

# Exam Questions MS-100

Microsoft 365 Identity and Services

<https://www.2passeasy.com/dumps/MS-100/>

### NEW QUESTION 1

- (Exam Topic 5)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

You may now click next to proceed to the lab. Lab information

Use the following login credentials as needed:

To enter your username, place your cursor in the Sign in box and click on the username below.

To enter your password, place your cursor in the Enter password box and click on the password below.

Microsoft 365 Username: admin@LODSe426243.onmicrosoft.com Microsoft 365 Password: 3&YWYjse-6-d

If the Microsoft 365 portal does not load successfully in the browser, press CTRL-K to reload the portal in a new browser tab.

The following information is for technical support purposes only:

Lab Instance: 10887751

You hire a new Microsoft 365 administrator named Nestor Wilke. Nestor Wilke will begin working for your organization in several days.

You need to ensure that Nestor Wilke is prevented from using his account until he begins working.

- A. Mastered
- B. Not Mastered

**Answer: A**

#### Explanation:

You need to sign-in status for the account to 'Blocked'. Blocking doesn't stop the account from receiving email and it doesn't delete any data.

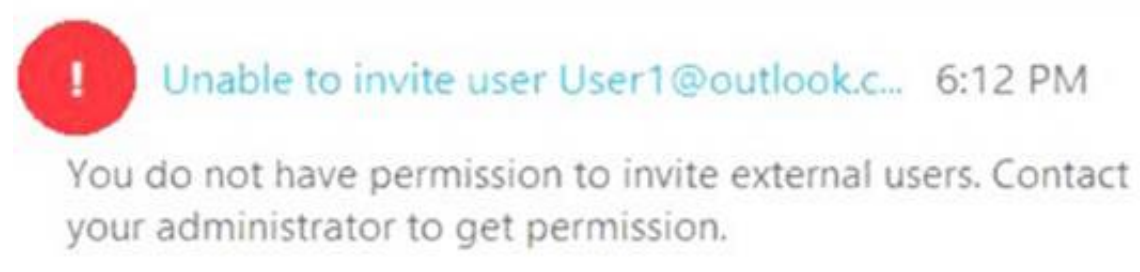

- \* 1. On the home page of the Microsoft 365 admin center, type the user's name into the Search box.
- \* 2. Select the Nestor Wilke account in the search results.
- \* 3. In the 'Sign-in status' section of the account properties, click the Edit link.
- \* 4. Select 'Block the user from signing in' and click the Save button.

### NEW QUESTION 2

- (Exam Topic 5)

You have a Microsoft Azure Active Directory (Azure AD) tenant named contoso.onmicrosoft.com. An external user has a Microsoft account that uses an email address of user1@outlook.com.

An administrator named Admin1 attempts to create a user account for the external user and receives the error message shown in the following exhibit.

You need to ensure that Admin1 can add the user.

What should you do from the Azure Active Directory admin center?

- A. Add a custom domain name named outlook.com.
- B. Modify the Authentication methods.
- C. Modify the External collaboration settings.
- D. Assign Admin1 the Security administrator role.

**Answer: C**

#### Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/b2b/delegate-invitations>

### NEW QUESTION 3

- (Exam Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result these questions will not appear in the review screen.

Your company has a main office and three branch offices. All the branch offices connect to the main office by using a WAN link. The main office has a high-speed Internet connection. All the branch offices connect to the Internet by using the main office connection.

Users use Microsoft Outlook 2016 to connect to 4 Microsoft Exchange Server mailbox hosted in the main office.

The users report that when the WAN link in their office becomes unavailable, they cannot access their mailbox.

You create a Microsoft 365 subscription, and then migrate all the user data to Microsoft 365.

You need to ensure that all the users can continue to use Outlook to receive email messages if a WAN link fails.

Solution: You deploy a site-to-site VPN from each branch office to Microsoft Azure. Does this meet the goal?

- A. Yes
- B. NO

Answer: B

#### NEW QUESTION 4

- (Exam Topic 5)

Your network contains an Active Directory domain and a Microsoft Azure Active Directory (Azure AD) tenant.

You implement directory synchronization for all 10,000 users in the organization. You automate the creation of 100 new user accounts.

You need to ensure that the new user accounts synchronize to Azure AD as quickly as possible. Which command should you run? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

#### Answer Area

Start-ADSyncSyncCycle	-PolicyType	Delta
Set-ADSyncScheduler		Initial
Invoke-ADSyncRunProfile		Full

- A. Mastered
- B. Not Mastered

Answer: A

#### Explanation:

Azure AD Connect synchronizes Active Directory to Azure Active Directory on a schedule. The minimum time between synchronizations is 30 minutes.

If you want to synchronize changes to Active Directory without waiting for the next sync cycle, you can initiate a sync by using the Start-AdSyncSyncCycle. The Delta option synchronizes changes to Active Directory made since the last sync. The Full option synchronizes all Active Directory objects including those that have not changed.

Reference:

<https://blogs.technet.microsoft.com/rmilne/2014/10/01/how-to-run-manual-dirsync-azure-active-directory-sync>

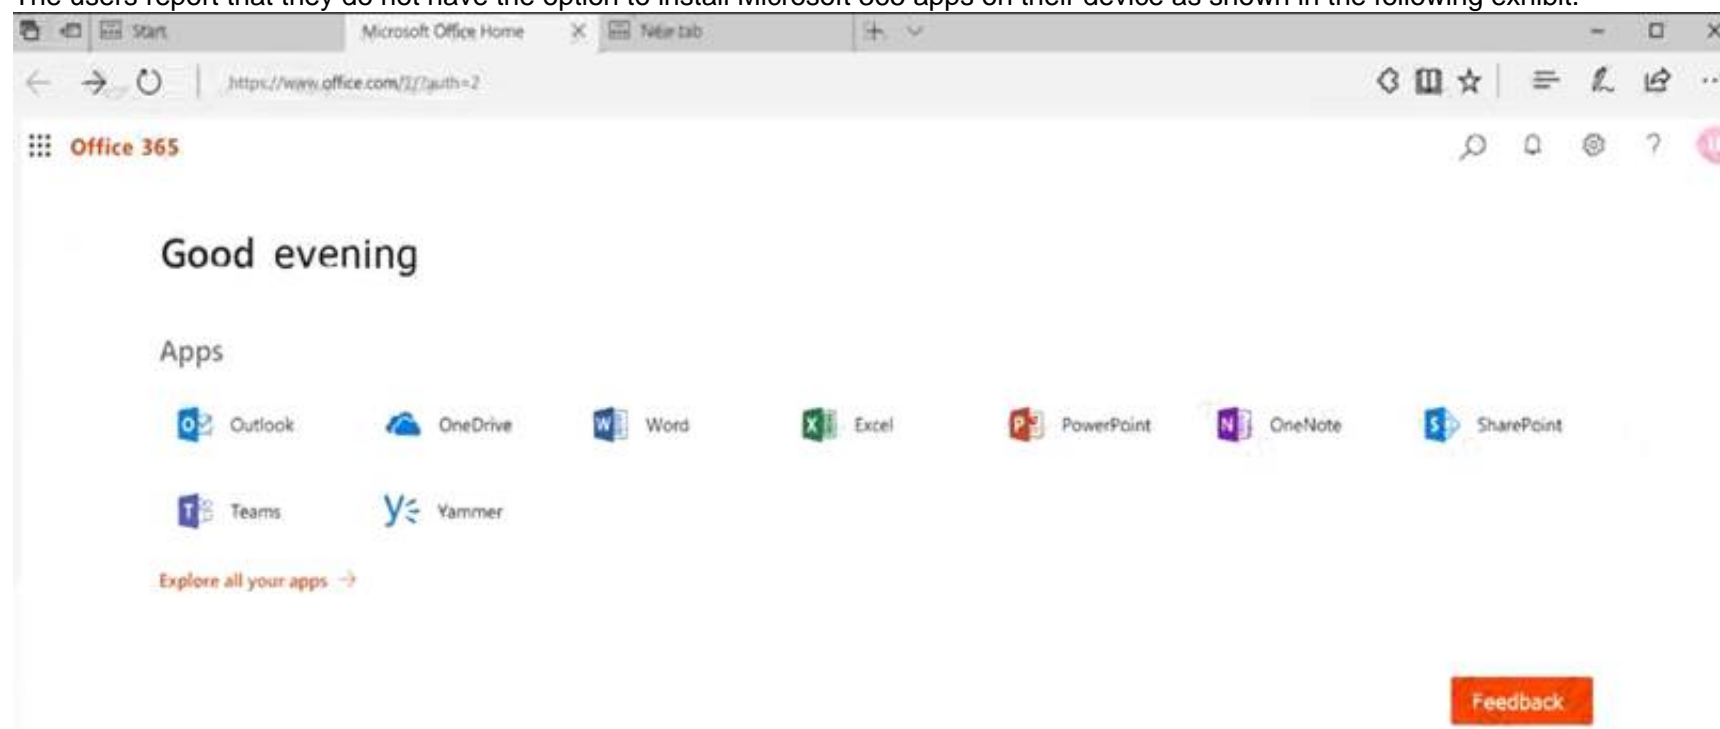

#### NEW QUESTION 5

- (Exam Topic 5)

You have a Microsoft 365 E5 subscription.

All users are assigned a license to Microsoft 365 Apps for enterprise.

The users report that they do not have the option to install Microsoft 365 apps on their device as shown in the following exhibit.

You need to ensure that the users can install Microsoft 365 apps from the Office 365 portal.

What should you do?

- A. From the Microsoft 365 admin center, modify the user license settings.
- B. From the Microsoft Endpoint Manager admin center, create a Microsoft 365 Apps app and assign the app to the devices.
- C. From the Microsoft Endpoint Manager admin center, create a Microsoft 365 Apps app and assign the app to the users.
- D. From the Microsoft 365 admin center, modify the Services & add-ins settings.

Answer: D

#### NEW QUESTION 6

- (Exam Topic 5)

You have a SharePoint Framework (SPFx) web part that displays the weather. Users can set the city within the web part. Which component is invoked to provide the users with the ability to configure the settings for the web part?

- A. a custom control
- B. the Application Customizer
- C. a library component
- D. the property pane

Answer: D

## NEW QUESTION 7

- (Exam Topic 5)

Your network contains an on-premises Active Directory domain named contoso.com. The domain contains 1,000 Windows 10 devices.

You perform a proof of concept (PoC) deployment of Windows Defender Advanced Threat Protection (ATP) for 10 test devices. During the onboarding process, you configure Windows Defender ATP-related data to be stored in the United States.

You plan to onboard all the devices to Windows Defender ATP data in Europe. What should you do first?

- A. Create a workspace
- B. Offboard the test devices
- C. Delete the workspace
- D. Onboard a new device

**Answer: B**

### Explanation:

When onboarding Windows Defender ATP for the first time, you can choose to store your data in Microsoft Azure datacenters in the European Union, the United Kingdom, or the United States. Once configured, you cannot change the location where your data is stored.

The only way to change the location is to offboard the test devices then onboard them again with the new location.

Reference:

<https://docs.microsoft.com/en-us/windows/security/threat-protection/microsoft-defender-atp/data-storage-privac>

## NEW QUESTION 8

- (Exam Topic 5)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

You may now click next to proceed to the lab. Lab information

Use the following login credentials as needed:

To enter your username, place your cursor in the Sign in box and click on the username below.

To enter your password, place your cursor in the Enter password box and click on the password below.

Microsoft 365 Username: admin@M365x981607.onmicrosoft.com Microsoft 365 Password: \*yfLo7lr2&yIf the Microsoft 365 portal does not load successfully in the browser, press CTRL-K to reload the portal in a new browser tab.

The following information is for technical support purposes only:

Lab Instance: 10811525

Your organization plans to open an office in New York, and then to add 100 users to the office. The city attribute for all new users will be New York.

You need to ensure that all the new users in the New York office are licensed for Microsoft Office 365 automatically.

- A. Mastered
- B. Not Mastered

**Answer: A**

### Explanation:

You need create a dynamic group based on the city attribute. You then need to assign a license to the group. User accounts with the city attribute set to 'New York' will automatically be added to the group. Anyone who is added to the group will automatically be assigned the license that is assigned to the group.

- \* 1. Go to the Azure Active Directory admin center.
- \* 2. Select Azure Active Directory then select Groups.
- \* 3. Click on the New Group link.
- \* 4. Give the group a name such as New York Users.
- \* 5. Select Users as the membership type.
- \* 6. Select 'Add dynamic query'.
- \* 7. Select 'City' in the Property drop-down box.
- \* 8. Select 'Equals' in the Operator drop-down box.
- \* 9. Enter 'New York' as the Value. You should see the following text in the Expression box: user.city -eq "New York"
- \* 10. Click Save to create the group.
- \* 11. In the Groups list, select the new group to open the properties page for the group.
- \* 12. Select 'Licenses'.
- \* 13. Select the '+ Assignments' link.
- \* 14. Tick the box to select the license.
- \* 15. Click the Save button to save the changes. References:

<https://docs.microsoft.com/en-us/azure/active-directory/users-groups-roles/groups-dynamic-membership> <https://docs.microsoft.com/en-us/azure/active-directory/users-groups-roles/licensing-groups-assign>

## NEW QUESTION 9

- (Exam Topic 5)

You have a Microsoft 365 tenant that contains the users shown in the following table.

Name	Email address
User1	User1@contoso.com
User2	User2@contoso.com
User3	User3@contoso.com

Microsoft Exchange Online has the mail flow rules shown in the following table

Name	Priority
Rule1	0
Rule2	1
Rule3	2

Rule1 has the following settings:

Answer Area

Statements	Yes	No
If User1 sends an email to User3, User3 receives the email.	<input type="radio"/>	<input type="radio"/>
If User1 sends an email, a disclaimer is added to the email.	<input type="radio"/>	<input type="radio"/>
If an email is sent to User2, two disclaimers are added to the email.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
If User1 sends an email to User3, User3 receives the email.	<input type="radio"/>	<input checked="" type="radio"/>
If User1 sends an email, a disclaimer is added to the email.	<input checked="" type="radio"/>	<input type="radio"/>
If an email is sent to User2, two disclaimers are added to the email.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 10

- (Exam Topic 5)

What should you add to a SharePoint Framework 5PFx) solution to ensure that the solution can be used as a Microsoft Teams tab?

- A. the TeamsTab value to the supportedHosts property in the manifest file
- B. a Teams manifest file to the config folder in the solution
- C. the TeamsTab value to the componentType property in the manifest file
- D. a webpart manifest file to the config folder in the solution

Answer: A

NEW QUESTION 10

- (Exam Topic 5)

You have a Microsoft 365 subscription.

You have the devices shown in the following table.

Operating system	Quantity
Windows 8.1	5
Windows 10	5
Windows Server 2016	5

You need to onboard the devices to Windows Defender Advanced Threat Protection (ATP). The solution must avoid installing software on the devices whenever possible.

Which onboarding method should you use for each operating system? To answer, drag the appropriate methods to the correct operating systems. Each method may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Methods	Answer Area
A Microsoft Azure ATP sensor	Windows 8.1: <input type="text"/>
A local script	Windows 10: <input type="text"/>
Microsoft Monitoring Agent	Windows Server 2016: <input type="text"/>

- A. Mastered  
 B. Not Mastered

**Answer:** A

**Explanation:**

References:

<https://docs.microsoft.com/en-us/windows/security/threat-protection/windows-defender-atp/onboard-downlevel-> <https://docs.microsoft.com/en-us/windows/security/threat-protection/windows-defender-atp/configure-endpoints> <https://docs.microsoft.com/en-us/windows/security/threat-protection/windows-defender-atp/configure-server-en> Box 1:

To onboard down-level Windows client endpoints to Microsoft Defender ATP, you'll need to: Configure and update System Center Endpoint Protection clients.

Install and configure Microsoft Monitoring Agent (MMA) to report sensor data to Microsoft Defender ATP Box 2:

For Windows 10 clients, the following deployment tools and methods are supported: Group Policy

System Center Configuration Manager

Mobile Device Management (including Microsoft Intune) Local script

Box 3:

Windows Server 2016 can be onboarded by using Azure Security Centre. When you add servers in the Security Centre, the Microsoft Monitoring Agent is installed on the servers.

**NEW QUESTION 13**

- (Exam Topic 5)

Your network contains an Active Directory domain named adatum.com that is synced to Microsoft Azure Active Directory (Azure AD).

