Microsoft

Exam Questions MS-100

Microsoft 365 Identity and Services
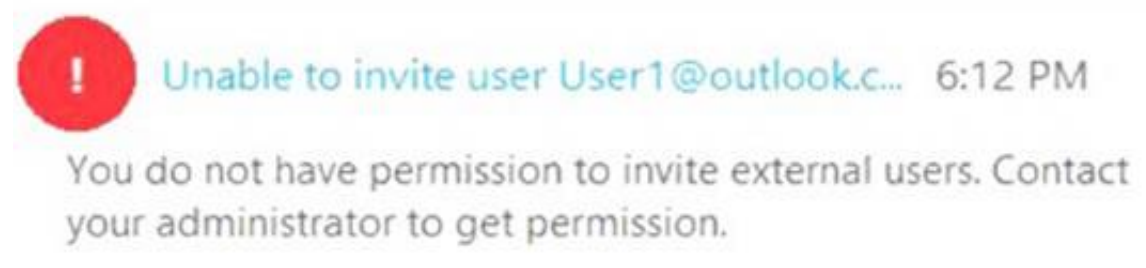

NEW QUESTION 1
- (Exam Topic 5)
You have a Microsoft Azure Active Directory (Azure AD) tenant named contoso.onmicrosoft.com. An external user has a Microsoft account that uses an email address of user1@outlook.com.
An administrator named Admin1 attempts to create a user account for the external user and receives the error message shown in the following exhibit.

You need to ensure that Admin1 can add the user.
What should you do from the Azure Active Directory admin center?

A. Add a custom domain name named outlook.com.
B. Modify the Authentication methods.
C. Modify the External collaboration settings.
D. Assign Admin1 the Security administrator role.

Answer: C

Explanation:
Reference:
https://docs.microsoft.com/en-us/azure/active-directory/b2b/delegate-invitations

NEW QUESTION 2
- (Exam Topic 5)
You plan to deploy two Microsoft Power Platform environments as shown in the following table.

Name	Requirement
Environment1	• Supports multiple makers that customize the environment • Supports copying other environments to Environment1 • Minimizes effort to reset the environment
Environment2	• Is a learning environment • Supports the creation of unlimited apps • Does not count against storage allocation for the tenant

Which environment type should you use for each environment? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Environment1:
Developer
Production
Sandbox

Environment2:
Developer
Production
Sandbox

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Graphical user interface, text, application, chat or text message Description automatically generated
Reference:
https://docs.microsoft.com/en-us/power-platform/admin/environments-overview

NEW QUESTION 3
- (Exam Topic 5)
Your company has a Microsoft 365 subscription.
You need to identify all the users in the subscription who are licensed for Microsoft Office 365 through a group membership. The solution must include the name of the group used to assign the license.
What should you use?

A. the Licenses blade in the Azure portal
B. Reports in the Microsoft 365 admin center
C. Active users in the Microsoft 365 admin center
D. Report in Security & Compliance

Answer: A

Explanation:
In the Azure AD Admin Center, select Azure Active Directory then select Licenses to open the Licenses blade. From there you need to click on the 'Managed your purchased licenses link'. Select a license you want to view, for example Office 365 E3. This will then display a list of all users with that license. In the 'Assignment Paths' column, it will say 'Direct' for a license that has been assigned directly to a user or 'Inherited (Group Name)' for a license that has been assigned through a group.
Reference:
https://docs.microsoft.com/en-us/azure/active-directory/users-groups-roles/licensing-groups-assign

NEW QUESTION 4
- (Exam Topic 5)
You have a Microsoft Azure Active Directory (Azure AD) tenant that contains the users shown in the following table.

Name	Role
User1	Global administrator
User2	Billing administrator
User3	None

You enable self-service password reset for all users. You set Number of methods required to reset to 1, and you set Methods available to users to Security questions only.
What information must be configured for each user before the user can perform a self-service password reset? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer Area

User1:
Email address only
Phone number only
Security questions only
Phone number and email address

User2:
Email address only
Phone number only
Security questions only
Phone number and email address

User3:
Email address only
Phone number only
Security questions only
Phone number and email address

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Microsoft enforces a strong default two-gate password reset policy for any Azure administrator role. This policy may be different from the one you have defined for your users and cannot be changed. You should always test password reset functionality as a user without any Azure administrator roles assigned.
With a two-gate policy, administrators don't have the ability to use security questions.
The two-gate policy requires two pieces of authentication data, such as an email address, authenticator app, or a phone number.
User3 is not assigned to an Administrative role so the configured method of Security questions only applies to User3.
Reference:
https://docs.microsoft.com/en-us/azure/active-directory/authentication/concept-sspr-policy#administrator-passw

NEW QUESTION 5
- (Exam Topic 5)
You have a Microsoft 365 subscription.
You suspect that several Microsoft Office 365 applications or services were recently updated. You need to identify which applications or services were recently updated.
What are two possible ways to achieve the goal? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.

A. From the Microsoft 365 admin center, review the Message center blade.
B. From the Office 365 Admin mobile app, review the messages.
C. From the Microsoft 365 admin center, review the Products blade.
D. From the Microsoft 365 admin center, review the Service health blade.

Answer: AB

Explanation:
The Message center in the Microsoft 365 admin center is where you would go to view a list of the features that were recently updated in the tenant. This is where Microsoft posts official messages with information including new and changed features, planned maintenance, or other important announcements.
The messages displayed in the Message center can also be viewed by using the Office 365 Admin mobile app. Reference:
https://docs.microsoft.com/en-us/office365/admin/manage/message-center?view=o365-worldwide
https://docs.microsoft.com/en-us/office365/admin/admin-overview/admin-mobile-app?view=o365-worldwide

NEW QUESTION 6
- (Exam Topic 5)
Your company has 10,000 users who access all applications from an on-premises data center. You plan to create a Microsoft 365 subscription and to migrate data to the cloud.
You plan to implement directory synchronization.
User account and group accounts must sync to Microsoft Azure Directory (Azure AD) successfully. You discover that several user accounts fail to sync to Azure AD.
You need to identify which user accounts failed to sync. You must resolve the issue as quickly as possible. What should you do?

A. From Active Directory Administrative Center, search for all the users, and then modify the properties of the user accounts.
B. Run idfix.exe, and then click Complete.
C. From Windows PowerShell, run the Start-AdSyncSyncCycle –PolicyType Delta command.
D. Run idfix.exe, and then click Edit.

Answer: D

Explanation:
IdFix is used to perform discovery and remediation of identity objects and their attributes in an on-premises Active Directory environment in preparation for migration to Azure Active Directory. IdFix is intended for the Active Directory administrators responsible for directory synchronization with Azure Active Directory.
Reference:
https://docs.microsoft.com/en-us/office365/enterprise/prepare-directory-attributes-for-synch-with-idfix https://www.microsoft.com/en-gb/download/details.aspx?id=36832

NEW QUESTION 7
- (Exam Topic 5)
You have a Microsoft 365 subscription linked to an Azure Active Directory (Azure AD) tenant named contoso.onmicrosoft.com.
In the subscription, an administrator adds two custom domains named sub1.contoso.onmicrosoft.com and sub2.contoso.onmicrosoft.com and the objects shown in the following table.

Name	Type	Attribute
Group1	Distribution group	Group email: group1@sub1.contoso.onmicrosoft.com
Group2	Mail-enabled security group	Group email: group2@sub2.contoso.onmicrosoft.com
Group3	Office 365 group	Group email: group3@contoso.onmicrosoft.com
User1	User	Username: user1@sub1.contoso.onmicrosoft.com
Contact2	Contact	Email: contact2@sub2.contoso.onmicrosoft.com

You plan to delete sub1.contoso.onmicrosoft.com and sub2.contoso.onmicrosoft.com.
Which objects must you delete or modify manually before you can delete the domains? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Sub1.contoso.onmicrosoft.com:
- User1 only
- Group1 only
- User1 and Group1 only
- User1, Group1, and Group3
- No resources must be deleted or modified

Sub2.contoso.onmicrosoft.com:
- Contact2 only
- Group2 only
- Contact2 and Group2 only
- Contact2, Group2, and Group3
- No resources must be deleted or modified

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Anything with an email address in the subdomain needs to be removed or moved to another domain. This includes users, mail-enabled security groups, distribution groups and contacts. Office 365 groups will also need to be removed from the subdomains (they cannot be moved to another domain). However, the only Office 365 group in this question is in the parent domain, not the subdomains.
Reference:
https://docs.microsoft.com/en-us/microsoft-365/admin/get-help-with-domains/remove-a-domain?view=o365-wo

NEW QUESTION 8
- (Exam Topic 5)

You have a DNS zone named contoso.com that contains the following records.

```
@           IN    SOA    dns1.contoso.com. hostmaster.contoso.com. (
                         539                ; serial number
                         900                ; refresh
                         600                ; retry
                         86400              ; expire
                         3600             ) ; default TTL

@           NS           dns1.contoso.com.

@           MX    10     server1.contoso.com.
@           TXT          ( "v=spf1 a include:server1.contoso.com -all" )
Server1     A            193.77.10.15
```

You purchase a Microsoft 365 subscription.
You plan to migrate mailboxes to Microsoft Exchange Online.
You need to configure Sender Policy Framework (SPF) to support Exchange Online. What should you do?

A. Add an additional TXT record.
B. Modify the TXT record.
C. Modify the expire interval of the SOA record.
D. Modify the default TTL of the SOA record.

Answer: B

Explanation:
Reference:
https://docs.microsoft.com/en-us/microsoft-365/security/office-365-security/set-up-spf-in-office-365-to-help-pre

NEW QUESTION 9
- (Exam Topic 5)
You have a Microsoft 365 E5 subscription.
You have an Azure AD tenant named contoso.com that contains the following users:
• Admin 1
• Admin2
• User1
Contoso.com contains an administrative unit named AU1 that has no role assignments. User1 is a member of AU1.

Answer Area

Statements	Yes	No
You can add Admin1 as a member of AU1.	○	○
You can add User1 as a member of AU2.	○	○
You can assign Admin2 the User administrator role for AU1.	○	○

A. Mastered
B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
You can add Admin1 as a member of AU1.	○	○
You can add User1 as a member of AU2.	○	○
You can assign Admin2 the User administrator role for AU1.	○	○

NEW QUESTION 10
- (Exam Topic 5)
Your network contains an on-premises Active Directory domain named contoso.com. The domain contains 1,000 Windows 10 devices.
You perform a proof of concept (PoC) deployment of Windows Defender Advanced Threat Protection (ATP) for 10 test devices. During the onboarding process, you configure Windows Defender ATP-related data to be stored in the United States.

You plan to onboard all the devices to Windows Defender ATP data in Europe. What should you do first?

A. Create a workspace
B. Offboard the test devices
C. Delete the workspace
D. Onboard a new device

Answer: B

Explanation:
When onboarding Windows Defender ATP for the first time, you can choose to store your data in Microsoft Azure datacenters in the European Union, the United Kingdom, or the United States. Once configured, you cannot change the location where your data is stored.
The only way to change the location is to offboard the test devices then onboard them again with the new location.
Reference:
https://docs.microsoft.com/en-us/windows/security/threat-protection/microsoft-defender-atp/data-storage-privac

NEW QUESTION 10
- (Exam Topic 5)
Your network contains an on-premises Active Directory domain.
You have a Microsoft 365 E5 subscription.
You plan to implement directory synchronization.
You need to identify potential synchronization issues for the domain. The solution must use the principle of least privilege
What should you use? To answer, select the appropriate options in the answer area.

Answer Area

Tool:
- AccessChk
- Azure AD Connect
- Active Directory Explorer
- IdFix

Required group membership:
- Domain Admins
- Domain Users
- Server Operators
- Enterprise Admins

A. Mastered
B. Not Mastered

Answer: A

Explanation:

Answer Area

Tool:
- AccessChk
- Azure AD Connect
- Active Directory Explorer
- IdFix

Required group membership:
- Domain Admins
- Domain Users
- Server Operators
- Enterprise Admins

NEW QUESTION 13
- (Exam Topic 5)
You have a Microsoft 365 Enterprise E5 subscription.
You need to enforce multi-factor authentication on all cloud-based applications for the users in the finance department.
What should you do?

A. Create an activity policy.
B. Create a new app registration.
C. Create a conditional access policy.
D. Create a session policy.

Answer: C

Explanation:
You can configure a conditional access policy that applies to the Finance department users. The policy can be configured to 'Allow access' but with multi-factor authentication as a requirement.

The reference below explains how to create a conditional access policy that requires MFA for all users. To apply the policy to finance users only, you would select Users and Group in the Include section instead of All Users and then specify the finance department group.
Reference:
https://docs.microsoft.com/en-us/azure/active-directory/conditional-access/howto-conditional-access-policy-all

NEW QUESTION 16
- (Exam Topic 5)
You have a Microsoft 365 subscription.
You have the devices shown in the following table.

