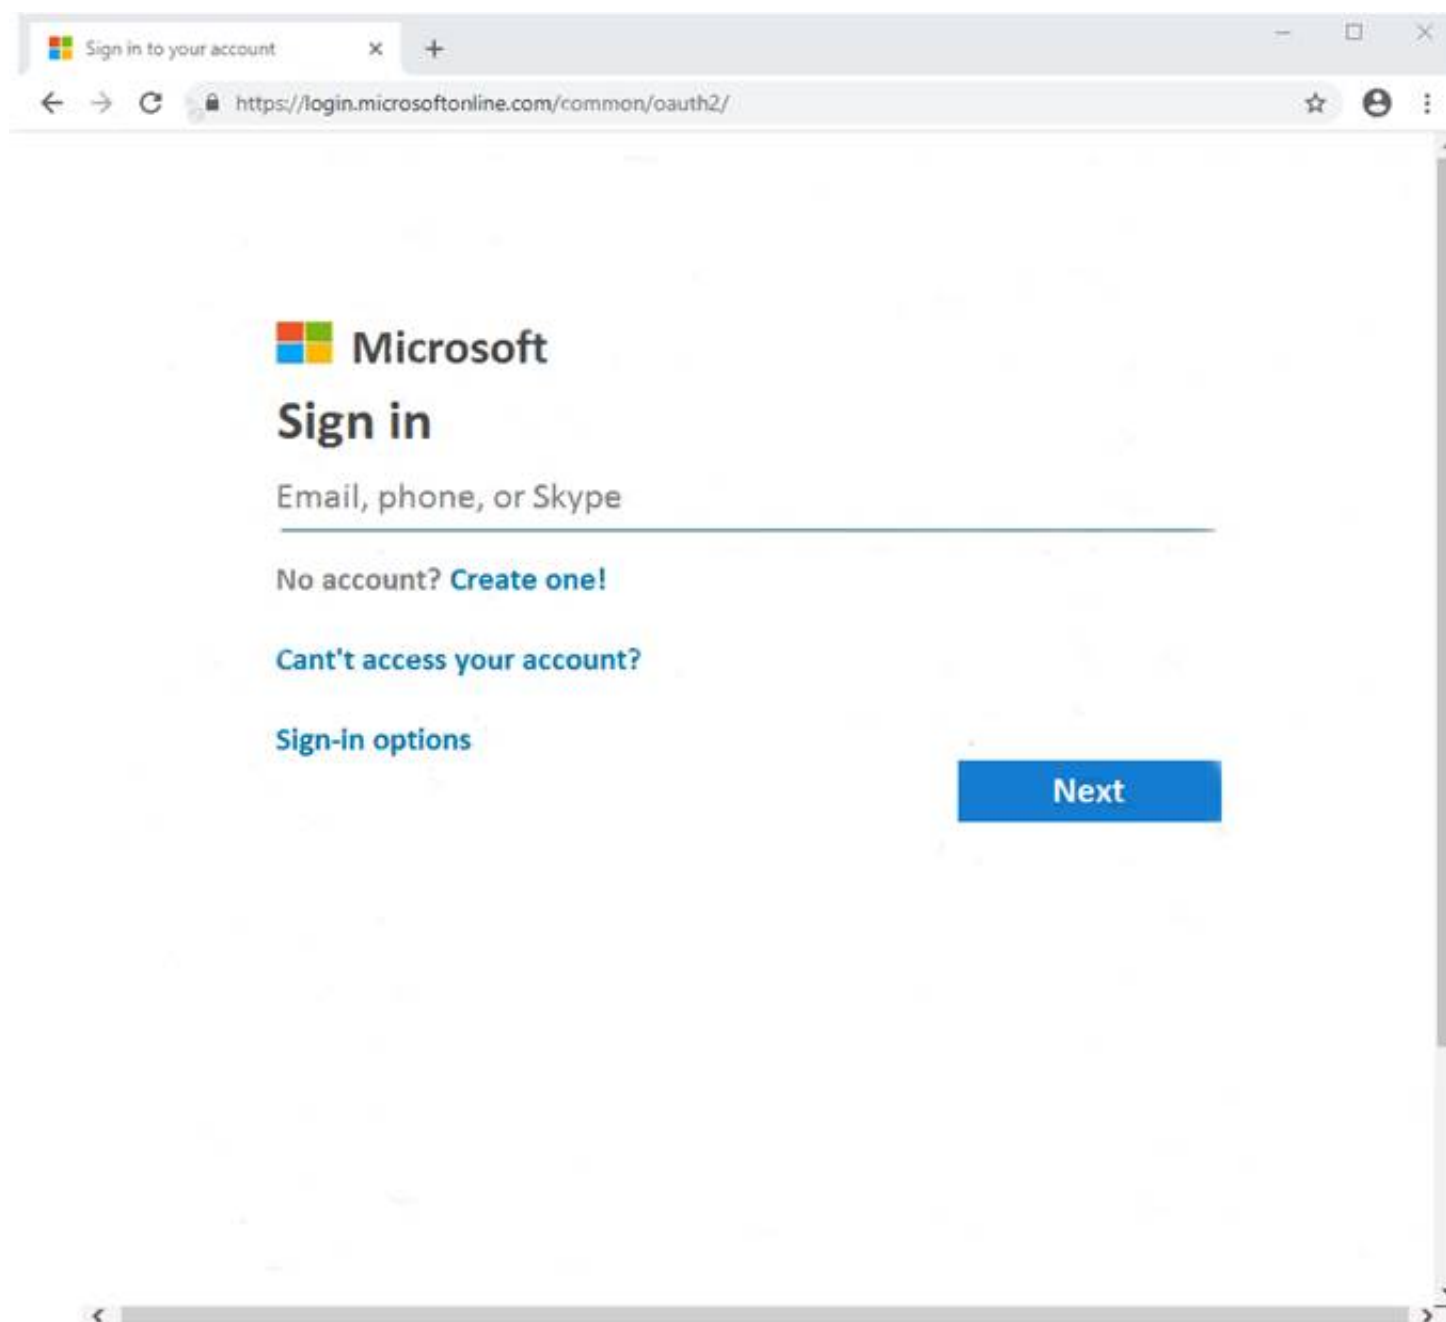

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

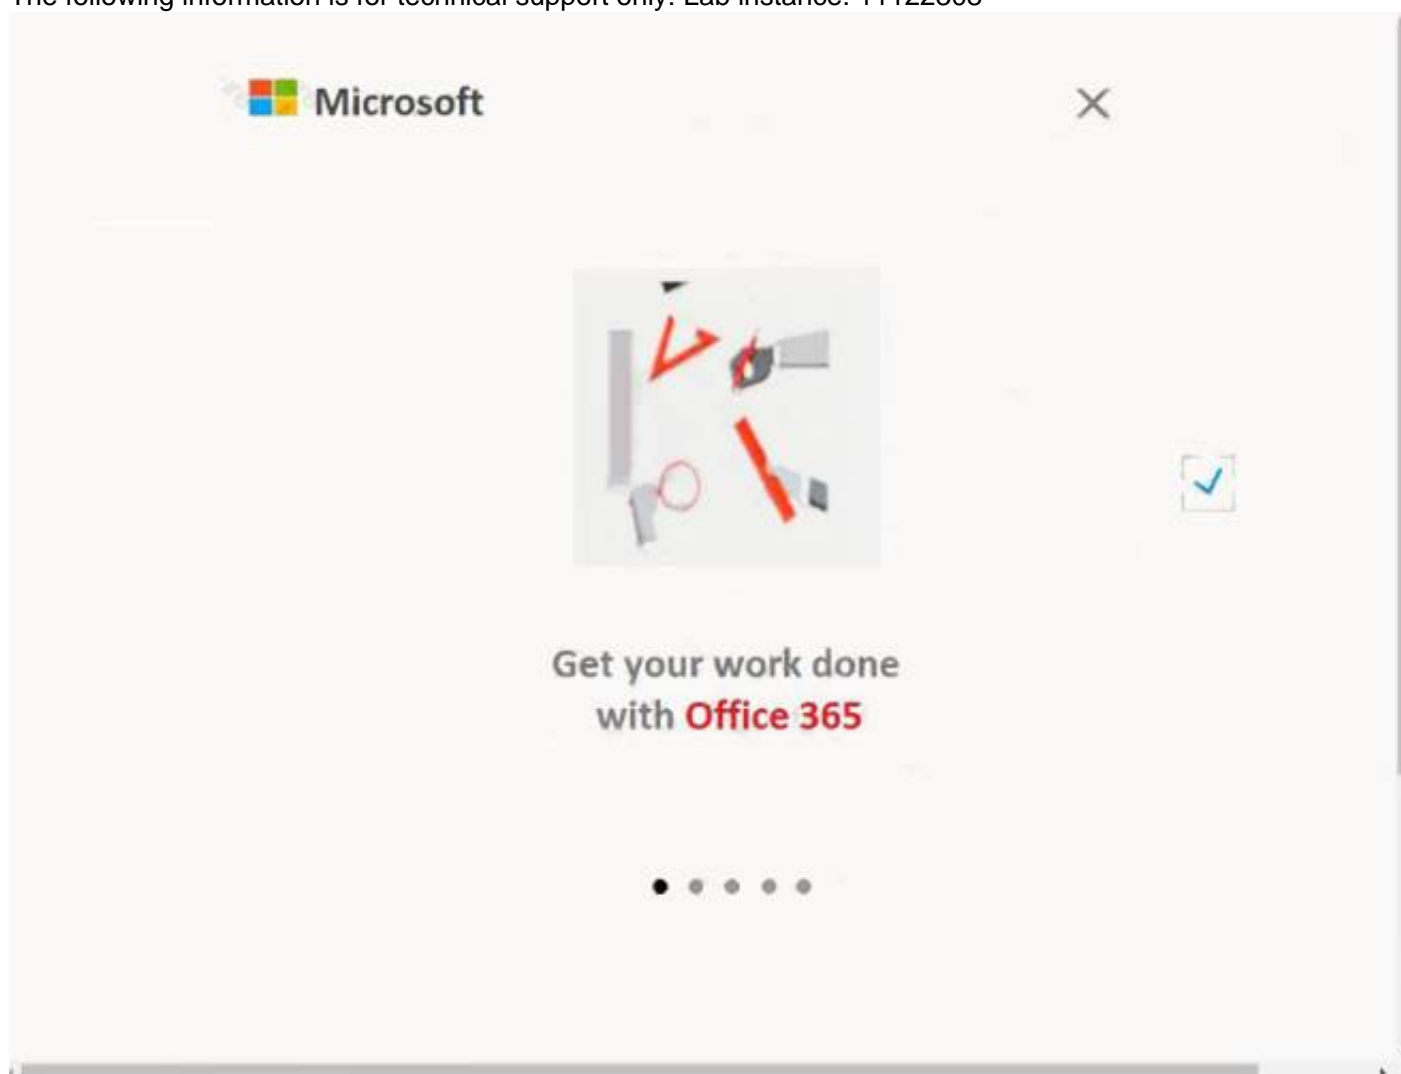

Use the following login credentials as needed:

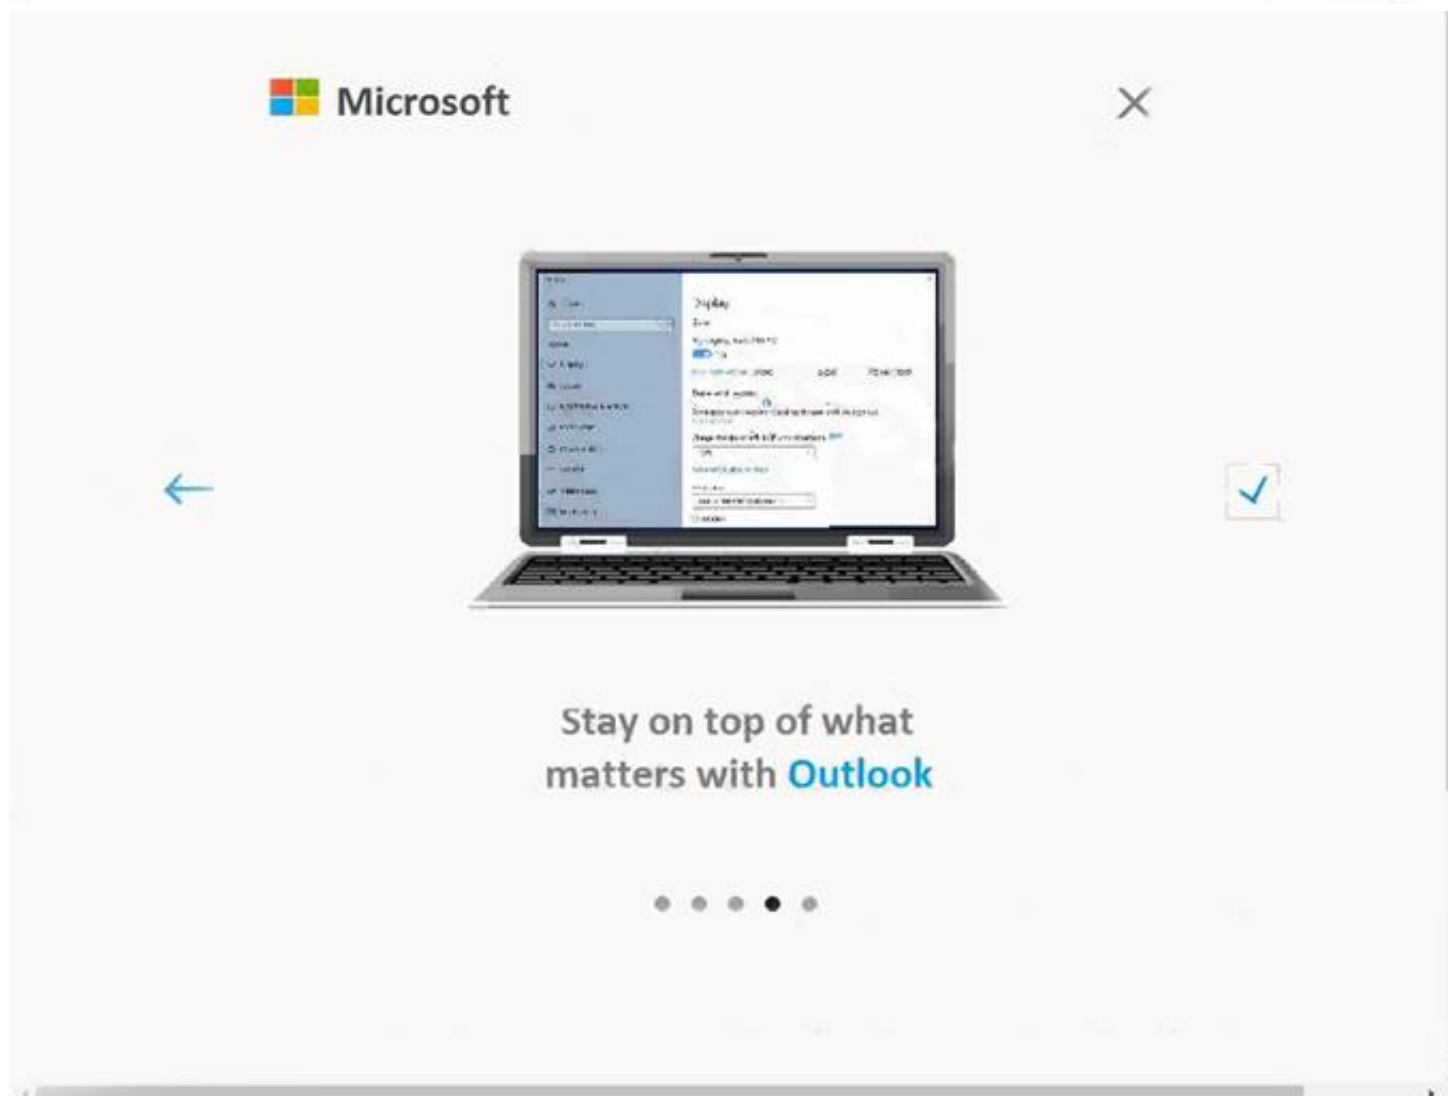

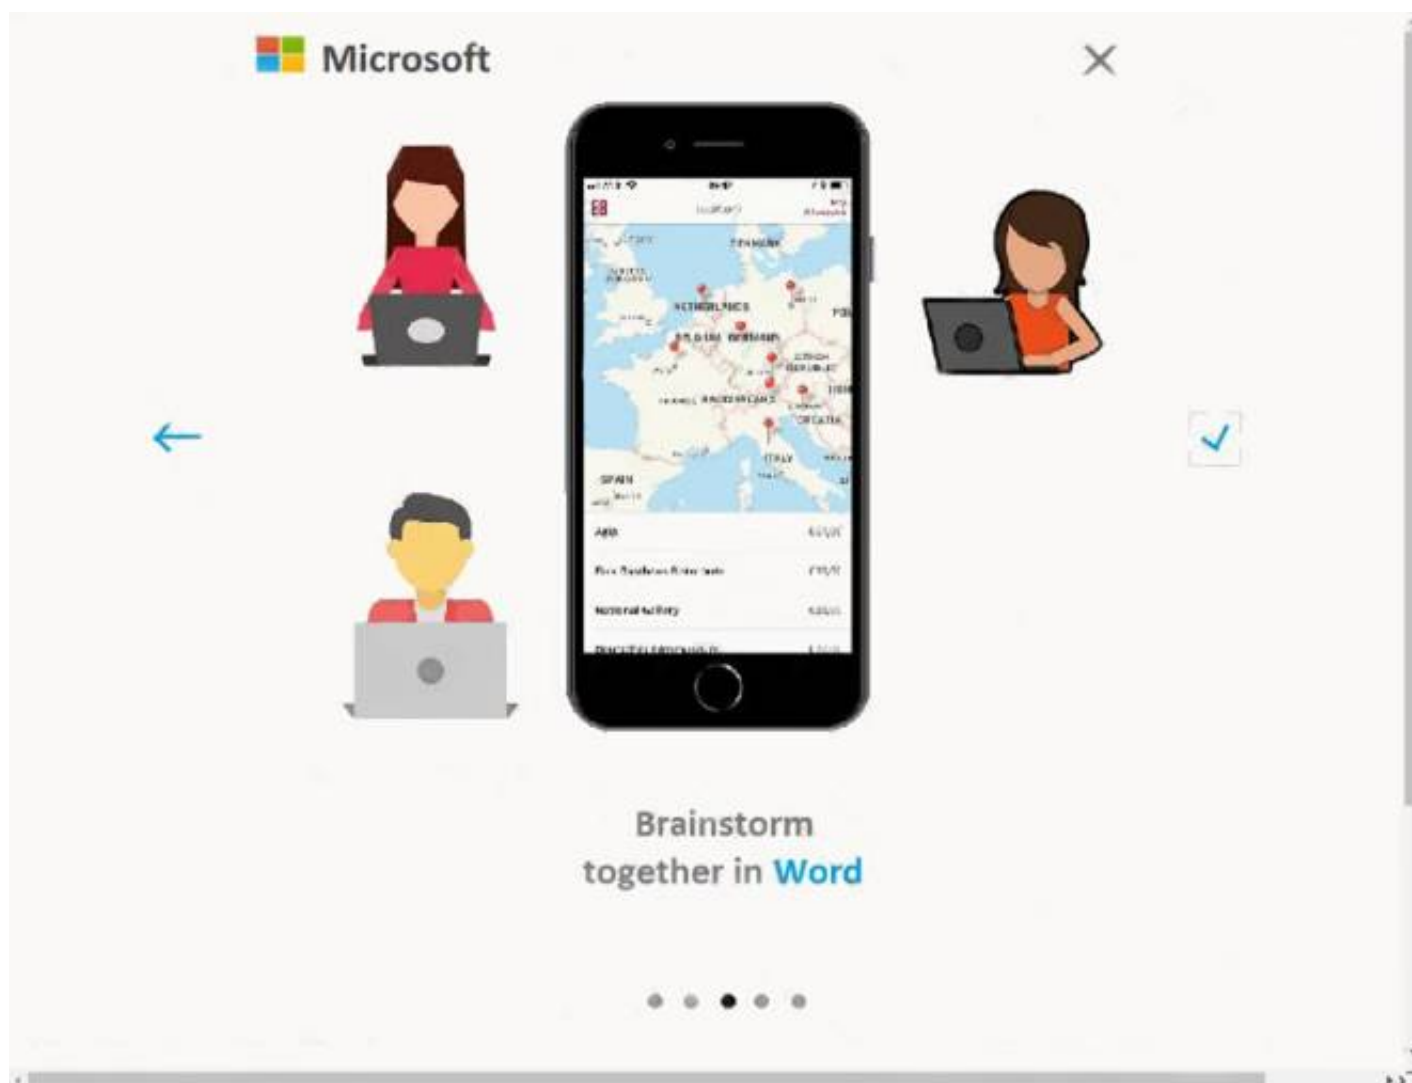

To enter your username, place your cursor in the Sign in box and click on the username below.

