

PL-100 Dumps

Microsoft Power Platform App Maker

<https://www.certleader.com/PL-100-dumps.html>

NEW QUESTION 1

- (Exam Topic 1)

You publish the first version of the app and solution on November 1, 2020. You need to create the version numbers for the app and the solution.

Which version numbers should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Versions

Version 1

1.0.0.0

1.20.11.1

20.11.1.1

Answer Area

Object	Version
Solution	<div>Version</div>
App	<div>Version</div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: 1.0.0.0

When identifying versions of the app solution, all dependencies, entities, and user interfaces components must be identified to avoid any unintentional issues caused by reverting individual components to a previous version.

A solution's version has the following format: major.minor.build.revision. An update must have a higher major, minor, build or revision number than the parent solution. For example, for a base solution version 3.1.5.7, a small update could be a version 3.1.5.8 or a slightly more significant update could have version 3.1.7.1.

A substantially more significant update could be version 3.2.0.0.

Box 2: 20.11.1.1

Scenario:

> You must use the following version control numbering scheme:

- Major: The last two digits of the year the app is packaged
- Minor: Two digits that represent the month when the app is packaged
- Build: A number that is incremented to represent significant changes to the app
- Revision: The incremented revision for a package

New versions of the application must completely replace previous versions of the app. Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/common-data-service/update-solutions>

NEW QUESTION 2

- (Exam Topic 1)

You need to configure the app to meet the requirements.

Which object properties should you configure? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Requirement	Property
Provide a visual indicator when the app is offline.	<div><div></div><div>Visible</div><div>OnSelect</div><div>DisplayMode</div><div>Fill</div></div>
Store data when the app is offline.	<div><div></div><div>OnSelect</div><div>LoadData</div><div>SubmitForm</div><div>Now</div></div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Fill

Scenario: You must display a visual indicator in the app so that sales representatives know whether the app is offline before submitting reports.

Fill – The background color of a control. Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/controls/control-screen> <https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function-form>

NEW QUESTION 3

- (Exam Topic 1)

You need to ensure that the app can support the needs of User2 and User3, and meets the production deployment requirements. Which tools should you use? To answer, select the appropriate tool in the answer area. NOTE: Each correct selection is worth one point.

Tools	Answer Area	
	Requirement	Tool
<div>Solution Checker</div>	Accessibility	<div>Tool</div>
<div>App Checker</div>	Deployment	<div>Tool</div>
<div>Object Detector</div>		
<div>Preview the app</div>		

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: App Checker

Scenario: Several sales representatives have accessibility restrictions. User2 is visually impaired and cannot see images. User3 is unable to use a mouse. Users who have vision, hearing, or other impairments can use your canvas app more easily and successfully if you consider accessibility as you design how the app looks and behaves. If you're not sure how to make your app more accessible, you can run the AppChecker Accessibility checker in Power Apps Studio.

Box 2: Solution Checker

Scenario: Before deploying the app to production, you must ensure that the app conforms to Microsoft accessibility and performance guidelines.

Use solution checker to validate your model-driven apps in Power Apps. Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/accessibility-checker> <https://docs.microsoft.com/en-us/powerapps/maker/common-data-service/use-powerapps-checker>

NEW QUESTION 4

- (Exam Topic 1)

You need to provide the app to Tailwind Traders. What should you do?

- A. Within Managed Properties, set the value of the Allow customizations option to tru
- B. Export the app as a managed solution.
- C. Use the Share App feature.
- D. Within Managed Properties, set the value of the Allow customizations option to fals
- E. Export the app as a managed solution.
- F. Within Managed Properties, set the value of the Allow customizations option to fals
- G. Export the app as an unmanaged solution.

Answer: C

Explanation:

Scenario: The completed app and all supporting components must be provided to Tailwind Traders. Tailwind Traders must not be able to make changes to any of the components.

Managed Solution: A managed solution is a finalized solution that can be distributed and installed. They are created by exporting an unmanaged solution by setting restrictions to prevent any further customizations. The whole point of Managed is locking down the Component states so they cannot be edited. Deleting the Managed Solution will remove all its customisations as well as data contained. Managed Solutions become read only once deployed so they cannot be manipulated.

Reference:

<https://powerusers.microsoft.com/t5/Power-Apps-Pro-Dev-ISV/Managed-vs-Unmanaged/td-p/495685>

NEW QUESTION 5

- (Exam Topic 2)

You need to configure the system to meet the requirements.

