NEW QUESTION 9
- (Topic 1)
Refer to the exhibits. Exhibit one.

Exhibit two.

An administrator created a new system template named Training with two new DNS addresses on FortiManager. During the installation preview stage, the administrator notices that many unset commands need to be pushed.
What can be the main reason for these unset commands?

A. The DNS addresses in the default system settings are the same as the Training system template
B. The Training system template has other default settings
C. The ADOM is locked by another administrator
D. The Training system template does not have assigned devices

Answer: B

NEW QUESTION 10
- (Topic 1)
Refer to the exhibit.

Which two statements about the output are true? (Choose two.)

A. The latest revision history for the managed FortiGate does match with the FortiGate running configuration
B. Configuration changes have been installed to FortiGate and represents FortiGate configuration has been changed
C. The latest history for the managed FortiGate does not match with the device-level database
D. Configuration changes directly made on the FortiGate have been automatically updated to device-leveldatabase

Answer: AC

Explanation:
STATUS: dev-db: modified; conf: in sync; cond: pending; dm: retrieved; conn: up– dev-db: modified – This is the device setting status which indicates that configuration changes were made on FortiManager.– conf: in sync – This is the sync status which shows that the latest revision history is in sync with Fortigate's configuration.– cond: pending – This is the configuration status which says that configuration changes need to be installed.
Most probably a retrieve was done in the past (dm: retrieved) updating the revision history DB (conf: in sync) and FortiManager device level DB, now there is a new modification on FortiManager device level DB (dev-db: modified) which wasn't installed to FortiGate (cond: pending), hence; revision history DB is not aware of that modification and doesn't match device DB.
Conclusion:– Revision DB does match FortiGate.– No changes were installed to FortiGate yet.– Device DB doesn't match Revision DB.– No changes were done on FortiGate (auto-update) but configuration was retrieved instead
After an Auto-Update or Retrieve:device database = latest revision = FGT
Then after a manual change on FMG end (but no install yet):latest revision = FGT (still) but now device database has been modified (is different).
After reverting to a previous revision in revision history:device database = reverted revision != FGT
