Exam Questions PL-100

Microsoft Power Platform App Maker

About Exambible

Your Partner of IT Exam

Found in 1998

Exambible is a company specialized on providing high quality IT exam practice study materials, especially Cisco CCNA, CCDA, CCNP, CCIE, Checkpoint CCSE, CompTIA A+, Network+ certification practice exams and so on. We guarantee that the candidates will not only pass any IT exam at the first attempt but also get profound understanding about the certificates they have got. There are so many alike companies in this industry, however, Exambible has its unique advantages that other companies could not achieve.

Our Advances

* 99.9% Uptime

    All examinations will be up to date.

* 24/7 Quality Support

    We will provide service round the clock.

* 100% Pass Rate

    Our guarantee that you will pass the exam.

* Unique Gurantee

    If you do not pass the exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

NEW QUESTION 1
- (Exam Topic 1)
You publish the first version of the app and solution on November 1, 2020. You need to create the version numbers for the app and the solution.
Which version numbers should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: 1.0.0.0
When identifying versions of the app solution, all dependencies, entities, and user interfaces components must be identified to avoid any unintentional issues caused by reverting individual components to a previous version.
A solution's version has the following format: major.minor.build.revision. An update must have a higher major, minor, build or revision number than the parent solution. For example, for a base solution version 3.1.5.7, a small update could be a version 3.1.5.8 or a slightly more signficant update could have version 3.1.7.1. A substantially more significant update could be version 3.2.0.0.
Box 2: 20.11.1.1
Scenario:
 You must use the following version control numbering scheme:
- Major: The last two digits of the year the app is packaged
- Minor: Two digits that represent the month when the app is packaged
- Build: A number that is incremented to represent significant changes to the app
- Revision: The incremented revision for a package
New versions of the application must completely replace previous versions of the app. Reference:
https://docs.microsoft.com/en-us/powerapps/maker/common-data-service/update-solutions

NEW QUESTION 2
- (Exam Topic 1)
You need to configure the app to meet the requirements.
Which object properties should you configure? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Fill
Scenario: You must display a visual indicator in the app so that sales representatives know whether the app is offline before submitting reports.

Fill – The background color of a control. Reference:
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/controls/control-screen https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function-form

NEW QUESTION 3
- (Exam Topic 1)
You need to ensure that the app can support the needs of User2 and User3, and meets the production deployment requirements.
Which tools should you use? To answer, select the appropriate tool in the answer area. NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: App Checker
Scenario: Several sales representatives have accessibility restrictions. User2 is visually impaired and cannot see images. User3 is unable to use a mouse.
Users who have vision, hearing, or other impairments can use your canvas app more easily and successfully if you consider accessibility as you design how the app looks and behaves. If you're not sure how to make your app more accessible, you can run the AppChecker Accessibility checker in Power Apps Studio.
Box 2: Solution Checker
Scenario: Before deploying the app to production, you must ensure that the app conforms to Microsoft accessibility and performance guidelines.
Use solution checker to validate your model-driven apps in Power Apps. Reference:
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/accessibility-checker https://docs.microsoft.com/en-us/powerapps/maker/common-data-service/use-powerapps-checker

NEW QUESTION 4
- (Exam Topic 2)
You need to implement the change requested by the operations manager. Which control should you use?
BF70D5D

A. Camera
B. Shape
C. Add picture
D. Image

Answer: D

Explanation:
Scenario: The operations manager asks that the time tracking app display the employee's photo once they have scanned their badge.
Image control in Power Apps is a control that shows an image from, for example, a local file or a data source. Reference:
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/controls/control-image

NEW QUESTION 5
- (Exam Topic 2)
You need to create the solution assets.
What should you use to create the visualizations? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: PowerBI Desktop
The Sales dashboard must reside in the Sales channel and must include information about active quotes, sales pipeline, and year-to-date sales KPIs for sales quotas by region.
PowerBI Desktop to support many data source. Box 2: PowerBI Desktop or Power BI Service on
A dashboard that shows a capacity Heat map by month as well as expected sales that are likely to close for the next month.
Both support visualizations. Reference:
https://docs.microsoft.com/en-us/power-bi/fundamentals/service-service-vs-desktop

NEW QUESTION 6
- (Exam Topic 2)
You need to implement logic in the app for lost sales. What should you do?