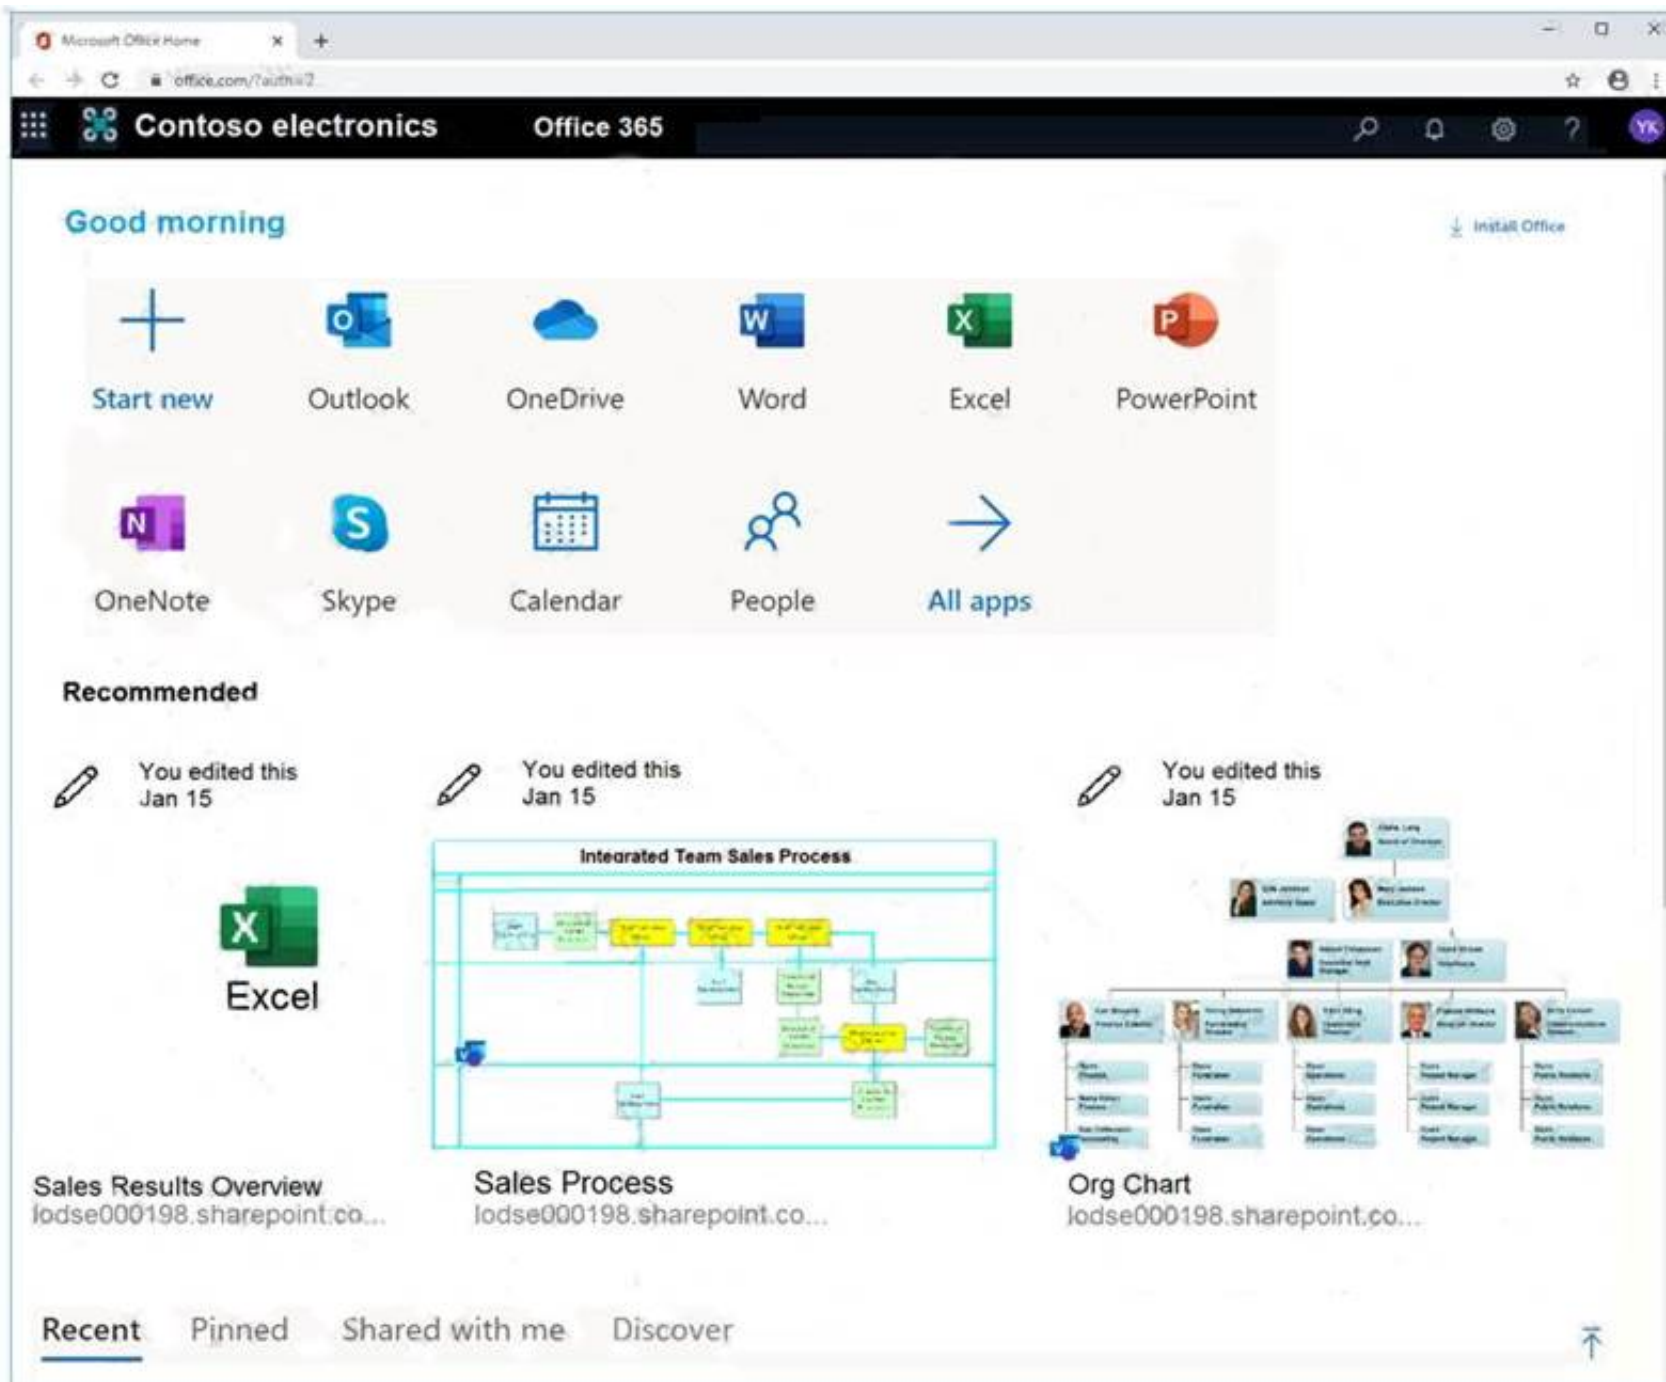

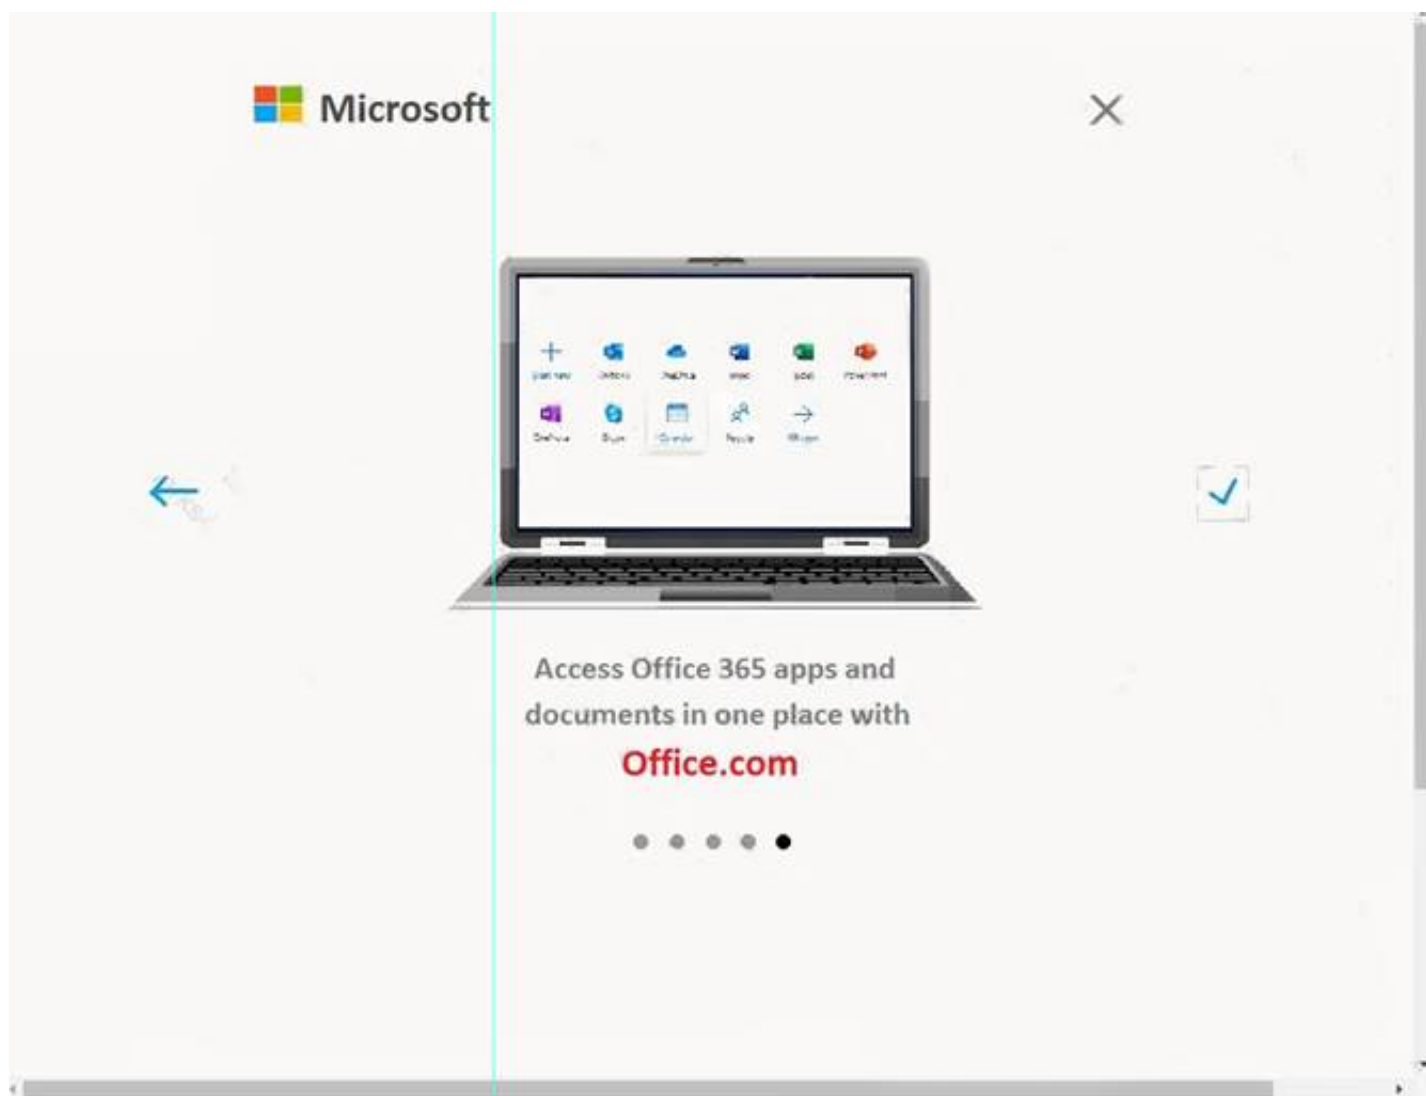

To enter your password, place your cursor in the Enter password box and click on the password below. Microsoft 365 Username: admin@LODSe00019@onmicrosoft.com Microsoft 365 Password: #HSP.ug?\$p6un

If the Microsoft 365 portal does not load successfully in the browser, press CTRL-K to reload the portal in a new browser tab.

The screenshot shows the OneDrive web interface. At the top, there are tabs for 'Recent', 'Pinned', 'Shared with me', and 'Discover'. Below this, the 'OneDrive' section displays a message: 'No recent folders. Go to OneDrive, and we'll put a list of the folders you opened recently here.' with a 'Go to OneDrive' button. Below this, there are two 'SharePoint' sections. The left section, 'Frequent sites', lists: 'Sales and Marketing' (SM), 'Retail' (R), and 'Communication Site' (Cs). The right section, 'Following', lists: 'Contoso Landings' (CL), 'Contoso Web 3' (CW), and 'Executive Corner' (EC). A 'Go to SharePoint' button is at the bottom of the left section.

Below the OneDrive interface, a browser window shows the 'Files - OneDrive' page. The address bar displays 'https://lodse000198-my.sharepoint.com/personal/adr'. The page has a dark header with 'OneDrive' and a search bar. Below the header, there are buttons for 'New', 'Upload', 'Sync', and 'Flow'. The main content area is titled 'Files' and contains a table with the following data:

You plan to create a script to automate user mailbox searches. The script will search the mailbox of a user named Allan Deyoung for messages that contain the word injunction.

You need to create the search that will be included in the script. To complete this task, sign in to the Microsoft 365 admin center.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Step 1: Create a CSV file that contains information about the searches you want to run

The comma separated value (CSV) file that you create in this step contains a row for each user that want to search. You can search the user's Exchange Online mailbox (which includes the archive mailbox, if it's enabled) and their OneDrive for Business site. Or you can search just the mailbox or the OneDrive for Business site. You can also search any site in your SharePoint Online organization. The script that you run in Step 3 will create a separate search for each row in the CSV file.

* 1. Copy and paste the following text into a .txt file using NotePad. Save this file to a folder on your local

computer. You'll save the other scripts to this folder as well. ExchangeLocation,SharePointLocation,ContentMatchQuery,StartDate,EndDate
sarad@contoso.onmicrosoft.com,https://contoso-my.sharepoint.com/personal/sarad_contoso_onmicrosoft_com,(OR legal),1/1/2000,12/31/2005
sarad@contoso.onmicrosoft.com,https://contoso-my.sharepoint.com/personal/sarad_contoso_onmicrosoft_com,(OR legal),1/1/2006,12/31/2010
sarad@contoso.onmicrosoft.com,https://contoso-my.sharepoint.com/personal/sarad_contoso_onmicrosoft_com,(OR legal),1/1/2011,3/21/2016
,https://contoso.sharepoint.com/sites/contoso,,,3/21/2016
,https://contoso-my.sharepoint.com/personal/davidl_contoso_onmicrosoft_com,,1/1/2015,
,https://contoso-my.sharepoint.com/personal/janets_contoso_onmicrosoft_com,,1/1/2015,

The first row, or header row, of the file lists the parameters that will be used by New-ComplianceSearch cmdlet to create a new Content Searches. Each parameter name is separated by a comma. Make sure there aren't any spaces in the header row. Each row under the header row represents the parameter values for each search. Be sure to replace the placeholder data in the CSV file with your actual data.

* 2. Open the .txt file in Excel, and then use the information in the following table to edit the file with information for each search.

Parameter	Description
ExchangeLocation	The SMTP address of the user's mailbox.
SharePointLocation	The URL for the user's OneDrive for Business site or the URL for any site in your organization. For the URL for OneDrive for Business sites, use this format: https://<your organization>-my.sharepoint.com/personal/<user alias>_<your organization>_onmicrosoft_com. For example, https://contoso-my.sharepoint.com/personal/sarad_contoso_onmicrosoft_com.
ContentMatchQuery	The search query for the search. For more information about creating a search query, see Keyword queries and search conditions for Content Search .
StartDate	For email, the date on or after a message was received by a recipient or sent by the sender. For documents on SharePoint or OneDrive for Business sites, the date on or after a document was last modified.
EndDate	For email, the date on or before a message was sent by a sent by the user. For documents on SharePoint or OneDrive for Business sites, the date on or before a document was last modified.

* 3. Save the Excel file as a CSV file to a folder on your local computer. The script that you create in Step 3 will use the information in this CSV file to create the searches.