What should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area	Feature	Setting
	Create the relationship between the Job Setup and Time Tracking entities.	<div>▼</div> <div>1:N</div> <div>N:N</div> <div>Self-referential</div>
	Configure ownership for the Time Tracking entity.	<div>▼</div> <div>Business-owned</div> <div>Organization-owned</div> <div>User or Team owned</div>

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Box 1: 1:N

Scenario: A sortable listing of all in-process jobs from the Job Setup table, by customer, start date, and product.

Box 2: User or Team owned

Scenario: Employees must only be able to access their own time tracking records from the app.

User or team: Data belongs to a user or a team. Actions that can be performed on these records can be controlled on a user level.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/common-data-service/types-of-entities>

NEW QUESTION 6

- (Exam Topic 3)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are creating a canvas app that displays a list of accounts.

Users must be able to select an account and view details for the account. The app must include a feature that brings the user back to the list of accounts.

You add a blank screen named Screen_Accounts and add a gallery named Gallery_Accounts to the screen. You set the data source of Gallery_Accounts to Accounts and add another blank screen named Screen_AccountDetail.

You need to complete the app. Solution:

- Add a display form to Screen_AccountDetail.
- Set the OnSelect property of Gallery_Accounts to Navigate(Screen_AccountDetail).
- Set the data source of the form to Accounts.
- Set the Item property of the form to Selected.
- Add a back icon on Screen_AccountDetail and set its OnSelect property to Navigate(Screen_Accounts). Does the solution meet the goal?

- A. Yes
B. No

Answer: A

Explanation:

If you add a Display form control, the user can display all fields of a record or only the fields that you specify. Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/controls/control-form-detail>

NEW QUESTION 7

- (Exam Topic 3)

You create a canvas app within a Power Platform environment.

You need to identify potential accessibility issues for the canvas app before making the app available to other users.

Which tool should you use?

- A. Portal Checker
B. App Checker
C. Solution Checker

Answer: B

Explanation:

Find accessibility issues

* 1. In the upper-right corner of Power Apps Studio, select the icon for the App checker.

* 2. In the menu that appears, select Accessibility.

A list of issues appears, sorted first by severity and then by screen. Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/accessibility-checker>

NEW QUESTION 8

- (Exam Topic 3)

You are configuring security to enable users to analyze data by using Microsoft Excel templates.

You create a security role named TemplateAdministrator and configure the role as shown below and assign the role to a user named User1.

Power Apps

File

Save and Close

Actions

Help

Security role: TemplateAdministrator

Working on solutions: Default Solution

Entity	Create	Read	Write	Delete	Append	Append To	Assign	Share
Business Unit								
Channel Property Group								
Currency								
Document Template								
Mailbox Auto Tracking Folder								
Organization								
Personal Document Template								

Privacy Related Privileges
Enabling these privileges will allow users to extract customer data from Microsoft Dynamics 365. For more information, review the corresponding user documentation.

Document Generation		Dynamics 365 for mobile	
Export to Excel		Go Offline in Outlook	
Mail Merge		Print	
Sync to Outlook		Use Dynamics 365 App for Outlook	

Miscellaneous Privileges

Act on Behalf of Another User		Approve Email Addresses for Users or Queues	
Assign manager for a user		Assign position for a user	
Assign Territory to User		Bulk Edit	

Key

- None Selected
- User
- Business Unit
- Parent: Child Business Unit
- Organization

Use the drop-down menus to select the answer choice that answers each question based on the information presented in the graphic.
NOTE: Each correct selection is worth one point.

You need to ensure that User1 can see the pre-configured example templates.
Which permission should you change?

Bulk Edit

Export to Excel

Read on Document Template

Read on Personal Document Template

You need to ensure that User1 can download the file to create an Excel template.
Which permission should you change?

Bulk Edit

Export to Excel

Read on Document Template

Read on Personal Document Template

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

You need to ensure that User1 can see the pre-configured example templates.
Which permission should you change?

	▼
Bulk Edit	
Export to Excel	
Read on Document Template	
Read on Personal Document Template	

You need to ensure that User1 can download the file to create an Excel template.
Which permission should you change?

	▼
Bulk Edit	
Export to Excel	
Read on Document Template	
Read on Personal Document Template	

NEW QUESTION 9

- (Exam Topic 3)

A company has a Common Data Service custom entity that stores customer account data. You need to create a relationship between the custom entity and the Account entity. Which two tools can you use? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Power Platform Admin center
- B. Power Apps solution explorer
- C. Power Apps Maker portal
- D. SQL Server Management Studio
- E. Visual Studio Code

Answer: BC

Explanation:

There are two designers you can use to create and edit 1:N (one-to-many) or N:1 (many-to-one) relationships:

- You can create and edit 1:N (one-to-many) or N:1 (many-to-one) entity relationships in Power Apps portal
- You can create and edit create and edit 1:N (one-to-many) or N:1 (many-to-one) entity relationships using solution explorer

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/common-data-service/create-edit-1n-relationships>

NEW QUESTION 10

- (Exam Topic 3)

You need to set the value for a global variable named RunningTotal to 5 and navigate to the previous screen named MainScreen.
Which formula should you use?

- A. UpdateContext({ RunningTotal: 5 }); Navigate(MainScreen, ScreenTransition.Cover, RunningTotal);
- B. If(Value(TextBox1.Text) >= 0, (Set(RunningTotal, 5); Back();), Color.Green)
- C. UpdateContext({ RunningTotal:5 }); Back()
- D. Set(RunningTotal, 5); Back();

Answer: D

Explanation:

You set the value of the global variable with the Set function. Set(MyVar, 1) sets the global variable MyVar to a value of 1.

Use the Back and Navigate function to change which screen is displayed. Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/working-with-variables> <https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function-navigate>

NEW QUESTION 10

- (Exam Topic 3)

An administrator plans to create and deploy dashboards for use only by sales associates. The dashboards will display the current sales pipeline, open cases, recent major wins, and key opportunities by postal code. Sales associates must be able to act on the specific data displayed in dashboards.

You need to create the dashboards.

Which type of dashboards should you create? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Requirement

Ensure that all sales associates can view the dashboard.

Ensure that sales associates can interact with data from the dashboards.

Type of dashboard

	▼
User	
System	

	▼
Standard	
Multi-stream	
Single-stream	

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Box 1: User

Type of dashboard: If you want your dashboards to be available across the organization and do not want to manage the access levels at a more detailed level, you might want to create an organization-owned dashboard. However, if you are concerned about the access privileges and security of your dashboard, consider creating a user-owned dashboard where you have more control on who can access it.

Box 2: Single-stream

The single-stream dashboards display real-time data over one stream based on an entity view or queue. The single-stream dashboards are typically helpful to Tier 2 service leads or managers, who monitor fewer, but more complex or escalated cases.

Reference:

<https://docs.microsoft.com/en-us/powerapps/developer/model-driven-apps/create-dashboard> <https://docs.microsoft.com/en-us/powerapps/maker/model-driven-apps/configure-interactive-experience-dashbo>

NEW QUESTION 14

- (Exam Topic 3)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You build a canvas app for a manufacturing company. The company receives parts and materials from many vendors. You create a form to collect information from packing slips.

Receivers must be able to take a picture of packing slips to receive materials instead of manually entering data in the app.

You need to ensure that users can scan packing slip information into the form. Proposed solution: Use a Key Phrase Extraction model.

Does the solution meet the goal?

- A. Yes
B. No

Answer: B

Explanation:

The key phrase extraction prebuilt model identifies the main points in a text document. Reference:

<https://docs.microsoft.com/en-us/ai-builder/prebuilt-key-phrase>

NEW QUESTION 18

- (Exam Topic 3)

You create a canvas app.

You need to make the app available to other people in your company.

What are two possible ways to achieve the goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Grant access to individual users in your company.
B. Share the app with a Microsoft Exchange distribution list.
C. Grant access to a Microsoft Teams team.
D. Share the app with a Microsoft Azure Active Directory security group.

Answer: AD

Explanation:

After you build a canvas app that addresses a business need, specify which users in your organization can run the app and which can modify and even reshare it. Specify each user by name, or specify a security group in Azure Active Directory.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/share-app>

NEW QUESTION 22

- (Exam Topic 3)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are creating a canvas app that displays a list of accounts.

Users must be able to select an account and view details for the account. The app must include a feature that brings the user back to the list of accounts.

You add a blank screen named Screen_Accounts and add a gallery named Gallery_Accounts to the screen. You set the data source of Gallery_Accounts to Accounts and add another blank screen named Screen_AccountDetail.

You need to complete the app. Solution:

- Add an edit form to Screen_AccountDetail and set the Default Mode of the form to New
- Set the OnSelect property of Gallery_Accounts to Navigate(Screen_AccountDetail).
- Set the data source of the form to Accounts.
- Set the Item property of the form to Selected.
- Add a back icon on Screen_AccountDetail and set its OnSelect property to Navigate(Screen_Accounts).

Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

FormMode.New: the form is populated with default values and the user can modify the values of the fields. Once complete, the user can add the record to the data source.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function-form>

NEW QUESTION 26

- (Exam Topic 3)

A company uses Power Automate and Power Apps to streamline business processes. You need to use AI Builder to analyze customer reviews of the company's products.

In which order should you perform the actions? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

Action	Answer Area
Publish the model.	
Connect data to the model.	
Train the model.	
Use the model in a Power Automate flow.	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Step 1: Connect data to the model.

First create an AI Builder form processing model for the customer reviews you want to process.

The screenshot shows the Power Apps AI Builder interface. On the left, a navigation pane lists steps: 'Select historical outcome', 'Review related data', 'Filters', and 'Model summary'. The main area displays the 'Model summary' page for 'Contoso orders'. It includes a 'Model type' of 'Prediction', an 'Owner' of 'Rena Lawrence', and a 'Data source' of 'Common Data Service'. Below this, the 'Historical outcome' is 'Order > Order Status' and 'Filters' are '3 conditions'. A table shows the number of fields for each entity: 'Invoice' (20) and 'Primary Contact (Contact)' (80). At the bottom, there are 'Back' and 'Train' buttons. A 'Quick tips' sidebar on the right offers help and feedback options.

Step 2: Train the model. Step 3: Publish the model.

Step 4: Use the model in a Power Automate flow.

Once you train and publish the model, create a solution-aware flow in Power Automate. Reference:

<https://powerapps.microsoft.com/en-us/blog/introducing-simplified-ai-builder-experience-in-power-automate/>

NEW QUESTION 29

- (Exam Topic 3)

You are designing a canvas app that will be used by all users including users who have vision impairments. Which outcome is achieved by each action? To answer, drag the appropriate outcomes to the correct actions.

Each outcome may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Outcomes	Action	Outcome
Not visible to any users	Set the values for the X and Y properties of a control to move the control off-screen.	Outcome
Visible to sighted users only	Set the Color and other related properties of a control to transparent.	Outcome
Visible to screen-reader users only	Set the Height and Width properties of a control to 1.	Outcome
Visible to both sighted and screen-reader users		

A. Mastered

B. Not Mastered

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/sv-se/powerapps/maker/canvas-apps/accessible-apps>

NEW QUESTION 33

- (Exam Topic 3)

You use a Microsoft SharePoint list to record information about customers.

You must perform a series of actions only when a new item is added to a SharePoint list. You need to configure a Power Automate flow.

Which trigger should you use?

A. When an item is created

B. When an item is created or modified

C. When a file is created (properties only)

D. For a selected item

Answer: A

Explanation:

Trigger - When an item is created Triggers when an item is created.

MS Flow will trigger when an item is created in the list. It will return all list item properties which can be used in the Flow.

Reference:

<https://www.c-sharpcorner.com/article/sharepoint-based-triggers-in-ms-flow-part-2/>

NEW QUESTION 34

- (Exam Topic 3)

You are an app maker.

You want to create apps and track customizations as part of the default solution. You need to determine the impact of performing the work in the default solution.

What should you conclude?

A. The default solution does not contain all components and customizations from all solutions in the environment.

B. The prefix used when creating components as part of the default solution can be set to a specific value.

C. The default solution cannot be exported and distributed to another environment.

Answer: C

Explanation:

Default Solution. This is a special solution that contains all components in the system. The default solution is useful for discovering all the components and configurations in your system.

Why you shouldn't use the default solutions to manage customizations

There are a few reasons why you shouldn't create apps and make customizations in either of the default solutions:

➤ The default solution can't be exported; therefore, you can't distribute the default solution to another environment.

The default solution contains all components and customizations from all solutions in the environment.

By default, all enabled users can create apps and customize components in the Common Data Services Default Solution.

It's difficult to locate or identify the customizations you've made in the environment by using either default solution.

When you use either default solution to create components, you'll also use the default publisher assigned to the solution. This often results in the wrong publisher prefix being applied to some components.