A. Create a business process flow.
B. Define a business rule for the Sales Log edit form.
C. Set the required field property of the Won/Lost field to Required.
D. Create a formula for the Description field that uses the Update function.

Answer: B

Explanation:
Scenario: Requests for quotes are currently stored in a Sales Log workbook. The workbook includes the following information:
 Status of the Request for Quote (RFQ) with the values of Won, Lost, No Bid, and Cancelled Salespeople often do not set status of RFQs in the Sales Log to Won when a sale is closed and the customer
purchase order is received.
You can create business rules and recommendations to apply logic and validations without writing code or creating plug-ins. Business rules provide a simple interface to implement and maintain fast-changing and commonly used rules.
Business rules defined for an entity apply to both canvas apps and model-driven apps if the entity is used in the app.
Reference:
https://docs.microsoft.com/en-us/powerapps/maker/common-data-service/data-platform-create-business-rule

NEW QUESTION 7
- (Exam Topic 3)
You create a canvas app.
A user is not able to determine which field currently has focus. You run App checker to identify errors. You need to verify that the focused border thickness is set to a value greater than zero.
Which section of the App checker results should you check?

A. Rules
B. Performance
C. Accessibility
D. Runtime

Answer: C

Explanation:
The Accessibility checker classifies each issue as an error, a warning, or a tip based the issue's severity. Issues include:
 Focus isn't showing
When the FocusBorderThickness of a control is set to 0. It is good practice to ensure a proper color-contrast ratio between the focus border and the control itself so it's clearly visible.
Reference:
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/accessibility-checker

NEW QUESTION 8
- (Exam Topic 3)
Each maker at a company has a separate Common Data Service environment. You are customizing a canvas app. You create two new entities in your environment.
You are leaving for a vacation. Another maker will continue customizing the app in your absence.
You need to transfer the work to the other maker and ensure that you can work on the updated app when you return from your vacation.
What should you export?

A. ununmanaged solution that includes all customizations
B. the default solution
C. a managed solution that includes all customizations
D. the app

Answer: A

Explanation:
Unmanaged Solution: The beginning state of solution is the unmanaged solution state. During this phase, you can add, edit, update, remove, delete, and test any of the components of the solution.
Reference:
https://powerusers.microsoft.com/t5/Power-Apps-Pro-Dev-ISV/Managed-vs-Unmanaged/td-p/495685

NEW QUESTION 9
- (Exam Topic 3)
You are an app builder for a medical office. The medical office uses activities to book appointments and business process flows to track patient status. The cleaning staff wants the app to connect directly to a Microsoft Excel workbook to track cleaning tasks. The office does not have access to reporting tools including Power BI.
You need to create apps for the following groups of users. Apps must not require customizations or the use of additional products.

Which type of app should you build for each group? To answer, drag the appropriate app types to the correct groups. Each app type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Reference:
https://docs.microsoft.com/en-us/powerapps/maker/model-driven-apps/embedded-canvas-app-guidelines https://global.hitachi-solutions.com/blog/canvas-vs-model-driven-apps

NEW QUESTION 10
- (Exam Topic 3)
You are configuring security to enable users to analyze data by using Microsoft Excel templates.
You create a security role named TemplateAdministrator and configure the role as shown below and assign the role to a user named User1.

Use the drop-down menus to select the answer choice that answers each question based on the information presented in the graphic.
NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 10
- (Exam Topic 3)
A company has a Common Data Service custom entity that stores customer account data. You need to create a relationship between the custom entity and the Account entity. Which two tools can you use? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.

A. Power Platform Admin center
B. Power Apps solution explorer
C. Power Apps Maker portal
D. SQL Server Management Studio
E. Visual Studio Code

Answer: BC

Explanation:
There are two designers you can use to create and edit 1:N (one-to-many) or N:1 (many-to-one) relationships:
 You can create and edit 1:N (one-to-many) or N:1 (many-to-one) entity relationships in Power Apps portal
 You can create and edit create and edit 1:N (one-to-many) or N:1 (many-to-one) entity relationships using solution explorer
Reference:
https://docs.microsoft.com/en-us/powerapps/maker/common-data-service/create-edit-1n-relationships

NEW QUESTION 11
- (Exam Topic 3)
You need to set the value for a global variable named RunningTotal to 5 and navigate to the previous screen named MainScreen.
Which formula should you use?