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/compliance/create-report-on-and-delete-multiple-content-search> Keyword queries and search conditions for Content Search

NEW QUESTION 75

- (Exam Topic 4)

Your network contains an on-premises Active Directory domain. The domain contains the servers shown in the following table.

Name	Configuration
DC1	Domain controller
Server1	Member server

You plan to implement Azure Advanced Threat Protection (ATP) for the domain. You install an Azure ATP standalone sensor on Server1. You need to monitor the domain by using Azure ATP. What should you do?

- A. Configure port mirroring for DC1.
- B. Configure port mirroring for Server 1.
- C. Install the Microsoft Monitoring Agent on Server!.
- D. Install the Microsoft Monitoring Agent on DC1.

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure-advanced-threat-protection/configure-port-mirroring>

NEW QUESTION 78

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft 365 subscription that contains the users shown in the following table.

Name	Role
User1	Compliance Manager Contributor
User2	Compliance Manager Assessor
User3	Compliance Manager Administrator
User4	Portal Admin

You discover that all the users in the subscription can access Compliance Manager reports. The Compliance Manager Reader role is not assigned to any users. You need to recommend a solution to prevent a user named User5 from accessing the Compliance Manager reports. Solution: You recommend modifying the licenses assigned to User5. Does this meet the goal?

- A. Yes
B. No

Answer: A

NEW QUESTION 83

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft 365 subscription that contains the users shown in the following table.

Name	Role
User1	Compliance Manager Contributor
User2	Compliance Manager Assessor
User3	Compliance Manager Administrator
User4	Portal Admin

You discover that all the users in the subscription can access Compliance Manager reports. The Compliance Manager Reader role is not assigned to any users. You need to recommend a solution to prevent a user named User5 from accessing the Compliance Manager reports. Solution: You recommend assigning the Compliance Manager Reader role to User5. Does this meet the goal?

- A. Yes
B. No

Answer: B

NEW QUESTION 86

- (Exam Topic 4)

Your company has 500 computers.

You plan to protect the computers by using Windows Defender Advanced Threat Protection (Windows Defender ATP). Twenty of the computers belong to company executives.

You need to recommend a remediation solution that meets the following requirements:

Windows Defender ATP administrators must manually approve all remediation for the executives Remediation must occur automatically for all other users

What should you recommend doing from Windows Defender Security Center?

- A. Configure 20 system exclusions on automation allowed/block lists
B. Configure two alert notification rules
C. Download an offboarding package for the computers of the 20 executives
D. Create two machine groups

Answer: D

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/security/threat-protection/windows-defender-atp/machine-groups>in defender-advanced-threat-protection

NEW QUESTION 89

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription that uses Microsoft Endpoint Manager. The Compliance policy settings are configured as shown in the following exhibit.

These settings configure the way the compliance service treats devices. Each device evaluates these as a "Built-in Device Compliance Policy", which is reflected in device monitoring.

Mark devices with no compliance policy assigned as ☐ ☐

Enhanced jailbreak detection ☐ ☐

Compliance status validity period (days)

On February 25, 2020, you create the device compliance policies shown in the following table.

Name	Require BitLocker Drive Encryption (BitLocker)	Require Secure Boot	Mark device as not compliant	Assigned to
Policy1	Yes	No	5 days after noncompliance	Group1
Policy2	No	Yes	10 days after noncompliance	Group1, Group2

On March 1, 2020, users enroll Windows 10 devices in Microsoft Endpoint Manager as shown in the following table

Name	BitLocker enabled	Secure Boot enabled	Member of
Device1	Yes	No	Group1
Device2	No	No	Group2

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Statements	Yes	No
On March 2, 2020, Device2 is marked as compliant.	<input type="radio"/>	<input type="radio"/>
On March 6, 2020, Device1 is marked as compliant.	<input type="radio"/>	<input type="radio"/>
On March 12, 2020, Device1 is marked as compliant.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Box 1: Yes

Device2 is in Group2 so Policy2 applies.

Device2 is not compliant with Policy2. However, the device won't be marked as non-compliant until 10 days after the device was enrolled.

Box 2: Yes

Device1 is in Group1 and Group2 so both Policy1 and Policy2 apply.

Device1 is compliant with Policy1 but non-compliant with Policy2. However, the device won't be marked as non-compliant until 10 days after the device was enrolled.

Box 3: No

Device1 is in Group1 and Group2 so both Policy1 and Policy2 apply. Device1 is compliant with Policy1 but non-compliant with Policy2.

March 12th is more than 10 days after the device was enrolled so it will now be marked as non-compliant by Policy2.

NEW QUESTION 90

- (Exam Topic 4)

You have multiple Microsoft 365 subscriptions.

You need to build an application that will retrieve the Microsoft Secure Score data of each subscription. What should you use?

- A. the Microsoft Defender for Endpoint API
- B. the Microsoft Graph Security API
- C. the Microsoft Office 365 Management API
- D. the Azure Monitor REST API

Answer: C

NEW QUESTION 91

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft 365 E5 subscription that contains a user named User1.

The Azure Active Directory (Azure AD) Identity Protection risky users report identifies User1. For User1, you select Confirm user compromised.

User1 can still sign in.

You need to prevent User1 from signing in. The solution must minimize the impact on users at a lower risk level.

Solution: You configure the sign-in risk policy to block access when the sign-in risk level is high. Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/identity-protection/howto-identity-protection-investigate>

NEW QUESTION 95

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription.

You implement Advanced Threat Protection (ATP) safe attachments policies for all users.

User reports that email messages containing attachments take longer than expected to be received.

You need to reduce the amount of time it takes to receive email messages that contain attachments. The solution must ensure that all attachments are scanned for malware. Attachments that have malware must be blocked.

What should you do from ATP?

- A. Set the action to Block
- B. Add an exception
- C. Add a condition
- D. Set the action to Dynamic Delivery

Answer: D

Explanation:

Reference:

<https://docs.microsoft.com/en-us/office365/securitycompliance/dynamic-delivery-and-previewing>

NEW QUESTION 98

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription that uses Azure Active Directory (Azure AD) Privileged identity Management (PIM). A user named User1 is eligible for the User Account Administrator role. You need User1 to request to activate the User Account Administrator role. From where should User1 request to activate the role?

- A. the My Access portal
- B. the Microsoft 365 Defender portal
- C. the Azure Active Directory admin center
- D. the Microsoft 365 admin center

Answer: B

NEW QUESTION 99

- (Exam Topic 4)

You have a Microsoft 365 subscription.

You receive a General Data Protection Regulation (GDPR) request for the custom dictionary of a user. From the Compliance admin center you need to create a content search.

How should you configure the content search?

- A. Condition: Type Operator
- B. Equals any of Value: Office Roaming Service
- C. Condition: Title Operator: Equals any of Value: Normal.dot
- D. Condition: Type Operator: Equals any of Value: Documents
- E. Condition: File type Operator: Equals any of Value: doc

Answer: D

NEW QUESTION 100

- (Exam Topic 4)

You have a Microsoft 365 subscription.

You have a site collection named SiteCollection1 that contains a site named Site2. Site2 contains a document library named Customers. Customers contains a document named Litware.docx. You need to remove Litware.docx permanently. Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
From PowerShell, run Remove-SPOUserProfile	
Delete Litware.docx from the Recycle Bin of Site2.	
From PowerShell, run Set-SPOSite.	
Delete Litware.docx from the Recycle Bin of SiteCollection1.	
From Powershell, run Remove-SPOUserInfo	
Delete Litware.docx from Customers.	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Actions	Answer Area
From PowerShell, run Remove-SPOUserProfile	Delete Litware.docx from Customers.
Delete Litware.docx from the Recycle Bin of Site2.	Delete Litware.docx from the Recycle Bin of Site2.
From PowerShell, run Set-SPOSite.	Delete Litware.docx from the Recycle Bin of SiteCollection1.
Delete Litware.docx from the Recycle Bin of SiteCollection1.	
From Powershell, run Remove-SPOUserInfo	
Delete Litware.docx from Customers.	

NEW QUESTION 105

- (Exam Topic 4)

You have a Microsoft 365 tenant.

You have 500 computers that run Windows 10.

You plan to monitor the computers by using Windows Defender Advanced Threat Protection (Windows Defender ATP) after the computers are enrolled in Microsoft Intune.

You need to ensure that the computers connect to Windows Defender ATP. How should you prepare Intune for Windows Defender ATP?

- A. Configure an enrollment restriction
- B. Create a device configuration profile
- C. Create a conditional access policy
- D. Create a Windows Autopilot deployment profile

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/intune/advanced-threat-protection>

NEW QUESTION 109

- (Exam Topic 4)

Your company has a Microsoft 365 E5 subscription that contains a user named User1. User1 leaves the company.

You need to identify all the personal data of User1 that is stored in the subscription. What should you do in the Microsoft Purview compliance portal?

- A. Create an eDiscovery case.
- B. Perform an audit.
- C. Perform a content search.
- D. Submit a Data Subject Request (DSR).

Answer: D

Explanation:

Find and export a user's personal data to help you respond to data subject requests for the General Data Protection Regulation (GDPR).
<https://learn.microsoft.com/en-us/microsoft-365/compliance/microsoft-365-compliance-center?view=o365-worl>