Operating system	Quantity
Windows 8.1	5
Windows 10	5
Windows Server 2016	5

You need to onboard the devices to Windows Defender Advanced Threat Protection (ATP). The solution must avoid installing software on the devices whenever possible.
Which onboarding method should you use for each operating system? To answer, drag the appropriate methods to the correct operating systems. Each method may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Methods

| A Microsoft Azure ATP sensor |
| A local script |
| Microsoft Monitoring Agent |

Answer Area

Windows 8.1: _____

Windows 10: _____

Windows Server 2016: _____

A. Mastered
B. Not Mastered

Answer: A

Explanation:
References:
https://docs.microsoft.com/en-us/windows/security/threat-protection/windows-defender-atp/onboard-downlevel- https://docs.microsoft.com/en-us/windows/security/threat-protection/windows-defender-atp/configure-endpoints https://docs.microsoft.com/en-us/windows/security/threat-protection/windows-defender-atp/configure-server-en Box 1:
To onboard down-level Windows client endpoints to Microsoft Defender ATP, you'll need to: Configure and update System Center Endpoint Protection clients.
Install and configure Microsoft Monitoring Agent (MMA) to report sensor data to Microsoft Defender ATP Box 2:
For Windows 10 clients, the following deployment tools and methods are supported: Group Policy
System Center Configuration Manager
Mobile Device Management (including Microsoft Intune) Local script
Box 3:
Windows Server 2016 can be onboarded by using Azure Security Centre. When you add servers in the Security Centre, the Microsoft Monitoring Agent is installed on the servers.

NEW QUESTION 18
- (Exam Topic 5)
Your network contains an Active Directory domain named adatum.com that is synced to Microsoft Azure Active Directory (Azure AD).
The domain contains 100 user accounts.
The city attribute for all the users is set to the city where the user resides.
You need to modify the value of the city attribute to the three-letter airport code of each city. What should you do?

A. From Active Directory Administrative Center, select the Active Directory users, and then modify the Properties settings.
B. From the Microsoft 365 admin center, select the users, and then use the Bulk actions option.
C. From Azure Cloud Shell, run the Get-MsolUser and Set-MSOluser cmdlets.
D. From Windows PowerShell on a domain controller, run the Get-AzureADUser and Set-AzureADUser cmdlets.

Answer: A

Explanation:
The user accounts are synced from the on-premise Active Directory to the Microsoft Azure Active Directory (Azure AD). Therefore, the city attribute must be changed in the on-premise Active Directory.
You can modify certain attributes of multiple user accounts simultaneously by selecting them in Active Directory Administrative Center or Active Directory Users and Computers, right clicking then selecting Properties.
The other three options all suggest modifying the city attribute of the users in the Azure Active Directory which is incorrect.
Reference:
https://blogs.technet.microsoft.com/canitpro/2015/11/25/step-by-step-managing-multiple-user-accounts-via-acti

NEW QUESTION 22

- (Exam Topic 5)
Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

You may now click next to proceed to the lab. Lab information
Use the following login credentials as needed:
To enter your username, place your cursor in the Sign in box and click on the username below.
To enter your password, place your cursor in the Enter password box and click on the password below.
Microsoft 365 Username: admin@LODSe878763.onmicrosoft.com
Microsoft 365 Password: m3t^We$Z7&xy
If the Microsoft 365 portal does not load successfully in the browser, press CTRL-K to reload the portal in a new browser tab.
The following information is for technical support purposes only:
Lab Instance: 11440873

You need to ensure that all the users in your organization are prompted to change their password every 60 days. The solution must ensure that the users are reminded that their password must be changed 10 days before the required change.
To answer, sign in to the Microsoft 365 portal.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
You need to configure the Password Expiration Policy.
* 1. Sign in to the Microsoft 365 Admin Center.
* 2. In the left navigation pane, expand the Settings section then select the Settings option.
* 3. Click on Security and Privacy.
* 4. Select the Password Expiration Policy.
* 5. Ensure that the checkbox labelled "Set user passwords to expire after a number of days" is ticked.
* 6. Enter 60 in the "Days before passwords expire" field.
* 7. Enter 10 in the "Days before a user is notified about expiration" field.
* 8. Click the 'Save changes' button.

NEW QUESTION 26
- (Exam Topic 5)
Your company has a Microsoft 365 subscription and a Microsoft Azure Active Directory (Azure AD) tenant named contoso.onmicrosoft.com.
An external vendor has a Microsoft account that has a username of user1@outlook.com. You plan to provide user1@outlook.com with access to several resources in the subscription.
You need to add the external user account to contoso.onmicrosoft.com. The solution must ensure that the external vendor can authenticate by using user1@outlook.com.
What should you do?

A. From Azure Cloud Shell, run the New-AzureADUser cmdlet and specify –UserPrincipalName user1@outlook.com.
B. From the Microsoft 365 admin center, add a contact, and then specify user1@outlook.com as the email address.
C. From the Azure portal, add a new guest user, and then specify user1@outlook.com as the email address.
D. From the Azure portal, add a custom domain name, and then create a new Azure AD user and use user1@outlook.com as the username.

Answer: C

Explanation:
You can invite guest users to the directory, to a group, or to an application. After you invite a user through any of these methods, the invited user's account is added to Azure Active Directory (Azure AD), with a user type of Guest. The guest user must then redeem their invitation to access resources. An invitation of a

user does not expire.
The invitation will include a link to create a Microsoft account. The user can then authenticate using their Microsoft account. In this question, the external vendor already has a Microsoft account (user1@outlook.com) so he can authenticate using that.
Reference:
https://docs.microsoft.com/en-us/azure/active-directory/b2b/add-users-administrator

NEW QUESTION 31
- (Exam Topic 5)
Your company has a Microsoft 365 subscription.
You plan to move several archived PST files to Microsoft Exchange Online mailboxes. You need to create an import job for the PST files.
Which three actions should you perform before you create the import job? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.

A. Create a Microsoft Azure Storage account.
B. From Microsoft 365 Security & Compliance, retrieve the SAS key.
C. Run azcopy.exe to copy the PST files to Microsoft Azure Storage
D. Use Microsoft Azure Storage Explorer to copy the PST files to Azure Storage.
E. Create a PST import mapping file.

Answer: BCE

Explanation:
The first step is to download and install the Azure AzCopy tool, which is the tool that you run in Step 2 to upload PST files to Office 365. You also copy the SAS URL for your organization. This URL is a combination of the network URL for the Azure Storage location in the Microsoft cloud for your organization and a Shared Access Signature (SAS) key. This key provides you with the necessary permissions to upload PST files to your Azure Storage location.
Now you're ready to use the AzCopy.exe tool to upload PST files to Office 365. This tool uploads and stores them in an Azure Storage location in the Microsoft cloud.
After the PST files have been uploaded to the Azure Storage location for your Office 365 organization, the next step is to create a comma-separated value (CSV) file that specifies which user mailboxes the PST files will be imported to. You'll submit this CSV file when you create a PST Import job.
Reference:
https://docs.microsoft.com/en-us/office365/securitycompliance/use-network-upload-to-import-pst-files

NEW QUESTION 33
- (Exam Topic 5)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
Your company has a main office and three branch offices. All the branch offices connect to the main office by using a WAN link. The main office has a high-speed Internet connection. All the branch offices connect to the Internet by using the main office connections.
Users use Microsoft Outlook 2016 to connect to a Microsoft Exchange Server mailbox hosted in the main office.
The users report that when the WAN link in their office becomes unavailable, they cannot access their mailbox.
You create a Microsoft 365 subscription, and then migrate all the user data to Microsoft 365.
You need to ensure that all the users can continue to use Outlook to receive email messages if a WAN link fails.
Solution: You enable Cached Exchange Mode for all the Outlook profiles. Does this meet the goal?

A. Yes
B. No

Answer: B

NEW QUESTION 34
- (Exam Topic 5)
You have a hybrid deployment of Microsoft 365 that contains the users shown in the following table.

Name	Member of
User1	Group2
User2	Group1, Group2
User3	Group1

You have an on-premises web app named AppA. Group1 has permissions to access AppA. You configure an Azure Active Directory (Azure AD) Application Proxy.
You add an Application Proxy entry for AppA as shown the exhibit. (Click the Exhibit tab.)

Add your own on-premises application

+ Add   ✕ Discard

Application proxy provides single sign-on (SSO) and secure remote access for web applications hosted on-premises. Learn more about Application Proxy

Basic Settings

Name * ⓘ	AppA ✓
Internal Url * ⓘ	https://Server1.contoso.com ✓
External Url ⓘ	https:// ∨ appa ✓ -contoso1919.msappproxy.net/ ∨
	https://appa-contoso1919.msappproxy.net/ 📋
Pre Authentication ⓘ	Passthrough ∨
Connector Group ⓘ	Default ∨

Additional Settings

Backend Application Timeout ⓘ	Default ∨
Use HTTP-Only Cookie ⓘ	Yes **No**
Use Secure Cookie ⓘ	**Yes** No
Use Persistent Cookie ⓘ	Yes **No**
Translate URLs In	
Headers ⓘ	**Yes** No
Application Body ⓘ	Yes **No**

You assign the AppA enterprise application in Azure to Group2.
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can access AppA by using the external URL.	○	○
User2 can access AppA in the My Apps portal.	○	○
User3 can access AppA by using the external URL.	○	○

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: No
User1 is in Group2. The enterprise app is assigned to Group2. However, the authentication method is "Passthrough" so the authentication will be passed to the on-premises web app. Only Group1 has access to the web app. Therefore, User1 will not be able to access the web app.
Box 2: Yes.
User2 is in Group1 and Group2. The enterprise app is assigned to Group2. The authentication method is "Passthrough" so the authentication will be passed to the on-premises web app. Group1 has access to the web app. Therefore, User2 will be able to access the web app in MyApps.
Box 3: No
User3 is in Group1. Group1 has access to the web app so User3 could access the app on-premises. However, the enterprise app is assigned to Group2 which User3 is not a member of. Therefore, User3 will not be able to access the external URL of the web app.

NEW QUESTION 37
- (Exam Topic 5)
Your network contains an Active Directory domain named .Ki.ituin.com that is synced to Microsoft Azure Active Directory (Azure AD).
The domain contains 10O user accounts.
The city attribute for all the users is set to the city where the user resides.
You need to modify the value of the city attribute to the three letter airport code of each city. What should you do?

A. from Active Directory Administrative Center, select the Active Directory users, and then modify the Property settings.B From the Microsoft 365 admin center, select the users, and then use the Bulk actions option.
B. From Azure Cloud Shell, run the Get-AzureADUsers, and then use the Bulk actions option.
C. From Azure Cloud Shell, run the Get-AzureADUser and set-AzureADUser cmdlets.

D. From Windows PowerShell on a domain controller, run the Get-AzureADUser and Set-AzureADUser cmdlets.

Answer: C

Explanation:
The user accounts are synced from the on-premise Active Directory to the Microsoft Azure Active Directory (Azure AD). Therefore, the city attribute must be changed in the on-premise Active Directory.
You can use Windows PowerShell on a domain controller and run the Get-ADUser cmdlet to get the required users and pipe the results into Set-ADUser cmdlet to modify the city attribute.
Reference:
https://docs.microsoft.com/en-us/powershell/module/addsadministration/set-aduser?view=win10-ps

NEW QUESTION 42
- (Exam Topic 5)
You need to meet the application requirement for the Office 365 ProPlus applications. You create a XML file that contains the following settings.

```
<Add SourcePath="\\Server1\OfficeSoftware"
     OfficeClientEdition="32"
     Channel="Targeted"
     AllowCdnFallback="True">
  <Product ID="O365ProPlusRetail">
     <Language ID="MatchOS" Fallback="en-us" />
  </Product>
</Add>
```

Use the drop-down menus to select the choice that complete each statement based on the information presented in the graphic.
NOTE: Each correct selection is worth one point.

Answer Area

Office 365 ProPlus feature updates will be installed [answer choice].

| automatically once a year |
| automatically twice a year |
| manually |

To meet the technical requirement for Office 365 ProPlus, [answer choice].

| Change SourcePath to DownloadPath. |
| Set the value for AllowCdnFallback to False. |
| Add SCLCacheOverride = 1 to the Product section. |

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Answer Area

Office 365 ProPlus feature updates will be installed [answer choice].

| automatically once a year |
| automatically twice a year |
| manually |

To meet the technical requirement for Office 365 ProPlus, [answer choice].

| Change SourcePath to DownloadPath. |
| Set the value for AllowCdnFallback to False. |
| Add SCLCacheOverride = 1 to the Product section. |

NEW QUESTION 45
- (Exam Topic 5)
You are developing a new Microsoft Teams app that will contain the following functionality:
• Start a new chat
• Prompt users to install an app.
• Make a Microsoft Graph API call.
• Trigger a search-based command.
Which two functionalities can be implemented by using a deep link? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point

A. Prompt users to install an app.
B. Trigger a search-based command.
C. Start a new chat
D. Make a Microsoft Graph API call.