A. UpdateContext({ RunningTotal: 5 }); Navigate(MainScreen, ScreenTransition.Cover, RunningTotal);
B. If(Value(TextBox1.Text) >= 0, (Set(RunningTotal, 5); Back();), Color.Green)
C. UpdateContext({ RunningTotal:5 }); Back()
D. Set(RunningTotal, 5); Back();

Answer: D

Explanation:
You set the value of the global variable with the Set function. Set(MyVar, 1) sets the global variable MyVar to a value of 1.
Use the Back and Navigate function to change which screen is displayed. Reference:
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/working-with-variables https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function-navigate

NEW QUESTION 15
- (Exam Topic 3)
You create a canvas app.
You need to make the app available to other people in your company.
What are two possible ways to achieve the goal? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.

A. Grant access to individual users in your company.
B. Share the app with a Microsoft Exchange distribution list.
C. Grant access to a Microsoft Teams team.
D. Share the app with a Microsoft Azure Active Directory security group.

Answer: AD

Explanation:
After you build a canvas app that addresses a business need, specify which users in your organization can run the app and which can modify and even reshare it.
Specify each user by name, or specify a security group in Azure Active Directory.
Reference:
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/share-app

NEW QUESTION 17
- (Exam Topic 3)
You have a solution that contains a Power Automate flow, an environment variable, and a model-driven app. Which three steps should you perform in sequence?
To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Step 1: Adjust the version number. Step 2: Select the managed solution.
Managed Solution: A managed solution is a finalized solution that can be distributed and installed. They are created by exporting an unmanaged solution by setting restrictions to prevent any further customizations. The whole point of Managed is locking down the Component states so they cannot be edited. Deleting the Managed Solution will remove all its customisations as well as data contained. Managed Solutions become read only once deployed so they cannot be manipulated.
Step 3: Publish all changes. Reference:
https://powerusers.microsoft.com/t5/Power-Apps-Pro-Dev-ISV/Managed-vs-Unmanaged/td-p/495685

NEW QUESTION 20
- (Exam Topic 3)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You are creating a canvas app that displays a list of accounts.
Users must be able to select an account and view details for the account. The app must include a feature that brings the user back to the list of accounts.
You add a blank screen named Screen_Accounts and add a gallery named Gallery_Accounts to the screen. You set the data source of Gallery_Accounts to Accounts and add another blank screen named Screen_AccountDetail.
You need to complete the app. Solution:
 Add an edit form to Screen_AccountDetail and set the Default Mode of the form to New
 Set the OnSelect property of Gallery_Accounts to Navigate(Screen_AccountDetail).
 Set the data source of the form to Accounts.
 Set the Item property of the form to Selected.
 Add a back icon on Screen_AccountDetail and set its OnSelect property to Navigate(Screen_Accounts).
Does the solution meet the goal?

A. Yes
B. No

Answer: B

Explanation:
FormMode.New: the form is populated with default values and the user can modify the values of the fields. Once complete, the user can add the record to the data source.
Reference:
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function-form

NEW QUESTION 23
- (Exam Topic 3)
A company uses data loss prevention (DLP) policies. You have a Power Automate flow that posts Twitter mentions into a Microsoft SharePoint list.
You are not able to activate the flow. You need to troubleshoot the issue.
What are two possible reasons why you cannot activate the flow? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.

A. You are not assigned the Power Platform Admin role.
B. You placed all connectors into the Business group within the DLP policy.
C. You placed all connectors into the Non-Business group within the DLP policy.
D. You are not assigned the Environment Admin role.

Answer: BD

Explanation:
D: DLP policies are created in the Power Platform admin center. They affect Power Platform canvas apps and Power Automate flows. To create a DLP policy, you need to be a tenant admin or have the Environment Admin role.
B: This table describes how the DLP policy you created affects data connections in apps and flows.

Note: Any connector that resides in the Non-Business data group—such as Outlook.com—won't share data with apps and flows by using SharePoint or Salesforce connectors. Facebook and Twitter connectors are altogether blocked from being used in any app or flow in non-test environments such as production or default environments.
Reference:
https://docs.microsoft.com/en-us/power-platform/admin/wp-data-loss-prevention

NEW QUESTION 25
- (Exam Topic 3)
You are designing a canvas app that will be used by all users including users who have vision impairments. Which outcome is achieved by each action? To answer, drag the appropriate outcomes to the correct actions.
Each outcome may be used once, more than once, or not at all. You may need to drag the split bar between
panes or scroll to view content.
NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Reference:
https://docs.microsoft.com/sv-se/powerapps/maker/canvas-apps/accessible-apps

NEW QUESTION 30
- (Exam Topic 3)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You build a canvas app for a manufacturing company. The company receives parts and materials from many vendors. You create a form to collect information from packing slips.
Receivers must be able to take a picture of packing slips to receive materials instead of manually entering data in the app.
You need to ensure that users can scan packing slip information into the form.
Proposed solution: Use a Category classification model. Does the solution meet the goal?

A. Yes
B. No

Answer: B

Explanation:
A Category classification model categorizes text by its meaning. Reference:
https://knowledgefrommanish.com/powerplatform/ai-builder-entity-extraction-ai-model/

NEW QUESTION 32
- (Exam Topic 3)
You use a Microsoft SharePoint list to record information about customers.
You must perform a series of actions only when a new item is added to a SharePoint list. You need to configure a Power Automate flow.
Which trigger should you use?

A. When an item is created
B. When an item is created or modified
C. When a file is created (properties only)
D. For a selected item

Answer: A

Explanation:
Trigger - When an item is created Triggers when an item is created.
MS Flow will trigger when an item is created in the list. It will return all list item properties which can be used in the Flow.
Reference:
https://www.c-sharpcorner.com/article/sharepoint-based-triggers-in-ms-flow-part-2/

NEW QUESTION 34
- (Exam Topic 3)
You are creating a multi-page canvas app that loads tabular data from an external data source. Once loaded, the data must be available to all screens within the canvas app.
You need to reduce the number of times that the app must retrieve data from the data source. Which two data stores can you use? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

A. parameter
B. global variable
C. collection
D. environment variable

Answer: CD

Explanation:
Reference:
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/working-with-data-sources

NEW QUESTION 36
- (Exam Topic 3)
You create a canvas app for technicians at a computer store. You assign technicians cases to work on. The technicians update cases at the end of customer site visit.
The manager wants the technicians to sell warranties to the customers. If a customer agrees to purchase a warranty, technicians use the canvas app to immediately alert the sales team, and then the technician records details about the warranty into the app.
You need to create a flow to alert the sales team. Which type of trigger should you use?

A. Flow button for mobile
B. Power Apps
C. Office 365 Outlook
D. Common Data Service

Answer: A

Explanation:
Create a button flow to run routine tasks by simply tapping a button. Customize your flow by allowing the user to provide specific details that will be used when the flow runs.

Note: There are many repetitive tasks that we all wish we could run with just a tap of a button. For example, you may need to quickly email your team to remind them to join the daily team sync, or you may want to start a new Visual Studio Codespaces build of your code base after you've been notified that there are no more checkins planned for the day. Button flows allow you to accomplish these and many other tasks simply by tapping a button on your mobile device.

Reference:
https://docs.microsoft.com/en-us/power-automate/button-flow-with-user-input-tokens

NEW QUESTION 40
- (Exam Topic 3)
You are an app maker.

You want to create apps and track customizations as part of the default solution. You need to determine the impact of performing the work in the default solution.
What should you conclude?

A. The default solution does not contain all components and customizations from all solutions in the environment.
B. The prefix used when creating components as part of the default solution can be set to a specific value.
C. The default solution cannot be exported and distributed to another environment.

Answer: C

Explanation:
Default Solution. This is a special solution that contains all components in the system. The default solution is useful for discovering all the components and configurations in your system.
Why you shouldn't use the default solutions to manage customizations
There are a few reasons why you shouldn't create apps and make customizations in either of the default solutions:
 The default solution can't be exported; therefore, you can't distribute the default solution to another environment.
The default solution contains all components and customizations from all solutions in the environment.
By default, all enabled users can create apps and customize components in the Common Data Services Default Solution.
It's difficult to locate or identify the customizations you've made in the environment by using either default solution.
When you use either default solution to create components, you'll also use the default publisher assigned to the solution. This often results in the wrong publisher prefix being applied to some components.
Reference:
https://docs.microsoft.com/en-us/power-platform/alm/use-solutions-for-your-customizations