NEW QUESTION 112

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

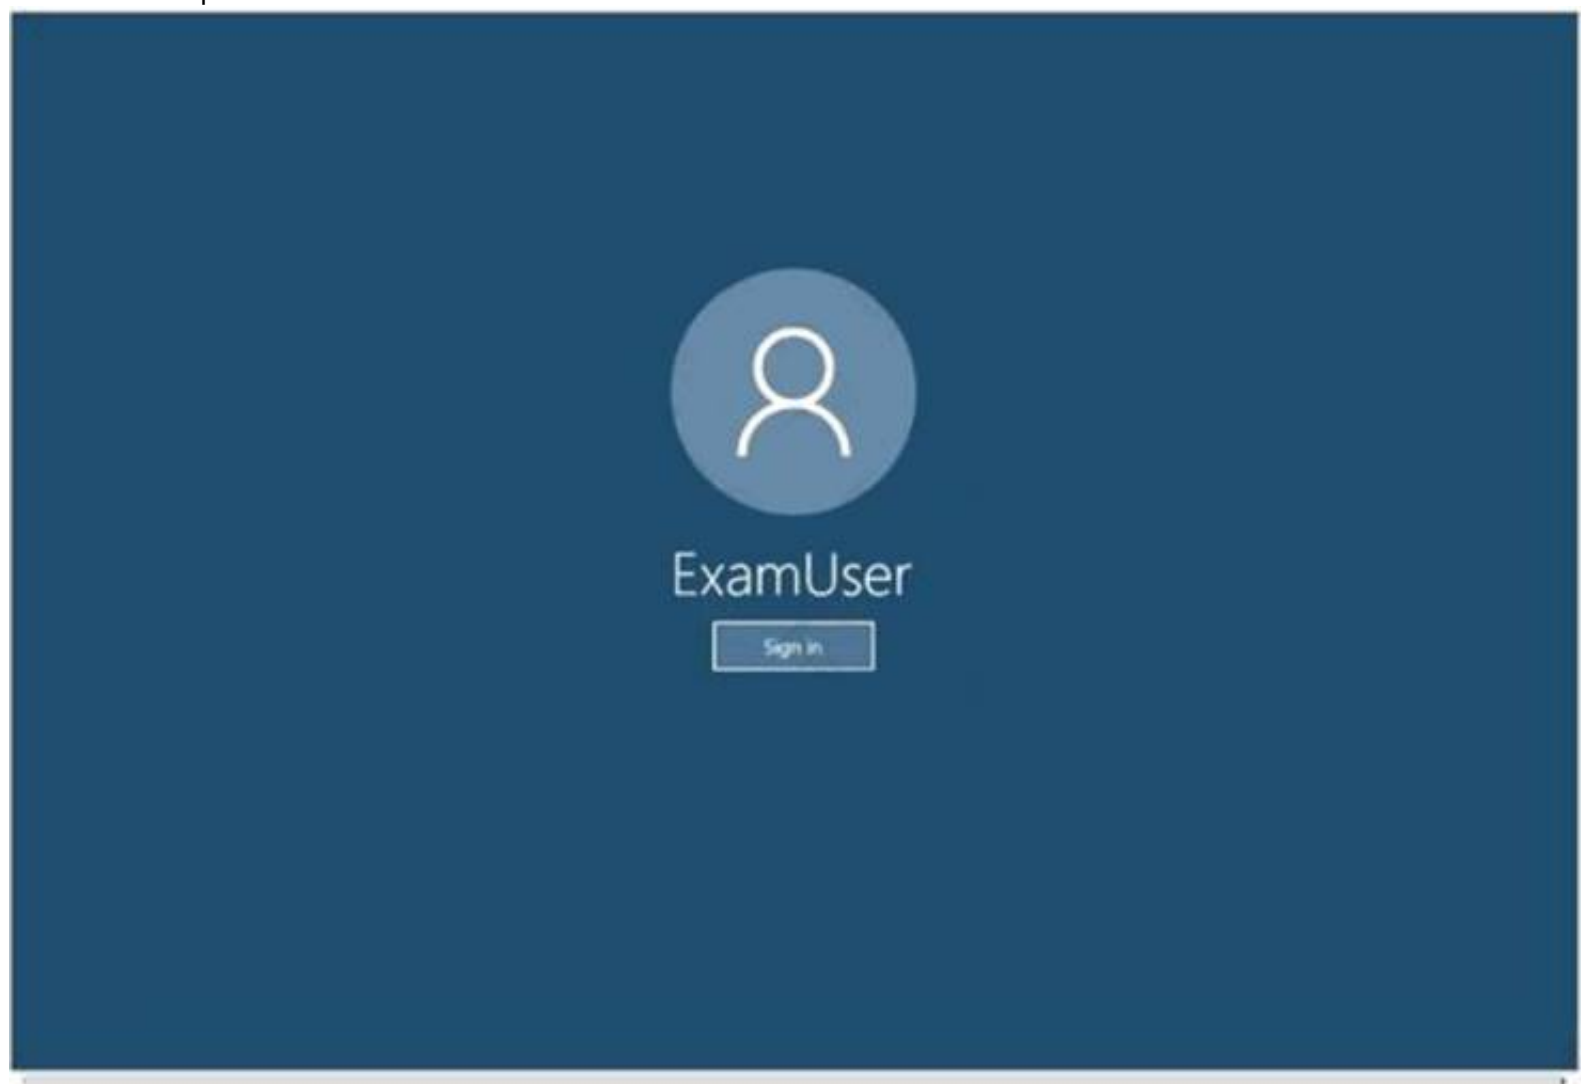

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

Use the following login credentials as needed:

To enter your username, place your cursor in the Sign in box and click on the username below.

To enter your password, place your cursor in the Enter password box and click on the password below. Microsoft 365 Username: admin@LODSe244001@onmicrosoft.com Microsoft 365 Password: &=Q8v@2qGzYz

If the Microsoft 365 portal does not load successfully in the browser, press CTRL-K to reload the portal in a new browser tab.

The following information is for technical support only: Lab instance: 11032396

You need to ensure that group owners renew their Office 365 groups every 180 days. To complete this task, sign in to the Microsoft Office 365 admin center.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Set group expiration

* 1. Open the Azure AD admin center with an account that is a global administrator in your Azure AD organization.

* 2. Select Groups, then select Expiration to open the expiration settings.

* 3. On the Expiration page, you can:

- Set the group lifetime in days. You could select one of the preset values, or a custom value (should be 31 days or more).
- Specify an email address where the renewal and expiration notifications should be sent when a group has no owner.
- Select which Office 365 groups expire. You can set expiration for:
- All Office 365 groups
- A list of Selected Office 365 groups
- None to restrict expiration for all groups

Save your settings when you're done by selecting Save. Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/users-groups-roles/groups-lifecycle>

NEW QUESTION 113

- (Exam Topic 4)

Your company has a Microsoft 365 subscription that includes a user named User1. You suspect that User1 sent email messages to a competitor detailing company secrets.

You need to recommend a solution to ensure that you can review any email messages sent by User1 to the competitor, including sent items that were deleted. What should you include in the recommendation?

- A. Enable In-Place Archiving for the mailbox of User1
- B. From the Security & Compliance, perform a content search of the mailbox of User1
- C. Place a Litigation Hold on the mailbox of User1
- D. Configure message delivery restrictions for the mailbox of User1

Answer: C

NEW QUESTION 117

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription and 5,000 users.

You create several alert policies that are triggered every time activities match rules.

You need to create an alert policy that is triggered when the volume of matched activities becomes unusual. What should you do first?

- A. Enable Microsoft Office 365 auditing.
- B. Enable Microsoft Office 365 analytics.
- C. Enable Microsoft Office 365 Cloud App Security.
- D. Deploy a Microsoft Office 365 add-in to all the users.

Answer: B

NEW QUESTION 119

- (Exam Topic 4)

You have a Microsoft 365 tenant.

You need to implement a policy to enforce the following requirements:

- If a user uses a Windows 10 device that is NOT hybrid Azure Active Directory (Azure AD) joined, the user must be allowed to connect to Microsoft SharePoint Online only from a web browser. The user must be prevented from downloading files or syncing files from SharePoint Online.
- If a user uses a Windows 10 device that is hybrid Azure AD joined, the user must be able to connect to SharePoint Online from any client application, download files, and sync files.

What should you create?

- A. a conditional access policy in Azure AD that has Client apps conditions configured

- B. a compliance policy in Microsoft Endpoint Manager that has the Device Health settings configured
- C. a compliance policy in Microsoft Endpoint Manager that has the Device Properties settings configured
- D. a conditional access policy in Azure AD that has Session controls configured

Answer: A

NEW QUESTION 121

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

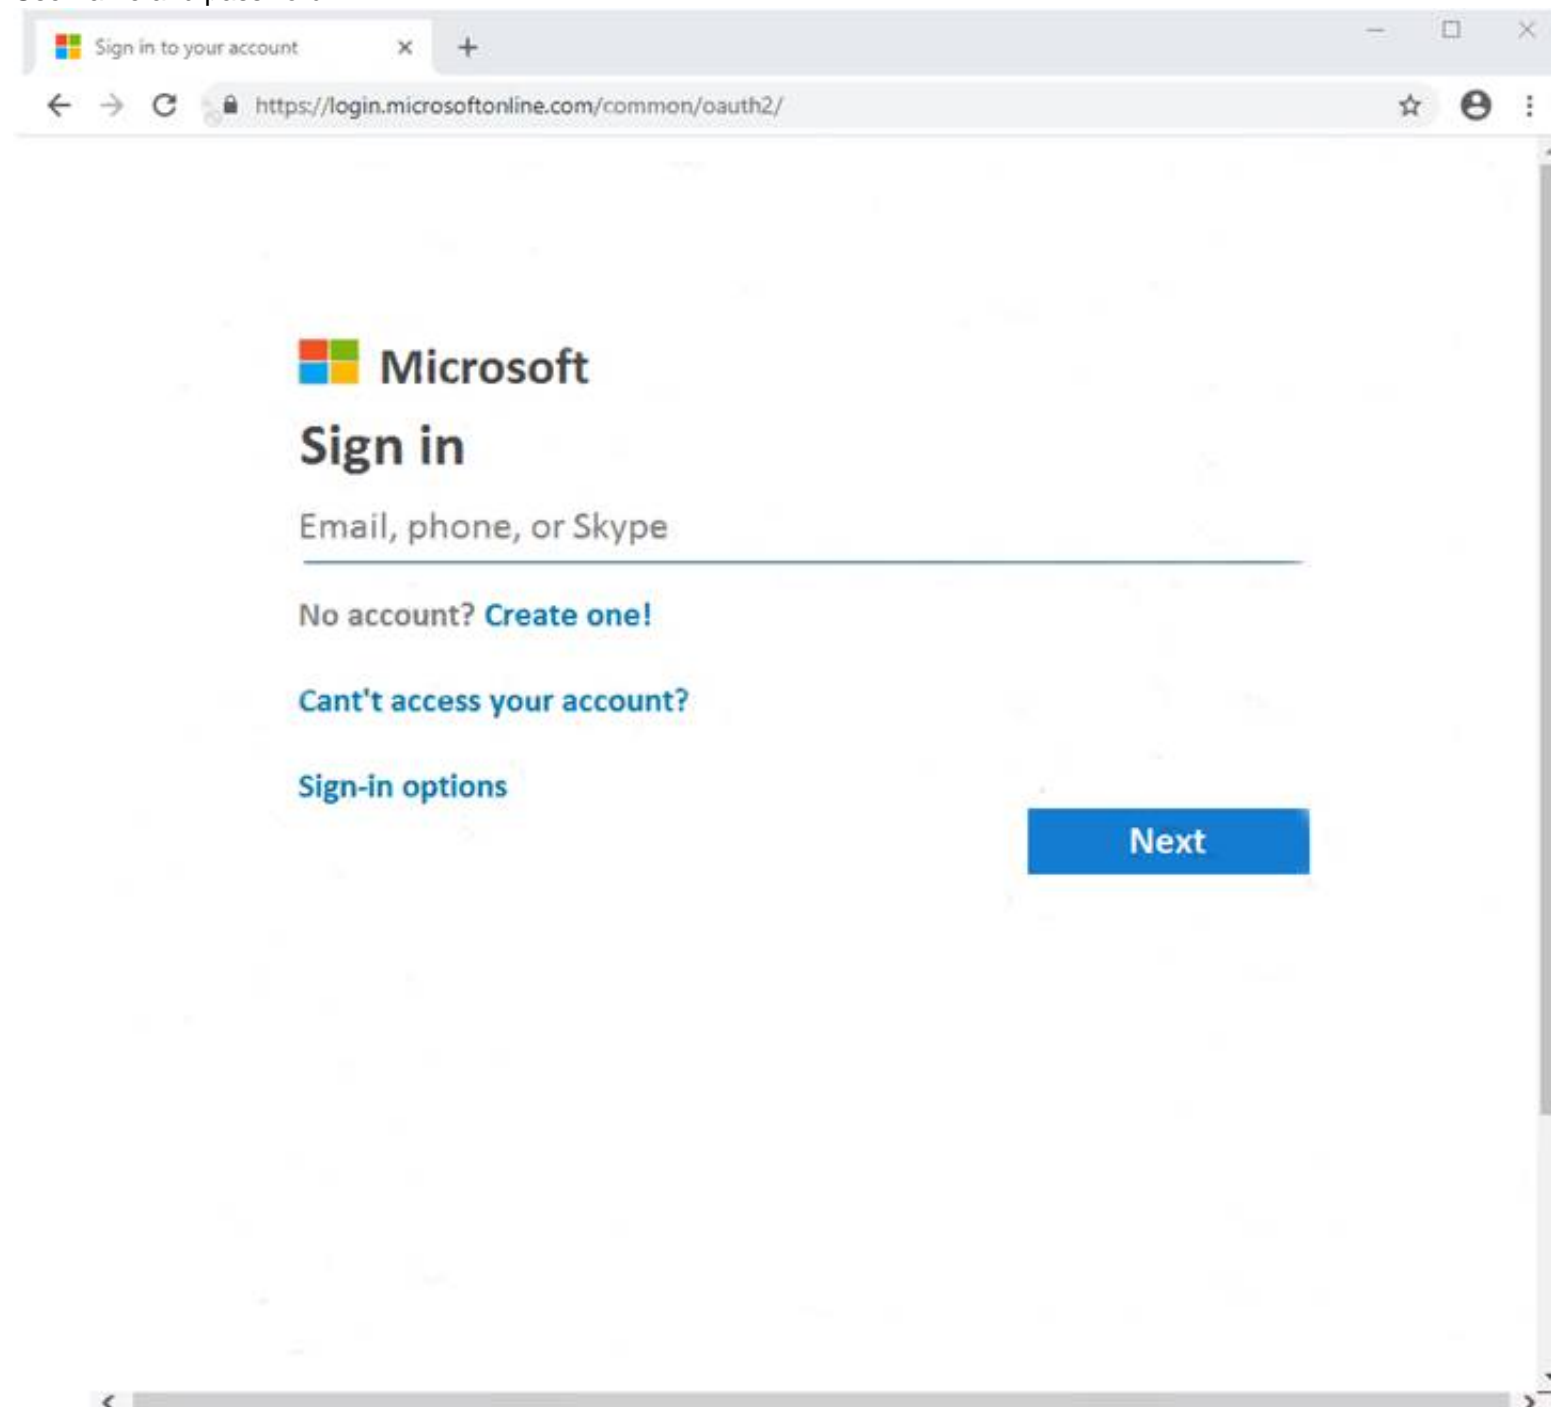

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

You need to create an Azure Information Protection label to meet the following requirements:

- Content must expire after 21 days.
- Offline access must be allowed for 21 days only.
- Documents must be protected by using a cloud key.
- Authenticated users must be able to view content only.

To complete this task, sign in to the Microsoft 365 admin center.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

* 1. If you haven't already done so, open a new browser window and sign in to the Azure portal. Then navigate to the Azure Information Protection pane.