Answer: AC

NEW QUESTION 50
- (Exam Topic 5)
You have a Microsoft 365 subscription you use Active Directory (Azure AD) tenant named contoso.com. The tenant contains the Windows 10 devices shown in the following table.

Name	Version	Language
Device1	x86	German
Device2	x64	English
Device3	x64	French

All the devices are managed by using Microsoft Endpoint Manager and are members of a group named Group1.
From the Microsoft Endpoint Manager admin center, you create an app suite named App1 for Microsoft Office 365 apps.
You configure the App1 settings as shown in the exhibit. (Click the Exhibit tab.)

App Suite Settings □ X

These settings apply to all apps you have selected in the suite.
Learn more

Architecture *
[32-bit] [**64-bit**]

Update channel *
[Semi-Annual ⌄]

Version to install on end user devices. Learn more
[**Latest**] [Specific]

Specific version
[Latest version ⌄]

Remove other versions of Office (MSI) from end user devices.
Learn more
[**Yes**] [No]

Automatically accept the app end user license agreement
[Yes] [**No**]

Use shared computer activation
[Yes] [**No**]

Languages ⊙
German, OS Languages

You assign App1 to Group1.
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
Note: Each correct selection is worth one point.

Statements	Yes	No
On Device1, Office 365 ProPlus will be installed and the display language will be German.	○	○
On Device2, Office 365 ProPlus will be installed and both the German and English display languages will be installed.	○	○
On Device3, Office 365 ProPlus will be installed and both the German and French display languages will be installed.	○	○

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: No
Device1 is x86 (32-bit) so Office 365 will not be installed. Box 2: Yes
Device2 is x64 (64-bit) so Office 365 will be installed. The German language pack will be installed and the OS language pack (English) will be installed.
Box 3: Yes
Device2 is x64 (64-bit) so Office 365 will be installed. The German language pack will be installed and the OS language pack (French) will be installed.

NEW QUESTION 53
- (Exam Topic 5)
Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.
When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.
Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.
Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.
Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.
You may now click next to proceed to the lab. Lab information
Use the following login credentials as needed:
To enter your username, place your cursor in the Sign in box and click on the username below.
To enter your password, place your cursor in the Enter password box and click on the password below.
Microsoft 365 Username: admin@LODSe426243.onmicrosoft.com Microsoft 365 Password: 3&YWyjse-6-d
If the Microsoft 365 portal does not load successfully in the browser, press CTRL-K to reload the portal in a new browser tab.
The following information is for technical support purposes only:
Lab Instance: 10887751
You need to ensure that all mobile devices that connect to Microsoft Exchange Online meet the following requirements:

≫ A password must be used to access the devices.

≫ Data on the devices must be encrypted.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
You need to modify the default mobile device mailbox policy.
* 1. Go to the Exchange Admin Center.
* 2. Select 'mobile' then select 'mobile device mailbox policies'.
* 3. Click the 'Create a policy' button.
* 4. Select the Default policy and click the edit icon (pencil icon).
* 5. Select the 'Security' link to open the security settings.
* 6. Tick the 'Require a password' checkbox.
* 7. Tick the 'Require encryption on device' checkbox.
* 8. Click the Save button to save the changes. References:
https://docs.microsoft.com/en-us/exchange/clients-and-mobile-in-exchange-online/exchange-activesync/mobile

NEW QUESTION 58
- (Exam Topic 5)
Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.
When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. A user named Johanna Lorenz recently left the company. A new employee named Ben Smith will handle the tasks of Johanna Lorenz.
You
need to create a user named Ben Smith. Ben Smith must be able to sign in to http://myapps.microsoft.com and open Microsoft Word Online.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
You need to create a user account and assign a license to the account. You then To create the user account and mailbox:

≫ In the Microsoft 365 admin center, go to User management, and select Add user.

≫ Enter the name Ben Smith in the First Name and Last Name fields.

≫ Enter Ben.Smith in the username field and click Next.

≫ Assign a Microsoft 365 license to the account.

≫ Click Next.

≫ Click Next again.

≫ Click 'Finish adding'.

NEW QUESTION 63
- (Exam Topic 5)
Your network contains an on-premises Active Directory domain.
Your company has a security policy that prevents additional software from being installed on domain controllers.
You need to monitor a domain controller by using Microsoft Azure Advanced Threat Protection (ATP). What should you do? More than once choice may achieve the goal. Select the BEST answer.

A. Deploy an Azure ATP standalone sensor, and then configure port mirroring.
B. Deploy an Azure ATP standalone sensor, and then configure detections.
C. Deploy an Azure ATP sensor, and then configure detections.
D. Deploy an Azure ATP sensor, and then configure port mirroring.

Answer: C

Explanation:
If you're installing on a domain controller, you don't need a standalone ATP sensor. You need to configure the detections to detect application installations. With an ATP sensor (non-standalone), you don't need to configure port mirroring.
Reference:
https://docs.microsoft.com/en-us/azure-advanced-threat-protection/install-atp-step5 https://docs.microsoft.com/en-us/azure-advanced-threat-protection/atp-capacity-planning#choosing-the-right-sen

NEW QUESTION 68
- (Exam Topic 5)
Your network contains an on premises Active Directory domain named contoso.com. The domain contains five domain controllers.
Your company purchases Microsoft 365 and creates a Microsoft Azure Active Directory (Azure AD) tenant named contoso.onmicrosoft.com.
You plan to establish federation authentication between on premises Active Directory and the Azure AD tenant by using Active Directory Federation Services (AD FS).
You need to establish the federation.
What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point

Action to perform before establishing the federation:

| From the Azure portal, add a custom domain name. |
| From the Azure portal, configure an authentication method. |
| From a domain controller, install a Pass-through Authentication Agent. |
| From a domain controller, install Windows Identity Foundation 3.5. |

Tool to use to establish the federation:

| Active Directory Domains and Trusts |
| Azure AD Connect |
| The AD FS console |
| The Azure portal |

A. Mastered
B. Not Mastered

Answer: A

Explanation:
The on-premises Active Directory domain is named contoso.com. Before you can configure federation authentication between on-premises Active Directory and the Azure AD tenant, you need to add the domain contoso.com to Microsoft 365. You do this by adding a custom domain name.
The next step is to establish the federation. You can configure AD FS by using Azure AD Connect. Reference:
https://docs.microsoft.com/en-us/azure/active-directory/hybrid/how-to-connect-install-custom#configuring-feder

NEW QUESTION 69
- (Exam Topic 5)
You have a backend service that will access the Microsoft Graph API. The backend service is hosted
on-premises. You need to configure the service to authenticate by using the most secure authentication method. What should you configure the service to use?

A. a client secret
B. a certificate
C. a hash
D. a shared key

Answer: B

NEW QUESTION 74
- (Exam Topic 5)
You plan to create a single-tenant console app that will use the Microsoft identity platform.
You need to ensure that the app can use the device code flow to access Microsoft Graph and read email on behalf of the authenticated user.
Which three actions should you perform? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

A. Set Supported account types to Accounts In this organizational directory only
B. Generate a client secret for the app

C. Set Supported account types to Accounts in any organizational directory
D. Enable the Default client type option.
E. Add redirect URIs.
F. From the Expose an API settings, create a custom scope.

Answer: BCE

NEW QUESTION 77
- (Exam Topic 5)
Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.
When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.
Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.
Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. Use the following login credentials as needed:
To enter your username, place your cursor in the Sign in box and click on the username below.
To enter your password, place your cursor in the Enter password box and click on the password below.
Microsoft 365 Username: admin@LODSe878763.onmicrosoft.com
Microsoft 365 Password: m3t^We$Z7&xy
If the Microsoft 365 portal does not load successfully in the browser, press CTRL-K to reload the portal in a new browser tab.
The following information is for technical support purposes only:
Lab Instance: 11440873

Your organization plans to start a new collaborative project that will contain email and chat communications, as well as regular meetings.
You need to create a team in Microsoft Teams for the planned project. The team must have the following configurations:

⟩ Be named Project1.
⟩ Have an owner named Lee Gu.
⟩ Have a channel named Channel1.
To answer, sign in to the Microsoft 365 portal.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
You need to create a team. You can create a team in the Microsoft Teams Admin Center or in the Microsoft Teams app. However, to be able to specify the team owner when creating the team, you need to use the Teams Admin Center.
* 1. Go to the Microsoft Teams Admin Center.
* 2. In the left navigation pane, expand the Teams section and select 'Manage Teams'.
* 3. Click the '+ Add' link to add a new team.
* 4. Give the team the name Project1.
* 5. In the Team Owner field, remove your name which is there by default and add Lee Gu.
* 6. Click the 'Create a team' button to create the team.
* 7. In the teams list, select the Project1 team.
* 8. Click on 'Channels'.
* 9. Click the '+ Add' link to add a new channel.
* 10. Give the channel the name Channel1.
* 11. Click the Apply button to create the channel.

NEW QUESTION 82
- (Exam Topic 5)

You are developing an app that will query the tenant for the names of all the Microsoft Teams teams in the organization. What permission will the app require? Your solution must follow the principle of least privilege.

A. Grou
B. Rea
C. All
D. Directory.Read.All
E. Channel.ReadBasic.All
F. TeamSettings.Read.All

Answer: D

NEW QUESTION 83
- (Exam Topic 5)
Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

The following information is for technical support purposes only:

Lab Instance: 10811525

Your organization recently partnered with another organization named Fabrikam, Inc.

You plan to provide a Microsoft 365 license to an external user named user1@fabrikam.com, and then to share documents with the user.

You need to invite user1@fabrikam.com to access your organization.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
You need to create a guest account for user1.
* 1. Go to the Azure Active Directory admin center.
* 2. Select Users.
* 3. Click the 'New guest user' link.
* 4. Select the 'Invite user' option.
* 5. Give the account a name (User1) and enter user1@fabrikam.com in the email address field.
* 6. Click the 'Invite' button. References:
https://docs.microsoft.com/en-us/azure/active-directory/b2b/b2b-quickstart-add-guest-users-portal

NEW QUESTION 87
- (Exam Topic 5)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company plans to deploy several Microsoft Office 365 services.

You need to design an authentication strategy for the planned deployment. The solution must meet the following requirements:
* Users must be able to authenticate during business hours only.
* Authentication requests must be processed successfully if a single server fails.
* When the password for an on-premises user account expires, the new password must be enforced the next time the user signs in.
* Users who connect to Office 365 services from domain-joined devices that are connected to the internal network must be signed in automatically.
Solution: You design an authentication strategy that contains a pass-through authentication model. The solution contains two servers that have an Authentication Agent installed and password hash synchronization configured.
Does this meet the goal?

A. Yes
B. No

Answer: B

Explanation:
This solution meets the following goals:

> Users must be able to authenticate during business hours only.

> Authentication requests must be processed successfully if a single server fails.

> When the password for an on-premises user account expires, the new password must be enforced the next time the user signs in.
However, the following goal is not met:

> Users who connect to Office 365 services from domain-joined devices that are connected to the internal network must be signed in automatically.
You would need to configure Single-sign on (SSO) to meet the last requirement. Reference:

https://docs.microsoft.com/en-us/azure/security/azure-ad-choose-authn

NEW QUESTION 91
- (Exam Topic 5)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You have a hybrid deployment of Microsoft 365 that contains the objects shown in the following table.

Name	Type	Source
User1	User	Azure Active Directory (Azure AD)
User2	User	Windows Server Active Directory
Group1	Group	Cloud
Group2	Group	Windows Server Active Directory

Azure AD Connect has the following settings:
> Password Hash Sync: Enabled
> Password writeback: Enabled
> Group writeback: Enabled
You need to add User2 to Group 2.
Solution: You use the Azure Active Directory admin center.
Does this meet the goal?

A. Yes
B. No

Answer: A

NEW QUESTION 94
- (Exam Topic 5)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
Your company plans to deploy several Microsoft Office 365 services.
You need to design an authentication strategy for the planned deployment. The solution must meet the following requirements:
* Users must be able to authenticate during business hours only.
* Authentication requests must be processed successfully if a single server fails.
* When the password for an on-premises user account expires, the new password must be enforced the next time the user signs in.
* Users who connect to Office 365 services from domain-joined devices that are connected to the internal network must be signed in automatically.
Solution: You design an authentication strategy that uses password hash synchronization and seamless SSO. The solution contains two servers that have an Authentication Agent installed.
Does this meet the goal?