The domain contains 100 user accounts.

The city attribute for all the users is set to the city where the user resides.

You need to modify the value of the city attribute to the three-letter airport code of each city. What should you do?

- A. From Active Directory Administrative Center, select the Active Directory users, and then modify the Properties settings.  
 B. From the Microsoft 365 admin center, select the users, and then use the Bulk actions option.  
 C. From Azure Cloud Shell, run the Get-MsolUser and Set-MSOLuser cmdlets.  
 D. From Windows PowerShell on a domain controller, run the Get-AzureADUser and Set-AzureADUser cmdlets.

**Answer:** A

**Explanation:**

The user accounts are synced from the on-premise Active Directory to the Microsoft Azure Active Directory (Azure AD). Therefore, the city attribute must be changed in the on-premise Active Directory.

You can modify certain attributes of multiple user accounts simultaneously by selecting them in Active Directory Administrative Center or Active Directory Users and Computers, right clicking then selecting Properties.

The other three options all suggest modifying the city attribute of the users in the Azure Active Directory which is incorrect.

Reference:

<https://blogs.technet.microsoft.com/canitpro/2015/11/25/step-by-step-managing-multiple-user-accounts-via-acti>

**NEW QUESTION 15**

- (Exam Topic 5)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

You may now click next to proceed to the lab. Lab information

Use the following login credentials as needed:

To enter your username, place your cursor in the Sign in box and click on the username below.

To enter your password, place your cursor in the Enter password box and click on the password below.

Microsoft 365 Username: admin@LODSe878763.onmicrosoft.com

Microsoft 365 Password: m3t^We\$Z7&xy

Next

You need to ensure that all the users in your organization are prompted to change their password every 60 days. The solution must ensure that the users are reminded that their password must be changed 10 days before the required change.  
To answer, sign in to the Microsoft 365 portal.

- A. Mastered
- B. Not Mastered

**Answer:** A

### Explanation:

You need to configure the Password Expiration Policy.

- \* 1. Sign in to the Microsoft 365 Admin Center.
- \* 2. In the left navigation pane, expand the Settings section then select the Settings option.
- \* 3. Click on Security and Privacy.
- \* 4. Select the Password Expiration Policy.
- \* 5. Ensure that the checkbox labelled "Set user passwords to expire after a number of days" is ticked.
- \* 6. Enter 60 in the "Days before passwords expire" field.
- \* 7. Enter 10 in the "Days before a user is notified about expiration" field.
- \* 8. Click the 'Save changes' button.

### NEW QUESTION 17

- (Exam Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result these questions will not appear in the review screen.

Your company has a main office and three branch offices. All the branch offices connect to the main office by using a WAN link. The main office has a high-speed Internet connection. All the branch offices connect to the Internet by using the main office connection.

Users use Microsoft Outlook 2016 to connect to 4 Microsoft Exchange Server mailbox hosted in the main office.

The users report that when the WAN link in their office becomes unavailable, they cannot access their mailbox.

You create a Microsoft 365 subscription, and then migrate all the user data to Microsoft 365.

You need to ensure that all the users can continue to use Outlook to receive email messages if a WAN link fails.

Solution: For each device, you configure an additional Outlook profile that uses IMAP. Does this meet the goal?

- A. Yes
- B. NO

**Answer:** B

### NEW QUESTION 20

- (Exam Topic 5)

You have a hybrid deployment of Microsoft 365 that contains the users shown in the following table.

Name	Member of
User1	Group2
User2	Group1, Group2
User3	Group1

You have an on-premises web app named AppA. Group1 has permissions to access AppA. You configure an Azure Active Directory (Azure AD) Application Proxy. You add an Application Proxy entry for AppA as shown the exhibit. (Click the Exhibit tab.)

Add your own on-premises application

+ Add

X Discard

Application proxy provides single sign-on (SSO) and secure remote access for web applications hosted on-premises. [Learn more about Application Proxy](#)

No

You assign the AppA enterprise application in Azure to Group2.  
For each of the following statements, select Yes if the statement is true. Otherwise, select No.  
NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can access AppA by using the external URL.	<input type="radio"/>	<input type="radio"/>
User2 can access AppA in the My Apps portal.	<input type="radio"/>	<input type="radio"/>
User3 can access AppA by using the external URL.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: No  
User1 is in Group2. The enterprise app is assigned to Group2. However, the authentication method is “Passthrough” so the authentication will be passed to the on-premises web app. Only Group1 has access to the web app. Therefore, User1 will not be able to access the web app.  
Box 2: Yes.  
User2 is in Group1 and Group2. The enterprise app is assigned to Group2. The authentication method is “Passthrough” so the authentication will be passed to the on-premises web app. Group1 has access to the web app. Therefore, User2 will be able to access the web app in MyApps.  
Box 3: No  
User3 is in Group1. Group1 has access to the web app so User3 could access the app on-premises. However, the enterprise app is assigned to Group2 which User3 is not a member of. Therefore, User3 will not be able to access the external URL of the web app.

NEW QUESTION 21

- (Exam Topic 5)  
Your network contains an Active Directory forest named contoso.local. You purchase a Microsoft 365 subscription.  
You plan to move to Microsoft and to implement a hybrid deployment solution for the next 12 months. You need to prepare for the planned move to Microsoft 365. What is the best action to perform before you implement directory synchronization? More than one answer choice may achieve the goal. Select the BEST answer.

- A. Purchase a third-party X.509 certificate.
- B. Rename the Active Directory forest.
- C. Purchase a custom domain name.
- D. Create an external forest trust.

Answer: C

#### Explanation:

The first thing you need to do before you implement directory synchronization is to purchase a custom domain name. This could be the domain name that you use in your on-premise Active Directory if it's a routable domain name, for example, contoso.com.

If you use a non-routable domain name in your Active Directory, for example contoso.local, you'll need to add the routable domain name as a UPN suffix in Active Directory.

Reference:

https://docs.microsoft.com/en-us/office365/enterprise/set-up-directory-synchronization

#### NEW QUESTION 23

- (Exam Topic 5)

You have a Microsoft 365 subscription you use Active Directory (Azure AD) tenant named contoso.com. The tenant contains the Windows 10 devices shown in the following table.

Name	Version	Language
Device1	x86	German
Device2	x64	English
Device3	x64	French

All the devices are managed by using Microsoft Endpoint Manager and are members of a group named Group1.

From the Microsoft Endpoint Manager admin center, you create an app suite named App1 for Microsoft Office 365 apps.

You configure the App1 settings as shown in the exhibit. (Click the Exhibit tab.)

#### App Suite Settings

These settings apply to all apps you have selected in the suite.

#### Use shared computer activation

Yes

No

Languages

German, OS Languages

You assign App1 to Group1.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

Note: Each correct selection is worth one point.

Statements	Yes	No
On Device1, Office 365 ProPlus will be installed and the display language will be German.	<input type="radio"/>	<input type="radio"/>
On Device2, Office 365 ProPlus will be installed and both the German and English display languages will be installed.	<input type="radio"/>	<input type="radio"/>
On Device3, Office 365 ProPlus will be installed and both the German and French display languages will be installed.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: No

Device1 is x86 (32-bit) so Office 365 will not be installed. Box 2: Yes

Device2 is x64 (64-bit) so Office 365 will be installed. The German language pack will be installed and the OS language pack (English) will be installed.

Box 3: Yes

Device2 is x64 (64-bit) so Office 365 will be installed. The German language pack will be installed and the OS language pack (French) will be installed.

<https://docs.microsoft.com/en-us/mem/intune/apps/apps-add-office365>

**NEW QUESTION 28**

- (Exam Topic 5)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live

environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

You may now click next to proceed to the lab. Lab information

Use the following login credentials as needed:

To enter your username, place your cursor in the Sign in box and click on the username below.

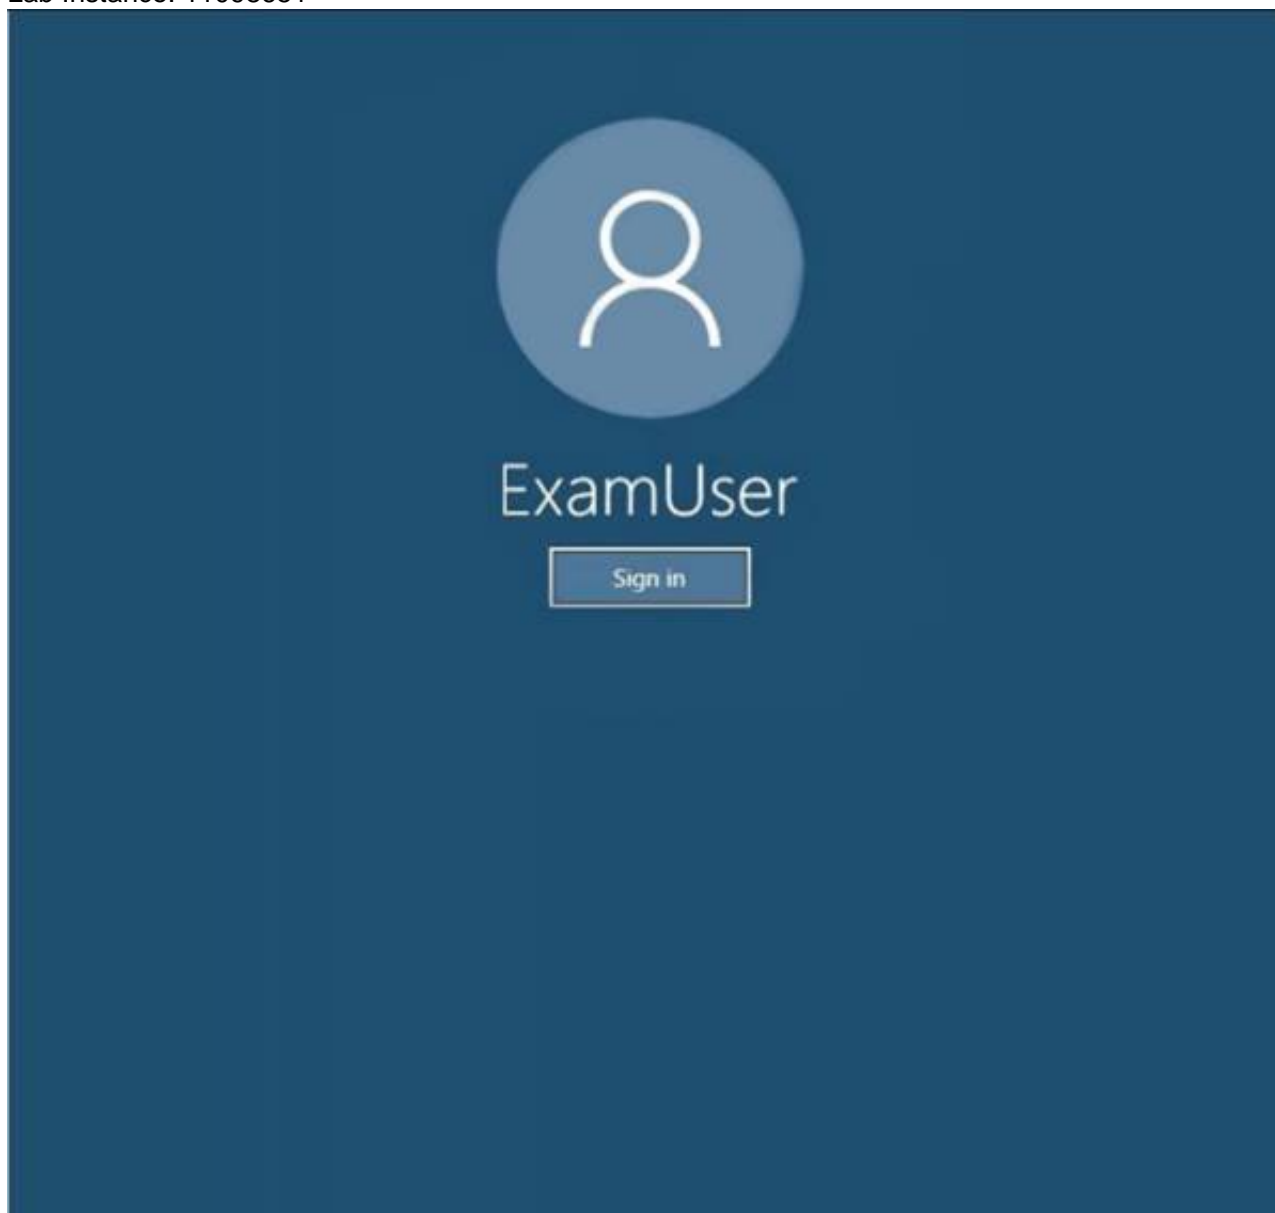

To enter your password, place your cursor in the Enter password box and click on the password below.

Microsoft 365 Username: admin@LODSe1211885.onmicrosoft.com Microsoft 365 Password: oL9z0=?Nq@ox

If the Microsoft 365 portal does not load successfully in the browser, press CTRL-K to reload the portal in a new browser tab.

The following information is for technical support purposes only:

Lab Instance: 11098651

You need to ensure that all the users in your organization are prompted to change their password every 180 days. To answer the question, sign in to the Microsoft 365 portal.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

You need to configure the Password Expiration Policy.

\* 1. Sign in to the Microsoft 365 Admin Center.

\* 2. In the left navigation pane, expand the Settings section then select the Settings option.

\* 3. Click on Security and Privacy.

- \* 4. Select the Password Expiration Policy.
- \* 5. Ensure that the checkbox labelled “Set user passwords to expire after a number of days” is ticked.
- \* 6. Enter 180 in the “Days before passwords expire” field.
- \* 7. Click the ‘Save changes’ button.

### NEW QUESTION 33

- (Exam Topic 5)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn’t matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

You may now click next to proceed to the lab. Lab information

Use the following login credentials as needed:

To enter your username, place your cursor in the Sign in box and click on the username below.

To enter your password, place your cursor in the Enter password box and click on the password below.

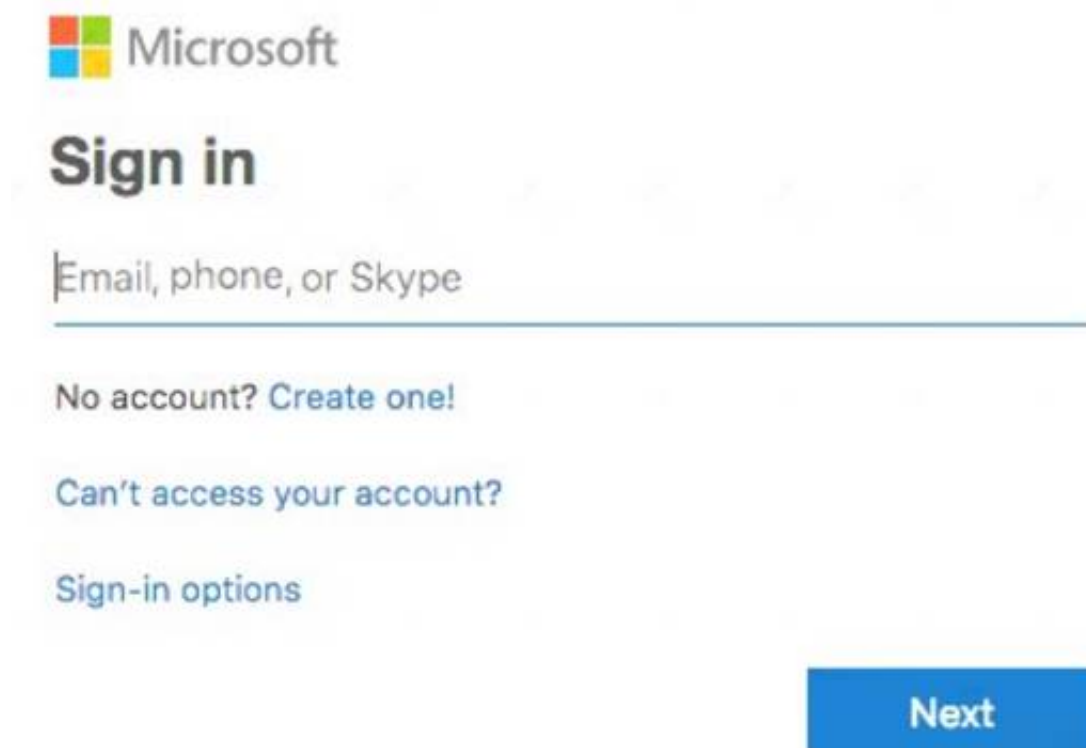

Microsoft 365 Username: admin@LODSe878763.onmicrosoft.com

Microsoft 365 Password: m3t^We\$Z7&xy

If the Microsoft 365 portal does not load successfully in the browser, press CTRL-K to reload the portal in a new browser tab.

The following information is for technical support purposes only:

Lab Instance: 11440873

You need to ensure that when Lynne Robbins attempts to sign in to the Microsoft Office 365 portal, Lynne Robbins is prompted to authenticate by using multiple methods.

To answer, sign in to the Microsoft 365 portal.

- A. Mastered
- B. Not Mastered

**Answer:** A

#### Explanation:

You need to enable Multi-Factor Authentication for Lynne Robbins.

- \* 1. Sign in to the Microsoft 365 Admin Center.
- \* 2. In the left navigation pane, expand the Users section and select Active Users.
- \* 3. Click the ‘Multi-factor authentication’ link.
- \* 4. Select Lynne Robbins.
- \* 5. In the right navigation pane, select the ‘Enable’ link to enable MFA for the account.
- \* 6. Confirm the setting by clicking the ‘Enable multi-factor authentication’ button.
- \* 7. Click the Close button to close the confirmation window.

### NEW QUESTION 38

- (Exam Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain.

You deploy a Microsoft Azure Active Directory (Azure AD) tenant. Another administrator configures the domain to synchronize to Azure AD.

You discover that 10 user accounts in an organizational unit (OU) are NOT synchronized to Azure AD. All the other user accounts synchronized successfully.

You review Azure AD Connect Health and discover that all the user account synchronizations completed successfully.

You need to ensure that the 10 user accounts are synchronized to Azure AD. Solution: You run idfix.exe and report the 10 user accounts.

Does this meet the goal?

- A. Yes

B. No

**Answer:** B

**Explanation:**

The question states that “all the user account synchronizations completed successfully”. If there were problems with the 10 accounts that needed fixing with idfix.exe, there would have been synchronization errors in Azure AD Connect Health.

It is likely that the 10 user accounts are being excluded from the synchronization cycle by a filtering rule. Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/hybrid/how-to-connect-sync-configure-filtering>

**NEW QUESTION 43**

- (Exam Topic 5)

Your company has three main offices and one branch office. The branch office is used for research. The company plans to implement a Microsoft 365 tenant and to deploy multi-factor authentication.

You need to recommend a Microsoft 365 solution to ensure that multi-factor authentication is enforced only for users in the branch office

What should you include in the recommendation?

- A. Azure AD password protection
- B. a Microsoft Endpoint Manager Device compliance policy
- C. Azure AD conditional access
- D. a Microsoft Endpoint Manager Device configuration profile

**Answer:** B

**NEW QUESTION 47**

- (Exam Topic 5)

You are developing an app that will query the tenant for the names of all the Microsoft Teams teams in the organization. What permission will the app require?

Your solution must follow the principle of least privilege.

- A. Group
- B. Read
- C. All
- D. Directory.Read.All
- E. Channel.ReadBasic.All
- F. TeamSettings.Read.All

**Answer:** D

**NEW QUESTION 52**

- (Exam Topic 5)

Your network contains an on-premises Active Directory domain. The domain contains the users shown in the following table.

Name	Country	Organizational unit (OU)
User1	United States	OU1
User2	Canada	OU1
User3	United States	OU2

You have a Microsoft 365 subscription that is linked to an Azure Active Directory (Azure AD) tenant named contoso.com. You configure Azure AD Connect to sync the on-premises domain to contoso.com as shown in the following exhibit.

**Answer Area**

Statements	Yes	No
User1 syncs to Azure AD.	<input type="radio"/>	<input type="radio"/>
User2 syncs to Azure AD.	<input type="radio"/>	<input type="radio"/>
User3 syncs to Azure AD.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

## Answer Area

Statements	Yes	No
User1 syncs to Azure AD.	<input checked="" type="radio"/>	<input type="radio"/>
User2 syncs to Azure AD.	<input checked="" type="radio"/>	<input type="radio"/>
User3 syncs to Azure AD.	<input checked="" type="radio"/>	<input type="radio"/>

### NEW QUESTION 56

- (Exam Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company plans to deploy several Microsoft Office 365 services.

You need to design an authentication strategy for the planned deployment. The solution must meet the following requirements:

- \* Users must be able to authenticate during business hours only.

- \* Authentication requests must be processed successfully if a single server fails.

- \* When the password for an on-premises user account expires, the new password must be enforced the next time the user signs in.

- \* Users who connect to Office 365 services from domain-joined devices that are connected to the internal network must be signed in automatically.

Solution: You design an authentication strategy that contains a pass-through authentication model. The solution contains two servers that have an Authentication Agent installed and password hash synchronization configured.

Does this meet the goal?

A. Yes

B. No

**Answer: B**

#### Explanation:

This solution meets the following goals:

- > Users must be able to authenticate during business hours only.

- > Authentication requests must be processed successfully if a single server fails.

- > When the password for an on-premises user account expires, the new password must be enforced the next time the user signs in.

However, the following goal is not met:

- > Users who connect to Office 365 services from domain-joined devices that are connected to the internal network must be signed in automatically.

You would need to configure Single-sign on (SSO) to meet the last requirement. Reference:

<https://docs.microsoft.com/en-us/azure/security/azure-ad-choose-authn>

### NEW QUESTION 59

- (Exam Topic 5)

Your company recently purchased a Microsoft 365 subscription.

You enable Microsoft Azure Multi-Factor Authentication (MFA) for all 500 users in the Azure Active Directory (Azure tenant).

You need to generate a report that lists all the users who Azure registration process.

What is the best approach to achieve the goal? More than one answer choice achieve the goal. Select the Best answer.

A. From Azure Cloud Shell, run the Get-Msoluser cmdlet.

B. From the Azure Active Directory admin center, use the Risky sign-ins blade.

C. From the Azure Active Directory admin center, use the Multi-factor Authentication – Server Status blade.

D. From Azure Cloud Shell, run the Get-AzureADUser cmdlet.

**Answer: A**

### NEW QUESTION 64

- (Exam Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company plans to deploy several Microsoft Office 365 services.

You need to design an authentication strategy for the planned deployment. The solution must meet the following requirements:

- \* Users must be able to authenticate during business hours only.

- \* Authentication requests must be processed successfully if a single server fails.

- \* When the password for an on-premises user account expires, the new password must be enforced the next time the user signs in.

- \* Users who connect to Office 365 services from domain-joined devices that are connected to the internal network must be signed in automatically.

Solution: You design an authentication strategy that uses password hash synchronization and seamless SSO. The solution contains two servers that have an Authentication Agent installed.

Does this meet the goal?

A. Yes

B. No

**Answer: B**

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/azure/security/azure-ad-choose-authn>

**NEW QUESTION 68**

- (Exam Topic 5)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

You may now click next to proceed to the lab. Lab information

Use the following login credentials as needed:

To enter your username, place your cursor in the Sign in box and click on the username below.

To enter your password, place your cursor in the Enter password box and click on the password below.

Microsoft 365 Username: admin@LODSe426243.onmicrosoft.com Microsoft 365 Password: 3&YWyjse-6-d

If the Microsoft 365 portal does not load successfully in the browser, press CTRL-K to reload the portal in a new browser tab.

The following information is for technical support purposes only:

Lab Instance: 10887751

Your company has a web application named App1.

The company plans to publish App1 by using a URL of <https://app1.contoso.com>. You need to register App1 to your Microsoft Office 365 tenant.

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

You need to register App1 in Azure Active Directory.

- \* 1. Go to the Azure Active Directory admin center.
- \* 2. Select Azure Active Directory.
- \* 3. Select 'App registrations'.
- \* 4. Click the 'New registration' link.
- \* 5. Enter the name App1.
- \* 6. Click the Register button.
- \* 7. To add the URL to App1, select App1 in the list of registered apps.
- \* 8. In the properties page of App1, select Branding.
- \* 9. Enter the URL <https://app1.contoso.com> in the 'Home page URL' box.
- \* 10. Click Save to save the changes. References:

<https://docs.microsoft.com/en-us/azure/active-directory/develop/quickstart-register-app>

**NEW QUESTION 72**

- (Exam Topic 5)

You have a Microsoft Teams app that contains a conversational bot. The bot uses task modules to reply to users. When the bot receives a new message, the following code is executed before a response is sent back to the user to decide whether the bot should continue the conversation.

```
80 case "task/submit": {
81     if (invokeValue.data !== undefined) {
82         switch (invokeValue.data.taskResponse) {
83             case "message":
84                 session.send(`task/submit results from the Adaptive card: ${JSON.stringify(invokeValue)} + `);
85                 break;
86             case "continue":
87                 let fetchResponse = fetchTemplates.submitResponse;
88                 fetchResponse.task.value.card = renderAttachment(cardTemplates.acSubmitResponse, { results: JSON.stringify(invokeValue.data) });
89                 cb(null, fetchResponse, 200);
90                 break;
```

## Answer Area

If `invokeValue.data.taskResponse` equals "message", the user will [answer choice]

stop interacting with the bot.  
continue interacting with the bot.  
receive a webpage pop-up window.  
receive a final message from the bot.

These are the selections for the statement If `invokeValue.data.taskResponse` equals "message", the user will [answer choice]

If `invokeValue.data.taskResponse` equals "final", the user will [answer choice]

stop interacting with the bot.  
continue interacting with the bot.  
receive a webpage pop-up window.  
receive a final message from the bot.

These are the selections for the statement If `invokeValue.data.taskResponse` equals "final", the user will [answer choice]

- A. Mastered  
B. Not Mastered

Answer: A

### Explanation:

Reference:

<https://github.com/OfficeDev/microsoft-teams-sample-task-module-nodejs>

## NEW QUESTION 75

- (Exam Topic 5)

You have three devices enrolled in Microsoft Intune as shown in the following table.

Name	Platform	BitLocker Drive Encryption (BitLocker)	Member of
Device1	Windows 10	Disabled	Group3
Device2	Windows 10	Disabled	Group2, Group3
Device3	Windows 10	Disabled	Group2

The device compliance policies in Intune are configured as shown in the following table.

Name	Platform	Require BitLocker	Assigned
Policy1	Windows 10 and later	Require	Yes
Policy2	Windows 10 and later	Not configured	Yes
Policy3	Windows 10 and later	Require	No

The device compliance policies have the assignment shown in the following table.

Name	Assigned to
Policy1	Group3
Policy2	Group2

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
Device1 is compliant.	<input type="radio"/>	<input type="radio"/>
Device2 is compliant.	<input type="radio"/>	<input type="radio"/>
Device3 is compliant.	<input type="radio"/>	<input type="radio"/>

- A. Mastered  
B. Not Mastered

Answer: A

**Explanation:**

Device 1:

No because Device1 is in group3 which has Policy1 assigned which requires BitLocker. Device 2:

No because Device2 is in group3 which has Policy1 assigned which requires BitLocker. Device2 is also in Group2 which has Policy2 assigned but the BitLocker requirement is not configured in Policy2.

Device3:

Yes because Device3 is in Group2 which has Policy2 assigned but the BitLocker requirement is not configured in Policy2.

Reference:

<https://blogs.technet.microsoft.com/cbernier/2017/07/11/windows-10-intune-windows-bitlocker-management-ye>

**NEW QUESTION 76**

- (Exam Topic 5)

Your network contains an Active Directory domain named fabrikam.com. The domain contains the objects shown in the following table.

Name	Type	In organizational unit (OU)
User1	User	OU1
User2	User	OU1
Group1	Security Group - Global	OU1
User3	User	OU2
Group2	Security Group - Global	OU2

The group have the members shown in the following table.

Group	Members
Group1	User1
Group2	User2, User3, Group1

You are configure synchronization between fabrikam.com and a Microsoft Azure Active Director (Azure AD) tenant.

You configure the domain/OU Filtering settings in Azure AD Connect as shown in the Domain>OU Filtering exhibit. (Click the Domain/OU Filtering tab.)

You configure the Filtering in Azure Connect as shown in the Filtering exhibit. (Click the Filtering tab.) NOTE: Each correct selection is worth one point.

Answer Area

	Statements	Yes	No
	User2 will synchronize to Azure AD.	<input type="radio"/>	<input type="radio"/>
	Group2 will synchronize to Azure AD.	<input type="radio"/>	<input type="radio"/>
	User3 will synchronize to Azure AD.	<input type="radio"/>	<input type="radio"/>

- A. Mastered  
B. Not Mastered

Answer: A

**Explanation:**

Box 1: No

The filtering is configured to synchronize Group2 and OU2 only. The effect of this is that only members of Group2 who are in OU2 will be synchronized.

User2 is in Group2. However, the User2 account object is in OU1 so User2 will not synchronize to Azure AD. Box 2: Yes

Group2 is in OU2 so Group2 will synchronize to Azure AD. However, only members of the group who are in OU2 will synchronize. Members of Group2 who are in OU1 will not synchronize.

Box 3: Yes

User3 is in Group2 and in OU2. Therefore, User3 will synchronize to Azure AD. References:

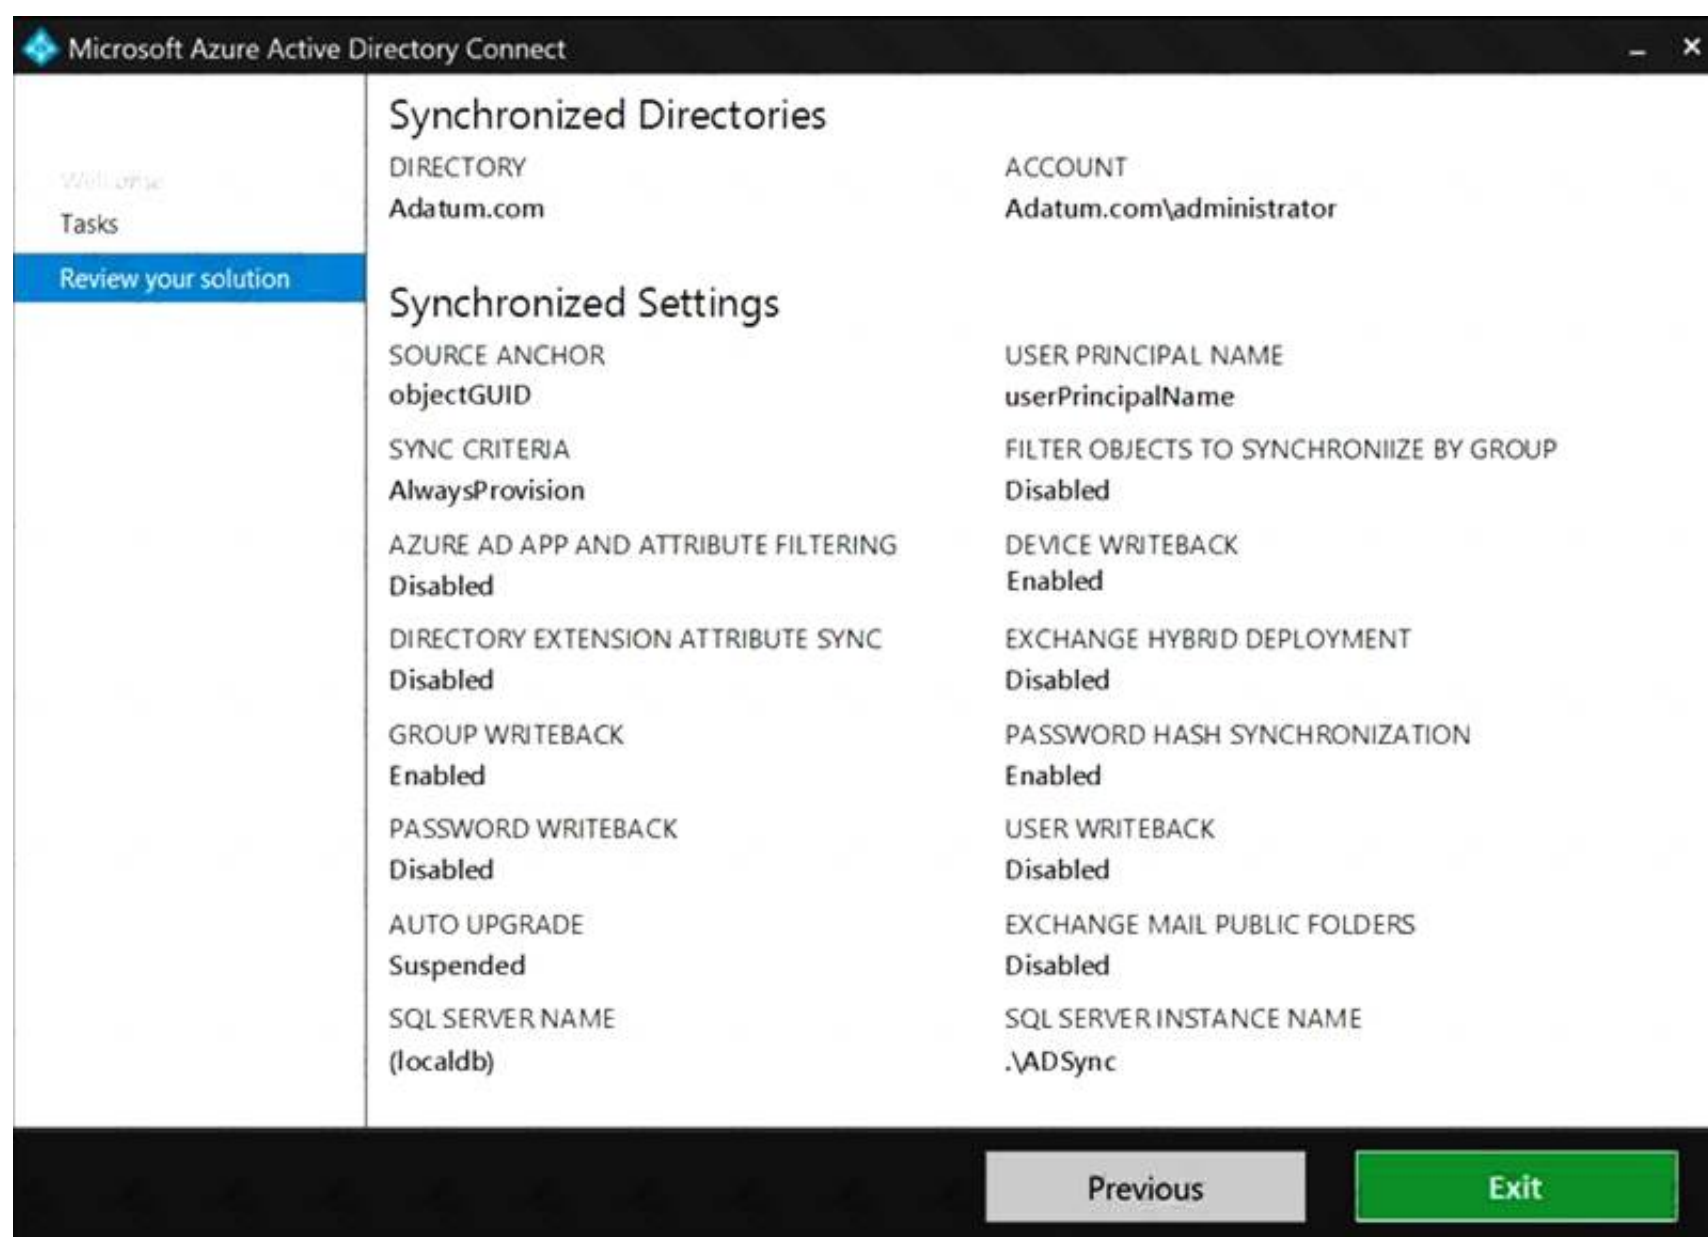

<https://docs.microsoft.com/en-us/azure/active-directory/hybrid/how-to-connect-sync-configure-filtering#group-b>

**NEW QUESTION 77**

- (Exam Topic 5)

You have an Active Directory domain named Adatum.com that is synchronized to Azure Active Directory as shown in the exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.  
 NOTE: Each correct selection is worth one point.

If you create a security group in Azure AD, the group will [answer choice].

- not sync to adatum.com
- sync to adatum.com as a security group
- sync to adatum.com as a distribution group

If you join a computer to Azure AD, the object will [answer choice].

- not sync to adatum.com
- sync to the Computers container in adatum.com
- sync to the LostAndFound container in adatum.com
- sync to the RegisteredDevices container in adatum.com

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Group Writeback is enabled in the Azure AD Connect configuration so groups created in Azure Active Directory will be synchronized to the on-premise Active Directory. A security group created in Azure Active Directory will be synchronized to the on-premise Active Directory as a security group. Device Writeback is enabled in the Azure AD Connect configuration so computers joined to the Azure Active Directory will be synchronized to the on-premise Active Directory. They will sync to the RegisteredDevices container in the on-premise Active Directory.

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/hybrid/how-to-connect-device-writeback>

**NEW QUESTION 78**

- (Exam Topic 5)

You have a Microsoft 365 subscription that uses an Azure Directory (Azure AD) tenant named Contoso.com. The tenant contains the users shown in the following table.

Name	Role
User1	Exchange administrator
User2	User administrator
User3	Global administrator
User4	None

You add another user named user5 to the User administrator role. You need to identify which management tasks User5 can perform.

Which two tasks should you identify? Each correct answer presents a complete solution.

- A. Reset the password of any user in Azure AD.
- B. Delete any user in Azure AD.
- C. Reset the password of User2 and User4 only.
- D. Reset the password of User4 only.
- E. Delete User1, User2, and User4 only.
- F. Delete User2 and User4 only.

**Answer:** CF

**Explanation:**

Users with the User Administrator role can create users and manage all aspects of users with some restrictions (see below).

Only on users who are non-admins or in any of the following limited admin roles:

- > Directory Readers
- > Guest Inviter
- > Helpdesk Administrator
- > Message Center Reader
- > Reports Reader
- > User Administrator Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/users-groups-roles/directory-assign-admin-roles#availab>

**NEW QUESTION 79**

- (Exam Topic 5)

Your company has an Azure Active Directory (Azure AD) tenant named contoso.com and a Microsoft 365 subscription.

Contoso.com contains the users shown in the following table.

Name	Group
User1	Group1
User2	None

You add an enterprise application named App1 to contoso.com. You configure the following self-service settings for App1:

- > Allow users to request access to this application is set to Yes.
- > To which group should assigned users be added is set to Group1.
- > Who is allowed to approve access to this application is set to User2.
- > Require approval before granting access to this application is set to Yes.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can request access to App1.	<input type="radio"/>	<input type="radio"/>
When User2 requests access to App1, the user is added to Group1 automatically.	<input type="radio"/>	<input type="radio"/>
User2 can approve requests for App1.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: Yes.

User1 can request access to App1 because “Allow users to request access to this application” is set to Yes. Box 2: No.

User2 is an approver. If User2 requests access to App1, he will still need to approve the request before he is added to Group1.

Box 3: Yes.

User2 can approve requests for App1 because “Who is allowed to approve access to this application” is set to User2.

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/manage-apps/manage-self-service-access>

**NEW QUESTION 83**

- (Exam Topic 5)

You have a data loss prevention (DLP) policy.

You need to increase the likelihood that the DLP policy will apply to data that contains medical terms from the International Classification of Diseases (ICD-9-CM).

The solution must minimize the number of false positives.

Which two settings should you modify? To answer, select the appropriate settings in the answer area. NOTE: Each correct selection is worth one point.

Content contains \*

Any of these ▾

International Classification of Diseases (ICD-9-CM)

Add ▾

Instance count

min

1

max

any

Match accuracy

min

50

max

100

A. Mastered  
 B. Not Mastered

**Answer:** A

**Explanation:**

You can tune your rules by adjusting the instance count and match accuracy to make it harder or easier for content to match the rules. Each sensitive information type used in a rule has both an instance count and match accuracy.

To make the rule easier to match, decrease the min count and/or increase the max count. You can also set the max count to any

by deleting the numerical value.

To minimize the number of false positives, we need to increase the minimum match accuracy.

A sensitive information type is defined and detected by using a combination of different types of evidence. Commonly, a sensitive information type is defined by multiple such combinations, called patterns. A pattern that requires less evidence has a lower match accuracy (or confidence level), while a pattern that requires more evidence has a higher match accuracy (or confidence level).

Reference:

<https://docs.microsoft.com/en-us/office365/securitycompliance/data-loss-prevention-policies>

<https://docs.microsoft.com/en-us/office365/securitycompliance/what-the-sensitive-information-types-look-for#i>

**NEW QUESTION 86**

- (Exam Topic 5)

Your network contains an Active Directory domain and a Microsoft Azure Active Directory (Azure AD) tenant.

The network uses a firewall that contains a list of allowed outbound domains. You began to implement directory synchronization.

You discover that the firewall configuration contains only the following domain names in the list of allowed domains:

- \*.microsoft.com
- \*.office.com

Directory synchronization fails.

You need to ensure that directory synchronization completes successfully.

What is the best approach to achieve the goal? More than one answer choice may achieve the goal. Select the BEST answer.

A. From the firewall, allow the IP address range of the Azure data center for outbound communication.  
 B. From Azure AD Connect, modify the Customize synchronization options task  
 C. Deploy an Azure AD Connect sync server in staging mode.  
 D. From the firewall, create a list of allowed inbound domains.  
 E. From the firewall, modify the list of allowed outbound domains.

**Answer:** E

**Explanation:**

Azure AD Connect needs to be able to connect to various Microsoft domains such as login.microsoftonline.com. Therefore, you need to modify the list of allowed outbound domains on the firewall.

<https://docs.microsoft.com/en-us/azure/active-directory/hybrid/reference-connect-ports>

Passing Certification Exams Made Easy

visit - <https://www.2PassEasy.com>

#### NEW QUESTION 87

- (Exam Topic 5)

Your company has a sales system that emails an alert to all the members of the sales department when a new sale is made. You need to ensure that a notification is posted to a team channel when a new sale is made. The solution must minimize development effort. Which two actions should you perform? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. Post XML to the webhook URL from the existing sales system.
- B. Set the configurationUrl property of a connector in the manifest
- C. Get an incoming webhook for the channel
- D. Post JSON to the webhook URL from the existing sales system.

**Answer:** AC

#### NEW QUESTION 91

- (Exam Topic 5)

You have a Microsoft Azure Active Directory (Azure AD) tenant. Your company implements Windows Information Protection (WIP). You need to modify which users and applications are affected by WIP.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

To modify which users are affected by WIP, configure:

The Azure AD app registration  
The Azure AD device settings  
The MAM User scope  
The mobile device management (MDM) authority

To modify which applications are affected by WIP, configure:

App configuration policies  
App protection policies  
Compliance policies  
Device configuration profiles

- A. Mastered
- B. Not Mastered

**Answer:** A

#### Explanation:

Microsoft Intune has an easy way to create and deploy a Windows Information Protection (WIP) policy. You can choose which apps to protect, the level of protection, and how to find enterprise data on the network. The devices can be fully managed by Mobile Device Management (MDM), or managed by Mobile Application Management (MAM), where Intune manages only the apps on a user's personal device.

The MAM User scope determines which users are affected by WIP. App protection policies are used to configure which applications are affected by WIP.

Reference:

<https://docs.microsoft.com/en-us/windows/security/information-protection/windows-information-protection/crea>

#### NEW QUESTION 95

- (Exam Topic 5)

Your network contains two disconnected on-premises Active Directory forests named adatum.com and contoso.com.

You have an Azure AD tenant named nwtraders.com

You need to sync the on-premises forests to nwtraders.com. The solution must meet the following requirements:

- Provide the ability to connect to adatum.com and contoso.com.
- Provide support for Microsoft Exchange hybrid.
- Provide the ability to sync device objects.
- Minimize administrative effort.

Tools

Azure AD Connect

Azure AD Connect Cloud Sync

Active Directory Migration Tool

Answer Area

Provide the ability to sync device objects:

Tool

Provide support for Microsoft Exchange hybrid:

Tool

Provide the ability to connect to adatum.com and contoso.com:

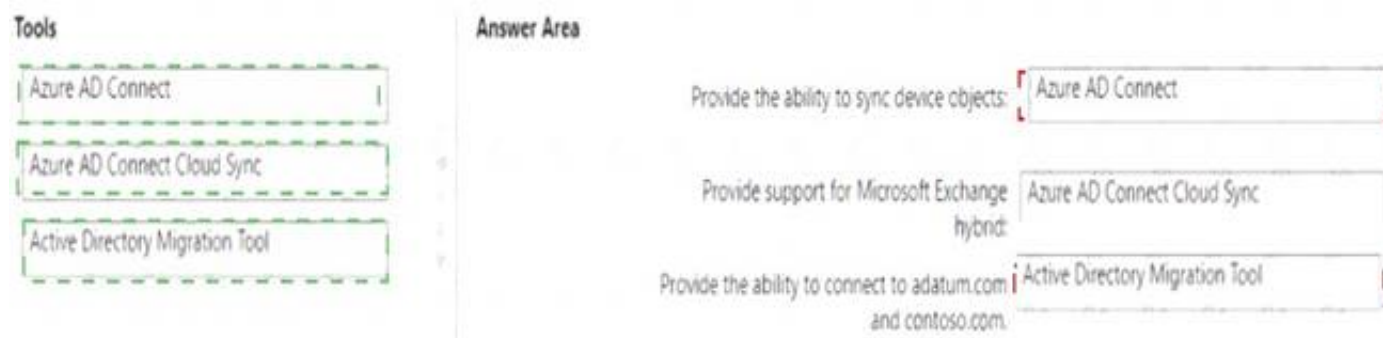

Tool

- A. Mastered
- B. Not Mastered

**Answer:** A

#### Explanation:

#### NEW QUESTION 97

- (Exam Topic 5)

Your company has a Microsoft 365 E5 subscription. Users in the research department work with sensitive data.

You need to prevent the research department users from accessing potentially unsafe websites by using hyperlinks embedded in email messages and documents.

Users in other departments must not be restricted. What should you do from the Security & Compliance admin center?

- A. Create a data loss prevention (DLP) policy that has a Content contains condition.
- B. Create a data loss prevention (DLP) policy that has a Content is shared condition.
- C. Modify the default safe links policy.
- D. Create a new safe links policy.

**Answer: D**

#### Explanation:

ATP Safe Links, a feature of Office 365 Advanced Threat Protection (ATP), can help protect your organization from malicious links used in phishing and other attacks. If you have the necessary permissions for the Office 365 Security & Compliance Center, you can set up ATP Safe Links policies to help ensure that when people click web addresses (URLs), your organization is protected. Your ATP Safe Links policies can be configured to scan URLs in email and URLs in Office documents.

Reference:

<https://docs.microsoft.com/en-us/office365/securitycompliance/set-up-atp-safe-links-policies#policies-that-apply>

#### NEW QUESTION 98

- (Exam Topic 5)

Your network contains an Active Directory forest named adatum.local. The forest contains 500 users and uses adatum.com as a UPN suffix.

You deploy a Microsoft 365 tenant.

You implement directory synchronization and sync only 50 support users.

You discover that five of the synchronized users have usernames that use a UPN suffix of onmicrosoft.com. You need to ensure that all synchronized identities retain the UPN set in their on-premises user account.

What should you do?

- A. From the Microsoft 365 admin center, add adatum.com as a custom domain name.
- B. From Windows PowerShell, run the Set-ADDomain –AllowedDNSSuffixes adatum.com command.
- C. From Active Directory Users and Computers, modify the UPN suffix of the five user accounts.
- D. From the Microsoft 365 admin center, add adatum.local as a custom domain name.

**Answer: C**

#### Explanation:

The question states that only five of the synchronized users have usernames that use a UPN suffix of onmicrosoft.com. Therefore the other 45 users have the correct UPN suffix. This tells us that the adatum.com domain has already been added to Office 365 as a custom domain.

The forest is named adatum.local and uses adatum.com as a UPN suffix. User accounts in the domain will have adatum.local as their default UPN suffix. To use adatum.com as the UPN suffix, each user account will need to be configured to use adatum.com as the UPN suffix.

Any synchronized user account that has adatum.local as a UPN suffix will be configured to use a UPN suffix of onmicrosoft.com because adatum.local cannot be added to Office 365 as a custom domain.

Therefore, the reason that the five synchronized users have usernames with a UPN suffix of onmicrosoft.com is because their accounts were not configured to use the UPN suffix of contoso.com.

Reference:

<https://docs.microsoft.com/en-us/office365/enterprise/prepare-a-non-routable-domain-for-directory-synchroniza>

#### NEW QUESTION 102

- (Exam Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an on-premises Active Directory forest named contoso.com. The forest contains the following domains:

- > Contoso.com
- > East.contoso.com

An Azure AD Connect server is deployed to contoso.com. Azure AD Connect syncs to an Azure Active Directory (Azure AD) tenant.

You deploy a new domain named west.contoso.com to the forest.

You need to ensure that west.contoso.com syncs to the Azure AD tenant.

Solution: You install a new Azure AD Connect server in west.contoso.com and set AD Connect to active mode.

Does this meet the goal?

- A. Yes
- B. No

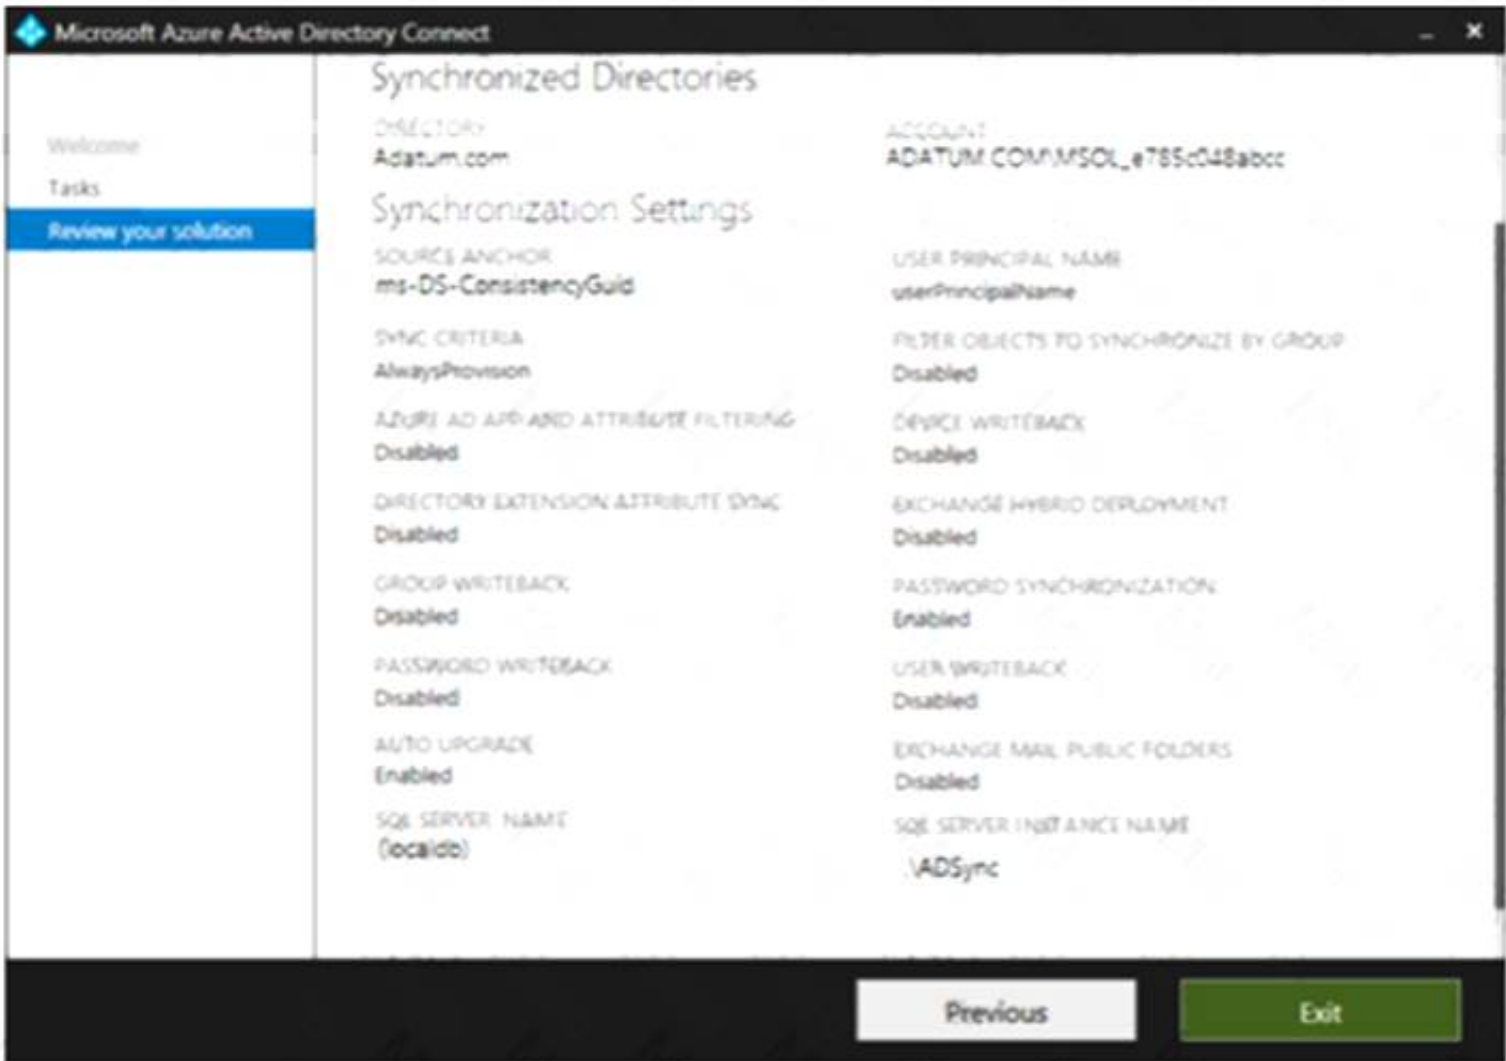

**Answer: A**

NEW QUESTION 103

- (Exam Topic 5)

Your company has a hybrid deployment of Microsoft 365.

An on-premises user named User1 is synced to Microsoft Azure Active Directory (Azure AD). Azure AD Connect is configured as shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.  
NOTE: Each correct selection is worth one point.

User1 [answer choice].

cannot change her password from any Microsoft portals  
can change her password by using self-service password reset feature only  
an change her password from the Office 365 admin center only

If the password for User1 is changed in Active Directory, [answer choice].

the password will be synchronized to Azure AD  
a new randomly generated password will be assigned to User1  
the password in Azure AD will be unchanged

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

User1 cannot change her password from any Microsoft portals because Password Writeback is disabled in the Azure AD Connect configuration.

If the password for User1 is changed in Active Directory, the password will be synchronized to Azure AD because Password Synchronization is enabled in the Azure AD Connect configuration.

Reference:

https://docs.microsoft.com/en-us/azure/active-directory/hybrid/how-to-connect-install-custom

NEW QUESTION 106

- (Exam Topic 5)

A user receives the following message when attempting to sign in to https://myapps.microsoft.com:

"Your sign-in was blocked. We've detected something unusual about this sign-in. For example, you might be signing in from a new location, device, or app. Before you can continue, we need to verify your identity. Please contact your admin."

Which configuration prevents the users from signing in?

- A. Security & Compliance supervision policies
- B. Security & Compliance data loss prevention (DLP) policies
- C. Microsoft Azure Active Directory (Azure AD) conditional access policies
- D. Microsoft Azure Active Directory (Azure AD) Identity Protection policies

Answer: C

Explanation:

The user is being blocked due to a 'risky sign-in'. This can be caused by the user logging in from a device that hasn't been used to sign in before or from an unknown location.

Integration with Azure AD Identity Protection allows Conditional Access policies to identify risky sign-in behavior. Policies can then force users to perform password

changes or multi-factor authentication to reduce their risk level or be blocked from access until an administrator takes manual action.

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/conditional-access/overview>

#### NEW QUESTION 107

- (Exam Topic 5)

Your network contains an on-premises Active Directory domain named contoso.com that is synced to a Microsoft Azure Active Directory (Azure AD) tenant.

The on-premises network contains a file server named Server1. Server1 has a share named Share1 that contains company documents.

Your company purchases a Microsoft 365 subscription.

You plan to migrate data from Share1 to Microsoft 365. Only data that was created or modified during the last three months will be migrated.

You need to identify all the files in Share1 that were modified or created during the last 90 days. What should you use?

- A. Server Manager
- B. Microsoft SharePoint Migration Tool
- C. Resource Monitor
- D. Usage reports from the Microsoft 365 admin center

**Answer: B**

#### Explanation:

You can use the Microsoft SharePoint Migration Tool to migrate files from a file server to SharePoint Online. The Microsoft SharePoint Migration Tool has a number of filters you can use to define which files will be

migrated. One filter setting is "Migrate files modified after". This setting will only migrate files modified after the selected date.

The first phase of a migration is to perform a scan of the source files to create a manifest of the files that will be migrated. You can use this manifest to identify all the files in Share1 that were modified or created during the last 90 days.

References:

<https://docs.microsoft.com/en-us/sharepointmigration/spmt-settings>

#### NEW QUESTION 112

- (Exam Topic 5)

You plan to develop a SharePoint Framework (SPfx) web part by using the ReactJS framework.

You need to ensure that all the web part fields and controls adopt the theme of the site when you deploy the web part. The solution must minimize development effort

What should you include in the solution?

- A. Material-UI
- B. FluentUI
- C. Microsoft Fluid Framework
- D. HTML5 and CSS

**Answer: B**

#### NEW QUESTION 117

- (Exam Topic 5)

Your network contains an on-premises Active Directory domain that syncs to Azure Active Directory (Azure AD).

The on-premises network contains a Microsoft SharePoint Server 2019 farm. The company purchases a Microsoft 365 subscription.

You have the users shown in the following table

Name	Source
User1	Windows Active Directory
User2	Azure Active Directory

You plan to assign User1 and User2 the required roles to run the SharePoint Hybrid Configuration Wizard. User1 will be used for on-premises credentials and User2 will be used for cloud credentials.

You need to assign the correct role to User2. The solution must use the principle of least privilege. Which role should you assign to User2?

- A. Application administrator
- B. SharePoint farm administrator
- C. Global administrator
- D. SharePoint administrator

**Answer: C**

#### Explanation:

To run the SharePoint Hybrid Configuration Wizard, you need to provide credentials of a user (in this case User2) of a Global Administrator account in Azure Active Directory.

Reference:

<https://www.c-sharpcorner.com/article/sharepoint-2019-enable-hybrid-experience/> <https://docs.microsoft.com/en-us/sharepoint/hybrid/accounts-needed-for-hybrid-configuration-and-testing>

#### NEW QUESTION 120

- (Exam Topic 5)

You have a Microsoft 365 subscription.

You view the service advisories shown in the following exhibit.

Home > Service health

Some services have posted advisories 2018-10-05 08:43(UTC) View history

All services	Office 365 Portal	1 advisory
Incidents	SharePoint Online	1 advisory
Advisories	Office Subscription	Service is healthy
	Microsoft Intune	Service is healthy
	Microsoft StaffHub	Service is healthy
	Microsoft Teams	Service is healthy
	Mobile Device Management for Office 365	Service is healthy
	Azure Information Protection	Service is healthy
	Exchange Online	Service is healthy

You need to ensure that users who administer Microsoft SharePoint Online can view the advisories to investigate health issues. Which role should you assign to the users?

- A. SharePoint administrator
- B. Message Center reader
- C. Reports reader
- D. Service administrator

**Answer: D**

**Explanation:**

People who are assigned the global admin or service administrator role can view service health. To allow Exchange, SharePoint, and Skype for Business admins to view service health, they must also be assigned the Service admin role. For more information about roles that can view service health.

Reference:

<https://docs.microsoft.com/en-us/office365/enterprise/view-service-health>

**NEW QUESTION 123**

- (Exam Topic 5)

You have a Microsoft 365 tenant that contains 300 users.

The users have Domestic and International Calling Plan licenses.

What is the maximum user phone numbers and toll-free service phone numbers can you acquire? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Number of user phone numbers:

150  
300  
340  
600

Number of toll-free service phone numbers:

20  
30  
45  
65

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

Graphical user interface, text, application, email Description automatically generated

Reference:

<https://docs.microsoft.com/en-us/microsoftteams/how-many-phone-numbers-can-you-get>

**NEW QUESTION 128**

- (Exam Topic 5)

You have a Microsoft 365 subscription.

You need to implement Windows Defender Advanced Threat Protection (ATP) for all the supported devices enrolled on mobile device management (MDM).

What should you include in the device configuration profile? To answer, select the appropriate options in the answer area.  
 NOTE: Each correct selection is worth one point.

Platform:

▼
Android
iOS
Windows 10 and later
Windows 8.1 and later

Settings:

▼
Offboard package
Onboard package
Windows Defender Applicaion Guard
Windows Defender Firewall

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

You can integrate Microsoft Defender Advanced Threat Protection (Microsoft Defender ATP) with Microsoft Intune as a Mobile Threat Defense solution. Integration can help you prevent security breaches and limit the impact of breaches within an organization. Microsoft Defender ATP works with devices that run Windows 10 or later.

When you establish a connection from Intune to Microsoft Defender ATP, Intune receives a Microsoft Defender ATP onboarding configuration package from Microsoft Defender ATP. This package is deployed to devices by using a device configuration profile.

Reference:

<https://docs.microsoft.com/en-us/intune/advanced-threat-protection>

**NEW QUESTION 131**

- (Exam Topic 5)

You have a Microsoft 365 E5 subscription that contains an Azure Active Directory (Azure AD) tenant named contoso.com. The tenant contains a Microsoft SharePoint Online site named Site1 and the accounts shown in the following table.

Name	Account type
UserA	User
UserB	User
GroupA	Security group

You have an on-premises server named Server1 that contains a folder named Folder1. Folder1 contains the files shown in the following table.

Name	Permission
File1	User1: Full control
File2	User2: Modify
File3	Group1: Full control

The User1, User2, and Group1 accounts have the security identifiers (SIDs) shown in the following table.

Name	SID
User1	S-1-5-21-4534338-1127018997-2609994386-1304
User2	S-1-5-21-4534338-1127018997-2609994386-1228
Group1	S-1-5-21-4534338-1127018997-2609994386-1106

You use the SharePoint Migration Tool to migrate Folder1 to Site1. You preserve the file share permissions and use the following user mapping file.

S-1-5-21-4534338-1127018997-2609994386-1304, UserA@Contoso.com, FALSE S-1-5-21-4534338-1127018997-2609994386-1228, UserB@Contoso.com, FALSE S-1-5-21-4534338-1127018997-2609994386-1106, GroupA, TRUE

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point

Statements	Yes	No
UserA is the owner of File1 on Site1.	<input type="radio"/>	<input type="radio"/>
UserB is the owner of File2 on Site1.	<input type="radio"/>	<input type="radio"/>
GroupA is the owner of File3 on Site1.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Statements	Yes	No
UserA is the owner of File1 on Site1.	<input type="radio"/>	<input checked="" type="radio"/>
UserB is the owner of File2 on Site1.	<input type="radio"/>	<input checked="" type="radio"/>
GroupA is the owner of File3 on Site1.	<input type="radio"/>	<input checked="" type="radio"/>

#### NEW QUESTION 134

- (Exam Topic 5)

You publish an enterprise application named App1 that process financial data.

You need to ensure that access to App1 is revoked for users who no longer require view the processed financial data.

What should you configure?

- A. An access review
- B. An app protection policy
- C. A conditional access policy
- D. An owner

**Answer:** A

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/governance/create-access-review>

#### NEW QUESTION 139

- (Exam Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft 365 subscription.

You need to prevent users from accessing your Microsoft SharePoint Online sites unless the users are connected to your on-premises network.

Solution: From the Azure Active Directory admin center, you create a trusted location and a conditional access policy.

Does this meet the goal?

- A. Yes
- B. No

**Answer:** A

**Explanation:**

Conditional Access in SharePoint Online can be configured to use an IP Address white list to allow access. References:

<https://docs.microsoft.com/en-us/azure/active-directory/conditional-access/location-condition> <https://techcommunity.microsoft.com/t5/Microsoft-SharePoint-Blog/Conditional-Access-in-SharePoint-Onlinea>

#### NEW QUESTION 144

- (Exam Topic 5)

Your company has a Microsoft 365 subscription that contains the users shown in the following table.

Name	Role
User1	Global administrator
User2	Security administrator, Guest inviter
User3	None
User4	Password administrator

You need to identify which users can perform the following administrative tasks:

- > Modify the password protection policy.
- > Create guest user accounts.

Which users should you identify for each task? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Modify the password protection policy:

▼

User1 only

User1 and User2 only

User1, User2, and User4 only

User1, User2, User3, and User4

Create new guest users in Microsoft Azure Active Directory (Azure AD):

▼

User1 only

User1 and User2 only

User1, User2, and User4 only

User1, User2, User3, and User4

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Only a Global Admin can modify the password protection policy.

A Global Admin or a user with the Guest Inviter role can create guest accounts. Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/authentication/howto-password-ban-bad-on-premises-op>

**NEW QUESTION 148**

- (Exam Topic 5)

Your on-premises network contains an Active Directory domain that syncs with an Azure Active Directory (Azure AD) tenant named contoso.com by using Azure AD Connect. Your company purchases another company that has an on-premises Active Directory domain named lrtwareinc.com. You need to sync lrtwareinc.com with contoso.com. What should you install in the lrtwareinc.com domain?

- A. an Azure AD Connect provisioning agent
- B. an Azure AD Connect instance in staging mode
- C. an active instance of Azure AD Connect
- D. an Azure AD application proxy connector

**Answer:** A

**NEW QUESTION 153**

- (Exam Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an on-premises Active Directory domain named contoso.com. The domain contains the users shown in the following table.

Name	UPN suffix
User1	Contoso.com
User2	Fabrikam.com

The domain syncs to an Azure Active Directory (Azure AD) tenant named contoso.com as shown in the exhibit. (Click the Exhibit tab.)

## PROVISION FROM ACTIVE DIRECTORY

### Azure AD Connect cloud provisioning

This feature allows you to manage provisioning from the cloud.

[Manage provisioning \(Preview\)](#)

### Azure AD Connect sync

Sync Status	Enabled
Last Sync	Less than 1 hour ago
Password Hash Sync	Enabled

## USER SIGN-IN

Federation	Disabled	0 domains
Seamless single sign-on	Enabled	1 domain
Pass-through authentication	Enabled	2 agents

User2 fails to authenticate to Azure AD when signing in as user2@fabrikam.com. You need to ensure that User2 can access the resources in Azure AD.  
 Solution: From the Azure Active Directory admin center, you add fabrikam.com as a custom domain. You instruct User2 to sign in as user2@fabrikam.com.  
 Does this meet the goal?

- A. Yes
- B. No

**Answer:** A

### Explanation:

The on-premises Active Directory domain is named contoso.com. To enable users to sign on using a different UPN (different domain), you need to add the domain to Microsoft 365 as a custom domain.

## NEW QUESTION 156

- (Exam Topic 5)

You have a Microsoft 365 E5 subscription.

You need to ensure that users are prompted for multi-factor authentication (MFA) when they attempt to access Microsoft SharePoint Online resources. Users must NOT be prompted for MFA when they attempt to access other Microsoft 365 services.  
 What should you do?

- A. From the Microsoft Endpoint Manager admin center, create an app protection policy.
- B. From the multi-factor authentication page, configure the users settings.
- C. From the Azure Active Directory admin center, create a conditional access policy.
- D. From the Cloud App Security admin center, create an app access policy.

**Answer:** C

### Explanation:

Multi-factor authentication (MFA) is configured through conditional access policies. Reference:  
<https://docs.microsoft.com/en-us/appcenter/general/configuring-aad-conditional-access>

## NEW QUESTION 160

- (Exam Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.  
 After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has 3,000 users. All the users are assigned Microsoft 365 E3 licenses.

Some users are assigned licenses for all Microsoft 365 services. Other users are assigned licenses for only certain Microsoft 365 services.

You need to determine whether a user named User1 is licensed for Exchange Online only. Solution: You run the Get-MsolUser cmdlet.

Does this meet the goal?

- A. Yes
- B. No

**Answer:** B

### Explanation:

The Get-MsolUser cmdlet will tell you if a user is licensed for Microsoft 365 but it does not tell you which licenses are assigned.

Reference:

<https://docs.microsoft.com/en-us/powershell/module/msonline/get-msoluser?view=azureadps-1.0>

#### NEW QUESTION 164

- (Exam Topic 5)

Your network contains an on-premises Active Directory forest named contoso.com. The forest contains the following domains:

- > Contoso.com
- > East.contoso.com

The forest contains the users shown in the following table.

Name	UPN suffix
User1	Contoso.com
User2	East.contoso.com
User3	Fabrikam.com

The forest syncs to an Azure Active Directory (Azure AD) tenant named contoso.com as shown in the exhibit. (Click the Exhibit tab.)

#### PROVISION FROM ACTIVE DIRECTORY

##### Azure AD Connect cloud provisioning

This feature allows you to manage provisioning from the cloud.

[Manage provisioning \(Preview\)](#)

##### Azure AD Connect sync

Sync Status	Enabled
Last Sync	Less than 1 hour ago
Password Hash Sync	Disabled

#### USER SIGN-IN

Federation	Disabled	0 domains
Seamless single sign-on	Enabled	1 domain
Pass-through authentication	Enabled	2 agents

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	NO
User1 can authenticate to Azure AD by using a username of user1@contoso.com.	<input type="radio"/>	<input type="radio"/>
User2 can authenticate to Azure AD by using a username of user2@contoso.com.	<input type="radio"/>	<input type="radio"/>
User3 can authenticate to Azure AD by using a username of user3@contoso.com	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

#### Explanation:

Box 1: Yes

The UPN of user1 is user1@contoso.com so he can authenticate to Azure AD by using the username user1@contoso.com.

Box 2: No

The UPN of user2 is user2@east.contoso.com so he cannot authenticate to Azure AD by using the username user2@contoso.com.

Box 3: No

The UPN of user3 is user3@fabrikam.com so he cannot authenticate to Azure AD by using the username user3@contoso.com.

#### NEW QUESTION 165

- (Exam Topic 5)

Your company has 500 client computers that run Windows 10.

You plan to deploy Microsoft Office 365 ProPlus to all the computers. You create the following XML file for the planned deployment.

```
<Configuration>
  <Add OfficeClientEdition="64" Channel="Broad" ForceUpgrade="TRUE">
    <Product ID="0365ProPlusRetail">
      <Language ID="en-us"/>
      <ExcludeApp ID="Groove"/>
      <ExcludeApp ID="Publisher"/>
    </Product>
  </Add>
  <Updates Enabled="TRUE" Channel="Broad" Deadline="03/31/2019, 00:00"
UpdatePath="\\sccm\updates"/>
  <Display Level="Full" AcceptEULA="TRUE"/>
  <Property Name="FORCEAPPSHUTDOWN" Value="TRUE"/>
  <Property Name="SharedComputerLicensing" Value="0"/>
  <Property Name="PinIconsToTaskbar" Value="TRUE"/>
</Configuration>
```

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.  
NOTE: Each correct selection is worth one point.

When the installation is complete [answer choice].

	▼
all users will be prompted to accept the EULA	
all users will be prompted to install several updates	
all semi-channel updates will be installed automatically	

Office 365 ProPlus will [answer choice].

	▼
include Microsoft OneDrive for Business and Microsoft Outlook only	
be installed on all the computers	
be installed only on the computers that run a 64-bit version of Windows 10	

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1:

When the installation is complete, all users will be prompted to install several updates.

In the configuration file, the Updates Enabled element is set to True. This means that Office will check for updates after the installation.

The Channel element set to Broad means that all semi-annual channel updates will be installed. Box 2:

Office 365 ProPlus will be installed only on the computers that run a 64-bit version of Windows 10.

The OfficeClientEdition element defines whether the 32-bit or 64-bit edition of Office 365 ProPlus is downloaded or installed. In the configuration file, it is set to '64'. The 64-bit version will only install on a 64-bit client computer.

Reference:

<https://docs.microsoft.com/en-us/deployoffice/configuration-options-for-the-office-2016-deployment-tool>

**NEW QUESTION 170**

- (Exam Topic 5)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

You may now click next to proceed to the lab. Lab information

Use the following login credentials as needed:

To enter your username, place your cursor in the Sign in box and click on the username below.

To enter your password, place your cursor in the Enter password box and click on the password below.

Microsoft 365 Username: admin@LODSe426243.onmicrosoft.com Microsoft 365 Password: 3&YWYjse-6-d

If the Microsoft 365 portal does not load successfully in the browser, press CTRL-K to reload the portal in a new browser tab.

The following information is for technical support purposes only:

Lab Instance: 10887751

You plan to provide an external user named fabrikamuser@fabrikam.com with access to several resources in your Microsoft 365 tenant.

You need to ensure that the external user can be added to Office 365 groups.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

You need to create a guest account for the external user.

- \* 1. Go to the Azure Active Directory admin center.
- \* 2. Select Users.
- \* 3. Click the 'New guest user' link.
- \* 4. Select the 'Invite user' option.
- \* 5. Give the account a name and enter fabrikamuser@fabrikam.com in the email address field.
- \* 6. Click the 'Invite' button. References:

<https://docs.microsoft.com/en-us/azure/active-directory/b2b/b2b-quickstart-add-guest-users-portal>

#### NEW QUESTION 173

- (Exam Topic 5)

You have a Microsoft 365 E5 subscription that contains a group named Group 1.

You need to ensure that all the members of Group1 are notified when Microsoft 365 outages occur. The solution must minimize administrative effort

What should you do?

- A. From the Microsoft 365 admin center, configure a Service health email notification
- B. From the Exchange admin center, create an alert policy and configure an email notification.
- C. From the Microsoft 365 admin center, configure a Message center email notification.
- D. From the Microsoft 365 Defender portal create an alert policy and configure an email notification.

**Answer:** C

#### NEW QUESTION 178

- (Exam Topic 5)

You have a Microsoft 365 subscription and a hybrid Microsoft Exchange Online deployment.

You plan to deploy iOS devices that will use Outlook for iOS and Hybrid Modern Authentication (HMA). You need to ensure that HMA is configured correctly.

What should you use?

- A. Microsoft Diagnostics and Recovery Toolset (DaRT)
- B. Microsoft Remote Connectivity Analyzer
- C. Microsoft Support and Recovery Assistant
- D. Apple Configurator

**Answer:** D

#### NEW QUESTION 183

- (Exam Topic 5)

You have a pilot app named App1 deployed to a Microsoft Power Platform production environment named Prod1.

You need to reset the Prod1 environment in preparation for the production deployment of App1.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
Reset the Prod1 environment	
Convert the Prod1 environment to a sandbox environment.	
Convert the Prod1 environment to a production environment.	⬅️ ⬆️
Sign in to the Power Platform admin center.	➡️ ⬇️
Sign in to the make.powerapps.com maker portal.	

- A. Mastered
- B. Not Mastered

**Answer:** A

#### Explanation:

#### NEW QUESTION 187

- (Exam Topic 5)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will

be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

You may now click next to proceed to the lab. Lab information

Use the following login credentials as needed:

To enter your username, place your cursor in the Sign in box and click on the username below.

To enter your password, place your cursor in the Enter password box and click on the password below.

Microsoft 365 Username: admin@LODSe426243.onmicrosoft.com Microsoft 365 Password: 3&YWyjse-6-d

If the Microsoft 365 portal does not load successfully in the browser, press CTRL-K to reload the portal in a new browser tab.

The following information is for technical support purposes only:

Lab Instance: 10887751

You plan to allow the users in your organization to invite external users as guest users to your Microsoft 365 tenant.

You need to prevent the organization's users from inviting guests who have an email address that uses a suffix of @gmail.com.

- A. Mastered
- B. Not Mastered

**Answer: A**

#### Explanation:

You need to add gmail.com as a denied domain in the 'External collaboration settings'.

- \* 1. Go to the Azure Active Directory admin center.
- \* 2. Select Users then select 'User settings'.
- \* 3. Under External Users, select the 'Manage external collaboration settings'.
- \* 4. Under 'Collaboration restrictions', select the 'Deny invitations to the specified domains' option.
- \* 5. Under, Target Domains, type in the domain name 'gmail.com'
- \* 6. Click the Save button at the top of the screen to save your changes. References:

<https://docs.microsoft.com/en-us/azure/active-directory/b2b/allow-deny-list>

#### NEW QUESTION 191

- (Exam Topic 5)

Your network contains two on-premises Active Directory forests named contoso.com and fabrikam.com. Fabrikam.com contains one domain and five domain controllers. Contoso.com contains the domains shown in the following table.

Name	Number of domain controllers
Contoso.com	2
East.contoso.com	3
West.contoso.com	3

You need to sync all the users from both the forests to a single Azure Active Directory (Azure AD) tenant by using Azure AD Connect.

What is the minimum number of Azure AD Connect sync servers required?

- A. 1
- B. 2
- C. 3
- D. 4

**Answer: A**

#### Explanation:

You can have only one active Azure AD Connect server synchronizing accounts to a single Azure Active Directory (Azure AD) tenant. You can have 'backup' Azure AD Connect servers, but these must be running in 'staging' mode. Staging mode means the Azure AD Connect instance is not actively synchronizing users but is ready to be brought online if the active Azure AD Connect instance goes offline.

When you have multiple forests, all forests must be reachable by a single Azure AD Connect sync server. The server must be joined to a domain. If necessary, to reach all forests, you can place the server in a perimeter network (also known as DMZ, demilitarized zone, and screened subnet).

References:

<https://docs.microsoft.com/en-us/azure/active-directory/hybrid/plan-connect-topologies#multiple-forests-single->

#### NEW QUESTION 196

- (Exam Topic 5)

You have a Microsoft 365 subscription that uses a default named contoso.com. Three files were created on February 1, 2019, as shown in the following table.

Name	Stored in
File1	Microsoft OneDrive
File2	A Microsoft SharePoint library
File3	Microsoft Exchange Online email

On March 1, 2019, you create two retention labels named Label1 and label2.

The settings for Label1 are configured as shown in the Label1 exhibit. (Click the Label1 tab.)

Label 1

## Label settings

### Retention ⓘ

On

### When this label is applied to content...

☒ Retain the content ⓘ

For this long... 2 years

Do you want us to delete it after this time?

☐ Delete the content automatically. ⓘ

☒ Trigger a disposition review ⓘ

Notify these people when there are items ready to review

User1@sk180818.onmicrosoft.com x

☐ Nothing. Leave the content as is. ⓘ

☐ Don't retain the content. Just delete it if it's older than ⓘ

1 years

Retain or delete the content based on when it was created ⓘ

### Label classification

☐ Use label to classify content as a "Record" ⓘ

The settings for Label2 are configured as shown in the Label1 exhibit. (Click the Label2 tab.)

Label 2

## Label settings

### Retention ⓘ

On

### When this label is applied to content...

☐ Retain the content ⓘ

For this long... 2 years

☒ Don't retain the content. Just delete it if it's older than ⓘ

1 years

Retain or delete the content based on when it was created ⓘ

You apply the retention labels to Exchange email, SharePoint sites, and OneDrive accounts. For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Statements	Yes	No
File1 will be deleted automatically on February1, 2020.	<input type="radio"/>	<input type="radio"/>
If User1 does not complete the disposition review within 90 days of receiving the notification, File2 will be deleted automatically after February 1, 2021.	<input type="radio"/>	<input type="radio"/>
File3 will be deleted automatically after February 1, 2021.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: No

Retention overrides deletion.

Box 2: No

Content in a document library will be moved to the first-stage Recycle Bin within 7 days of disposition, and then permanently deleted another 93 days after that. Thus 100 days in total.

Box 3: No

Items in an Exchange mailbox will be permanently deleted within 14 days of disposition. References:

<https://docs.microsoft.com/en-us/office365/securitycompliance/labels> <https://docs.microsoft.com/en-us/office365/securitycompliance/disposition-reviews>

**NEW QUESTION 199**

- (Exam Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain named contoso.com that is synced to Microsoft Azure Active Directory (Azure AD).

You manage Windows 10 devices by using Microsoft System Center Configuration Manager (Current Branch).

You configure a pilot for co-management.

You add a new device named Device1 to the domain. You install the Configuration Manager client on Device1.

You need to ensure that you can manage Device1 by using Microsoft Intune and Configuration Manager. Solution: You add Device1 to an Active Directory group. Does this meet the goal?

- A. Yes
- B. No

**Answer:** B

**Explanation:**

Device1 has the Configuration Manager client installed so you can manage Device1 by using Configuration Manager.

To manage Device1 by using Microsoft Intune, the device has to be enrolled in Microsoft Intune. In the Co-management Pilot configuration, you configure a Configuration Manager Device Collection that determines which devices are auto-enrolled in Microsoft Intune. You need to add Device1 to the Device Collection, not an Active Directory Group. Therefore, this solution does not meet the requirements.

Reference:

<https://docs.microsoft.com/en-us/configmgr/comanage/how-to-enable>

**NEW QUESTION 204**

- (Exam Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an on-premises Active Directory forest named contoso.com. The forest contains the following domains:

> Contoso.com

> East.contoso.com

An Azure AD Connect server is deployed to contoso.com. Azure AD Connect syncs to an Azure Active Directory (Azure AD) tenant.

You deploy a new domain named west.contoso.com to the forest.

You need to ensure that west.contoso.com syncs to the Azure AD tenant.

Solution: You install a new Azure AD Connect server in west.contoso.com and set AD Connect to staging mode.

Does this meet the goal?

- A. Yes
- B. No

**Answer:** B

**NEW QUESTION 205**

- (Exam Topic 5)

Note: This question it part of a series of questions that present the same scenario. Cacti question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has a Microsoft Office 365 tenant.

You suspect that several Office 365 features were recently updated.

You need to view a last of the features that were recently updated in the tenant. Solution: You use Dashboard in Security & Compliance.

Does this meet the goal?

A. Yes

B. NO

**Answer: B**

**Explanation:**

Depending on what your organization's Office 365 subscription includes, the Dashboard in Security & Compliance includes several widgets, such as Threat Management Summary, Threat Protection Status, Global Weekly Threat Detections, Malware, etc. It does not display a list of the features that were recently updated in the tenant so this solution does not meet the goal.

To meet the goal, you need to use Message center in the Microsoft 365 admin center.

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/security/office-365-security/security-dashboard> <https://docs.microsoft.com/en-us/office365/admin/manage/message-center?view=o365-worldwide>

**NEW QUESTION 206**

- (Exam Topic 5)

Your Network contains an on-premises Active Directory domain named contoso.local. The domain contains five domain controllers.

Your company purchases Microsoft 365 and creates a Microsoft Anne Active Directory (Azure AD) tenant named .contoso.onmicrosoft.com.

You plan to implement pass- through authentication.

You need to prepare the environment for the planned implementation of pass-through authentication. Which three actions should you perform? Each correct answer presents pan of the solution.

NOTE: Each correct selection is worth one point.

A. Modify the email address attribute for each user account.

B. From the Azure portal, add a custom domain name.

C. From Active Directory Domains and Trusts, add a UPN suffix.

D. Modify the User logon name for each user account.

E. From the Azure portal, configure an authentication method.

F. From a domain controller, install an authentication Agent.

**Answer: BCF**

**Explanation:**

To implement pass-through authentication, you need to install and configure Azure AD Connect.

The on-premise Active Directory domain is named contoso.local. Before you can configure Azure AD Connect, you need to purchase a routable domain, for example, contoso.com.

You then need to add the domain contoso.com to Microsoft as a custom domain name.

The user accounts in the Active Directory domain need to be configured to use the domain name contoso.com as a UPN suffix. You need to add contoso.com to the Active Directory first by using Active Directory Domains and Trusts to add contoso.com add a UPN suffix. You can then configure each account to use the new UPN suffix.

An Authentication Agent is required on a domain controller to perform the authentication when pass-through authentication is used. When the custom domain and user accounts are configured, you can install and configure Azure AD Connect. An Authentication Agent is installed when you select the pass-through authentication option in the Azure AD Connect configuration or you can install the Authentication Agent manually.

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/hybrid/how-to-connect-pta-quick-start>

**NEW QUESTION 209**

- (Exam Topic 5)

Your company has a Microsoft Azure Active Directory (Azure AD) tenant named contoso.onmicrosoft.com that contains a user named User1.

You suspect that an imposter is signing in to Azure AD by using the credentials of User1.

You need to ensure that an administrator named Admin1 can view all the sign in details of User1 from the past 24 hours.

To which three roles should you add Admin1? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

A. Security administrator

B. Password administrator

C. User administrator

D. Compliance administrator

E. Reports reader

F. Security reader

**Answer: AEF**

**Explanation:**

Users in the Security Administrator, Security Reader, Global Reader, and Report Reader roles can view the sign in details.

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/reports-monitoring/concept-sign-ins>

**NEW QUESTION 213**

- (Exam Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain.

You deploy a Microsoft Azure Active Directory (Azure AD) tenant. Another administrator configures the domain to synchronize to Azure AD.

You discover that 10 user accounts in an organizational unit (OU) are NOT synchronized to Azure AD. All the other user accounts synchronized successfully.

You review Azure AD Connect Health and discover that all the user account synchronizations completed successfully. You need to ensure that the 10 user accounts are synchronized to Azure AD. Solution: From Azure AD Connect, you modify the filtering settings. Does this meet the goal?

- A. Yes
- B. No

**Answer:** A

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/hybrid/how-to-connect-sync-configure-filtering>

**NEW QUESTION 215**

- (Exam Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has 3,000 users. All the users are assigned Microsoft 365 E3 licenses.

Some users are assigned licenses for all Microsoft 365 services. Other users are assigned licenses for only certain Microsoft 365 services.

You need to determine whether a user named User1 is licensed for Exchange Online only. Solution: You launch the Azure portal, and then review the Licenses blade.

Does this meet the goal?

- A. Yes
- B. No

**Answer:** A

**Explanation:**

In the Licenses blade, click All Products then select the E3 License. This will display a list of all users assigned an E3 license. Select User1. You'll see how many services are assigned in the Enabled Services column. Click on the number in the Enabled Services column for User1 and you'll be taken to the licenses page for that user. Click on the number in the Enabled Services column for User1 again and a page will open which shows you exactly which services are enabled or disabled.

Alternatively, you can go into the user account properties directly then select Licenses. This will display the licenses blade for that user. You can then click on the number in the Enabled Services column for the user and a page will open which shows you exactly which services are enabled or disabled.

**NEW QUESTION 216**

- (Exam Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory forest. You deploy Microsoft 365.

You plan to implement directory synchronization.

You need to recommend a security solution for the synchronized identities. The solution must meet the following requirements:

- Users must be able to authenticate successfully to Microsoft 365 services if Active Directory becomes unavailable.
- Users passwords must be 10 characters or more.

Solution: Implement password hash synchronization and modify the password settings from the Default Domain Policy in Active Directory.

Does this meet the goal?

- A. Yes
- B. No

**Answer:** A

**Explanation:**

This solution meets the requirements:

- Users must be able to authenticate successfully to Microsoft 365 services if Active Directory becomes unavailable. (this is because the authentication is performed by Azure Active Directory).
- Users passwords must be 10 characters or more. (the Default Domain Policy in the on-premise Active Directory can be configured to require the password length)

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/hybrid/how-to-connect-password-hash-synchronization>

**NEW QUESTION 220**

- (Exam Topic 5)

Your network contains a single Active Directory domain and two Microsoft Azure Active Directory (Azure AD) tenants.

You plan to implement directory synchronization for both Azure AD tenants. Each tenant will contain some of the Active Directory users.

You need to recommend a solution for the planned directory synchronization. What should you include in the recommendation?

- A. Deploy two servers that run Azure AD Connect, and then filter the users for each tenant by using organizational unit (OU)-based filtering.
- B. Deploy one server that runs Azure AD Connect, and then specify two sync groups.
- C. Deploy one server that runs Azure AD Connect, and then filter the users for each tenant by using organizational unit (OU)-based filtering.
- D. Deploy one server that runs Azure AD Connect, and then filter the users for each tenant by using domain-based filtering.

**Answer:** A

**Explanation:**

There's a 1:1 relationship between an Azure AD Connect sync server and an Azure AD tenant. For each Azure AD tenant, you need one Azure AD Connect sync server installation.

Therefore, we need to deploy two servers that run Azure AD Connect for the two Azure AD tenants.

Each user account can only be synchronized to one Azure AD tenant. Therefore, we need a way of splitting the users between the two Azure AD tenants. Azure AD Connect offers three ways to filter which users get synchronized to an Azure AD tenant. You can use domain-based filtering if you have multiple domains in a forest, attribute-based filtering or OU-based filtering.

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/hybrid/plan-connect-topologies#multiple-azure-ad-tenant>

<https://docs.microsoft.com/en-us/azure/active-directory/hybrid/how-to-connect-sync-configure-filtering>

**NEW QUESTION 222**

- (Exam Topic 5)

You have a Microsoft 365 subscription and a Microsoft Azure Active Directory (Azure AD) tenant named contoso.com. Contoso.com contains the users shown in the following table.

Name	Type	Role
User1	Member	None
User2	Member	Security administrator, Guest inviter
User3	Member	User administrator
User4	Guest	None

Contoso.com is configured as shown in the following exhibit.

## External collaboration settings

 Save
  Discard

Guest users permissions are limited ⓘ

Admins and users in the guest inviter role can invite ⓘ

Members can invite ⓘ

Guests can invite ⓘ

### Collaboration restrictions

☒ Allow invitations to be sent to any domain (most inclusive)
 ☐ Deny invitations to the specified domains
 ☐ Allow invitations only to the specified domains (most restrictive)

You need to ensure that guest users can be created in the tenant. Which setting should you modify?

- A. Guests can invite.
- B. Guest users permissions are limited.
- C. Members can invite.
- D. Admins and users in the guest inviter role can invite.
- E. Deny invitations to the specified domains

**Answer: D**

**Explanation:**

The setting “Admins and users in the guest inviter role can invite” is set to No. This means that no one can create guest accounts because they cannot ‘invite’ guests. This setting needs to be changed to Yes to ensure that guest users can be created in the tenant.

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/b2b/delegate-invitations> <https://docs.microsoft.com/en-us/azure/active-directory/fundamentals/users-default-permissions>

**NEW QUESTION 226**

- (Exam Topic 5)

Your network contains an on-premises Active Directory domain. The domain contains a server named Server1. Server1 has a share named Share1 that contains the files shown in the following table.

Name	Created	Modified	Permission
File1.txt	12/15/2018	03/15/2019	Domain Users: Allow Read
File2.txt	01/15/2019	03/15/2019	User1: Allow Read
File3.txt	03/05/2019	03/15/2019	Domain Users: Allow Read User1: Deny Read

You have a hybrid deployment of Microsoft 365.

You create a Microsoft SharePoint site collection named Col lection1. You plan to migrate Share1 to a document library in Collection1

You configure the SharePoint Migration Tool as shown in the exhibit. (Click the Exhibit tab.) For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

### All migration settings

Only perform scanning ⓘ

☐ Off

Preserve file share permissions ⓘ

☒ On

#### Users

Azure Active Directory lookup ⓘ

☒ On

User mapping file ⓘ

Choose File

#### Filters

Keep all versions ⓘ

☒ On

Migrate hidden files ⓘ

☒ On

Migrate files created after ⓘ

Migrate files modified after ⓘ

Save

Cancel

#### Answer Area

Statements	Yes	No
File1.txt will be migrated to SharePoint.	<input type="radio"/>	<input type="radio"/>
File2.txt will be migrated to SharePoint.	<input type="radio"/>	<input type="radio"/>
User1 will be denied access to read File3.txt in SharePoint when the migration is complete.	<input type="radio"/>	<input type="radio"/>

- A. Mastered  
 B. Not Mastered

Answer: A

#### Explanation:

Box 1: No

File1.txt will not be migrated as it was created before Jan 1 2019

Box 2: Yes

File2.txt will be migrated as it was created after Jan 1 2019 and was modified after Mar 1 2019.

Box 3: Yes

File permissions will be maintained after the migration. References:

<https://docs.microsoft.com/en-us/sharepointmigration/spmt-settings>

#### NEW QUESTION 228

- (Exam Topic 5)

You have a Microsoft 365 E5 subscription.

Users have Android or iOS devices and access Microsoft 365 resources from computers that run Windows 11 or MacOS. You need to implement passwordless authentication. The solution must support all the devices. Which authentication method should you use?

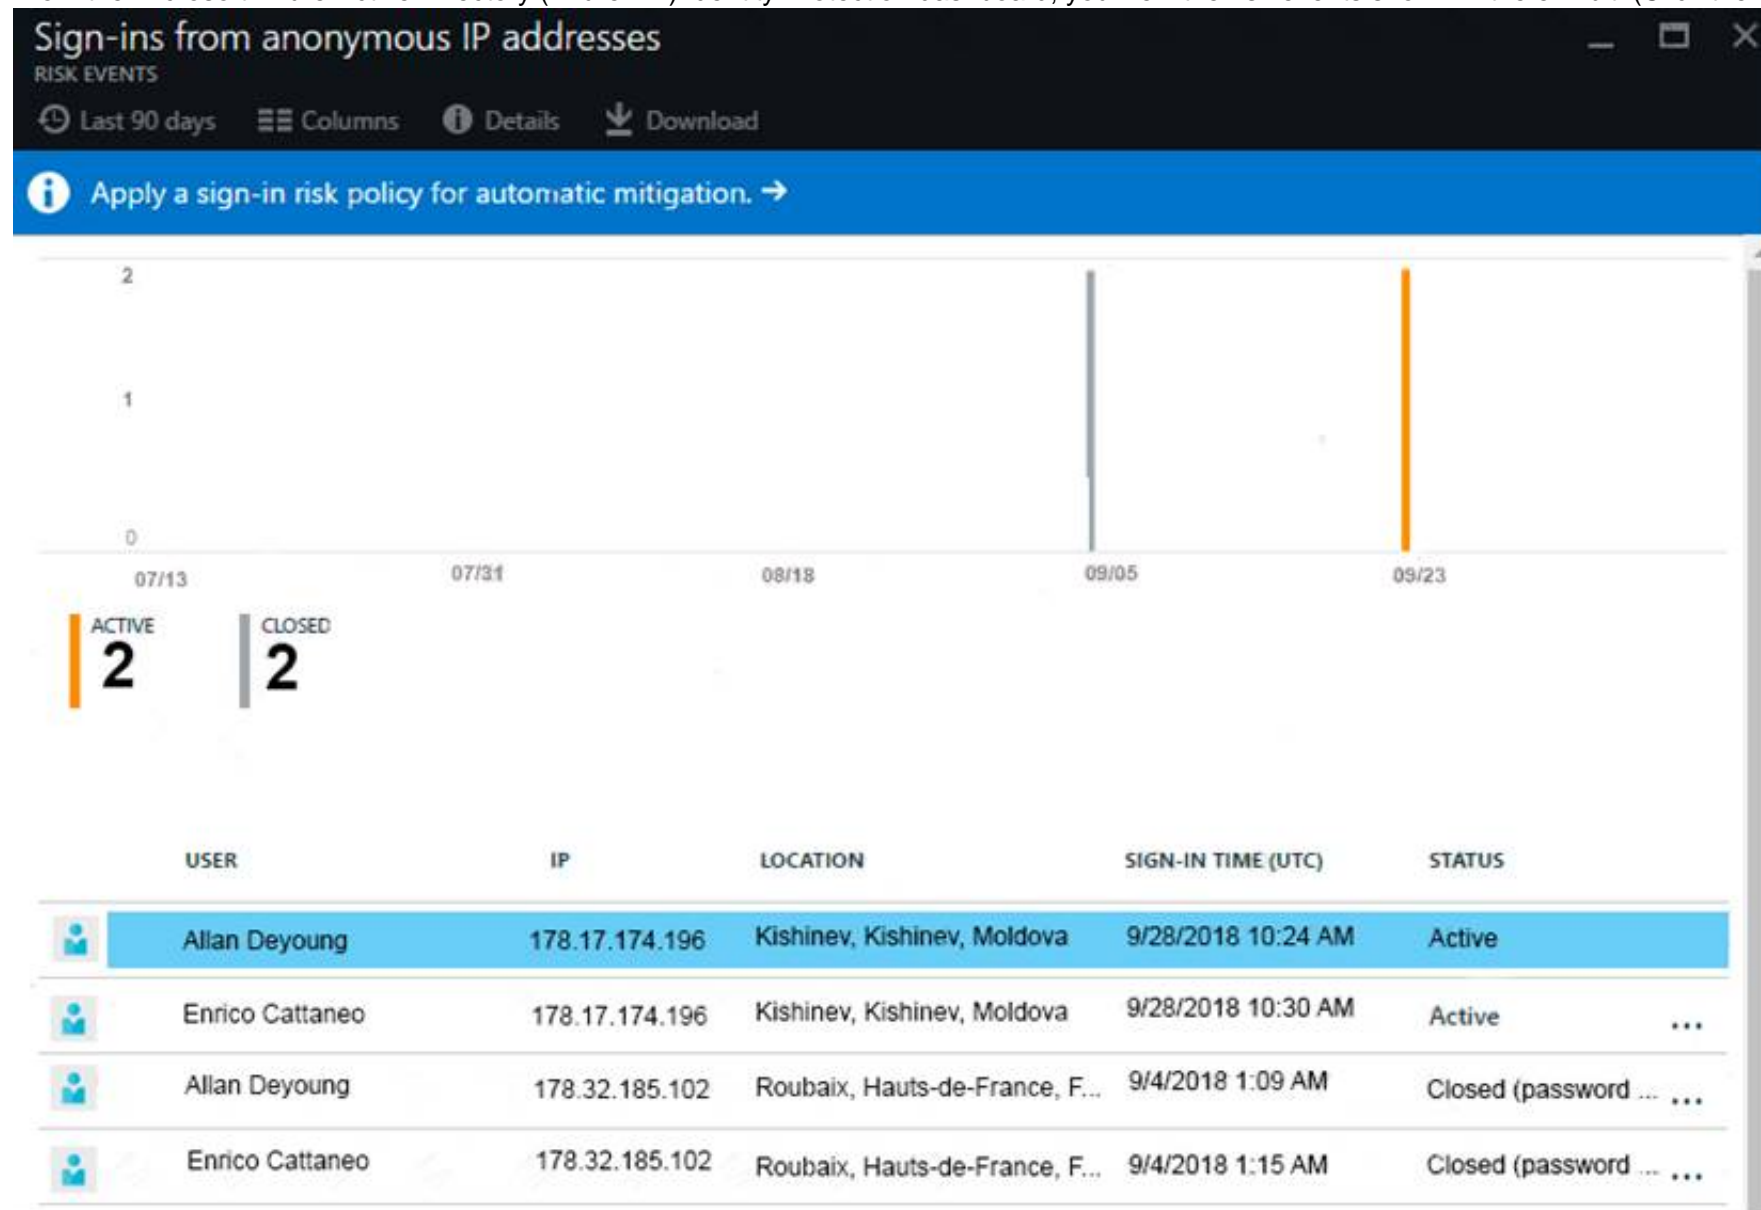

- A. Windows Hello
- B. Microsoft Authenticator app
- C. FIDO2 compliant security keys

**Answer:** A

#### NEW QUESTION 231

- (Exam Topic 5)

From the Microsoft Azure Active Directory (Azure AD) Identity Protection dashboard, you view the risk events shown in the exhibit. (Click the Exhibit tab.)

You need to reduce the likelihood that the sign-ins are identified as risky. What should you do?

- A. From the Security & Compliance admin center, add the users to the Security Readers role group.
- B. From the Conditional access blade in the Azure Active Directory admin center, create named locations.
- C. From the Azure Active Directory admin center, configure the trusted IPs for multi-factor authentication.
- D. From the Security & Compliance admin center, create a classification label.

**Answer:** B

#### Explanation:

A named location can be configured as a trusted location. Typically, trusted locations are network areas that are controlled by your IT department. In addition to Conditional Access, trusted named locations are also used by Azure Identity Protection and Azure AD security reports to reduce false positives for risky sign-ins.

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/conditional-access/location-condition>

#### NEW QUESTION 233

- (Exam Topic 5)

You are developing a Microsoft Teams app that will use an Azure function to send scheduled messages from a bot to users. What is required for the Teams app to send a proactive message to the users?

- A. The users must send at least one message to the bot.
- B. The bot must be approved in Azure Active Directory (Azure AD).
- C. The bot must be granted admin access to the users.
- D. The Teams app must be added for each user.

**Answer:** A

#### NEW QUESTION 237

- (Exam Topic 5)

Your company has a Microsoft 365 subscription.

You upload several archive PST files to Microsoft 365 by using the Security & Compliance admin center. A month later, you attempt to run an import job for the PST files.

You discover that the PST files were deleted from Microsoft 365.

What is the most likely cause of the files being deleted? More than one answer choice may achieve the goal. Select the BEST answer.

- A. The PST files were corrupted and deleted by Microsoft 365 security features.
- B. PST files are deleted automatically from Microsoft 365 after 30 days.
- C. The size of the PST files exceeded a storage quota and caused the files to be deleted.
- D. Another administrator deleted the PST files.

**Answer:** B

**Explanation:**

References:

<https://docs.microsoft.com/en-us/office365/securitycompliance/faqimporting-pst-files-to-office-365> You can use the Office 365 Import Service to bulk-import PST files to Office 365 mailboxes.

When you use the network upload method to import PST files, you upload them to an Azure blob container named ingestiondata. If there are no import jobs in progress on the Import page in the Security & Compliance Center), then all PST files in the ingestiondata container in Azure are deleted 30 days after the most recent import job was created in the Security & Compliance Center.

Reference:

<https://docs.microsoft.com/en-us/office365/securitycompliance/faqimporting-pst-files-to-office-365>

**NEW QUESTION 239**

- (Exam Topic 5)

Your on-premises network contains a Microsoft Exchange Server 2019 organization. You purchase a Microsoft 365 E5 subscription. You need to integrate the on-premises network and Exchange Online. What should you do first?

- A. implement Azure AD Connect.
- B. Add a connector in Exchange Online.
- C. Run the Hybrid Configuration wizard
- D. install an Azure Active Directory (Azure AD) Application Proxy connector.

**Answer:** A

**NEW QUESTION 244**

- (Exam Topic 5)

Your network contains an on-premises Active Directory domain named conioso.com.

for all user accounts, the Logon Hours settings are configured to prevent sign-ins outside of business hours You plan to sync contoso.com to an Azure Active Directory (Azure AD) tenant

You need to recommend a solution to ensure that the logon hour restrictions apply when synced users sign in to Azure AD.

What should you include in the recommendation?

- A. conditional access policies
- B. password synchronization
- C. pass-Through authentication
- D. Azure AD identity Protection policies

**Answer:** C

**NEW QUESTION 248**

- (Exam Topic 5)

Your company has a Microsoft Azure Active Directory (Azure AD) tenant named contoso.onmicrosoft.com that contains a user named User1.

You suspect that an imposter is signing in to Azure AD by using the credentials of User1.

You need to ensure that an administrator named Admin1 can view all the sign in details of User 1 from the past 24 hours.

To which three roles should you add Admin1? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. Security administrator
- B. Password administrator
- C. User administrator
- D. Compliance administrator
- E. Reports reader
- F. Security Reader

**Answer:** AEF

**Explanation:**

Users in the Security Administrator, Security Reader, Global Reader, and Report Reader roles can view the sign in details.

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/reports-monitoring/concept-sign-ins>

**NEW QUESTION 251**

- (Exam Topic 5)

Your network contains an on-premises Active Directory domain named contoso.com. The domain contains the objects shown in the following table.

Name	Configuration
Group1	Global security group
User1	Enabled user account
User2	Disabled user account

You configure Azure AD Connect to sync contoso.com to Azure Active Directory. Which objects will sync to Azure AD?

- A. Group1, Used, and User2

- B. Group1 and User1 only
- C. User1 and User2 only
- D. Group1 only

**Answer:** A

**Explanation:**

Global Security Group is a scope for the group and is set for created groups:

<https://docs.microsoft.com/en-us/windows/security/identity-protection/access-control/active-directory-security-g>

**NEW QUESTION 252**

- (Exam Topic 5)

You are developing a Microsoft Teams tab.

You need to create a modal dialog to collect input from a user.

What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Create the dialog as:

A bot  
A .json manifest file  
A webpage  
An .xml file

Invoke the dialog from the Teams tab by using a JavaScript code of:

```
microsoftTeams.appInitialization.notifySuccess();
microsoftTeams.tasks.startTask(taskModuleInfo);
microsoftTeams.tasks.submitTask();
window.open("/dialog.html", "_blank");
```

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Answer Area

Create the dialog as:

A bot  
A .json manifest file  
A webpage  
An .xml file

Invoke the dialog from the Teams tab by using a JavaScript code of:

```
microsoftTeams.appInitialization.notifySuccess();
microsoftTeams.tasks.startTask(taskModuleInfo);
microsoftTeams.tasks.submitTask();
window.open("/dialog.html", "_blank");
```

**NEW QUESTION 254**

- (Exam Topic 5)

You have a Microsoft 365 E5 subscription that uses Endpoint security.

You need to create a group and assign the Endpoint Security Manager role to the group, Which type of group can you use?

- A. Microsoft 365 only
- B. distribution, mail-enabled securit
- C. Microsoft 365 and security
- D. security only
- E. mail-enabled security and security only
- F. mail-enabled security, Microsoft 365. and security only

**Answer:** E

**NEW QUESTION 258**

- (Exam Topic 5)

Your network contains an Active Directory domain named contoso.com. The domain contains 1000 Windows 8.1 devices.

You plan to deploy a custom Windows 10 Enterprise image to the Windows 8.1 devices. You need to recommend a Windows 10 deployment method.

What should you recommend?

- A. Wipe and load refresh
- B. Windows Autopilot
- C. a provisioning package
- D. an in-place upgrade

**Answer:** A

**Explanation:**

To deploy a custom image, you must use the wipe and load refresh method. You cannot deploy a custom image by using an in-place upgrade, Windows Autopilot or a provisioning package.

<https://docs.microsoft.com/en-us/windows/deployment/windows-10-deployment-scenarios>

**NEW QUESTION 262**

- (Exam Topic 5)

Your company has a Microsoft Azure Active Directory (Azure AD) tenant named contoso.com. You sign up for Microsoft Store for Business.

The tenant contains the users shown in the following table.

Name	Microsoft Store for Business role	Azure AD role
User1	Purchaser	None
User2	Basic Purchaser	None
User3	None	Application administrator
User4	None	Cloud application administrator
User5	None	None

Microsoft Store for Business has the following Shopping behavior settings:

- Allow users to shop is set to On.
- Make everyone a Basic Purchaser is set to Off.

You need to identify which users can install apps from the Microsoft for Business private store. Which users should you identify?

- A. user1, User2, User3, User4, and User5
- B. User1 only
- C. User1 and User2 only
- D. User3 and User4 only
- E. User1, User2, User3, and User4 only

**Answer:** C

**Explanation:**

Allow users to shop controls the shopping experience in Microsoft Store for Education. When this setting is on, Purchasers and Basic Purchasers can purchase products and services from Microsoft Store for Education.

**NEW QUESTION 265**

- (Exam Topic 5)

You have a Microsoft 365 subscription. All users have client computers that run Windows 10 and have Microsoft Office 365 ProPlus installed.

Some users in the research department work for extended periods of time without an Internet connection. How many days can the research department users remain offline before they are prevented from editing Office documents?

- A. 10
- B. 30
- C. 90
- D. 120

**Answer:** B

**Explanation:**

After 30 days, Microsoft Office 365 ProPlus will go into reduced functionality mode. When this happens, users will be able to open files but they won't be able to edit them.

As part of the installation process, Office 365 ProPlus communicates with the Office Licensing Service and the Activation and Validation Service to obtain and activate a product key. Each day, or each time the user logs on to their computer, the computer connects to the Activation and Validation Service to verify the license status and extend the product key. As long as the computer can connect to the Internet at least once every 30 days, Office remains fully functional. If the computer goes offline for more than 30 days, Office enters reduced functionality mode until the next time a connection can be made.

**NEW QUESTION 269**

- (Exam Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company plans to deploy several Microsoft Office 365 services.

You need to design an authentication strategy for the planned deployment. The solution must meet the following requirements:

- \* Users must be able to authenticate during business hours only.
- \* Authentication requests must be processed successfully if a single server fails.
- \* When the password for an on-premises user account expires, the new password must be enforced the next time the user signs in.
- \* Users who connect to Office 365 services from domain-joined devices that are connected to the internal network must be signed in automatically.

Solution: You design an authentication strategy that uses password hash synchronization and seamless SSO. The solution contains two servers that have an Authentication Agent installed.

- A. Yes  
 B. No

**Answer:** B

#### NEW QUESTION 273

- (Exam Topic 5)

You have a Microsoft Azure Active Directory (Azure AD) tenant named contoso.com. You add an app named App1 to the enterprise applications in contoso.com. You need to configure self-service for App1. What should you do first?

- A. Assign App1 to users and groups.  
 B. Add an owner to App1.  
 C. Configure the provisioning mode for App1.  
 D. Configure an SSO method for App1.

**Answer:** C

#### Explanation:

The provisioning mode (manual or automatic) needs to be configured for an app before you can enable self-service application access.

References:

<https://docs.microsoft.com/en-us/azure/active-directory/manage-apps/manage-self-service-access>

#### NEW QUESTION 274

- (Exam Topic 5)

You have a Microsoft 365 subscription that uses an Azure Active Directory (Azure AD) tenant named contoso.com. The tenant contains the users shown in the following table.

Name	Device type	License
User1	Windows 10	None
User2	Windows 10	Microsoft Office 365 E5
User3	Android	Microsoft Office 365 E5

You configure the Office software download settings as shown in the exhibit. (Click the Exhibit tab.)

Office software download settings

Choose whether your users can install Office apps on their own devices.

If you choose not to allow this, you can [manually deploy apps to users](#) instead.

Apps for Windows and mobile devices

☒ Office (includes Skype for Business)

How often do you want users to get feature updates for Office apps?

☐ Every month (Monthly channel)
 ☒ Every 6 months (Semi-Annual channel)

Apps for Mac

☒ Office

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can use Microsoft Word Online to edit documents when he signs in to <a href="https://www.office.com">https://www.office.com</a> .	<input type="radio"/>	<input type="radio"/>
User2 can install Office 365 apps on his device when he signs in to <a href="https://www.office.com">https://www.office.com</a> .	<input type="radio"/>	<input type="radio"/>
User3 can install Microsoft Word on his device when he signs in to <a href="https://www.office.com">https://www.office.com</a> .	<input type="radio"/>	<input type="radio"/>

A. Mastered  
 B. Not Mastered

**Answer:** A

Passing Certification Exams Made Easy

visit - <https://www.2PassEasy.com>

**Explanation:**

Box 1: No.

User1 does not have an Office 365 license so will be unable to use edit documents in Word online. Box 2: Yes.

User2 has a Windows device and an Office 365 license. Box 3: No

Although, User 3 has an Office 365 license, you cannot download Android apps from the Office 365 portal. You need to download the apps from the Android app store.

**NEW QUESTION 276**

- (Exam Topic 5)

You have a Microsoft 365 E5 subscription that contains the users shown in the following table.

Name	Member of	Multi-Factor Auth Status
User1	Group1	Disabled
User2	Group1, Group2	Enabled
User3	Group2	Disabled

You configure a multi-factor authentication (MFA) registration policy that has the following settings: Assignments:

- Include: Group1

- Exclude: Group2

Access controls: Require Azure MFA registration

Enforce Policy: On

You create a conditional access policy that has the following settings: Name: Policy1

Assignments:

- Include: Group2

- Exclude: Group1 Access controls:

- Grant, Require multi-factor authentication Enable policy: On

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 will be required to use MFA on the next sign-in.	<input type="radio"/>	<input type="radio"/>
User2 will be required to use MFA on the next sign-in.	<input type="radio"/>	<input type="radio"/>
User3 will be required to use MFA on the next sign-in.	<input type="radio"/>	<input type="radio"/>

A. Mastered

B. Not Mastered

**Answer: A**

**Explanation:**

Graphical user interface, text, application Description automatically generated

Box 1: No

The MFA policy applies to User1 so he will be prompted to register for MFA. He has 14 days to complete the registration. During this 14-day period, he can bypass registration but at the end of the period he will be required to register before he can complete the sign-in process.

The Conditional Access Policy does not apply to User1 so MFA is not required. Box 2: No

User2's MFA status is Enabled which means he has been enrolled in MFA but has not yet completed the registration.

The Conditional Access Policy does not apply to User2 because Group1 is excluded so MFA is not required. Box 3: Yes

The Conditional Access Policy does apply to User3 so MFA will be required. He will need to be enrolled for MFA first.