For example, in the search box for resources, services, and docs: Start typing Information and select Azure Information Protection.

* 2. From the Classifications > Labels menu option: On the Azure Information Protection - Labels pane, select the label you want to change.

On the Label pane, locate Set permissions for documents and emails containing this label, and select Protect.

* 3. Select Protection.

* 4. On the Protection pane, select Azure (cloud key).

* 5. Select Set permissions to define new protection settings in this portal.

* 6. If you selected Set permissions for Azure (cloud key), this option lets you select users and usage rights.

To specify the users that you want to be able to open protected documents and emails, select Add permissions. Then on the Add permissions pane, select the first set of users and groups who will have rights to use the content that will be protected by the selected label:

- Choose Select from the list where you can then add all users from your organization by selecting Add <organization name> - All members. This setting excludes guest accounts. Or, you can select Add any authenticated users, or browse the directory. When you choose all members or browse the directory, the users or groups must have an email address. In a production environment, users and groups nearly always have an email address, but in a simple testing environment, you might need to add email addresses to user accounts or groups.

- Change the File Content Expiration setting to 21 days.

- Change the Allow offline access setting to 21 days.

When you have finished configuring the permissions and settings, click OK.

This grouping of settings creates a custom template for the Azure Rights Management service. These templates can be used with applications and services that integrate with Azure Rights Management.

* 7. Click OK to close the Protection pane and see your choice of User defined or your chosen template display for the Protection option in the Label pane.

* 8. On the Label pane, click Save.

* 9. On the Azure Information Protection pane, use the PROTECTION column to confirm that your label now displays the protection setting that you want:

- A check mark if you have configured protection.
- An x mark to denote cancellation if you have configured a label to remove protection.
- A blank field when protection is not set.

When you clicked Save, your changes are automatically available to users and services. There's no longer a separate publish option.

<https://docs.microsoft.com/en-us/azure/information-protection/configure-policy-protection>

NEW QUESTION 125

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some questions sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft 365 subscription.

You have a user named User1. Several users have full access to the mailbox of User1. Some email messages sent to User1 appear to have been read and deleted before the user viewed them. When you search the audit log in Security & Compliance to identify who signed in to the mailbox of User1, the results are blank. You need to ensure that you can view future sign-ins to the mailbox of User1. You run the Set-MailboxFolderPermission –Identity "User1" -User User1@contoso.com –AccessRights Owner command. Does that meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

References:

<https://docs.microsoft.com/en-us/powershell/module/exchange/mailboxes/set-mailbox?view=exchange-ps>

NEW QUESTION 129

- (Exam Topic 4)

Note: This question is part of series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft 365 E5 subscription that is associated to a Microsoft Azure Active Directory (Azure AD) tenant named contoso.com.

You use Active Directory Federation Services (AD FS) to federate on-premises Active Directory and the tenant. Azure AD Connect has the following settings:

- Source Anchor: objectGUID
- Password Hash Synchronization: Disabled
- Password writeback: Disabled
- Directory extension attribute sync: Disabled
- Azure AD app and attribute filtering: Disabled
- Exchange hybrid deployment: Disabled
- User writeback: Disabled

You need to ensure that you can use leaked credentials detection in Azure AD Identity Protection. Solution: You modify the Azure AD app and attribute filtering settings.

Does that meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 131

- (Exam Topic 4)

Your network contains an on-premises Active Directory domain named contoso.local that has a forest functional level of Windows Server 2008 R2.

You have a Microsoft 365 E5 subscription linked to an Azure Active Directory (Azure AD) tenant named contoso.com.

You plan to install Azure AD Connect and enable single sign-on (SSO).

You need to prepare the domain to support SSO. The solution must minimize administrative effort. What should you do?

- A. Raise the forest functional level to Windows Server 2016.
- B. Modify the UPN suffix of all domain users.
- C. Populate the mail attribute of all domain users.
- D. Rename the domain.

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/enterprise/prepare-a-non-routable-domain-for-directory-synchro>

NEW QUESTION 136

- (Exam Topic 4)

You have an Azure Sentinel workspace that has an Azure Active Directory (Azure AD) connector and an Office 365 connector.

From the workspace, you plan to create a scheduled query rule that will use a custom query. The rule will be used to generate alerts when inbound access to Office 365 from specific user accounts is detected.

You need to ensure that when multiple alerts are generated by the rule, the alerts are consolidated as a single incident per user account.

What should you do?

- A. From Set rule logic, map the entities.
- B. From Analytic rule details, configure Severity.
- C. From Set rule logic, set Suppression to Off.
- D. From Analytic rule details, configure Tactics.

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/sentinel/map-data-fields-to-entities>

NEW QUESTION 140

- (Exam Topic 4)

You need to implement a solution to manage when users select links in documents or email messages from Microsoft Office 365 ProPlus applications or Android devices. The solution must meet the following requirements:

- Block access to a domain named fabrikam.com
- Store information when the users select links to fabrikam.com

To complete this task, sign in to the Microsoft 365 portal.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

You need to configure a Safe Links policy.

- Go to the Office 365 Security & Compliance admin center.
- Navigate to Threat Management > Policy > Safe Links.
- In the Policies that apply to the entire organization section, select Default, and then click the Edit icon.
- In the Block the following URLs section, type in *.fabrikam.com. This meets the first requirement in the question.
- In the Settings that apply to content except email section, untick the checkbox labelled Do not track when users click safe links. This meets the second requirement in the question.
- Click Save to save the changes. Reference:

<https://docs.microsoft.com/en-us/microsoft-365/security/office-365-security/set-up-atp-safe-links-policies?view>

NEW QUESTION 141

- (Exam Topic 4)

You have a Microsoft 365 subscription that contains 1,000 user mailboxes.

An administrator named Admin1 must be able to search for the name of a competing company in the mailbox of a user named User5.

You need to ensure that Admin1 can search the mailbox of User5 successfully. The solution must prevent Admin1 from sending User5.

Solution: You modify the privacy profile, and then create a Data Subject Request (DSR) case. Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 144

- (Exam Topic 4)

You have an Azure Active Directory (Azure AD) tenant named contoso.com that contains the users shown in the following table.

Name	Role
Admin1	Groups administrator
Admin2	User administrator

You add internal as a blocked word in the group naming policy for contoso.com. You add Contoso- as prefix in the group naming policy for contoso.com.

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Statements	Yes	No
Admin1 can create an Office 365 group named Distribution.	<input type="radio"/>	<input type="radio"/>
Admin2 can create an Office 365 group named Contoso-FinanceInternal.	<input type="radio"/>	<input type="radio"/>
Admin2 can create a security group named Contoso-internal.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

User Admin and Global Admin are exempt from group password policies. Reference:

<https://docs.microsoft.com/en-us/microsoft-365/solutions/groups-naming-policy?view=o365-worldwide>

NEW QUESTION 145

- (Exam Topic 4)

You have a Microsoft 365 alert named Alert?

as shown in the following exhibit.

View alerts

						+ Export	Filter
<input type="checkbox"/>	Severity	Alert name	Status	Category	Activity count	Last occurrence...	
<input type="checkbox"/>	Medium	Alert2	Resolved	Data loss prevention	1	6 days ago	

You need to manage the status of Alert2. To which status can you change Alert2?

- A. The status cannot be changed.
- B. investigating only
- C. Active or investigating only
- D. Investigating, Active, or Dismissed
- E. Dismissed only

Answer: D

Explanation:

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/compliance/dlp-configure-view-alerts-policies?view=o365-world>

NEW QUESTION 147

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription that contains the users shown in the following table.

User	Security group	Azure Active Directory (Azure AD) role
User1	ADGroup1	Security administrator
User2	ADGroup2	Application administrator
User3	ADGroup3	User administrator

You have the devices shown in the following table.

Name	Operating system	Onboarded to Microsoft Defender for Endpoint
Device1	Windows 10	Yes
Device2	Windows 8.1	Yes
Device3	Windows 10	Yes

You have the Microsoft Defender for Endpoint portal roles shown in the following table.

Name	Assigned to
Role1	ADGroup1
Role2	ADGroup2
Role3	ADGroup3

You have the Microsoft Defender for Endpoint device groups shown in the following table.

Name	Remediation level	Rank	Role	Members
Group1	Full - remediate threats automatically	1	Role1	OS: Windows 10
Group2	Semi - require approval for all folders	2	Role2	OS: Windows 8.1
Group3	Semi - require approval for all folders	3	Role3	OS: Windows 10

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
User1 can manage alerts for Device2.	<input type="radio"/>	<input type="radio"/>
User3 can manage alerts for Device3.	<input type="radio"/>	<input type="radio"/>
The Remediation level for Device3 is Semi - require approval for all folders.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

	Statements	Yes	No
	User1 can manage alerts for Device2.	<input checked="" type="radio"/>	<input type="radio"/>
	User3 can manage alerts for Device3.	<input type="radio"/>	<input checked="" type="radio"/>
	The Remediation level for Device3 is Semi - require approval for all folders.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 148

- (Exam Topic 4)

You have a Microsoft 365 subscription.

You create a retention label named Label1 as shown in the following exhibit.

Create a label to help users classify their content.

- ☒ Name your label
- ☒ Label settings
- ☐ Review your settings

Review your settings

Name Edit
Label1

Descriptions for admins Edit

Description for users Edit

Retention Edit
 2 years
 Retain and Delete
 Based on when it was created
 Use Label to classify content as a "Record"

Back Create this label Cancel

You publish Label1 to SharePoint sites.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

If you create a file in a Microsoft SharePoint library on January 1, 2019, you can [answer choice].

	▼
never delete the file.	
delete the file before January 1, 2021.	
delete the file after January 1, 2021.	

If you create a file in a Microsoft SharePoint library on March 15, 2019, the file will [answer choice].

	▼
always remain in the library.	
remain in the library until you delete the file.	
be deleted automatically on March 15, 2021.	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/office365/securitycompliance/labels>

NEW QUESTION 152

- (Exam Topic 4)

You have a Microsoft 365 subscription linked to an Azure Active Directory (Azure AD) tenant that contains a user named User1.

You have a Data Subject Request (DSR) case named Case1.

You need to allow User1 to export the results of Case1. The solution must use the principle of least privilege. Which role should you assign to User1 for Case1?

- A. eDiscovery Manager
- B. Security Operator
- C. eDiscovery Administrator
- D. Global Reader

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/compliance/manage-gdpr-data-subject-requests-with-the-dsr-cas>

NEW QUESTION 154

- (Exam Topic 4)

You have a Microsoft Azure Active Directory (Azure AD) tenant named contoso.com that contains the users shown in the following table.

Name	Member of	Multi-factor authentication (MFA) status
User1	Group1, Group2	Disabled
User2	Group1	Disabled

You create and enforce an Azure AD Identity Protection sign-in risk policy that has the following settings: ➤ Assignments: Include Group1, Exclude Group2

➤ Conditions: Sign in risk of Low and above

➤ Access: Allow access, Require password multi-factor authentication

You need to identify how the policy affects User1 and User2.

What occurs when each user signs in from an anonymous IP address? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

User1:

	▼
Blocked	
Can sign in without MFA	
Prompted for MFA	

User2:

	▼
Blocked	
Can sign in without MFA	
Prompted for MFA	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

User1:

	▼
Blocked	
Can sign in without MFA	
Prompted for MFA	

User2:

	▼
Blocked	
Can sign in without MFA	
Prompted for MFA	

NEW QUESTION 156

- (Exam Topic 4)

You have a Microsoft 365 subscription.

You create and run a content search from the Security & Compliance admin center. You need to download the results of the content search.

What should you obtain first?

- A. an export key
- B. a password
- C. a certificate
- D. a pin

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/office365/securitycompliance/export-search-results>

NEW QUESTION 161

- (Exam Topic 4)

You have a Microsoft 365 subscription that uses a default name of litwareinc.com.

You configure the Sharing settings in Microsoft OneDrive as shown in the following exhibit.

Links

Choose the kind of link that's selected by default when users share items.

Default link type

☒ Shareable: Anyone with the link

☐ Internal: Only people in your organization

☐ Direct: Specific people

External sharing

Users can share with:

SharePoint	OneDrive	Permissions
		Anyone Users can create shareable links that don't require sign-in
		New and existing external users External users must sign-in
		Existing external users Only users already in your organization's directory
		Only people in your organization No external sharing allowed

Your sharing setting for OneDrive can't be more permissive than your setting for SharePoint.

Advanced settings for external sharing

☒ Allow or block sharing with people on specific domains

Allow only these domains: Contoso.com, Adatum.com

[Add domains](#)

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

A user who has an email address of user1@fabrikam.com [answer choice].