A. Yes
B. No

Answer: B

Explanation:
Reference:
https://docs.microsoft.com/en-us/azure/security/azure-ad-choose-authn

NEW QUESTION 96
- (Exam Topic 5)
Your company has three main offices and one branch office. The branch office is used for research. The company plans to implement a Microsoft 365 tenant and to deploy multi-factor authentication.
You need to recommend a Microsoft 365 solution to ensure that multi-factor authentication is enforced only for users in the branch office.
What should you include in the recommendation?

A. Microsoft Azure Active Directory (Azure AD) conditional access.
B. Microsoft Azure Active Directory (Azure AD) password protection.
C. a device compliance policy
D. a Microsoft Intune device configuration profile

Answer: A

Explanation:
With Azure Active Directory (Azure AD) Conditional Access, you can control how authorized users can access your cloud apps. The location condition of a Conditional Access policy enables you to tie access controls settings to the network locations of your users.
For this question, we need to configure a location condition in a conditional access policy and apply the policy to users in that location (the branch office). The conditional access policy can be required to 'Allow Access' but 'Required MFA'.
Reference:
https://docs.microsoft.com/en-us/azure/active-directory/conditional-access/location-condition

NEW QUESTION 100
- (Exam Topic 5)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the

stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You have a Microsoft 365 subscription.
You discover that some external users accessed content on a Microsoft SharePoint site. You modify the SharePoint sharing policy to prevent sharing outside your organization.
You need to be notified if the SharePoint policy is modified in the future. Solution: From the SharePoint site, you create an alert.
Does this meet the goal?

A. Yes
B. No

Answer: B

Explanation:
You need to create a threat management policy in the Security & Compliance admin center.

NEW QUESTION 104
- (Exam Topic 5)
You have a Microsoft Teams app that contains a conversational bot. The bot uses task modules to reply to users. When the hot receives a new message, the following code is executed before a response is sent back to the user to decide whether the bot should continue the conversation.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Reference:
https://github.com/OfficeDev/microsoft-teams-sample-task-module-nodejs

NEW QUESTION 109
- (Exam Topic 5)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You have a Microsoft 365 subscription.
You discover that some external users accessed content on a Microsoft SharePoint site. You modify the SharePoint sharing policy to prevent sharing outside your organization.
You need to be notified if the SharePoint policy is modified in the future.
Solution: From the Security & Compliance admin center, you create a threat management policy. Does this meet the goal?

A. Yes
B. No

Answer: A

Explanation:
We can create a threat management policy to alert us when the sharing policy is changed.

Create a new Alert policy > under Category select Threat Management > under 'Activity is' scroll down to the 'Site administration activities' and select 'Changed a sharing policy'.

NEW QUESTION 111
- (Exam Topic 5)
You have three devices enrolled in Microsoft Intune as shown in the following table.

Name	Platform	BitLocker Drive Encryption (BitLocker)	Member of
Device1	Windows 10	Disabled	Group3
Device2	Windows 10	Disabled	Group2, Group3
Device3	Windows 10	Disabled	Group2

The device compliance policies in Intune are configured as shown in the following table.

Name	Platform	Require BitLocker	Assigned
Policy1	Windows 10 and later	Require	Yes
Policy2	Windows 10 and later	Not configured	Yes
Policy3	Windows 10 and later	Require	No

The device compliance policies have the assignment shown in the following table.

Name	Assigned to
Policy1	Group3
Policy2	Group2

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Statements	Yes	No
Device1 is compliant.	○	○
Device2 is compliant.	○	○
Device3 is compliant.	○	○

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Device 1:
No because Device1 is in group3 which has Policy1 assigned which requires BitLocker. Device 2:
No because Device2 is in group3 which has Policy1 assigned which requires BitLocker. Device2 is also in Group2 which has Policy2 assigned but the BitLocker requirement is not configured in Policy2.
Device3:
Yes because Device3 is in Group2 which has Policy2 assigned but the BitLocker requirement is not configured in Policy2.
Reference:
https://blogs.technet.microsoft.com/cbernier/2017/07/11/windows-10-intune-windows-bitlocker-management-ye

NEW QUESTION 113
- (Exam Topic 5)
Your company has an Azure Active Directory (Azure AD) tenant named contoso.com and a Microsoft 365 subscription.
Contoso.com contains the users shown in the following table.

Name	Group
User1	Group1
User2	None

You add an enterprise application named App1 to contoso.com. You configure the following self-service settings for App1:

≫ Allow users to request access to this application is set to Yes.

≫ To which group should assigned users be added is set to Group1.

≫ Who is allowed to approve access to this application is set to User2.

≫ Require approval before granting access to this application is set to Yes.
For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can request access to App1.	○	○
When User2 requests access to App1, the user is added to Group1 automatically.	○	○
User2 can approve requests for App1.	○	○

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Yes.
User1 can request access to App1 because "Allow users to request access to this application" is set to Yes. Box 2: No.
User2 is an approver. If User2 requests access to App1, he will still need to approve the request before he is added to Group1.
Box 3: Yes.
User2 can approve requests for App1 because "Who is allowed to approve access to this application" is set to User2.
Reference:
https://docs.microsoft.com/en-us/azure/active-directory/manage-apps/manage-self-service-access

NEW QUESTION 115
- (Exam Topic 5)
Your company has a Microsoft 365 subscription that has multi-factor authentication configured for all users. Users on the network report that they are prompted for multi-factor authentication multiple times a day.
You need to reduce the number of times the users are prompted for multi-factor authentication on their company-owned devices.
What should you do?

A. Enable the multi-factor authentication trusted IPs setting, and then verify each device as a trusted device.
B. Enable the remember multi-factor authentication setting, and then verify each device as a trusted device.
C. Enable the multi-factor authentication trusted IPs setting, and then join all client computers to Microsoft Azure Active Directory (Azure AD).
D. Enable the remember multi-factor authentication setting, and then join all client computers to Microsoft Azure Active Directory (Azure AD).

Answer: B

Explanation:
The remember Multi-Factor Authentication feature for devices and browsers that are trusted by the user is a free feature for all Multi-Factor Authentication users.
Users can bypass subsequent verifications for a specified number of days, after they've successfully signed-in to a device by using Multi-Factor Authentication.
The feature enhances usability by minimizing the number of times a user has to perform two-step verification on the same device.
Reference:
https://docs.microsoft.com/en-us/azure/active-directory/authentication/howto-mfa-mfasettings

NEW QUESTION 117
- (Exam Topic 5)
You have a Microsoft 365 subscription.
Your company deploys an Active Directory Federation Services (AD FS) solution. You need to configure the environment to audit AD FS user authentication.
Which two actions should you perform? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

A. From all the AD FS servers, run audltpol.exe.
B. From all the domain controllers, run the set-AdminAuditLogConfig cmdlet and specify the –LogiLevel parameter.
C. On a domain controller install Azure AD Connect Health for AD DS.
D. From the Azure AO Connect server, run the Register-AzureADCConnectHealthSyncAgent cmdlet.
E. On an server, install Azure AD Connect Health for AD FS.

Answer: DE

Explanation:
To audit AD FS user authentication, you need to install Azure AD Connect Health for AD FS. The agent should be installed on an AD FS server. After the installation, you need to register the agent by running the Register-AzureADConnectHealthSyncAgent cmdlet.
Reference:
https://docs.microsoft.com/en-us/azure/active-directory/hybrid/how-to-connect-health-agent-install https://docs.microsoft.com/en-us/azure/active-directory/hybrid/how-to-connect-health-adfs

NEW QUESTION 119
- (Exam Topic 5)
You have a data loss prevention (DLP) policy.
You need to increase the likelihood that the DLP policy will apply to data that contains medical terms from the International Classification of Diseases (ICD-9-CM).
The solution must minimize the number of false positives.

Which two settings should you modify? To answer, select the appropriate settings in the answer area. NOTE: Each correct selection is worth one point.

Content contains *

Any of these ▼

PII Identifiers ✎
Sensitive information type   Instance count   Match accuracy

U.S. Social Security Number (SSN)
min	max	min	max
1	any	50	100

Add ▼

and ▼

Any of these ▼

Medical Terms ✎
Sensitive information type   Instance count   Match accuracy

International Classification of Diseases (ICD-9-CM)
min	max	min	max
1	any	50	100

A. Mastered
B. Not Mastered

Answer: A

Explanation:
You can tune your rules by adjusting the instance count and match accuracy to make it harder or easier for content to match the rules. Each sensitive information type used in a rule has both an instance count and match accuracy.
To make the rule easier to match, decrease the min
count and/or increase thme ax
count. You can also semt ax
toany
by deleting the numerical value.
To minimize the number of false positives, we need to increase the minimum match accuracy.
A sensitive information type is defined and detected by using a combination of different types of evidence. Commonly, a sensitive information type is defined by multiple such combinations, called patterns. A pattern that requires less evidence has a lower match accuracy (or confidence level), while a pattern that requires more evidence has a higher match accuracy (or confidence level).
Reference:
https://docs.microsoft.com/en-us/office365/securitycompliance/data-loss-prevention-policies
https://docs.microsoft.com/en-us/office365/securitycompliance/what-the-sensitive-information-types-look-for#i

NEW QUESTION 120
- (Exam Topic 5)
You are developing a single-page application (SPA) that authenticates users by using MSALjs. The SPA must meet the following requirements:
• Only allow access to the users in an organization named contoso.onmicrosoft.com.
• Support single sign-on (SSO) across tabs and user sessions.
How should you complete the code for the SPA? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.
Answer Area

```
const config = {
    auth: {
        clientId: "c10639eb-16ca-452b-a94d-ad8c43682819",
        authority:
                        "https://login.microsoftonline.com/consumers/",
        cachelocatio   "https://login.microsoftonline.com/organizations/",
                        "https://login.microsoftonline.com/contoso.onmicrosoft.com",
    }                               These are the selections for Authority
}

const myMSALObj = new UserAgentApplication(config);
```

B. Not Mastered

Answer: A

Explanation:

Answer Area

```
const config = {

    auth: {

        clientId: "c10639eb-16ca-452b-a94d-ad8c43682819",

        authority:

        cacheLocatio            "https://login.microsoftonline.com/consumers/",
                               "https://login.microsoftonline.com/organizations/",
        }                      "https://login.microsoftonline.com/contoso.onmicrosoft.com",
                                    These are the selections for Authority
    }

    const myMSALObj = new UserAgentApplication(config);
```

NEW QUESTION 124
- (Exam Topic 5)
Your company has a sales system that emails an alert to all the members of the sales department when a new sale is made.
You need to ensure that a notification is posted to a team channel when a new sale is made. The solution must minimize development effort.
Which two actions should you perform? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

A. Post XML to the webhook URL from the existing sales system.
B. Set the configurationUrl property of a connector in the manifest
C. Get an incoming webhook for the channel
D. Post JSON to the webhook URL from the existing sales system.

Answer: AC

NEW QUESTION 125
- (Exam Topic 5)
Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.
When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.
Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.
Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.
Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.
You may now click next to proceed to the lab. Lab information
Use the following login credentials as needed:
To enter your username, place your cursor in the Sign in box and click on the username below.
To enter your password, place your cursor in the Enter password box and click on the password below.
Microsoft 365 Username: admin@LODSe878763.onmicrosoft.com
Microsoft 365 Password: m3t^We$Z7&xy
If the Microsoft 365 portal does not load successfully in the browser, press CTRL-K to reload the portal in a new browser tab.
The following information is for technical support purposes only:

Next

You need to prevent all the users in your organization from sending an out of office reply to external users.
To answer, sign in to the Microsoft 365 portal.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
You need to modify the default remote domain. When you add a remote domain, you specify the domain name and the settings apply to that domain. The default remote domain applies to all other domains. Therefore, we need to disable Out of Office replies for external users in the settings of the default remote domain.
* 1. Go to the Exchange Admin Center.
* 2. Click Mail Flow in the left navigation pane.
* 3. Click on Remote Domains.
* 4. Select the default remote domain and click the Edit icon (pencil icon).
* 5. In the 'Out of Office automatic reply types' section, select 'None'.
* 6. Click Save to save to changes to the default remote domain.

NEW QUESTION 128
- (Exam Topic 5)
Your network contains three Active Directory forests.
You create a Microsoft Azure Active Directory (Azure AD) tenant. You plan to sync the on premises Active Directory (Azure AD).
You need to recommend a synchronization solution. The solution must ensure that the synchronization can complete successfully and as quickly as possible if a single server fails.
What should you include in the recommendation?

A. Three Azure AD Connect sync servers and three Azure AD Connect sync servers in staging mode
B. One Azure AD Connect sync servers one Azure AD Connect sync servers in staging mode
C. Three Azure AD Connect sync servers and one Azure AD Connect sync servers in staging mode
D. six Azure AD Connect sync servers and three Azure AD Connect sync servers in staging mode

Answer: B

Explanation:
Azure AD Connect can be active on only one server. You can install Azure AD Connect on another server for redundancy but the additional installation would need to be in Staging mode. An Azure AD connect installation in Staging mode is configured and ready to go but it needs to be manually switched to Active to perform directory synchronization.
Reference:
https://docs.microsoft.com/en-us/azure/active-directory/hybrid/how-to-connect-install-custom

NEW QUESTION 132
- (Exam Topic 5)
Your network contains two disconnected on-premises Active Directory forests named adatum.com and contoso.com.
You have an Azure AD tenant named nwtraders.com
You need to sync the on-premises forests to nwtraders.com. The solution must meet the following requirements:
• Provide the ability to connect to adatum.com and contoso.com.
• Provide support for Microsoft Exchange hybrid.
• Provide the ability to sync device objects.
• Minimize administrative effort.

Tools

Azure AD Connect
Azure AD Connect Cloud Sync
Active Directory Migration Tool

Answer Area

Provide the ability to sync device objects:	Tool
Provide support for Microsoft Exchange hybrid:	Tool
Provide the ability to connect to adatum.com and contoso.com.	Tool

A. Mastered
B. Not Mastered

Answer: A

Explanation:

Tools

Azure AD Connect
Azure AD Connect Cloud Sync
Active Directory Migration Tool

Answer Area

Provide the ability to sync device objects:	Azure AD Connect
Provide support for Microsoft Exchange hybrid:	Azure AD Connect Cloud Sync
Provide the ability to connect to adatum.com and contoso.com.	Active Directory Migration Tool

NEW QUESTION 136
- (Exam Topic 5)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
Your company has a Microsoft Office 365 tenant.
You suspect that several Office 365 features were recently updated.
You need to view a list of the features that were recently updated in the tenant. Solution: You review the Windows release health in the Microsoft 365 admin center. Does this meet the goal?

A. Yes
B. No

Answer: A

Explanation:
Reference:
https://techcommunity.microsoft.com/t5/windows-it-pro-blog/windows-release-health-now-available-in-the-adm

NEW QUESTION 139
- (Exam Topic 5)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You have a hybrid deployment of Microsoft 365 that contains the objects shown in the following table.

Name	Type	Source
User1	User	Azure Active Directory (Azure AD)
User2	User	Windows Server Active Directory
Group1	Group	Cloud
Group2	Group	Windows Server Active Directory

Azure AD Connect has the following settings:
➤ Password Hash Sync: Enabled
➤ Password writeback: Enabled
➤ Group writeback: Enabled
You need to add User2 to Group 2.
Solution: You use the Security & Compliance admin center. Does this meet the goal?

A. Yes
B. No

Answer: B

NEW QUESTION 141
- (Exam Topic 5)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the

stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has 3,000 users. All the users are assigned Microsoft 365 E3 licenses.

Some users are assigned licenses for all Microsoft 365 services. Other users are assigned licenses for only certain Microsoft 365 services.

You need to determine whether a user named User1 is licensed for Exchange Online only. Solution: You run the Get-MsolAccountSku cmdlet.

Does this meet the goal?

A. Yes
B. No

Answer: B

Explanation:
The Get-MsolAccountSku cmdlet returns all the SKUs that the company owns. It does not tell you which licenses are assigned to users.
Reference:
https://docs.microsoft.com/en-us/powershell/module/msonline/get-msolaccountsku?view=azureadps-1.0

NEW QUESTION 146
- (Exam Topic 5)
You have a Microsoft 365 Enterprise subscription.

You have a conditional access policy to force multi factor .mthentication when accessing Microsoft SharePoint from a mobile device

You need to view which users authenticated by using multi factor authentication. What should you do?

A. From the Microsoft 36S admin center, view the Security Compliance reports.
B. From the Azure Active Directory admin center, view the user sign-ins.
C. From the Microsoft 365 admin center, view the Usage reports.
D. From the Azure Active Directory admin center, view the audit logs.

Answer: B

Explanation:
With the sign-ins activity report in the Azure portal, you can get the information you need to determine how your environment is doing.

The sign-ins report can provide you with information about the usage of managed applications and user sign-in activities, which includes information about multi-factor authentication (MFA) usage. The MFA data gives you insights into how MFA is working in your organization
References:
https://docs.microsoft.com/en-us/azure/active-directory/authentication/howto-mfa-reporting

NEW QUESTION 149
- (Exam Topic 5)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an on-premises Active Directory forest named contoso.com. The forest contains the following domains:

> Contoso.com

> East.contoso.com

An Azure AD Connect server is deployed to contoso.com. Azure AD Connect syncs to an Azure Active Directory (Azure AD) tenant.

You deploy a new domain named west.contoso.com to the forest.

You need to ensure that west.contoso.com syncs to the Azure AD tenant.

Solution: You install a new Azure AD Connect server in west.contoso.com and set AD Connect to active mode.

Does this meet the goal?

A. Yes
B. No

Answer: A

NEW QUESTION 152
- (Exam Topic 5)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain.

You deploy a Microsoft Azure Active Directory (Azure AD) tenant. Another administrator configures the domain to synchronize to Azure AD.

You discover that 10 user accounts in an organizational unit (OU) are NOT synchronized to Azure AD. All the other user accounts synchronized successfully.

You review Azure AD Connect Health and discover that all the user account synchronizations completed successfully.

You need to ensure that the 10 user accounts are synchronized to Azure AD.

Solution: From Azure AD Connect, you modify the Azure AD credentials. Does this meet the goal?

A. Yes
B. No

Answer: B

Explanation:
The question states that "all the user account synchronizations completed successfully". Therefore, the Azure AD credentials are configured correctly in Azure AD Connect. It is likely that the 10 user accounts are being excluded from the synchronization cycle by a filtering rule.
Reference:
https://docs.microsoft.com/en-us/azure/active-directory/hybrid/how-to-connect-sync-configure-filtering

NEW QUESTION 156
- (Exam Topic 5)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
Your network contains an Active Directory forest. You deploy Microsoft 365.
You plan to implement directory synchronization.
You need to recommend a security solution for the synchronized identities. The solution must meet the following requirements:
➤ Users must be able to authenticate successfully to Microsoft 365 services if Active Directory becomes unavailable.
➤ Users passwords must be 10 characters or more.
Solution: Implement password hash synchronization and configure password protection in the Azure AD tenant.
Does this meet the goal?

A. Yes
B. No

Answer: B

Explanation:
Reference:
https://docs.microsoft.com/en-us/azure/active-directory/hybrid/how-to-connect-password-hash-synchronization

NEW QUESTION 159
- (Exam Topic 5)
Your network contains an on-premises Active Directory domain named contoso.com that is synced to a Microsoft Azure Active Directory (Azure AD) tenant.
The on-premises network contains a file server named Server1. Server1 has a share named Share1 that contains company documents.
Your company purchases a Microsoft 365 subscription.
You plan to migrate data from Share1 to Microsoft 365. Only data that was created or modified during the last three months will be migrated.
You need to identify all the files in Share1 that were modified or created during the last 90 days. What should you use?

A. Server Manager
B. Microsoft SharePoint Migration Tool
C. Resource Monitor
D. Usage reports from the Microsoft 365 admin center

Answer: B

Explanation:
You can use the Microsoft SharePoint Migration Tool to migrate files from a file server to SharePoint Online. The Microsoft SharePoint Migration Tool has a number of filters you can use to define which files will be
migrated. One filter setting is "Migrate files modified after". This setting will only migrate files modified after the selected date.
The first phase of a migration is to perform a scan of the source files to create a manifest of the files that will be migrated. You can use this manifest to identify all the files in Share1 that were modified or created during the last 90 days.
References:
https://docs.microsoft.com/en-us/sharepointmigration/spmt-settings

NEW QUESTION 160
- (Exam Topic 5)
You have a Microsoft 365 E5 subscription that uses Microsoft Intune.
You need to access service health alerts from a mobile phone. What should you use?

A. the Microsoft Authenticator app
B. the Intune app
C. the Microsoft 365 Admin mobile app
D. Intune Company Portal

Answer: A

NEW QUESTION 163
- (Exam Topic 5)
Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.
When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.
Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.
Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.
Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.
You may now click next to proceed to the lab. Lab information
Use the following login credentials as needed:

Lab Instance: 11440873

You need to create a policy that allows a user named Lee Gu to use Outlook Web App to review 50 percent of the outbound email messages sent by a user named Joni Sherman.
To answer, sign in to the Microsoft 365 portal.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
You need to configure a Supervision Policy.
* 1. Go to https://protection.office.com or navigate to the Security & Compliance admin center.
* 2. In the left navigation pane, select Supervision.
* 3. Click the '+Create' button to create a new supervision policy.
* 4. Give the policy a name such as 'Joni Sherman' and click Next.
* 5. In the 'Supervised users' section, click '+Add users or groups'.
* 6. Select Joni Sherman from the users list and click the Add button.
* 7. Deselect the 'Teams chats' and 'Skype for Business Conversations' checkboxes leaving only the 'Exchange Email' checkbox ticked and click Next.
* 8. Under 'Direction is', deselect Inbound leaving only Outbound selected and click Next.
* 9. In the 'Percentage to review' section, enter 50 and click Next.
* 10. In the 'Reviewers' section, start typing Lee Gu then select his account when it appears.
* 11. Click Next.
* 12. On the 'Review your settings' page, check the settings are correct the click the Finish button to create the policy.

NEW QUESTION 165
- (Exam Topic 5)
Note: This question it part of a series of questions that present the same scenario. Cacti question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
Your company has a Microsoft Office 36S tenant.
You suspect that several Office 365 features were recently updated.
You need to view a last of the features that were recently updated in the tenant. Solution: You use the View service requests option in the Microsoft 365 admin center. Does this meet the goal?

A. Yes
B. NO

Answer: B

Explanation:
A service request is a support ticket. Therefore, the View service requests option in the Microsoft 365 admin center displays a list of support tickets. It does not display a list of the features that were recently updated in the tenant so this solution does not meet the goal.
To meet the goal, you need to use Message center in the Microsoft 365 admin center.
Reference:
https://docs.microsoft.com/en-us/office365/admin/manage/message-center?view=o365-worldwide

NEW QUESTION 168
- (Exam Topic 5)
You have a Microsoft 365 subscription that uses a default domain named contoso.com. The domain contains the users shown in the following table.

Name	Member of
User1	Compliant
User2	Group1, Group2

The domain contains the devices shown in the following table.

Name	Compliance status
Device1	Compliant
Device2	Noncompliant

The domain contains conditional access policies that control access to a cloud app named App1. The policies are configured as shown in the following table.

Name	Includes	Excludes	Device state includes	Device state excludes	Grant
Policy1	Group1	None	All device states	Devices marked as compliant	Block access
Policy2	Group1	Group2	None	None	Block Access
Policy3	Group1	None	All device states	None	Grant access

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can access App1 from Device1.	○	○
User2 can access App1 from Device1.	○	○
User2 can access App1 from Device2.	○	○

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Yes.
User1 is in a group named Compliant. All the conditional access policies apply to Group1 so they don't apply to User1.
As there is no conditional access policy blocking access for the group named Compliant, User1 is able to access App1 using any device.
Box 2: Yes.
User2 is in Group1 so Policy1 applies first. Policy1 excludes compliant devices and Device1 is compliant. Therefore, Policy1 does not apply so we move on to Policy2.
User2 is also in Group2. Policy2 excludes Group2. Therefore, Policy2 does not apply so we move on to Policy3.
Policy3 applies to Group1 so Policy3 applies to User2. Policy3 applies to 'All device states' so Policy3 applies to Device1. Policy3 grants access. Therefore, User2 can access App1 using Device1.
Box 3: No.
User2 is in Group1 so Policy1 applies. Policy1 excludes compliant devices but Devices is non-compliant. Therefore, User2 cannot access App1 from Device2.
Reference:
https://docs.microsoft.com/en-us/azure/active-directory/conditional-access/plan-conditional-access

NEW QUESTION 171
- (Exam Topic 5)
You have a Microsoft 365 tenant that contains 300 users.
The users have Domestic and International Calling Plan licenses.
What is the maximum user phone numbers and toll-free service phone numbers can you acquire? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Number of user phone numbers:

| 150 |
| 300 |
| 340 |
| 600 |

Number of toll-free service phone numbers:

| 20 |
| 30 |
| 45 |
| 65 |

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Graphical user interface, text, application, email Description automatically generated
Reference:
https://docs.microsoft.com/en-us/microsoftteams/how-many-phone-numbers-can-you-get

NEW QUESTION 172
- (Exam Topic 5)
You have a Microsoft 365 subscription.
You need to implement Windows Defender Advanced Threat Protection (ATP) for all the supported devices enrolled devices enrolled on mobile device management (MDM).
What should you include in the device configuration profile? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Platform:

| Android |
| iOS |
| Windows 10 and later |
| Windows 8.1 and later |

Settings:

| Offboard package |
| Onboard package |
| Windows Defender Applicaion Guard |
| Windows Defender Firewall |

A. Mastered
B. Not Mastered

Answer: A

Explanation:
You can integrate Microsoft Defender Advanced Threat Protection (Microsoft Defender ATP) with Microsoft Intune as a Mobile Threat Defense solution. Integration can help you prevent security breaches and limit the impact of breaches within an organization. Microsoft Defender ATP works with devices that run Windows 10 or later.
When you establish a connection from Intune to Microsoft Defender ATP, Intune receives a Microsoft Defender ATP onboarding configuration package from Microsoft Defender ATP. This package is deployed to devices by using a device configuration profile.
Reference:
https://docs.microsoft.com/en-us/intune/advanced-threat-protection

NEW QUESTION 175
- (Exam Topic 5)
Your network contains an Active Directory domain.
You deploy a Microsoft Azure Active Directory (Azure AD) tenant.
Another administrator configures the domain the synchronization to Azure AD.
You discover that 10 user accounts in an organizational unit (OU) are NOT synchronized to Azure AD. All the other user accounts synchronized to successfully.
You review Azure AD Connect Health and discover that all the user account synchronization completed. You discover AD Connect Health and discover that at the user account synchronization to Azure AD. Solution: You run idfix.exe and export the 10 user accounts.

A. Yes

B. No

Answer: B

NEW QUESTION 180
- (Exam Topic 5)
You have a Microsoft 365 E5 subscription that contains an Azure Active Directory (Azure AD) tenant named contoso.com. The tenant contains a Microsoft SharePoint Online site named Site1 and the accounts shown in the following table.

Name	Account type
UserA	User
UserB	User
GroupA	Security group

You have an on-premises server named Server1 that contains a folder named Folder1. Folder1 contains the files shown in the following table.

Name	Permission
File1	User1: Full control
File2	User2: Modify
File3	Group1: Full control

The User1, User2, and Group1 accounts have the security identifiers (SIDs) shown in the following table.

Name	SID
User1	S-1-5-21-4534338-1127018997-2609994386-1304
User2	S-1-5-21-4534338-1127018997-2609994386-1228
Group1	S-1-5-21-4534338-1127018997-2609994386-1106

You use the SharePoint Migration Tool to migrate Folder1 to Site1. You preserve the file share permissions and use the following user mapping file.
S-1-5-21-4534338-1127018997-2609994386-1304, UserA@Contoso.com, FALSE S-1-5-21-4534338-1127018997-2609994386-1228, UserB@Contoso.com, FALSE S-1-5-21-4534338-1127018997-2609994386-1106, GroupA, TRUE
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point

Statements	Yes	No
UserA is the owner of File1 on Site1.	○	○
UserB is the owner of File2 on Site1.	○	○
GroupA is the owner of File3 on Site1.	○	○

A. Mastered
B. Not Mastered

Answer: A

Explanation:

Statements	Yes	No
UserA is the owner of File1 on Site1.	○	[○]
UserB is the owner of File2 on Site1.	○	[○]
GroupA is the owner of File3 on Site1.	○	[○]

NEW QUESTION 182
- (Exam Topic 5)
Your company is based in the United Kingdom (UK).
Users frequently handle data that contains Personally Identifiable Information (PII).

You create a data loss prevention (DLP) policy that applies to users inside and outside the company. The policy is configured as shown in the following exhibit.

New DLP policy

Review your settings   ✕

- ✅ Choose the information to protect
- ✅ Name your policy
- ✅ Choose locations
- ✅ Policy settings
- ⬤ Review your settings

Template name   Edit
U.K. Personally Identifiable Information (PII) Data

Policy name   Edit
U.K. Personally Identifiable Information (PII) Data

Applies to content in these locations   Edit
Exchange email
SharePoint sites
OneDrive accounts

Policy settings   Edit
In the content contains these types of sensitive info:
U.K. National Insurance Number (NINO).U.S. / U.K.
Passport Number then notify people with a policy tip
and email message.

If there are at least 10 instances of the same type of
sensitive info, block access to the content and send
an incident report with a high severity level but allow
people to override.

Turn policy on after it's created?
Yes   Edit

[Back] [Create] [Cancel]

Use the drop-down menus to select the answer choice that completes each statement based in the information presented in the information presented in the graphic.
NOTE: Each correct selection is worth one point.

If a user attempts to upload a document to a Microsoft SharePoint site, and the document contains one UK passport number, the document will be **[answer choice]**.

allowed
blocked without warning
blocked, but the user can override the policy

If a user attempts to email 100 UK passport numbers to a user in the same company, the email message will be **[answer choice]**.

allowed
blocked without warning
blocked, but the user can override the policy

A. Mastered
B. Not Mastered

Answer: A

Explanation:
The text in the Policy Settings section of the exhibit explains what will happen.
If a user sends between 1 and 10 instances of the sensitive info (passport number), then a notification email and will be sent to the user and a policy tip will be displayed. The email will not be blocked though. Therefore, it will be allowed.
If a user sends more than 10 instances of the sensitive info (passport number), the email will be blocked and a high-severity alert generated. However, the user can override the block.
Reference:
https://docs.microsoft.com/en-us/office365/securitycompliance/data-loss-prevention-policies

NEW QUESTION 184
- (Exam Topic 5)
When creating an sppkg package for deploying a web part you use the gulp command.
Instructions: Review the underlined text. If it makes the statement correct select "No change is needed/ If the statement is incorrect select the answer choice that makes the statement correct.

A. No change is needed.
B. the web part must be signed
C. you use the yeoman (or yo) PowerShell cmdtet
D. the solution must be signed

Answer: C

NEW QUESTION 186
- (Exam Topic 5)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft 365 subscription.
You need to prevent users from accessing your Microsoft SharePoint Online sites unless the users are connected to your on-premises network.
Solution: From the Azure Active Directory admin center, you create a trusted location and a conditional access policy.
Does this meet the goal?

A. Yes
B. No

Answer: A

Explanation:
Conditional Access in SharePoint Online can be configured to use an IP Address white list to allow access. References:
https://docs.microsoft.com/en-us/azure/active-directory/conditional-access/location-condition https://techcommunity.microsoft.com/t5/Microsoft-SharePoint-Blog/Conditional-Access-in-SharePoint-Onlinea

NEW QUESTION 189
- (Exam Topic 5)
Your company has a Microsoft 365 subscription that contains the users shown in the following table.

Name	Role
User1	Global administrator
User2	Security administrator, Guest inviter
User3	None
User4	Password administrator

You need to identify which users can perform the following administrative tasks:

≫ Modify the password protection policy.

≫ Create guest user accounts.

Which users should you identify for each task? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Modify the password protection policy: ▼
- User1 only
- User1 and User2 only
- User1, User2, and User4 only
- User1, User2, User3, and User4

Create new guest users in Microsoft Azure Active Directory (Azure AD): ▼
- User1 only
- User1 and User2 only
- User1, User2, and User4 only
- User1, User2, User3, and User4

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Only a Global Admin can modify the password protection policy.
A Global Admin or a user with the Guest Inviter role can create guest accounts. Reference:
https://docs.microsoft.com/en-us/azure/active-directory/authentication/howto-password-ban-bad-on-premises-op

NEW QUESTION 192
- (Exam Topic 5)
You have a Microsoft 365 subscription that uses an Azure Active Directory (Azure AD) tenant named contoso.com.
A temporary employee at your company uses an email address of user1@outlook.com.
You need to ensure that the temporary employee can sign in to contoso.com by using the user1@outlook.com account.
What should you do?

A. From the Azure Active Directory admin center, create a new user.
B. From the Microsoft 365 admin center, create a new contact.
C. From the Azure Active Directory admin center, create a new guest user.
D. From the Microsoft 365 admin center, create a new user.

Answer: C

Explanation:
You can invite guest users to the directory, to a group, or to an application. After you invite a user through any of these methods, the invited user's account is added to Azure Active Directory (Azure AD), with a user type of Guest. The guest user must then redeem their invitation to access resources. An invitation of a user does not expire.
The invitation will include a link to create a Microsoft account. The user can then authenticate using their Microsoft account. In this question, the external vendor already has a Microsoft account (user1@outlook.com) so he can authenticate using that.
Reference:
https://docs.microsoft.com/en-us/azure/active-directory/b2b/add-users-administrator

NEW QUESTION 195
- (Exam Topic 5)
Your company has a hybrid deployment of Microsoft 36S.
Users authenticate by using pass-through authentication. Several Microsoft Azure AD Connect Authentication Agents are deployed.
You need to verify whether all the Authentication Agents are used for authentication. What should you do?

A. From the Azure portal, use the Troubleshoot option on the Pass-through authentication page.
B. From Performance Monitor, use the #PTA authentications counter.
C. From the Azure portal use the Diagnostics settings on the Monitor blade.
D. From Performance Monitor, use the Kerberos authentications counter.

Answer: A

Explanation:
On the Troubleshoot page, you can view how many agents are configured. If you click on the agents link, you can view the status of each agent. Each agent will have a status of Active or Inactive.
Reference:
https://docs.microsoft.com/en-us/azure/active-directory/hybrid/tshoot-connect-pass-through-authentication

NEW QUESTION 199
- (Exam Topic 5)
Your company has a Microsoft 365 subscription.
You need to identify which users performed the following privileged administration tasks:

≫ Deleted a folder from the second-stage Recycle Bin if Microsoft SharePoint

≫ Opened a mailbox of which the user was not the owner

≫ Reset a user password
What should you use?

A. Microsoft Azure Active Directory (Azure AD) audit logs
B. Microsoft Azure Active Directory (Azure AD) sign-ins
C. Security & Compliance content search
D. Security & Compliance audit log search

Answer: A

Explanation:
 References:
https://docs.microsoft.com/en-us/azure/azure-monitor/platform/activity-logs-overview

NEW QUESTION 200
- (Exam Topic 5)
Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.
When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.
Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.
Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.
Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.
You may now click next to proceed to the lab. Lab information
Use the following login credentials as needed:
To enter your username, place your cursor in the Sign in box and click on the username below.
To enter your password, place your cursor in the Enter password box and click on the password below.
Microsoft 365 Username: admin@M365x981607.onmicrosoft.com Microsoft 365 Password: *yfLo7Ir2&ylf the Microsoft 365 portal does not load successfully in the browser, press CTRL-K to reload the portal in a new browser tab.
The following information is for technical support purposes only:
Lab Instance: 10811525
You need to prevent non-administrators in your organization from registering applications.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
You need to configure the App Registrations setting in Azure Active Directory.
* 1. Go to the Azure Active Directory admin center.
* 2. Select Azure Active Directory.
* 3. Select 'User settings'
* 4. In the 'App registrations' section, toggle the 'Users can register applications' setting to No.
* 5. Click Save to save the changes.

NEW QUESTION 205
- (Exam Topic 5)
You have a Microsoft Azure Active Directory (Azure AD) tenant named contoso.com.
You have three applications App1, App2, App3. The Apps use files that have the same file extensions. Your company uses Windows Information Protection (WIP).
WIP has the following configurations:

> Windows Information Protection mode: Silent
> Protected apps: App1
> Exempt apps: App2

From App1, you create a file named File1.
What is the effect of the configurations? To answer, select the appropriate options in the answer area.

You can open File1 from:

App1 only
App1 and App2 only
App1 and App3 only
App1, App2, and App3

An action will be logged when you attempt to open File1 from:

App1 only
App3 only
App1 and App2 only
App2 and App3 only
App1, App2, and App3

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Exempt apps: These apps are exempt from this policy and can access corporate data without restrictions.
Windows Information Protection mode: Silent: WIP runs silently, logging inappropriate data sharing, without stopping anything that would've been prompted for employee interaction while in Allow overrides mode. Unallowed actions, like apps inappropriately trying to access a network resource or WIP-protected data, are still stopped.
Reference:
https://docs.microsoft.com/en-us/intune/apps/windows-information-protection-policy-create https://docs.microsoft.com/en-us/windows/security/information-protection/windows-information-protection/crea

NEW QUESTION 208
- (Exam Topic 5)
You have a Microsoft 365 subscription that uses an Azure AD tenant named contoso.com. The tenant contains the user's shown in the following table.

Name	Role
User1	Report reader
User2	User administrator
User3	Security administrator
User4	Global administrator

From the Sign-ins blade of the Azure Active Directory admin center, for which users can User1 and User2 view the sign-ins? To answer, select the appropriate options in the answer area.

Answer Area

User1 can view the sign-ins for the following users:

User1 only
User1 and User2 only
User1, User2, and User3 only
User1, User2, User3, and User4

User2 can view the sign-ins for the following users:

User2 ...
User1 and User2 only
User1, User2, and User3 only
User1, User2, User3, and User4

These are the selections for User2 can view the sign-ins for the following users

A. Mastered
B. Not Mastered

Answer: A

Explanation:

Answer Area

User1 can view the sign-ins for the following users:	[dropdown]

User1 only
User1 and User2 only
User1, User2, and User3 only
User1, User2, User3, and User4

User2 can view the sign-ins for the following users:	[dropdown]

User2 can view the sign-ins for the following users:	[dropdown]

User2 o   These are the selections for User2 can view the sign-ins for the following users
User1 and User2 only
User1, User2, and User3 only
User1, User2. User3, and User4
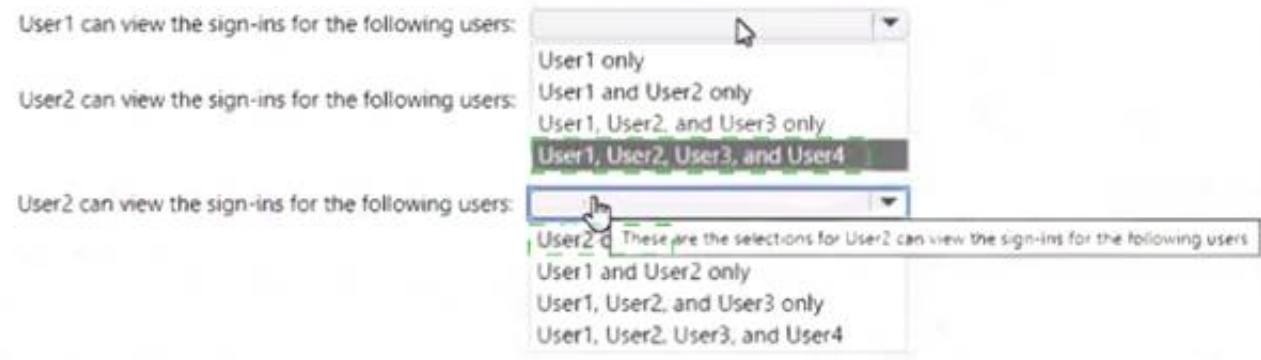

NEW QUESTION 211
- (Exam Topic 5)
Your network contains an on-premises Active Directory forest named contoso.com. The forest contains the users shown in the following table.

Name	Domain	User UPN suffix
User1	Contoso.com	Fabrikam.com
User2	East.contoso.com	Contoso.com

You create an Azure Active Directory (Azure AD) tenant named fabrikam.onmicrosoft.com.
You plan to sync the users in the forest to fabrikam.onmicrosoft.com by using Azure AD Connect. Which username will be assigned to User1 and User2 in Azure AD after the synchronization? To answer,
select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

User1: [dropdown]

User1@contoso.com
User1@east.contoso.com
User1@fabrikam.com
User1@fabrikam.onmicrosoft.com

User2: [dropdown]

User2@contoso.com
User2@east.contoso.com
User2@fabrikam.com
User2@fabrikam.onmicrosoft.com

A. Mastered
B. Not Mastered

Answer: A

Explanation:
If you added the contoso.com and east.contoso.com domains as custom domains in Microsoft 365, then the users would be assigned their user principle names as Microsoft 365 usernames.
However, the question does not state that you have added the domains as custom domains. Therefore, both users will use the default @fabrikam.onmicrosoft.com domain for their usernames.

NEW QUESTION 216
- (Exam Topic 5)
You have a Microsoft 365 subscription and a DNS domain. The domain is hosted by a third-party DNS service.
You plan to add the domain to the subscription.
You need to use Microsoft Exchange Online to send and receive emails for the domain.
Which type of DNS record should you add to the DNS zone of the domain for each task? To answer, drag the appropriate records to the correct tasks. Each record
may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Answer Area

| A | CNAME | MX | SRV | TXT |

Route email for the domain to Exchange Online

Enable Microsoft Outlook to auto discover the Exchange Online server for the domain.

Help prevent spam for the domain.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: MX
When you update your domain's MX record, all new email for anyone who uses your domain will now come to Microsoft 365.
Box 2: CNAME
Add CNAME records to connect other service. You can add CNAME records for each service that you want to connect.
Box 3: TXT
Add or edit an SPF TXT record to help prevent email spam Reference:
https://docs.microsoft.com/en-us/microsoft-365/admin/get-help-with-domains/create-dns-records-at-any-dns-hos

NEW QUESTION 219
- (Exam Topic 5)
This question requires that you evaluate the underlined text to determine if it is correct-In Microsoft Word on Windows, before you can sideload a Microsoft Office Add-in, you must firs: upload the manifest to Microsoft OneDrive instructions: Review the underlined text. If it makes the statement correct select "No change is needed," If the statement is incorrect select the answer choice that makes the statement correct

A. No change is needed.
B. deploy the manifest to an Azure website
C. publish the manifest to a trusted network location
D. set Microsoft Edge to Developer Mode

Answer: C

NEW QUESTION 223
- (Exam Topic 5)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these
questions will not appear in the review screen.
Your company has 3,000 users. All the users are assigned Microsoft 365 E3 licenses.
Some users are assigned licenses for all Microsoft 365 services. Other users are assigned licenses for only certain Microsoft 365 services.
You need to determine whether a user named User1 is licensed for Exchange Online only. Solution: You run the Get-MsolUser cmdlet.
Does this meet the goal?

A. Yes
B. No

Answer: B

Explanation:
The Get-MsolUser cmdlet will tell you if a user is licensed for Microsoft 365 but it does not tell you which licenses are assigned.
Reference:
https://docs.microsoft.com/en-us/powershell/module/msonline/get-msoluser?view=azureadps-1.0

NEW QUESTION 224
- (Exam Topic 5)
Your company has 500 client computers that run Windows 10.
You plan to deploy Microsoft Office 365 ProPlus to all the computers. You create the following XML file for the planned deployment.

```
<Configuration>
  <Add OfficeClientEdition="64" Channel="Broad" ForceUpgrade="TRUE">
      <Product ID="O365ProPlusRetail">
            <Language ID="en-us"/>
            <ExcludeApp ID="Groove"/>
            <ExcludeApp ID="Publisher"/>
      </Product>
  </Add>
  <Updates Enabled="TRUE" Channel="Broad" Deadline="03/31/2019, 00:00"
UpdatePath="\\sccm\updates"/>
  <Display Level="Full" AcceptEULA="TRUE"/>
  <Property Name="FORCEAPPSHUTDOWN" Value="TRUE"/>
  <Property Name="SharedComputerLicensing" Value="0"/>
  <Property Name="PinIconsToTaskbar" Value="TRUE"/>
</Configuration>
```

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.
NOTE: Each correct selection is worth one point.

When the installation is complete [answer choice].
- all users will be prompted to accept the EULA
- all users will be prompted to install several updates
- all semi-channel updates will be installed automatically

Office 365 ProPlus will [answer choice].
- include Microsoft OneDrive for Business and Microsoft Outlook only
- be installed on all the computers
- be installed only on the computers that run a 64-bit version of Windows 10

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1:
When the installation is complete, all users will be prompted to install several updates.
In the configuration file, the Updates Enabled element is set to True. This means that Office will check for updates after the installation.
The Channel element set to Broad means that all semi-annual channel updates will be installed. Box 2:
Office 365 ProPlus will be installed only on the computers that run a 64-bit version of Windows 10.
The OfficeClientEdition element defines whether the 32-bit or 64-bit edition of Office 365 ProPlus is downloaded or installed. In the configuration file, it is set to
'64'. The 64-bit version will only install on a 64-bit client computer.
Reference:
https://docs.microsoft.com/en-us/deployoffice/configuration-options-for-the-office-2016-deployment-tool

NEW QUESTION 226
- (Exam Topic 5)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the
stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
Your company plans to deploy several Microsoft Office 365 services.
You need to design an authentication strategy for the planned deployment. The solution must meet the following requirements:

≫ Users must be able to authenticate during business hours only.

≫ Authentication requests must be processed successfully if a single server fails.

≫ When the password for an on-premises user account expires, the new password must be enforced the next time the user signs in.

≫ Users who connect to Office 365 services from domain-joined devices that are connected to the internal network must be signed in automatically.
Solution: You design an authentication strategy that uses federation authentication by using Active Directory Federation Services (AD FS). The solution contains
two AD FS servers and two Web Application Proxies.
Does this meet the goal?

A. Yes
B. No

Answer: B

Explanation:
This solution meets the following requirements:

≫ Users must be able to authenticate during business hours only.

≫ Authentication requests must be processed successfully if a single server fails.

≫ When the password for an on-premises user account expires, the new password must be enforced the next time the user signs in.
The following requirement is not met:

≫ Users who connect to Office 365 services from domain-joined devices that are connected to the internal network must be signed in automatically.

To meet this requirement, you would need to configure seamless Single Sign-on (SSO) Reference:
https://docs.microsoft.com/en-us/azure/security/azure-ad-choose-authn

NEW QUESTION 227
- (Exam Topic 5)
You create a Microsoft 365 subscription.
You plan to deploy Microsoft Office 365 ProPlus applications to all the client computers at your company. You prepare the following XML file for the planned deployment.

```
<Configuration>
 <Add OfficeClientEdition="32"
     Channel="Broad">
 <Product ID="0365ProPlusRetail">
   <Language ID="en-us" />
   </Product>
 </Add>
<Updates Enabled="TRUE"
         UpdatePath=""
         Channel="Targeted" />
<Display Level="None"
         AcceptEULA="TRUE" />
</Configuration>
```

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.
NOTE: Each correct selection is worth one point.

Office 365 ProPlus feature updates will be installed [answer choice].

once a month
once every six months
once a year

Office 365 ProPlus security updates will be installed [answer choice].

once a month
every six months in January and July
every six months in March and September

A. Mastered
B. Not Mastered

Answer: A

Explanation:
References:
https://docs.microsoft.com/en-us/deployoffice/configuration-options-for-the-office-2016-deployment-tool#updat https://docs.microsoft.com/en-us/deployoffice/overview-of-update-channels-for-office-365-proplus

NEW QUESTION 232
- (Exam Topic 5)
You have a Microsoft 365 E5 subscription that contains a group named Group 1.
Vou need to ensure that all the members of Group1 are notified when Microsoft 365 outages occur. The solution must minimize administrative effort
What should you do?

A. From the Microsoft 365 admin center, configure a Service health email notification
B. From the Exchange admin center, create an alert policy and configure an email notification.
C. From the Microsoft 365 admin center, configure a Message center email notification.
D. From the Microsoft 365 Defender portal create an alert policy and configure an email notification.

Answer: C

NEW QUESTION 234
- (Exam Topic 5)
Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.
When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.
Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.
Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.
Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Use the following login credentials as needed:
To enter your username, place your cursor in the Sign in box and click on the username below.

To enter your password, place your cursor in the Enter password box and click on the password below.
Microsoft 365 Username: admin@M365x981607.onmicrosoft.com Microsoft 365 Password: *yfLo7Ir2&ylf the Microsoft 365 portal does not load successfully in the browser, press CTRL-K to reload the portal in a new browser tab.
The following information is for technical support purposes only:
Lab Instance: 10811525
You plan to provide several users in your organization with the ability to join their Windows 10 device to Microsoft Azure Active Directory (Azure AD).
You need to ensure that all the users who join a device use multi-factor authentication.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
You need to configure the device settings in Azure Active Directory.
* 1. Go to the Azure Active Directory admin center.
* 2. Select Azure Active Directory.
* 3. Select Devices.
* 4. Select Device Settings.
* 5. Toggle the 'Require Multi-Factor Auth to join devices' setting to Yes.
* 6. Click Save to save the changes. References:
https://docs.microsoft.com/en-us/azure/active-directory/devices/device-management-azure-portal
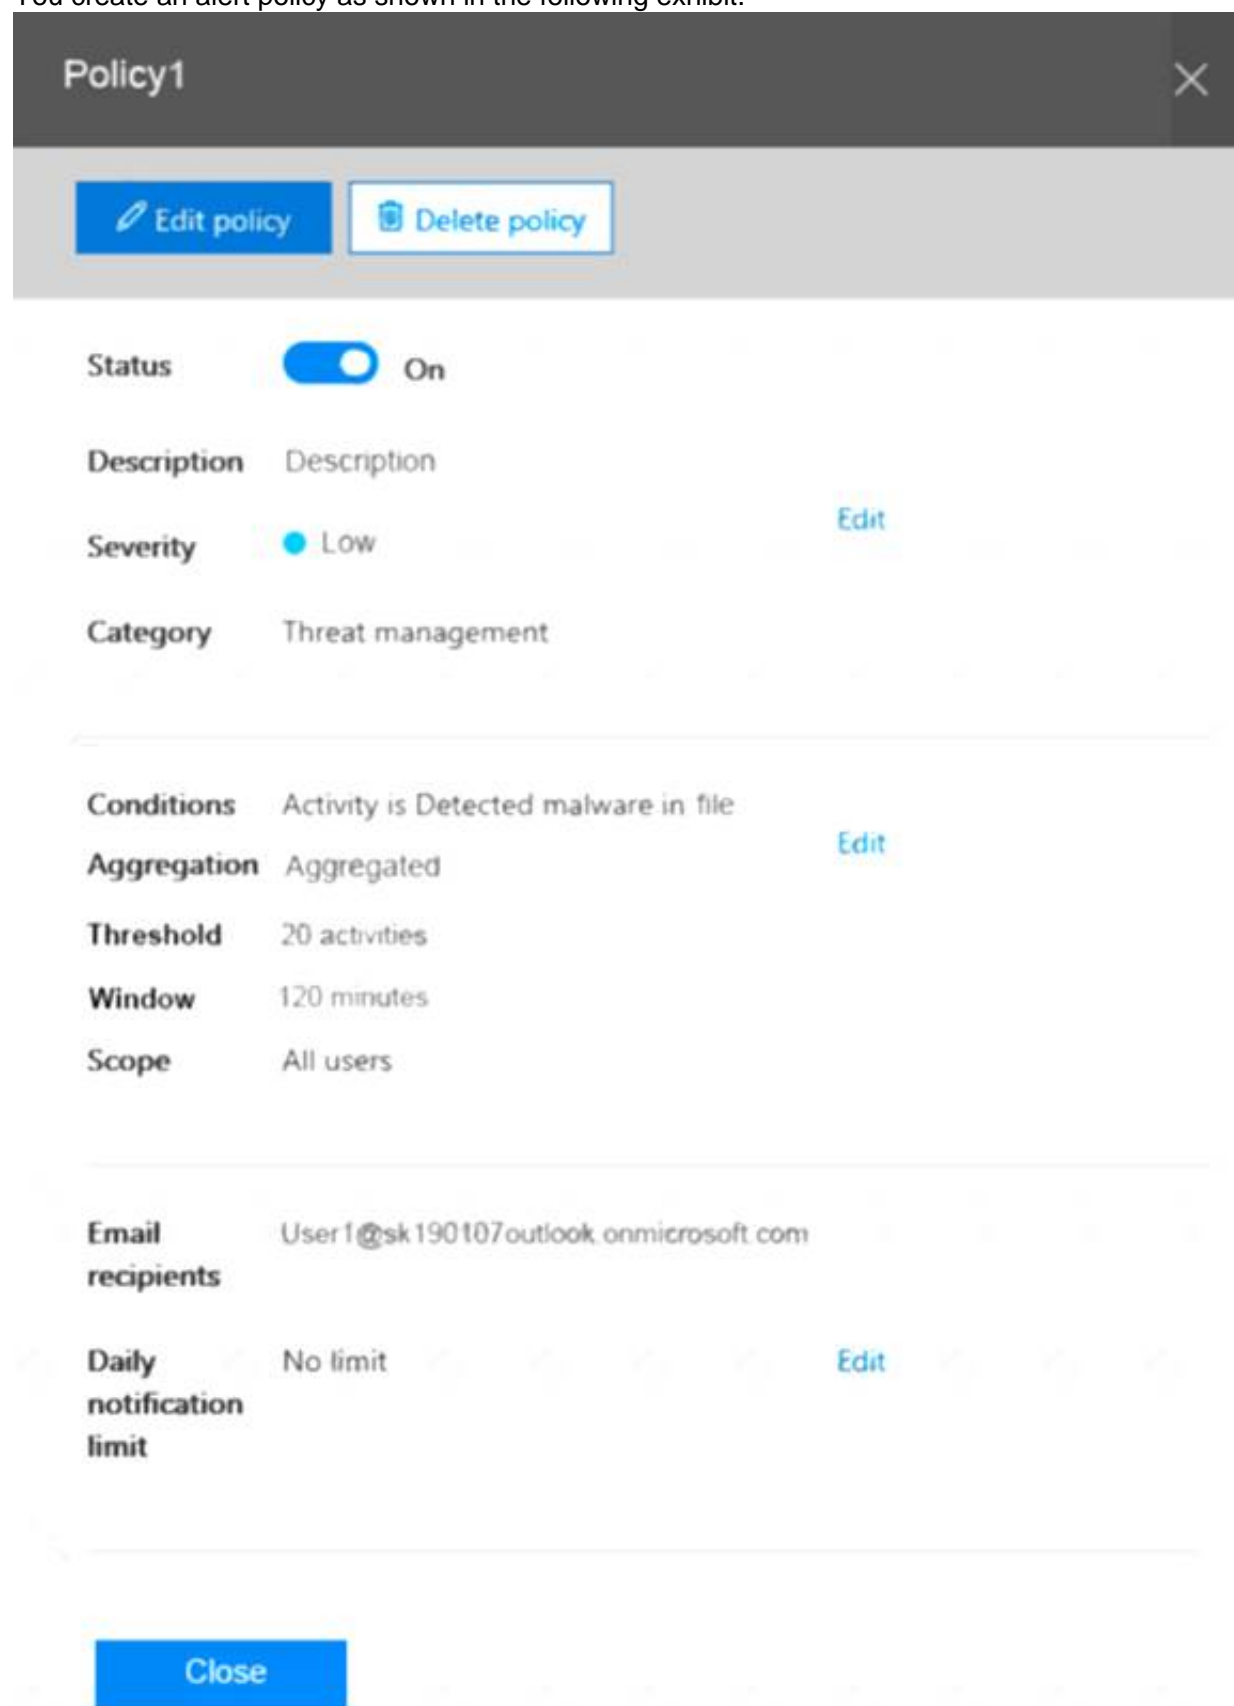

NEW QUESTION 239
- (Exam Topic 5)
You have a Microsoft 365 subscription.
You create an alert policy as shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information in the graphic.
NOTE: Each correct selection is worth one point.

Policy1 will trigger an alert if malware is detected in [answer choice].

Exchange Online only
SharePoint Online only
SharePoint Online or OneDrive only
Exchange Online, SharePoint Online, or OneDrive

The maximum number of email messages that Policy1 will generate per day is [answer choice].

5
12
20
100

A. Mastered
B. Not Mastered

Answer: A

Explanation:
The 'Activity is' setting is configured as 'Detected malware in file'. This setting means the policy is applied to files stored in SharePoint or OneDrive.
The Aggregation settings has a 120 minute window. This means that if there 20 detections in 120 minutes, an email will be generated. Therefore, the maximum number of emails generated in 24 hours is 12.
Reference:
https://docs.microsoft.com/en-us/microsoft-365/compliance/alert-policies

NEW QUESTION 241
- (Exam Topic 5)
You have a Microsoft 365 tenant that contains Microsoft Exchange Online.
You plan to enable calendar sharing with a partner organization named adatum.com. The partner organization also has a Microsoft 365 tenant.
You need to ensure that the calendar of every user is available to the users in adatum.com immediately. What should you do?

A. From the Exchange admin center, create a sharing policy.
B. From the Exchange admin center, create a new organization relationship
C. From the Microsoft 365 admin center, modify the Organization profile settings.
D. From the Microsoft 365 admin center, configure external site sharing.

Answer: B

Explanation:
You need to set up an organization relationship to share calendar information with an external business partner. Office 365 admins can set up an organization relationship with another Office 365 organization or with an Exchange on-premises organization.
Reference:
https://docs.microsoft.com/en-us/exchange/sharing/organization-relationships/create-an-organization-relationshi

NEW QUESTION 246
- (Exam Topic 5)
You have retention policies in Microsoft 365 as shown in the following table.

Name	Location
Policy1	OneDrive accounts
Policy2	Exchange email, Exchange public folders, Office 365 groups, OneDrive accounts, SharePoint sites

Policy1 is configured as shown in the Policy1 exhibit. (Click the Policy1 tab.)
Policy1

Decide if you want to retain content, delete it, or both

Do you want to retain content? ⓘ

○ Yes, I want to retain it ⓘ

  | For this long... ▼ | 7 | years ▼ |

● No, just delete content that's older than ⓘ

  | 1 | years ▼ |

  Delete the content based on | when it was created ▼ | ⓘ

Need more options?

○ Use advanced retention settings ⓘ

| Back | Next | Cancel |

Policy1 is configured as shown in the Policy2 exhibit. (Click the Policy2 tab.)
Policy2

Decide if you want to retain content, delete it, or both

Do you want to retain content? ⓘ

● Yes, I want to retain it ⓘ

  | For this long... ▼ | 4 | years ▼ |

  Retain the content based on | when it was created ▼ | ⓘ

  Do you want us to delete it after this time? ⓘ
  ○ Yes   ● No

○ No, just delete content that's older than ⓘ

  | 2 | years ▼ |

Need more options?

○ Use advanced retention settings ⓘ

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Statements	Yes	No
If a user creates a file in Microsoft OneDrive on January 1, 2018, users will be able to access the file on January 15, 2020	○	○
If a user deletes a Microsoft OneDrive file that was created on January 1, 2018, and administrator will be able to recover the file on April 15, 2020.	○	○
If a user deletes a Microsoft OneDrive file that was created on January 1, 2018, an administrator will be able to recover the file on April 15, 2023.	○	○

A. Mastered
B. Not Mastered

Answer: A

Explanation:

≫ Retention wins over deletion. Suppose that one retention policy says to delete Exchange email after three years, but another retention policy says to retain Exchange email for five years and then delete it. Any content that reaches three years old will be deleted and hidden from the users' view, but still retained in the Recoverable Items folder until the content reaches five years old, when it is permanently deleted.

≫ The longest retention period wins. If content is subject to multiple policies that retain content, it will be retained until the end of the longest retention period.
Box 1: No.
The file will be deleted and hidden from the users' view, but still retained in the Recoverable Items folder. An administrator would need to recover the file.
Box 2: Yes.
The file will be deleted and hidden from the users' view, but still retained in the Recoverable Items folder. An administrator will be able to recover the file.
Box 3: Yes.
2018 to 2023 is five years. Policy2 has a retention period of four years. However, Policy2 is configured to not delete the files after the four-year retention period.

NEW QUESTION 250
- (Exam Topic 5)
Your organization has an on-premises Microsoft Exchange Server 2016 organization. The organization is in the company's main office in Melbourne. The main office has a low-bandwidth connection to the Internet.
The organization contains 250 mailboxes.
You purchase a Microsoft 365 subscription and plan to migrate to Exchange Online next month. In 12 months, you plan to increase the bandwidth available for the Internet connection.
You need to recommend the best migration strategy for the organization. The solution must minimize administrative effort.
What is the best recommendation to achieve the goal? More than one answer choice may achieve the goal. Select the BEST answer.

A. network upload
B. cutover migration
C. hybrid migration
D. staged migration

Answer: C

Explanation:
With a hybrid migration, you can migrate the mailboxes in small batches over a period of time which will help to avoid saturating the bandwidth. With the migration wizard, you can configure a migration batch to start outside office hours which would minimize bandwidth usage during office hours.
With a hybrid migration, you do not need to reconfigure Outlook to connect to the migrated mailbox. Outlook will automatically detect the new mailbox location. This reduces administrative effort.

NEW QUESTION 254
- (Exam Topic 5)
You are configuring an enterprise application named TestApp in Microsoft Azure as shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.
NOTE: Each correct selection is worth one point.

To ensure that when users access TestApp, the proxy automatically scans for internal URLs published through the Application Proxy, set [answer choice].

▼
Use Http-Only Cookie to Yes
Translate URLs in Headers to No
Translate URLs in Application Body to Yes

To protect TestApp from Cross-Site Scripting (XSS), set [answer choice].

▼
Use Http-Only Cookie to Yes
Translate URLs in Headers to No
Translate URLs in Application Body to Yes

A. Mastered
B. Not Mastered

Answer: A

NEW QUESTION 259
- (Exam Topic 5)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
Your network contains an Active Directory forest.
You deploy Microsoft 365.
You plan to implement directory synchronization.
You need to recommend a security solution for the synchronized identities. The solution must meet the following requirements:

≫ Users must be able to authenticate successfully to Microsoft 365 services if Active Directory becomes unavailable.

≫ Users passwords must be 10 characters or more.

Solution: Implement pass-through authentication and configure password protection in the Azure AD tenant. Does this meet the goal?

A. Yes
B. No

Answer: B

Explanation:
