Answer: D

Explanation:

Over time, the focus of service desks has broadened from simply logging and resolving technical issues, to providing more comprehensive support for people and the business. They are increasingly being used to get various matters arranged, explained, and coordinated. The service desk has a major influence on user experience and how the service provider is perceived by the users. By understanding and acting on the business context of transactional activity (i.e. logging tickets), the service desk is better placed to add value to the organization.

NEW QUESTION 356

- (Exam Topic 3)

Which Practice includes management of workarounds and known errors?

- A. Monitoring and event management
- B. Service configuration management
- C. Problem management
- D. Incident management

Answer: C

Explanation:

What is problem management?

The purpose of problem management is to reduce the likelihood and impact of incidents by identifying actual and potential causes of incidents, and managing workarounds and known errors.

Problems are related to incidents, but it is important to differentiate them in the way they are managed:

- Incidents have an impact on users or business processes, and must be resolved so that normal business activity can take place.
- Problems are the causes of incidents therefore they require investigation and analysis to identify the causes, develop workarounds, and recommend longer-term resolution. This reduces the number and impact of future incidents.