	▼
cannot access OneDrive content	
can access OneDrive content after a link is created	
must be added to be a group before the user can access shared files	

If a new guest user is created for user2@contoso.com [answer choice]

	▼
the user cannot access OneDrive content	
the user can access OneDrive content after a link is created	
must be added to a group before the user can access shared files	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References:

NEW QUESTION 162

- (Exam Topic 4)

You have a Microsoft 365 subscription that contains 50 devices- The devices are enrolled in Microsoft Endpomt Manager and have Microsoft Defender for Endpoint enabled. You need to identify devices that have a pending offline scan. What should you do?

- A. From the Microsoft 365 Defender portal, review the Threat & Vulnerability Management dashboard.
- B. From the Microsoft 365 Defender portal, review the Threat analytics dashboard
- C. From the Microsoft Endpoint Manager admin center, review the Detected malware report
- D. From the Microsoft Endpoint Manager admin center, review the Antivirus agent status report.

Answer: A

NEW QUESTION 163

- (Exam Topic 4)

You have an Azure Active Directory (Azure AD) tenant named contoso.com that contains the users shown in the following table.

Name	Permanent role assignment
User1	Global Administrator
User2	Security Administrator
User3	Privileged Role Administrator
User4	None

The User Administrator role is configured in Azure AD Privileged Identity Management (PIM) as shown in the following exhibit.

NEW QUESTION 168

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

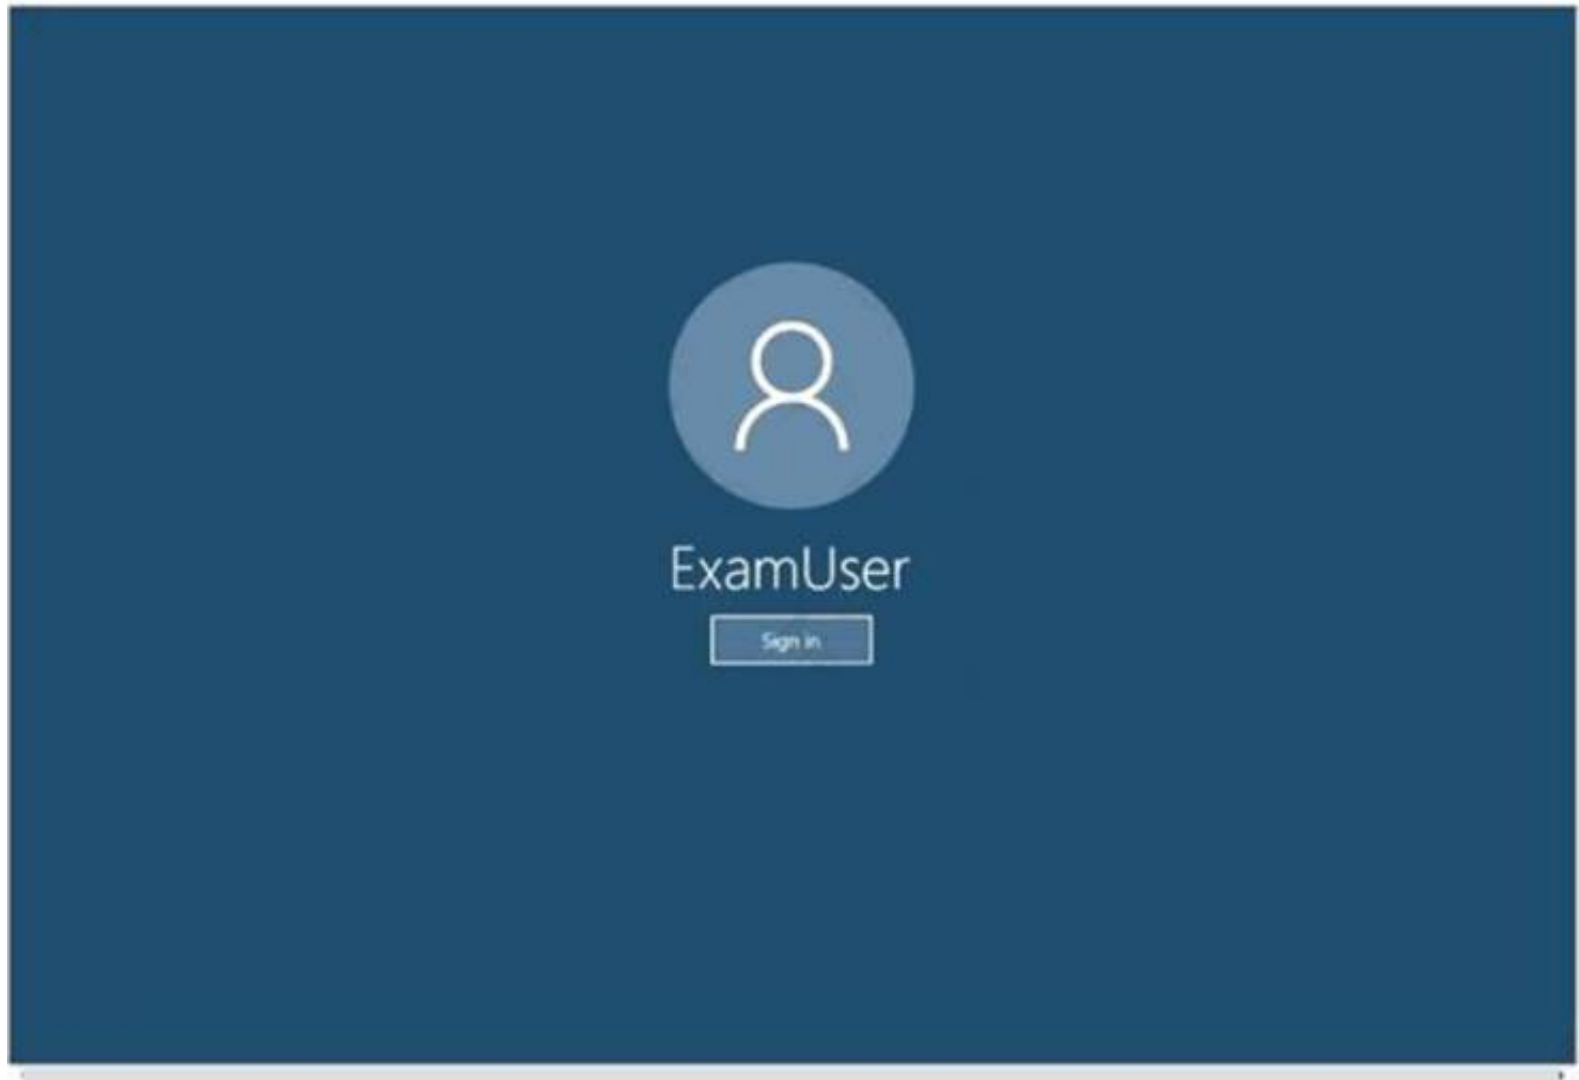

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

Use the following login credentials as needed:

To enter your username, place your cursor in the Sign in box and click on the username below.

To enter your password, place your cursor in the Enter password box and click on the password below. Microsoft 365 Username:

admin@LODSe244001@onmicrosoft.com Microsoft 365 Password: &=Q8v@2qGzYz

If the Microsoft 365 portal does not load successfully in the browser, press CTRL-K to reload the portal in a new browser tab.

The following information is for technical support only: Lab instance: 11032396

You need to ensure that SharepointAdmins@contoso.com receives an alert when a user establishes a sync relationship to a document library from a computer that is a member of an Active Directory (AD) domain.

To complete this task, sign in to the Microsoft Office 365 admin center.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

* 1. Navigate to Manage Alerts in the Security & Compliance Center.

* 2. On the Activity alerts page, click + New.

The flyout page to create an activity alert is displayed.

* 3. Complete the following fields to create an activity alert:

* a. Name - Type a name for the alert. Alert names must be unique within your organization.

* b. Description (Optional) - Describe the alert, such as the activities and users being tracked, and the users that email notifications are sent to. Descriptions provide a quick and easy way to describe the purpose of the alert to other admins.

* c. Alert type - Make sure the Custom option is selected.

* d. Send this alert when - Click Send this alert when and then configure these two fields:

➤ Activities - Click the drop-down list to display the activities that you can create an alert for. This is the same activities list that's displayed when you search the Office 365 audit log. You can select one or more specific activities or you can click the activity group name to select all activities in the group. For a description of these activities, see the "Audited activities" section in Search the audit log. When a user performs any of the activities that you've added to the alert, an email notification is sent.

➤ Users - Click this box and then select one or more users. If the users in this box perform the activities that you added to the Activities box, an alert will be sent. Leave the Users box blank to send an alert when any user in your organization performs the activities specified by the alert.

* e. Send this alert to - Click Send this alert, and then click in the Recipients box and type a name to add a user's who will receive an email notification when a user (specified in the Users box) performs an activity (specified in the Activities box). Note that you are added to the list of recipients by default. You can remove your name from this list.

* 4. Click Save to create the alert.

The new alert is displayed in the list on the Activity alerts page.

Activity alerts			
Name	Recipients	Status ▲	Date modified
Executive mailbox alert	compliance@contoso.com	On	2016-06-08 14:42:02
SharePoint upload alert	admin@contoso.com	Off	2016-06-08 14:23:39
External sharing alert	admin@contoso.com	Off	2016-06-08 14:24:08

The status of the alert is set to On. Note that the recipients who will receive an email notification when an alert is sent are also listed.

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/compliance/create-activity-alerts?view=o365-worldwide>

NEW QUESTION 171

- (Exam Topic 4)

You have a Microsoft 365 subscription that uses an Azure Active Directory (Azure AD) tenant named contoso.com. All the devices in the tenant are managed by using Microsoft Intune.

You purchase a cloud app named App1 that supports session controls. You need to ensure that access to App can be reviewed in real time.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer Area

Actions

From the Azure Active Directory admin center, register App1.

From the Cloud App Security admin center, create an access policy.

From the Cloud App Security admin center, create an app discovery policy.

From the Device Management admin center, create an app configuration policy.

From the Azure Active Directory admin center, create a conditional access policy.

From the Device Management admin center, add an App1.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/cloud-app-security/access-policy-aad>

NEW QUESTION 173

- (Exam Topic 4)

You have a Microsoft 365 subscription. You need to ensure that users can apply retention labels to individual documents in their Microsoft SharePoint libraries. Which two actions should you perform? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. From the Cloud App Security admin center, create a file policy.
- B. From the SharePoint admin center, modify the Site Settings.
- C. From the SharePoint & Compliance admin center, create a label.
- D. From the SharePoint admin center, modify the records management settings.
- E. From the Security & Compliance admin center, publish a label.

Answer: CE

Explanation:

Reference:

<https://docs.microsoft.com/en-us/office365/securitycompliance/protect-sharepoint-online-files-with-office-365-l>

NEW QUESTION 176

- (Exam Topic 4)

You have a hybrid Microsoft 365 deployment that contains the Windows 10 devices shown in the following table.

Name	Trusted Platform Module (TPM) version	Joined to	Microsoft Intune enrolled
Device1	v2.0	Active Directory	Yes
Device2	v2.0	Azure Active Directory (Azure AD)	Yes
Device3	v1.3	Azure Active Directory (Azure AD)	Yes

You assign a Microsoft Endpoint Manager disk encryption policy that automatically and silently enables BitLocker Drive Encryption (BitLocker) on all the devices. Which devices will have BitLocker enabled?

- A. Device 1, Device2, and Device3
- B. Device2 only
- C. Device1 and Device2 only
- D. Device2 and Device3 only

Answer: B

Explanation:

To silently enable BitLocker, the device must be Azure AD Joined or Hybrid Azure AD Joined and the device must contain TPM (Trusted Platform Module) 2.0.

Reference:

<https://docs.microsoft.com/en-us/mem/intune/protect/encrypt-devices>

NEW QUESTION 177

- (Exam Topic 4)

You have a Microsoft 365 subscription.

You need to create data loss prevention (DLP) queries in Microsoft SharePoint Online to find sensitive data stored in sites.

Which type of site collection should you create first?

- A. Records Center
- B. Compliance Policy Center
- C. eDiscovery Center
- D. Enterprise Search Center
- E. Document Center

Answer: C

Explanation:

Reference:

<https://support.office.com/en-us/article/overview-of-data-loss-prevention-in-sharepoint-server-2016-80f907bbb9>

NEW QUESTION 179

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some questions sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have an on-premises Active Directory domain named contoso.com.

You install and run Azure AD Connect on a server named Server1 that runs Windows Server. You need to view Azure AD Connect events.

You use the Security event log on Server1. Does that meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

References:

<https://support.pingidentity.com/s/article/PingOne-How-to-troubleshoot-an-AD-Connect-Instance>

NEW QUESTION 183

- (Exam Topic 4)

You create an Azure Sentinel workspace.

You configure Azure Sentinel to ingest data from Azure Active Directory (Azure AD).

In the Azure Active Directory admin center, you discover Azure AD Identity Protection alerts. The Azure Sentinel workspace shows the status as shown in the following exhibit.

In Azure Log Analytics, you can see Azure AD data in the Azure Sentinel workspace.

What should you configure in Azure Sentinel to ensure that incidents are created for detected threats?

- A. data connectors
- B. rules
- C. workbooks
- D. hunting queries

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/sentinel/detect-threats-custom>

NEW QUESTION 185

- (Exam Topic 4)

You plan to add a file named ConfidentialHR.docx to a Microsoft SharePoint library.

You need to ensure that a user named Megan Bowen is notified when another user accesses ConfidentialHR.xlsx.

To complete this task, sign in to the Microsoft 365 portal.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

You need to configure an alert policy.

- Go to the Security & Compliance Admin Center.
- Navigate to Alerts > Alert Policies.
- Click on + New alert policy to create a new policy.

- Give the policy a name and select a severity level. For example: Medium.
- In the Category section, select Information Governance and click Next.
- In the Select an activity section, select Any file or folder activity.
- Click Add a condition and select File name.
- Type in the filename ConfidentialHR.xlsx and click Next.
- In the email recipients section, add Megan Bowen and click Next.
- Click Finish to create the alert policy.

NEW QUESTION 190

- (Exam Topic 4)

You have a Microsoft 365 subscription.

You create a supervision policy named Policy1, and you designate a user named User1 as the reviewer. What should User1 use to view supervised communications?

- A. a team in Microsoft Teams
- B. the Security & Compliance admin center
- C. Outlook on the web
- D. the Exchange admin center D18912E1457D5D1DDCBD40AB3BF70D5D

Answer: B

Explanation:

NEW QUESTION 195

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

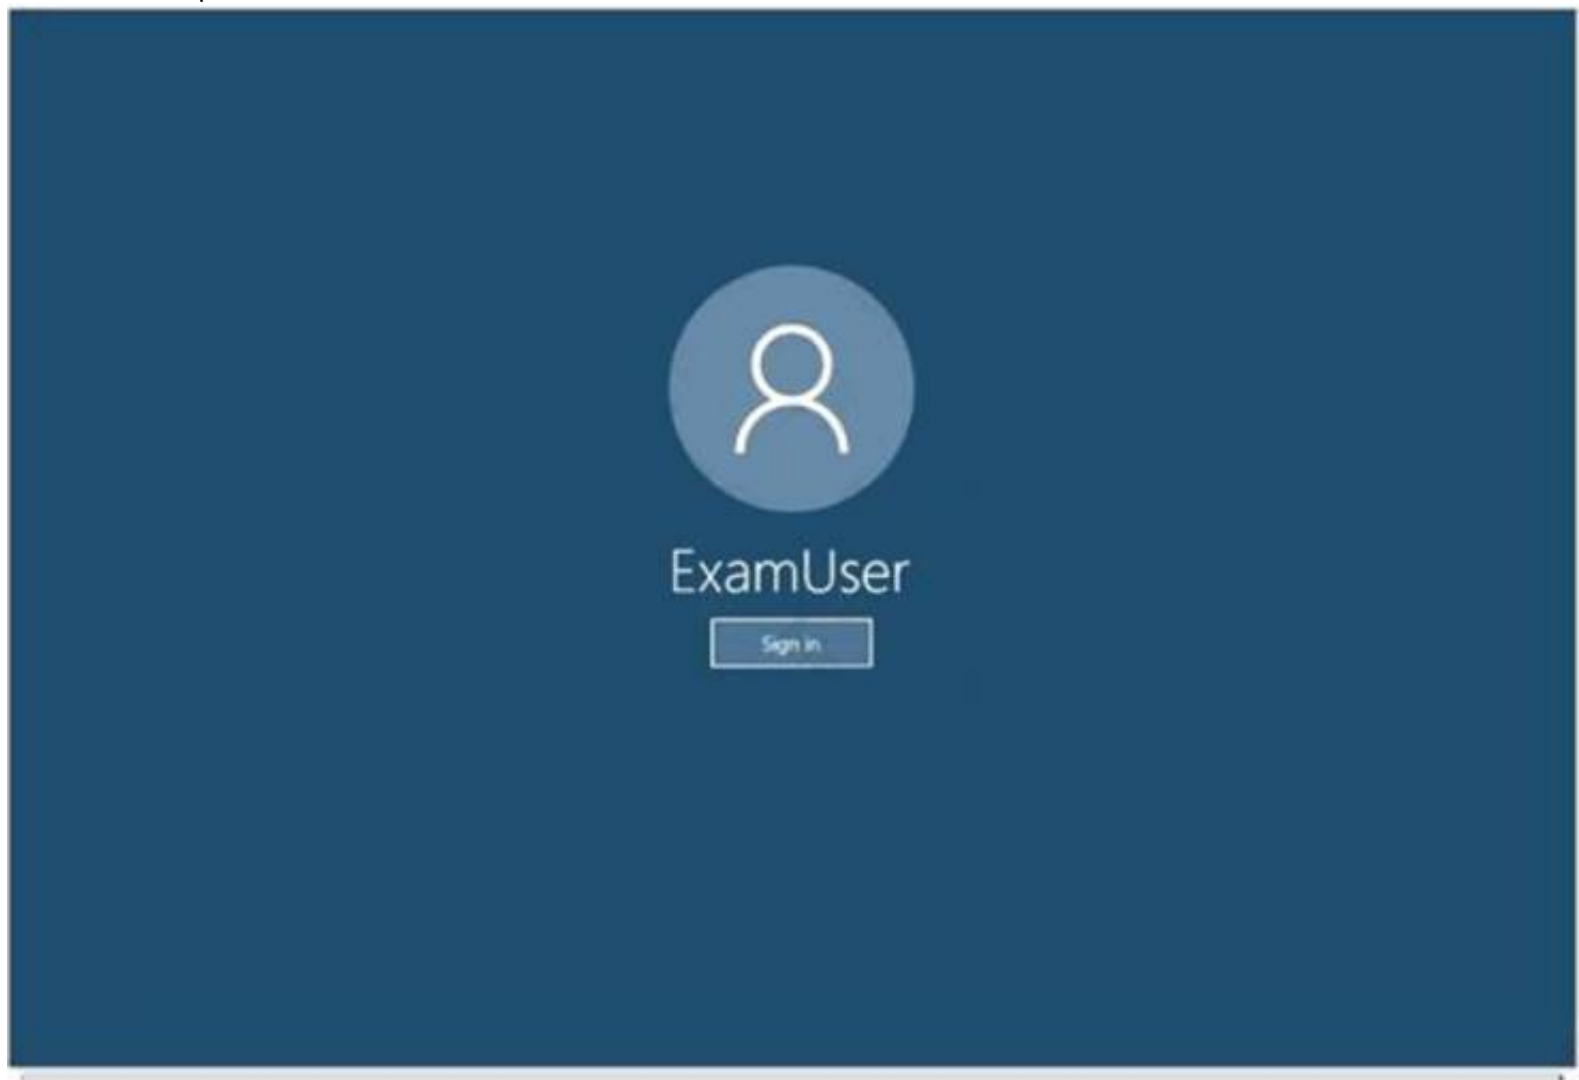

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

Use the following login credentials as needed:

To enter your username, place your cursor in the Sign in box and click on the username below.

To enter your password, place your cursor in the Enter password box and click on the password below. Microsoft 365 Username: admin@LODSe244001@onmicrosoft.com Microsoft 365 Password: &=Q8v@2qGzYz

If the Microsoft 365 portal does not load successfully in the browser, press CTRL-K to reload the portal in a new browser tab.

The following information is for technical support only:

Lab instance: 11032396

You need to ensure that a user named Lee Gu can manage all the settings for Exchange Online. The solution must use the principle of least privilege.

To complete this task, sign in to the Microsoft Office 365 admin center.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

- In the Exchange Administration Center (EAC), navigate to Permissions > Admin Roles.
- Select the group: Organization Management and then click on Edit.
- In the Members section, click on Add.
- Select the users, USGs, or other role groups you want to add to the role group, click on Add, and then click on OK.
- Click on Save to save the changes to the role group. Reference:

<https://help.bittitan.com/hc/en-us/articles/115008104507-How-do-I-assign-the-elevated-admin-role-Organization> <https://docs.microsoft.com/en-us/exchange/permissions-exo/permissions-exo>

NEW QUESTION 200

- (Exam Topic 4)

You have a Microsoft 365 subscription. Auditing is enabled.

A user named User1 is a member of a dynamic security group named Group1. You discover that User1 is no longer a member of Group1.

You need to search the audit log to identify why User1 was removed from Group1.

Which two actions should you use in the search? To answer, select the appropriate activities in the answer area.

NOTE: Each correct selection is worth one point.

NEW QUESTION 202

- (Exam Topic 4)

You have a Microsoft 365 subscription that contains several Windows 10 devices. The devices are managed by using Microsoft Endpoint Manager.

You need to enable Microsoft Defender Exploit Guard (Microsoft Defender EG) on the devices. Which type of device configuration profile should you use?

- A. Endpoint protection
- B. Device restrictions
- C. Microsoft Defender for Endpoint
- D. identity protection

Answer: A

NEW QUESTION 207

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription.

You plan to implement Microsoft Sentinel to create incidents based on:

- Azure Active Directory (Azure AD) Identity Protection alerts
- Correlated events from the DeviceProcessEvents table

Which analytic rule types should you use for each incident type? To answer, drag the appropriate rule types to the correct incident types. Each rule type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Analytic rules	Answer Area
Fusion	Incidents based on Azure AD Identity Protection alerts::
Microsoft security	Incidents based on correlated events from the DeviceProcessEvents table::
Machine learning behavioral analytics	
Scheduled

Scheduled	

NEW QUESTION 209

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription and a hybrid Microsoft Exchange Server organization.

Each member of a group named Executive has an on-premises mailbox. Only the Executive group members have multi-factor authentication (MFA) enabled. Each member of a group named Research has a mailbox in Exchange Online.

You need to use Microsoft Office 365 Attack simulator to model a spear-phishing attack that targets the Research group members.

The email address that you intend to spoof belongs to the Executive group members. What should you do first?

- A. From Azure ATP admin center, configure the primary workspace settings
- B. From the Microsoft Azure portal, configure the user risk settings in Azure AD Identity Protection
- C. Enable MFA for the Research group members
- D. Migrate the Executive group members to Exchange Online

Answer: C

Explanation:

Reference:

<https://docs.microsoft.com/en-us/office365/securitycompliance/attack-simulator>

NEW QUESTION 214

- (Exam Topic 4)

You have a Microsoft 365 subscription.

You create a retention policy and apply the policy to Exchange Online mailboxes.

You need to ensure that the retention policy tags can be assigned to mailbox items as soon as possible. What should you do?

- A. From Exchange Online PowerShell, run Start-RetentionAutoTagLearning
- B. From Exchange Online PowerShell, run Start-ManagedFolderAssistant
- C. From the Security & Compliance admin center, create a data loss prevention (DLP) policy
- D. From the Security & Compliance admin center, create a label policy

Answer: D

Explanation:

References:

<https://docs.microsoft.com/en-us/office365/securitycompliance/labels>

NEW QUESTION 215

- (Exam Topic 4)

You have a Microsoft 365 subscription.

From the Microsoft 365 admin center, you create a new user.

You plan to assign the Reports reader role to the user.

You need to see the permissions of the Reports reader role. Which admin center should you use?

- A. Azure Active Directory
- B. Cloud App Security
- C. Security & Compliance

D. Microsoft 365

Answer: A

NEW QUESTION 217

- (Exam Topic 4)

You have a Microsoft 365 tenant.

User attributes are synced from your company’s human resources (HR) system to Azure Active Directory (Azure AD).

The company has four departments that each has its own Microsoft SharePoint Online site. Each site must be accessed only by the users from its respective department.

You are designing an access management solution that has the following requirements:

- Users must be added automatically to the security group of their department.
- All security group owners must verify once quarterly that only the users in their department belong to their group.

Which components should you recommend to meet the requirements? To answer, drag the appropriate components to the correct requirements. Each component may only be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Components

Access packages

Access reviews

Azure AD Privileged Identity Management (PIM) role assignments

Conditional access policies

Data loss prevention (DLP) policies

Groups that have a Membership type of Assigned

Groups that have a Membership type of Dynamic User

Answer Area

Users must be automatically added to the security group for their department:

Group owners must verify membership of departmental groups:
