

Microsoft

Exam Questions MS-203

Microsoft 365 Messaging

NEW QUESTION 1

- (Topic 5)

Your company has a Microsoft Exchange Server 2019 hybrid deployment.

Users in the advertising department and the editorial department of the company have mailboxes in Exchange Online.

A company policy requires that the advertising department users and the editorial department users be segmented based on the following requirements:

? The advertising department users must not see the editorial department users in the global address list

? (GAL).

? The editorial department users must not see the advertising department users in the GAL.

? The editorial department users must be treated as external recipients of the advertising department users.

? The advertising department users must be treated as external recipients of the editorial department users.

You need to recommend a solution that meets the requirements and minimize costs and effort.

What should you recommend?

A. In the Exchange Online tenant, create separate address book policies (ABPs) for the advertising and editorial departments.

B. Migrate all the mailboxes of the advertising department to the on-premises organization, and then enable address book policy (ABP) routing.

C. Purchase an additional Microsoft 365 subscription, and then migrate all the mailboxes of the advertising department to the new subscription.

D. Create two address book policies (ABPs) in Exchange Online, and then enable ABP routing for the Exchange Online tenant.

Answer: D

Explanation:

References:

<https://docs.microsoft.com/en-us/exchange/email-addresses-and-address-books/address-book-policies/address-book-policies?view=exchserver-2019>

NEW QUESTION 2

- (Topic 5)

You have a Microsoft 365 tenant that contains a user named User1.

User1 reports that she cannot configure a mail profile in Microsoft Outlook for Windows. User1 receives the following error message: "Encrypted connection to your mail server is not available."

You verify that User1 is assigned a Microsoft Office 365 Enterprise F3 license and can send email messages from her account by using Outlook on the web.

You need to ensure that User1 can connect to Outlook successfully. What should you do?

A. Run the Microsoft Support and Recovery Assistant for Office 365.

B. Activate the installation of Office 365 ProPlus.

C. Modify the license assigned to User1.

D. Install a new certificate on the computer of User1.

Answer: C

Explanation:

Reference:

<https://docs.microsoft.com/en-us/exchange/troubleshoot/outlook-issues/encrypted-connection-unavailable>

NEW QUESTION 3

- (Topic 5)

You have a Microsoft Exchange Online tenant that uses an email domain named @contoso.com.

You recently configured Microsoft 365 to use a new email domain named @fabrikam.com instead of @contoso.com

Users report that when they send email messages to external recipients, the messages are often erroneously identified as SPAM.

You verify that all the users can receive email successfully from other companies.

You need to reduce the likelihood that the email will be identified as SPAM by the external recipients.

What should you modify?

A. a text (TXT) record

B. a mail flow rule

C. a remote domain

D. a safe attachments policy

E. a mail exchanger (MX) record

Answer: B

NEW QUESTION 4

- (Topic 5)

You have a Microsoft 365 subscription that uses a default domain named contoso.com.

Users report that email messages from a domain named fabrikam.com are identified as spam even though the messages are legitimate.

You need to prevent messages from fabrikam.com from being identified as spam. What should you do?

A. Enable the Zero-hour auto purge (ZAP) email protection feature.

B. Enable the safe list on a connection filter.

C. Edit the default mail flow rule to bypass the spam filter.

D. Modify the IP Allow list of a connection filter policy.

Answer: D

Explanation:

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/security/office-365-security/configure-the-connection-filter-policy?view=o365-worldwide>

NEW QUESTION 5

SIMULATION - (Topic 5)

SIMULATION

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

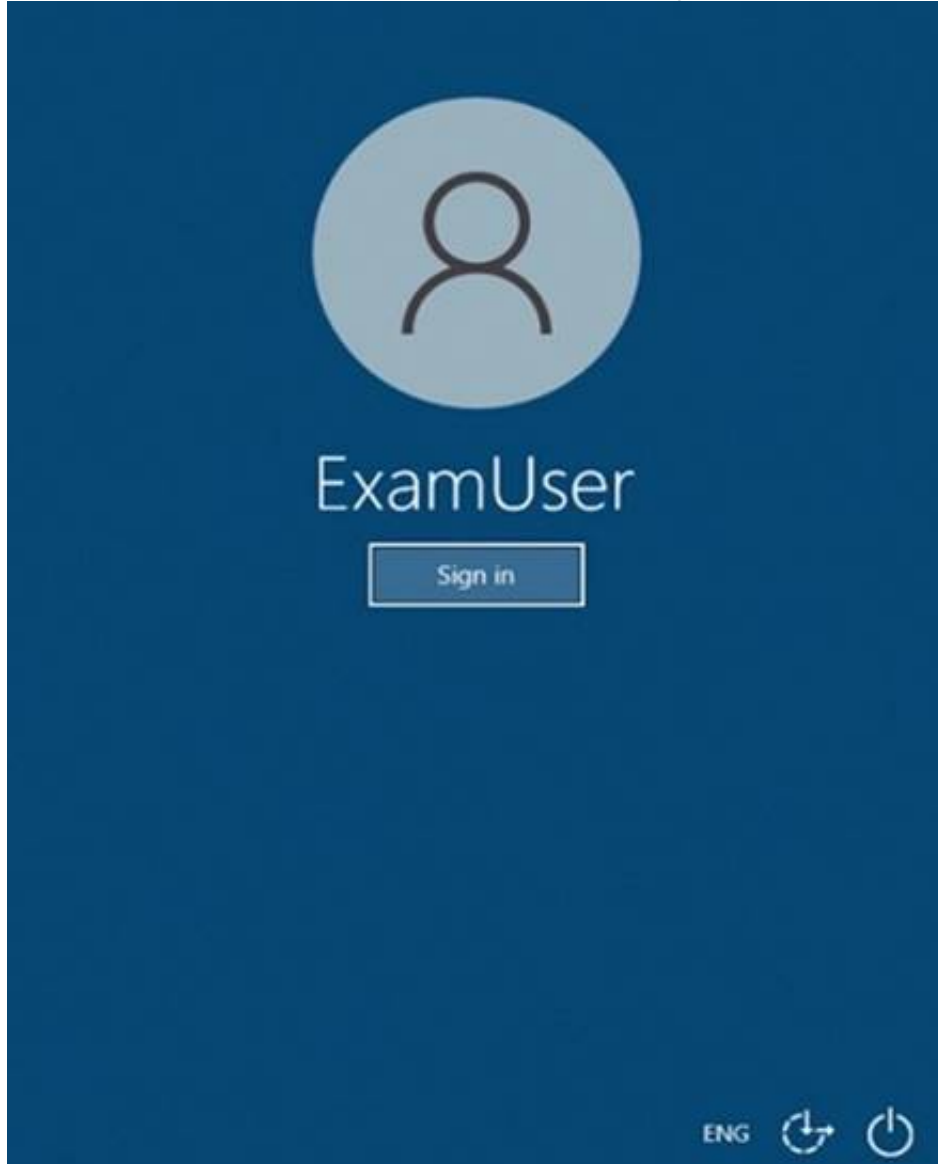

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you

as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Use the following login credentials as needed:

To enter your username, place your cursor in the Sign in box and click on the username below.

To enter your password, place your cursor in the Enter password box and click on the password below.

Microsoft 365 Username: admin@abc.com

Microsoft 365 Password: xxxxxx

If the Microsoft 365 portal does not load successfully in the browser, press CTRL-K to reload the portal in a new browser tab.

The following information is for technical support purposes only.

Lab Instance: XXXXXX

You need to ensure that the users in your tenant can only share calendar availability information with users in the tenant and users in a domain named contoso.com.

To complete this task, sign in to the Microsoft 365 admin center.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

? From the Microsoft 365 admin center dashboard, go to Admin > Exchange.

? Go to Organization > Sharing.

? Under Organization Sharing, click New +.

? In new organization relationship, in the Relationship name box, type a friendly name for the organization relationship.

? In the Domains to share with box, type the domain for the external Microsoft 365, Office 365, or Exchange on-premises organization you want to let see your calendars. If you need to add more than one domain, you can do it after you create the organization relationship by editing it.

? Select the Enable calendar free/busy information sharing check box to turn on calendar sharing with the domains you listed. Set the sharing level for calendar free/busy information and set which users can share calendar free/busy information.

? To set the free/busy access level, select one of the following values:

- Calendar free/busy information with time only
- Calendar free/busy with time, subject, and location

To set which users will share calendar free/busy information, select one of the following values:

- Everyone in your organization
- A specified security group

? Click Browse to pick the security group from a list, then click OK.

? Click Save to create the organization relationship.

NEW QUESTION 6

DRAG DROP - (Topic 5)

Your company has three departments name Dept1, Dept2. and Dept3 and a Microsoft Exchange Online tenant.

You need to increase security for the email messages sent from the departments. The solution must meet the following requirements:

« Users in Dept1 must be able to digitally sign and encrypt email messages as required.

+ Email messages sent from Dept2 to an external email domain must be encrypted automatically during transit only.

« Email messages sent from Dept3 to an external email domain must be encrypted until the recipient opens the message.

« Implementation costs must be minimized.

'Which type of encryption should you use for each department? To answer, drag the appropriate encryption types to the correct departments. Each encryption type may be used

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

? Users in Dept1 should use S/MIME encryption1. S/MIME is a standard for public key encryption and signing of email messages1. It allows users to digitally sign and encrypt email messages as required using certificates1. S/MIME provides end-to-end encryption and ensures message integrity and sender authentication1.

? Email messages sent from Dept2 to an external email domain should

use TLS encryption1. TLS is a protocol that encrypts the connection or session between two servers1. It protects email messages during transit only and does not require any action from the sender or recipient1. TLS provides opportunistic encryption and ensures message confidentiality and server authentication1.

? Email messages sent from Dept3 to an external email domain should

use Microsoft Purview Message Encryption2. Microsoft Purview Message Encryption is an online service that encrypts email messages and attachments using rights management policies2. It allows users to send encrypted email messages to anyone inside or outside the organization using various email services2.

Microsoft Purview Message Encryption provides persistent encryption and ensures message confidentiality and authorization policies2.

NEW QUESTION 7

- (Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft Exchange Online tenant that contains 1,000 users.

A user named User1 receives a non-delivery report (NDR) when attempting to send an email message to an internal group named sales@contoso.com. The NDR contains the following text: "5.7.1 Delivery not authorized."

You need to ensure that User1 can send email to sales@contoso.com successfully. Solution: You modify the properties of the sales@contoso.com group.

- A. Yes
- B. No

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/exchange/mail-flow-best-practices/non-delivery-reports-in-exchange-online/fix-error-code-550-5-7-1-in-exchange-online>

NEW QUESTION 8

- (Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has a Microsoft 365 subscription.

Several users in the finance department of the company recently accessed unsafe websites by clicking on links in email messages.

Users in the marketing department of the company report that they must be able to access all the links embedded in email messages.

You need to reduce the likelihood of the finance department users accessing unsafe websites. The solution must affect only the finance department users.

Solution: You modify the Global Settings Safe Links policy.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/security/office-365-security/configure-global-settings-for-safe-links?view=o365-worldwide>

NEW QUESTION 9

- (Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has a Microsoft Exchange Server 2019 hybrid deployment that contains two Mailbox servers named MBX1 and MBX2.

The company has the departments shown in the following table.

Name	Mailbox location	Number of recipients
Sales	MBX1	300
Production	MBX2	500
Administration	MBX1	200
IT	Exchange Online	50
Managers	Exchange Online	100
Marketing	Exchange Online	350

From the on-premises organization, outbound email is sent directly to the Internet by using DNS lookups.

You are informed that some sales department users send email messages that are identified as spam.

You need to automatically block the sales department users from repeatedly sending spam.

Solution: You migrate all the mailboxes of the sales department to Exchange Online. Does this meet the goal?

A. yes

B. No

Answer: A

Explanation:

Exchange Online Protection (EOP) will scan outbound messages from Exchange Online mailboxes.

NEW QUESTION 10

- (Topic 5)

You have a Microsoft Exchange Online tenant that uses Microsoft Defender for Office 365.

You need to create a new Safe Attachments policy named Policy1 that meets the following requirements:

? Immediately delivers email messages that contain attachments and replaces the attachments with placeholders

? Reattaches the attachments after scanning is complete

? Quarantines malicious attachments

Which action should you select for Policy1?

A. Monitor

B. Block

C. Dynamic Delivery

D. Replace

Answer: C

NEW QUESTION 10

SIMULATION - (Topic 5)

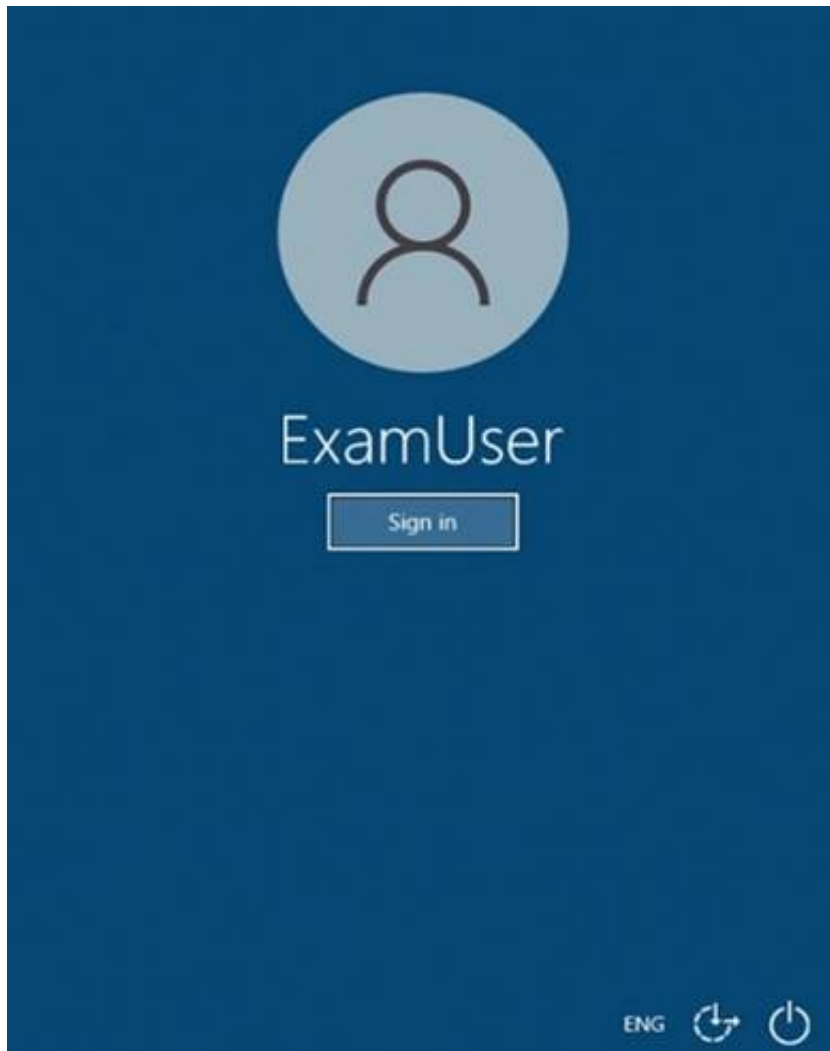

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Use the following login credentials as needed:

To enter your username, place your cursor in the Sign in box and click on the username below.

To enter your password, place your cursor in the Enter password box and click on the password below.

Microsoft 365 Username: admin@abc.com

Microsoft 365 Password: xxxxxx

If the Microsoft 365 portal does not load successfully in the browser, press CTRL-K to reload the portal in a new browser tab.

The following information is for technical support purposes only.

Lab Instance: XXXXXX

Two users named Christie Cline and Irvyn Sayers leave your company.

You need to ensure that all email sent to the users at your company are forwarded automatically to the mailbox of Megan Bowen. The solution must NOT use mail flow rules.

To complete this task, sign in to the Microsoft 365 admin center.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

? In the EAC, go to Recipients > Mailboxes.

? In the list of user mailboxes, click or tap the mailbox that you want to configure mail forwarding for, and then click or tap Edit

? On the mailbox properties page, click Mailbox Features.

? Under Mail Flow, select View details to view or change the setting for forwarding email messages.

On this page, you can set the maximum number of recipients that the user can send a message to. For on-premises Exchange organizations, the recipient limit is unlimited. For Exchange Online organizations, the limit is 500 recipients.

? Check the Enable forwarding check box, and then click or tap Browse.

? On the Select Recipient page, select a user you want to forward all email to. Select the Deliver message to both forwarding address and mailbox check box if you want both the recipient and the forwarding email address to get copies of the emails sent. Click or tap OK, and then click or tap Save.

NEW QUESTION 13

- (Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft Exchange Server 2019 hybrid deployment. All user mailboxes are hosted in Microsoft 365. All outbound SMTP email is routed through the on-premises Exchange organization.

A corporate security policy requires that you must prevent credit card numbers from being sent to internet recipients by using email.

You need to configure the deployment to meet the security policy requirement. Solution: From Microsoft 365, you create a supervision policy.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

You should create a Data Loss Prevention (DLP) policy.

NEW QUESTION 14

HOTSPOT - (Topic 5)

You have an address book policy named Contoso-US that contains an address list named Contoso-Finance. You need to add an address list named Contoso-Marketing to Contoso-US without removing Contoso-Finance. How should you complete the command? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

New-AddressList
Set-AddressList

NEW QUESTION 16

- (Topic 5)

You have a Microsoft Exchange Online tenant and the devices shown in the following table.

Name	Operating system	Microsoft Outlook version
Device1	Windows	Outlook 2019
Device2	MacOS	Outlook 2016 for Mac
Device3	iOS	Outlook for iOS
Device4	Windows	Outlook on the web

You plan to implement sensitivity labels for users to apply to email messages. Which Microsoft Outlook versions will support sensitivity labels without requiring additional software?

- A. Outlook 2019 and Outlook on the web only
 B. Outlook on the web only
 C. Outlook 2019. Outlook 2016 for Ma
 D. Outlook for iO
 E. and Outlook on the web
 F. Outlook for iOS and Outlook on the web only
 G. Outlook 2019 only

Answer: D

NEW QUESTION 17

SIMULATION - (Topic 5)

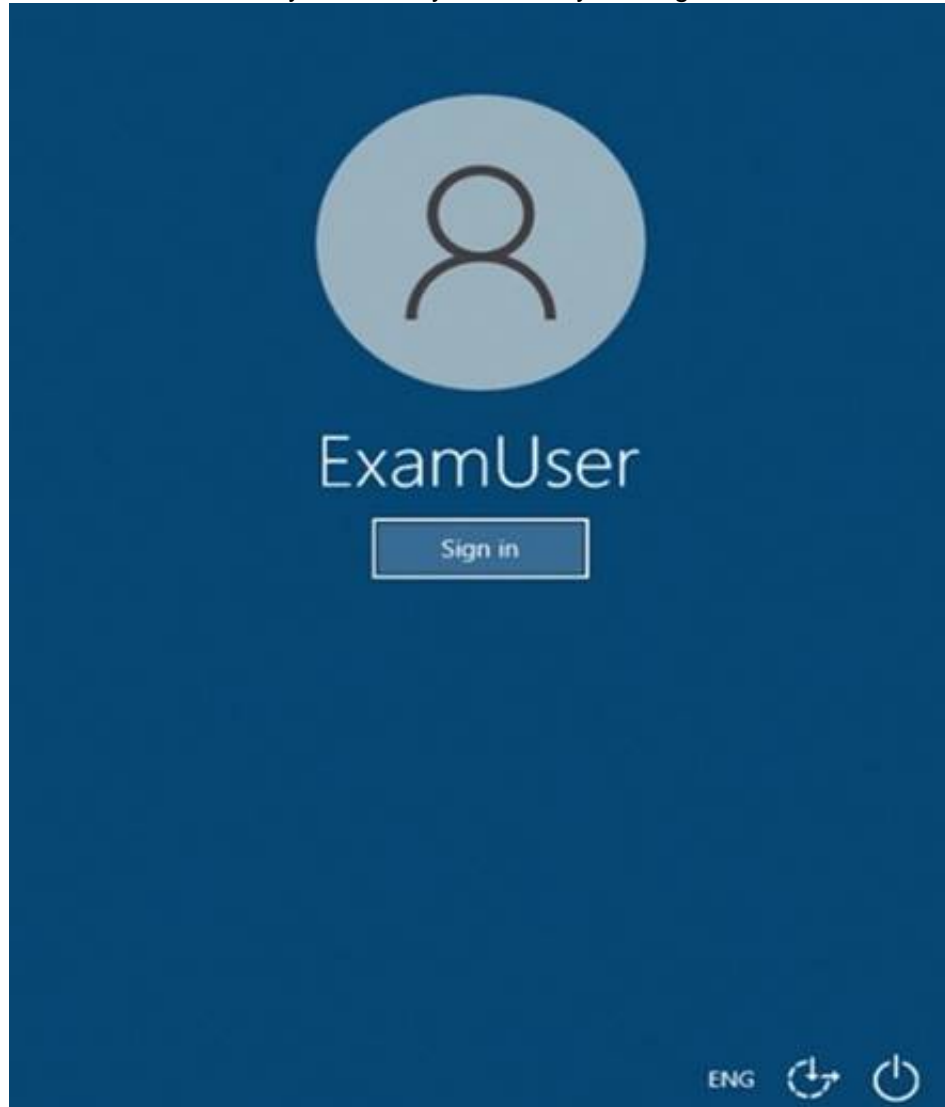

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. To enter your password, place your cursor in the Enter password box and click on the password below.

Microsoft 365 Username: admin@abc.com

Microsoft 365 Password: xxxxxx

If the Microsoft 365 portal does not load successfully in the browser, press CTRL-K to reload the portal in a new browser tab.

The following information is for technical support purposes only.

Lab Instance: XXXXXX

You need to prevent users in your company from sending out-of-office replies to users who use an email address suffix of @contoso.com. The solution must NOT use mail flow rules.

To complete this task, sign in to the Exchange admin center.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

? In the Exchange admin center, go to Mail flow > Remote domains.

? Click + Add a remote domain. The Name the domain screen appears.

? In the Name text box, enter a descriptive name for the domain.

? In the Remote Domain text box, enter the full domain name. Use the wildcard character (*) for all subdomains of a specified domain, for example, *.contoso.com.

? Click Next. The Email reply types screen appears.

? Define the following settings:

- In the Out of Office reply types section, specify which type of out-of-office replies should be sent to people at this domain.

- In the Automatic replies section, specify whether you want to allow automatic replies, automatic forwarding, or both.

? Click Next. The Message reporting screen appears.

? Specify whether you want to allow delivery reports and non-delivery reports by checking the respective check boxes.

? Click Next. The Text and character set screen appears.

? Define the following settings:

- In the Use Rich-text format pane, specify whether to follow each user's message settings, or whether to always or never preserve RTF formatting. Selecting Never means that RTF messages are sent as plain text or HTML.

- In the Supported Character Set pane, specify which character set to use (if the message doesn't specify the character set) by choosing from the MIME character set or on-MIME character set drop-down list.

? Click Next. The Review screen appears.

? Review the remote domain settings, and click Save.

NEW QUESTION 18

- (Topic 5)

You have a hybrid deployment between a Microsoft Exchange Online tenant and an

Exchange Server 2019 organization. You need to enable journaling for outbound email. Where can you store the journal reports?

- A. a mail-enabled public folder
- B. an Exchange Server 2019 mailbox
- C. a Microsoft SharePoint Online document library
- D. an Exchange Online mailbox

Answer: A

NEW QUESTION 22

DRAG DROP - (Topic 5)

You have a Microsoft Exchange Online tenant that contains the users shown in the following table.

Name	Type	Assigned license
User1	Member	Microsoft 365 E3
User2	Member	Microsoft 365 E5
User3	Guest	None

You need to create audit retention policies to retain the mailbox activity of all the users. What is the maximum duration that you can set for each user? To answer, drag the appropriate duration values to the correct users. Each duration value may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

NEW QUESTION 25

DRAG DROP - (Topic 5)

You have a Microsoft Exchange Server 2019 hybrid deployment. All user mailboxes are migrated to Exchange Online.

You need to migrate the public folders from the on-premises organizations to Exchange Online.

Which three actions should you perform in sequence before you create the migration batch? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

From Exchange Online, create the target public folder mailboxes.

From Exchange Online, run the Set-organizationConfig -RemotePublicFolderMailboxes \$Null -PublicFoldersEnabled Local command

From Exchange on-premises, run the SetmailPublicFolderExternalAddress.ps1 script

From Exchange on-premises, run the Export-ModernPublicFolderStatistics.ps1 script

From Exchange on-premises, run the Set-OrganizationConfig -RemotePublicFolderMailboxes \$Null -PublicFoldersEnabled Local command

From Exchange on-premises, run the ModernPublicFolderToMailboxMapgenerator.ps1 script.

Answer Area

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 29

- (Topic 5)

You have a Microsoft Exchange Online tenant.

The tenant has the following Exchange ActiveSync configurations.

```
[PS] C:\> Get-ActiveSyncDeviceAccessRule | f1 Name, QueryString, AccessLevel, Characteristic

Name           : Outlook for iOS and Android (DeviceModel)
QueryString    : Outlook for iOS and Android
AccessLevel    : Allow
Characteristic  : DeviceModel

[PS] C:\> Get-ActiveSyncOrganizationSettings | f1 Name, DefaultAccessLevel, IsIntuneManaged,
HasAzurePremiumSubscription, DeviceFiltering

Name           : Mobile Mailbox Settings
DefaultAccessLevel : False
IsIntuneManaged  : False
HasAzurePremiumSubscription : False
DeviceFiltering   :
```

Which mail client can Android device users use?

- A. both native Exchange ActiveSync clients and Microsoft Outlook for Android
- B. Microsoft Outlook for iOS and Android only
- C. native Exchange ActiveSync clients only
- D. neither native Exchange ActiveSync clients nor Microsoft Outlook for Android

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/powershell/module/exchange/new-activesyncdeviceaccessrule?view=exchange-ps>

NEW QUESTION 34

HOTSPOT - (Topic 5)

You have a Microsoft Exchange Online tenant that contains three users named User1, User2, and User3.

Mobile device mailbox policies are configured as shown in the following exhibit.

mobile device access mobile device mailbox policies

+

NAME	MODIFIED
Default (default)	9/28/2020 8:06 AM
Executive policy	9/28/2020 8:07 AM
Managers policy	9/28/2020 8:07 AM

The users are configured as shown in the following table.

Name	Assigned policy
User1	Executive policy
User2	Managers policy
User3	Default

You create a new mobile device mailbox policy as shown in the following exhibit.

new mobile device mailbox policy

*Required fields

*Name:

- ☒ This is the default policy
- ☒ Allow mobile devices that don't fully support these policies to synchronize

Policies for Exchange ActiveSync and OWA for Devices

Select the policies that you want to enable for Exchange ActiveSync and OWA for Devices. [Learn more](#)

- ☒ Require a password
- ☐ Allow simple passwords
- ☒ Require an alphanumeric password
- Password must include this many character sets:
-
- ☐ Require encryption on device
- ☒ Minimum password length:
-
- ☐ Number of sign-in failures before device is wiped:
-
- ☐ Require sign-in after the device has been inactive for (minutes):
- minutes
- ☒ Enforce password lifetime (days):
- days
- Password recycle count:
-

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
 NOTE: Each correct selection is worth one point.

Statements	Yes	No
Mobile Tablet Policy will be assigned to User3 automatically.	<input type="radio"/>	<input type="radio"/>
A new user can use a password of 135753.	<input type="radio"/>	<input type="radio"/>
Mobile Tablet Policy will be assigned to new users.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
 B. Not Mastered

Answer: A

Explanation:

Statements	Yes	No
Mobile Tablet Policy will be assigned to User3 automatically.	<input checked="" type="radio"/>	<input type="radio"/>
A new user can use a password of 135753.	<input type="radio"/>	<input checked="" type="radio"/>
Mobile Tablet Policy will be assigned to new users.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 39

HOTSPOT - (Topic 5)

You have a Microsoft Exchange Online tenant that contains a group named Tier1ServiceDesk.

You have an Azure AD administrative unit named US that contains only users in the United States.

You need to ensure that Tier1ServiceDesk can manage recipient email addresses for only the users in US. The solution must use the principle of least privilege.

How should you complete the command? To answer, select the appropriate options in the answer area.
 NOTE: Each correct selection is worth one point.

Answer Area

New-ManagementRoleAssignment	-Role	-Role	"Recipient Management"	-SecurityGroup
Add-ManagementRoleEntry			"Organization Management"	
New-ManagementRoleAssignment			"Recipient Management"

Set-RoleGroup				

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

New-ManagementRoleAssignment	-Role	-Role	"Recipient Management"	-SecurityGroup
Add-ManagementRoleEntry			"Organization Management"	
New-ManagementRoleAssignment			"Recipient Management"	
Set-ManagementScope			"Security Administrator"	
Set-RoleGroup				

NEW QUESTION 41

- (Topic 5)

You have a Microsoft Exchange Online tenant that contains a user named User1. User1 must perform the following tasks:

- Manage audit logs.
- Track email messages in the Exchange organization.
- Manage transport rules for the Exchange organization.

You need to recommend to which role group to add User1. The solution must follow the principle of least privilege. What should you recommend?

- A. Security Administrator
- B. Organization Management
- C. Compliance Management
- D. Security Operator

Answer: C

NEW QUESTION 45

- (Topic 5)

You have a Microsoft Exchange Online tenant.

You plan to implement an on-premises alarm system that will send email alerts by using SMTP. The alarm system will NOT support TLS.

You need to ensure that the alarm system can send the alerts to both internal and external recipients by using Exchange Online.

Which two actions should you perform? Each correct answer presents part of the solution. NOTE: Each correct answer is worth one point.

- A. Configure SMTP AUTH client submission.
- B. Configure the alarm system settings to use a TXT record of the tenant.
- C. Create a connector.
- D. Configure the alarm system settings to use an MX record of the tenant.
- E. Configure direct send.

Answer: CE

Explanation:

? C. Create a connector1. A connector is a configuration setting that controls how email messages are delivered to or received from your own email servers or a partner organization1. You need to create a connector to route mail between Exchange Online and your on-premises alarm system that uses SMTP1. You can specify the IP address of your alarm system as a trusted sender and configure the connector to use certificate-based authentication or IP address-based authentication1.

? E. Configure direct send2. Direct send is an option that allows you to send mail directly from your printer or application to Microsoft 365 or Office 365 without using a local email server2. You need to configure direct send on your alarm system settings to use an MX record of the tenant as the SMTP server address2. For example, contoso-com.mail.protection.outlook.com2. Direct send does not require TLS encryption or SMTP authentication2.

NEW QUESTION 46

HOTSPOT - (Topic 5)

You have a Microsoft Exchange Server 2019 organization.

The recovery options for a user named User1 are configured as shown in the following exhibit.

```
[PS] C:\Windows\system32>Get-Mailbox User1 | fl RetainDeletedItemsFor,
RetainDeletedItemsUntilBackup, SingleItemRecoveryEnabled, Database

RetainDeletedItemsFor      : 14.00:00:00
RetainDeletedItemsUntilBackup : False
SingleItemRecoveryEnabled  : False
Database                   : MD001

[PS] C:\Windows\system32>Get-MailboxDatabase MD001 | fl
DeletedItemRetention, RetainDeletedItemsUntilBackup

DeletedItemRetention       : 30.00:00:00
RetainDeletedItemsUntilBackup : False
```

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

Email messages that are soft deleted by User1 will
be available for the user to recover [answer choice].

▼
for 14 days
for 30 days
until a backup occurs 14 days after the deletion
until a backup occurs 30 days after the deletion

When email messages are hard deleted by User1,
[answer choice] restoring from a backup.

▼
only an administrator can recover the messages without
an administrator or User1 can recover the messages without
the messages can be recovered only by

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Email messages that are soft deleted by User1 will
be available for the user to recover [answer choice].

▼
for 14 days
for 30 days
until a backup occurs 14 days after the deletion
until a backup occurs 30 days after the deletion

When email messages are hard deleted by User1,
[answer choice] restoring from a backup.

▼
only an administrator can recover the messages without
an administrator or User1 can recover the messages without
the messages can be recovered only by

NEW QUESTION 47

- (Topic 5)

You have a Microsoft Exchange Server 2019 hybrid deployment.

You are migrating public folder data to Exchange Online by using a migration batch of the PublicFolder type.

You need to identify the sync status of each move request in the batch. Which cmdlet should you run?

- A. Gec-PublicFolderMailboxMigrationRequest
- B. Get-PublicFolderMigrationRequest
- C. Gec-PublicFolderMoveRequest
- D. Gee-MoveRequest

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/powershell/module/exchange/get-publicfoldermailboxmigrationrequest?view=exchange-ps>

NEW QUESTION 50

HOTSPOT - (Topic 5)

You have a Microsoft Exchange Online tenant that contains a mail-enabled public folder named CustomerSupport

You need to create a group for the customer support team at your company. The solution must ensure that email sent to the group is also posted to the CustomerSupport public folder

How should you configure the group? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Group type:

▼
Distribution list
Microsoft 365
Security

Configuration:

▼
Add CustomerSupport as a member of the group.
Assign the group the Contributor role for CustomerSupport.
Configure the Send As settings.
Configure the Send on Behalf settings.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Group type:

▼
Distribution list
Microsoft 365
Security

Configuration:

▼
Add CustomerSupport as a member of the group.
Assign the group the Contributor role for CustomerSupport.
Configure the Send As settings.
Configure the Send on Behalf settings.

NEW QUESTION 55

HOTSPOT - (Topic 5)

You have a Microsoft Exchange Online tenant.

You need to be notified when more than 1,000 email messages are queued in Exchange for more than one hour.

What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Configure:

Alert policies
▼
Alert policies
Insights
Message trace
Rules

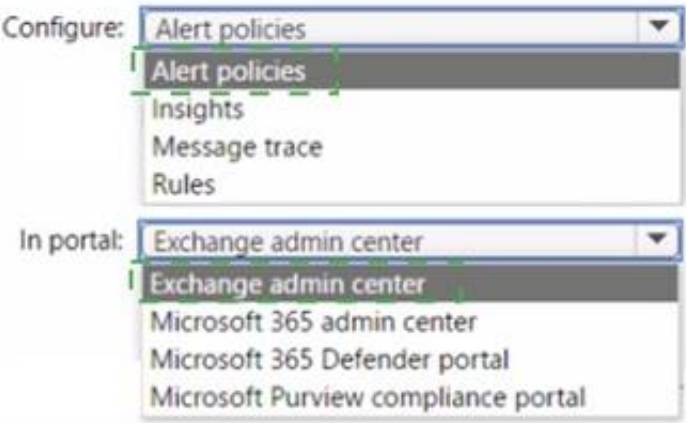

In portal:

Exchange admin center
▼
Exchange admin center
Microsoft 365 admin center
Microsoft 365 Defender portal
Microsoft Purview compliance portal

- A. Mastered
- B. Not Mastered

Answer: A

Answer Area

NEW QUESTION 56

HOTSPOT - (Topic 5)

You have a Microsoft Exchange Online tenant that contains two users named User1 and User2.

User1 receives an email message that appears to come from User2. You discover that the message did NOT originate from User2.

You need to prevent email impersonation in the Exchange environment.

Which type of policy should you use, and which setting should you configure? To answer, select the appropriate options in the answer area.

Answer Area

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:
Answer Area

NEW QUESTION 60

HOTSPOT - (Topic 5)

You have a Microsoft Exchange Online tenant.

You need to configure Outlook on the web to meet the following requirements:

- Prevent users from requesting a remote wipe of their devices.
- Prevent users from accessing voice mails.

You create a new Outlook Web App mailbox policy named Policy1.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Unified Messaging

NEW QUESTION 61

- (Topic 5)

You have a hybrid deployment that contains a Microsoft Exchange Online tenant and an on-premises Exchange Server 2019 server named Server1. All users use an email address suffix of @contoso.com.

You migrate 200 mailboxes from Server1 to Exchange Online by using Exchange PowerShell cmdlets. Users hosted on Server1 can send email messages to the migrated mailboxes.

In Microsoft 365, you create a new mailbox that uses an email address of user1@contoso.com.

When email is sent from the mailboxes hosted on Server1 to user1@contoso.com, the senders receive a non-delivery report (NDR) that contains the following text: "550 5.1.10 RESOLVER.ADR.RecipientNotFound; Recipient not found by SMTP address lookup."

You verify that Microsoft 365 mailboxes can send email to user1@contoso.com successfully.

You delete the user account and mailbox of User1.

You need to ensure that when new mailboxes are created, all the users at your company can exchange email successfully

Which two actions should you perform? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. From Azure AD Connect, modify the synchronization settings
- B. From Server1, run the New-RemoteMailbox cmdlet
- C. From Server1, run the Enable-Mailbox cmdlet
- D. From the on-premises network, create new mailboxes, and then migrate the mailboxes to Microsoft 365
- E. From the Exchange admin center, modify the properties of the Outbound connector

Answer: BD

Explanation:

The problem happens because the on-premise Exchange server is not aware of the existence of the mailbox created in Exchange Online. To prevent this happening, new mailboxes need to be created from the on-premise Exchange server.

You can create on Exchange Online mailbox from the on-premise server by running New-RemoteMailbox cmdlet. Alternatively, you can create a local mailbox on the on-premise server and then migrate the mailbox to Exchange Online.

NEW QUESTION 66

- (Topic 5)

You have a Microsoft Exchange Online subscription.

You need to generate a CSV file containing all the email messages that failed to send from the user1@contoso.com email address during the last 30 days.

What are two possible ways to achieve the goal? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. From Exchange Online PowerShell, run the Get-MessageTrace cmdlet.
- B. From the Exchange admin center, run a message trace.
- C. From the Security & Compliance admin center, export the mailbox audit logs.
- D. From Exchange Online PowerShell, run the Get-MessagetraceDetail cmdlet.
- E. From the Security & Compliance admin center, run a message trace.

Answer: BD

Explanation:

References:

<https://docs.microsoft.com/en-us/exchange/monitoring/trace-an-email-message/run-a-message-trace-andview-results>

<https://docs.microsoft.com/en-us/powershell/module/exchange/mail-flow/get-messagetracedetail?view=exchange-ps>

NEW QUESTION 70

- (Topic 5)

You have a Microsoft Exchange Online tenant that has an email domain named contoso.com.

You collaborate with a partner company that has an email domain named adatum.com. You need to ensure that all the email messages sent to and received from adatum.com are encrypted in transit.

Which two actions should you perform? Each correct answer presents part of the solution. NOTE: Each correct answer is worth one point.

- A. Create a connector from adatum.com to Microsoft Office 365 and configure the connector to use SMTP relay.
- B. Create a connector from adatum.com to Microsoft Office 365 and configure the connector to require TLS.
- C. Create a connector from Microsoft Office 365 to adatum.com and configure the connector to require TLS.
- D. Issue S/MIME certificates to all the users in contoso.com.
- E. Configure Exchange Online to use direct send to adatum.com.

Answer: BC

NEW QUESTION 73

HOTSPOT - (Topic 5)

Your company has a Microsoft Exchange Server 2019 hybrid deployment.

The company has four departments that have the mailboxes shown in the following table.

Department	Number of mailboxes	Location
Finance	500	On-premises
Manufacturing	1,000	Exchange Online
Sales	5,000	On-premises
Marketing	2,000	Exchange Online

The mailboxes are configured as shown in the following table.

Department	Archive	Single item recovery
Finance	Enabled	Enabled
Manufacturing	Disabled	Disabled
Sales	Disabled	Disabled
Marketing	Enabled	Enabled

You have two administrators named Admin1 and Admin2 that are assigned the permissions shown in the following table.

Administrator	Management role group	Organization	Management role
Admin1	Organization Management, Discovery Management	Exchange Online, on-premises	None
Admin2	Organization Management, Discovery Management	Exchange Online, on-premises	Mailbox Import Export

For each of the following statement, select yes if the statement is true. otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
Admin1 can search for email messages in every mailbox in the organization by running the <code>New-ComplianceSearch</code> cmdlet.	<input type="radio"/>	<input type="radio"/>
Admin2 can perform a search for a specific keyword in every mailbox of the manufacturing department by running the <code>Search-mailbox</code> cmdlet.	<input type="radio"/>	<input type="radio"/>
Admin1 can delete email message from every mailbox of the marketing department by running the <code>Search-Mailbox</code> cmdlet.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
 B. Not Mastered

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/exchange/discovery-management-exchange-2013-help>

<https://docs.microsoft.com/en-us/powershell/module/exchange/mailboxes/search-mailbox?view=exchange-ps>

NEW QUESTION 74

HOTSPOT - (Topic 5)

You have a Microsoft Exchange Server 2019 organization.

You have the Address Book Policies (ABP) and address lists in the following table.

Name	Global address list	Offline address book	Address list
ABP1	GAL_1	OAB_1	List 1
ABP2	GAL_2	Default Offline Address Book	List 2

You have the users in the following table.

Name	Global address list	Address List
User1	GAL_1	List 1
User2	GAL_2	List 2
User3	GAL_2	none

You assign ABP1 to User1 and User2.

User3 is NOT assigned to an Address Book Policy.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can view the membership of List 2	<input type="radio"/>	<input type="radio"/>
User2 can only view the membership of GAL_2	<input type="radio"/>	<input type="radio"/>
User3 can view the membership of List 1	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References:

NEW QUESTION 79

- (Topic 5)

You have a Microsoft Exchange Online tenant.

Remote users report that they receive an error message when they attempt to add their email account to Microsoft Outlook.

You need to confirm that the DNS records resolve correctly for the users.

Which two DNS records should you test? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. autodiscover.outlook.com
- B. smtp.office365.com
- C. outlook.office365.com
- D. security.microsoft365.com
- E. portal.office.com

Answer: AC

Explanation:

Reference:

<https://docs.microsoft.com/en-us/exchange/troubleshoot/administration/incorrect-settings>

NEW QUESTION 80

HOTSPOT - (Topic 5)

You have a Microsoft Exchange Online tenant that contains a user named User1.

You need to ensure that User1 receives an email notification and can take corrective action when the Fix possible mail loop insight is generated

What should you use, and to which role group should you add User1? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point

Answer Area

Use:

Mail flow rules

Alert policies

Mail flow reports

Mail flow rules

Message trace

Role group:

Records Management

Compliance Management

Organization Management

Records Management

Security Operator

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Use:

Mail flow rules

Alert policies

Mail flow reports

Mail flow rules

Message trace

Role group:

Records Management

Compliance Management

Organization Management

Records Management

Security Operator

NEW QUESTION 84

HOTSPOT - (Topic 5)

You need to configure a hybrid deployment between a Microsoft Exchange Online tenant and an on-premises Exchange Server 2019 organization that contains a server named Server1. The solution must meet the following requirements:

- Support remote move migrations of mailboxes from Server1 to Exchange Online.
- Enable free/busy lookups between Server1 and Exchange Online.

What should you do for each requirement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Support remote move migrations:

Enable the MRS Proxy endpoint.

Enable the MRS Proxy endpoint.

Run Azure AD Connect sync.

Run the Hybrid Configuration wizard.

Enable free/busy lookups:

Run the Hybrid Configuration wizard.

Enable the MRS Proxy endpoint.

Run Azure AD Connect sync.

Run the Hybrid Configuration wizard.

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Answer Area

Support remote move migrations:

Enable the MRS Proxy endpoint.

Enable the MRS Proxy endpoint.

Run Azure AD Connect sync.

Run the Hybrid Configuration wizard.

Enable free/busy lookups:

Run the Hybrid Configuration wizard.

Enable the MRS Proxy endpoint.

Run Azure AD Connect sync.

Run the Hybrid Configuration wizard.

NEW QUESTION 85

- (Topic 5)

Note: This question is part of a series of questions that present the same scenario.

Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has a Microsoft 365 subscription.

Several users in the finance department of the company recently accessed unsafe websites by clicking on links in email messages.

Users in the marketing department of the company report that they must be able to access all the links embedded in email messages.

You need to reduce the likelihood of the finance department users accessing unsafe websites. The solution must affect only the finance department users.

Solution: You create a new safe attachments policy. Does this meet the goal?

- A. Yes
B. No

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/security/office-365-security/set-up-safe-links-policies?view=o365-worldwide>

NEW QUESTION 90

HOTSPOT - (Topic 5)

You run the Get-WebServicesVirtualDirectory cmdlet as shown in the following exhibit.

```
PowerShell I-preview o(64)

PS C:\> Get-WebServicesVirtualDirectory | Format-Table

Identity MRSProxyEnabled InternalURL ExternalURL
-----
MBX1      False      https://mail.contoso.com/EWS/Exchange.asmx https://mail.contoso.com/EWS/Exchange.asmx
MBX2      True       https://mail.contoso.com/EWS/Exchange.asmx https://mail.contoso.com/EWS/Exchange.asmx
MBX3      False      https://mail.contoso.com/EWS/Exchange.asmx https://mail.contoso.com/EWS/Exchange.asmx

PS C:\> Get-ExchangeCertificate | Format-Table

Thumbprint RootCAType ISSelfSigned Services
-----
A80VESIE410PCANGPT014VPXYC51H9AGRN72KFZG6 None True SMTP
TTVQY2WYN851594C2062NWNF5JK98I6N667RF9XK4 ThirdParty False IIS, IMAP, POP

PS C:\>
```

Use the drop-down menus to select the answer choice that answers each question based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

What should you do to ensure that all mailboxes can be synced successfully?

Enable the MRS proxy endpoint on all servers.
Disable the MRS proxy endpoint on all servers.
Update the external URL to outlook.office365.com.

What should you do to ensure that email can be delivered between on-premises users and Microsoft Exchange Online users?

Configure IMAP to use a self-signed certificate.
Configure SMTP to use a third-party certificate.
Disable the MRS proxy endpoint on all servers.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1:

The MRS proxy endpoint needs to be enabled on all mailbox servers.

Box 2:

SMTP is used to deliver email between on-premise users and Exchange Online users. This requires a third-party (public CA) certificate.

NEW QUESTION 93

- (Topic 4)

Lynne Robbins and the users in the sales department plan to collaborate on a project with a partner company named Contoso, Ltd. that has an email domain named contoso.com.

You need to ensure that only the sales department users can share all their calendar free/busy information with the users in contoso.com.

How should you configure the organization relationship?

- A. Select Calendar free/busy information with time only and enter Group1B Select Calendar free/busy information with time, subject, and location and enter Groups
- C Select Calendar free/busy information with time, subject, and location and enter Group3
- B. Select Calendar free/busy information with time only and enter Group3
- C. Select Calendar free/busy information with time only and enter Group2

Answer: C

Explanation:

Reference:

<https://docs.microsoft.com/en-us/exchange/sharing/organization-relationships/create-an-organization-relationship>

NEW QUESTION 97

- (Topic 4)

You need to ensure that Alex Wilber can recover deleted items when using Outlook on the web.

Which two actions should you perform? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Assign Sales Policy to Alex Wilbur.
- B. Modify Marketing Policy.
- C. Remove Alex Wilbur from all groups.
- D. Assign Policy2 to Alex Wilbur.
- E. Modify Policy1

Answer: BD

NEW QUESTION 99

- (Topic 4)

You need to ensure that Allan Deyoung can create a new public folder for the sales department.

Which two actions should you perform first? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Add Allan Deyoung to the Organization Management role group
- B. Create a new public folder mailbox
- C. Add Allan Deyoung to the Recipient Management role group
- D. Create a new shared mailbox

E. Modify Sales Policy

Answer: B

Explanation:

<https://docs.microsoft.com/en-us/exchange/permissions-exo/feature-permissions> <https://docs.microsoft.com/en-us/exchange/collaboration-exo/public-folders/set-up-public-folders>

NEW QUESTION 102

- (Topic 4)

Allan Deyoung must perform a message trace of the email messages sent by Isaiah Langer and provide a report that contains all the messages sent during the last 30 days.

You need to ensure that Allan Deyoung can perform the message trace. What should you do?

- A. Add Allan Deyoung to the Organization Management role group
- B. Add Allan Deyoung to the Security Administrator role group
- C. For Allan Deyoun
- D. set ElcProcessingDisabled to true
- E. For Isaiah Lange
- F. set ElcProcessingDisabled to true

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/exchange/permissions-exo/feature-permissions>

NEW QUESTION 106

HOTSPOT - (Topic 3)

You need to modify FilesPolicy to prevent users from downloading ASPX files. The solution must meet the technical requirements.

How should you complete the command? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

<div><div></div><div><div>Set-SafeLinksPolicy</div><div>Set-OwaMailboxPolicy</div><div>Set-ActiveSyncMailboxPolicy</div><div>Set-HostedContentFilterPolicy</div></div></div>	-id FilesPolicy -BlockedFileTypes	<div><div></div><div><div>.aspx</div><div>*.aspx</div><div>@{Add = ".aspx"}</div><div>@{Remove = ".aspx"}</div></div></div>
--	-----------------------------------	---

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

<div><div></div><div><div>Set-SafeLinksPolicy</div><div>Set-OwaMailboxPolicy</div><div>Set-ActiveSyncMailboxPolicy</div><div>Set-HostedContentFilterPolicy</div></div></div>	-id FilesPolicy -BlockedFileTypes	<div><div></div><div><div>.aspx</div><div>*.aspx</div><div>@{Add = ".aspx"}</div><div>@{Remove = ".aspx"}</div></div></div>
--	-----------------------------------	---

NEW QUESTION 107

HOTSPOT - (Topic 3)

You need to ensure that In-Place Archiving is enabled for the marketing department users.

Which user should perform the change, and which tool should the user use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

User:

Admin2 only

Admin3 only

Admin1 and Admin3 only

Admin2 and Admin4 only

Tool:

Microsoft 365 admin center

Microsoft 365 security center

Microsoft 365 compliance center

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated

NEW QUESTION 111

- (Topic 3)

User3 leaves the company.

You need to ensure that Admin1 and Admin2 can access the mailbox of User3. The solution must meet the technical requirements.

What should you do?

- A. Migrate the mailbox of User3 to a distribution group.
- B. Migrate the mailbox of User3 to a Microsoft 365 group.
- C. Convert the mailbox of User3 into a resource mailbox.
- D. Convert the mailbox of User3 into a shared mailbox.

Answer: D

Explanation:

Fabrikam identifies the following technical requirements:

? When users leave the company, remove their licenses and ensure that their mailbox is accessible to Admin1 and Admin2.

If you remove the license from User3, the mailbox will be deleted after 30 days. Converting the mailbox to a shared mailbox will ensure that the mailbox is not deleted. You would still need to give Admin1 and Admin2 permissions to access the mailbox.

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/admin/email/convert-user-mailbox-to-shared-mailbox?view=o365-worldwide>

NEW QUESTION 116

- (Topic 3)

You need to identify which users clicked the links in the phishing emails.

What should you do?

- A. Run a message trace and review the results.
- B. Query the mailbox audit log.
- C. Use the URL trace reporting feature.
- D. Review the quarantine mailbox.

Answer: C

Explanation:

<https://docs.microsoft.com/en-us/powershell/module/exchange/get-maildetailatpreport?view=exchange-ps>

NEW QUESTION 118

- (Topic 2)

You need to resolve the issue for the transport department users.

What is the best way to achieve the goal? More than one answer choice may achieve the goal. Select the BEST answer.

- A. Move the public folder mailbox that contains TransportPF to a server in the main office.
- B. Move TransportPF to a public folder mailbox hosted in the main office.
- C. Modify the default public folder mailbox for all the transport department users.
- D. Instruct the transport department users to add TransportPF to their Favorites list in Outlook.

Answer: B

Explanation:

References:

<https://docs.microsoft.com/en-us/exchange/recipients/mailbox-moves?view=exchserver-2019>

NEW QUESTION 121

HOTSPOT - (Topic 3)

You need to configure the new smartboard to support the planned changes.

Which three settings should you configure? To answer, select the appropriate settings in the answer area.

NOTE: Each correct selection is worth one point.

Booking options

Assign settings for the booking policy that defines when this resource can be scheduled

- ☐ Allow repeating meetings
- ☐ Allow scheduling only during work hours
- ☐ Auto-accepts meeting request

Set to "Off" if you want to specify users who want to accept meetings manually

Booking delegates

Search a mail or email

- ☐ Automatically decline meetings outside of limits below

Booking window (days)

Maximum duration (hours)

If the organizer needs a reply enter message below

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, email Description automatically generated

NEW QUESTION 125

HOTSPOT - (Topic 2)

You need to implement a solution that meets the technical requirements for the retention of junk email, sent items, and deleted items. What is the minimum number of retention policies and retention tags you should use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Retention tags:

NEW QUESTION 131
HOTSPOT - (Topic 5)
You have a Microsoft Exchange Online tenant.
You need to create a new policy to retain mailbox items for five years before the items are deleted. The policy must be assigned to any user that has a job title attribute of Manager.
Which type of policy should you create, and what should you create first? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer Area

Policy type:

Retention policy

Auto-labeling policy

Retention label policy

Retention policy

Sensitivity label policy

First create:

A label

A data connector

A label

A messaging records management (MRM) retention tag

An adaptive scope

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Policy type: Retention policy
 Auto-labeling policy
 Retention label policy
 Retention policy
 Sensitivity label policy

First create: A label
 A data connector
 A label
 A messaging records management (MRM) retention tag
 An adaptive scope

NEW QUESTION 136

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft 365 E5 subscription.

You need to ensure that a user named User1 can review audit reports from the Microsoft 365 security center. User1 must be prevented from tracing messages from the Security admin center.

Solution: You assign the Reports reader role to User1. Does this meet the goal?

A. Yes

B. No

Answer: B

NEW QUESTION 138

HOTSPOT - (Topic 5)

Your company named ADatum Corporation has a Microsoft Exchange Online subscription that contains the sharing policies shown in the following table.

Name	Domain	Enabled	Default
Policy1	{Anonymous:CalendarSharingFreeBusySimple, fabrikam.com:CalendarSharingFreeBusyReviewer, ContactsSharing}	True	True
Policy2	{contoso.com:CalendarSharingFreeBusyDetail}	True	False
Policy3	{litware.com:CalendarSharingFreeBusyReviewer}	True	False

The subscription contains the mailboxes shown in the following table.

Name	Sharing policy
User1	Policy1
User2	Policy2
User3	Policy3

ADatum does business with the partner companies shown in the following table.

Name	SMTP domain	Email platform
Fabrikam, Inc.	Fabrikam.com	On-premises Exchange Server 2019
Contoso, Ltd.	Contoso.com	Third-party email server
Litware, Inc.	Litware.com	Exchange Online

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
For User1 to share contacts with the users at Fabrikam, a federation trust is required.	<input type="radio"/>	<input type="radio"/>
User2 can share free/busy hours, subject, and location with the users at Contoso.	<input type="radio"/>	<input type="radio"/>
User3 can share calendars with the users at Litware.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Statements	Yes	No
For User1 to share contacts with the users at Fabrikam, a federation trust is required.	<input type="radio"/>	<input checked="" type="radio"/>
User2 can share free/busy hours, subject, and location with the users at Contoso.	<input checked="" type="radio"/>	<input type="radio"/>
User3 can share calendars with the users at Litware.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 140

- (Topic 5)

You have a Microsoft Exchange Server 2019 hybrid deployment. You plan to implement Hybrid Modern Authentication (HMA). You retrieve the Exchange virtual directory settings, and you discover the following output.

```
InternalUrl           : https://mail.contoso.com
ExternalUrl           : https://mail.contoso.com
IISAuthenticationMethods : {Ntlm, Negotiate}
InternalAuthenticationMethods : {Ntlm, Negotiate}
ExternalAuthenticationMethods : {Ntlm, Negotiate}
```

You need to prepare the virtual directories for the planned implementation of HMA. What should you do?

- A. Add OAuth as an authentication method.
- B. Remove NTLM as an authentication method.
- C. Delete https://mail.contoso.com from the ExternalUrl value.
- D. Modify the InternalUrl value to http://mail.contoso.com.

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/enterprise/configure-exchange-server-for-hybrid-modernauthentication?view=o365-worldwide>

NEW QUESTION 144

- (Topic 5)

You have a Microsoft Exchange Online tenant named contoso.com.

You create a partnership with two other companies named fabhkam.com and wingtiptoys.com. All the mailboxes of fabnkam.com are hosted in Microsoft 365. All the mailboxes of wingtiptoys.com are hosted in an on-premises Exchange Server 2019 organization.

You need to ensure that all the email messages sent from contoso.com to fabrikam.com and wingtiptoys.com is encrypted by using TLS.

What should you do?

- A. Configure one connector.
- B. Create an organizational relationship.
- C. Create two remote domains.
- D. Run the Office 365 Exchange Hybrid Configuration wizard.
- E. Configure two mail flow rules.

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/exchange/mail-flow-best-practices/use-connectors-to-configure-mail-flow/set-up-connectors-for-secure-mail-flow-with-a-partner>

NEW QUESTION 145

- (Topic 5)

You have a hybrid deployment between a Microsoft Exchange Online tenant and an on- premises Exchange Server 2019 organization.

Several users hosted in Microsoft 365 report that when they send email messages to mailboxes hosted in Exchange Server 2019, the messages fail to be delivered.

You need to examine the non-delivery reports (NDRs) sent to the Microsoft 365 mailboxes.

Which two actions should you perform? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. From an on-premises Exchange server, use the transport logs.
- B. From an on-premises Exchange server, use the SMTP logs.
- C. From the on-premises Exchange admin center, use a message trace.
- D. From the Exchange admin center, use a message trace.
- E. From the Exchange Management Shell, run the Get-Queue cmdlet.

Answer: CD

Explanation:

Explanation/Reference: Reference:
https://docs.microsoft.com/en-us/exchange/monitoring/trace-an-email-message/message- trace-faq

NEW QUESTION 148

DRAG DROP - (Topic 5)

You have a Microsoft 365 E5 subscription that contains a public folder named Folder1 and two users named User1 and User2. You need to ensure that the users can perform the actions shown in the following table.

User	Action
User1	<ul style="list-style-type: none">Create new items.Delete items created by User1.Only modify items created by User1.Read existing items.View folders.
User2	<ul style="list-style-type: none">Create subfolders.Read all items.Delete all items.Only modify items created by User2.

The solution must use the principle of least privilege and minimize administrative effort. Which folder permission should you grant to each user? To answer, drag the appropriate permissions to the correct users. Each permission may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

NEW QUESTION 151

- (Topic 5)

You have a Microsoft Exchange Online tenant that contains a group named Group1. The members of Group1 need to create user mailboxes. The solution must use the principle of least privilege. To which role group should you add Group1?

- A. Recipient Management
- B. Security Operator
- C. Help Desk
- D. Organization Management

Answer: A

NEW QUESTION 154

- (Topic 5)

You have a Microsoft Exchange Online tenant that uses an email domain named @contoso.com.

You recently purchased an email domain named fabrikam.com.

You need to ensure that all the users in the tenant can receive email messages by using the @fabrikam.com email domain. The solution must ensure that the users can continue to receive email by using the @contoso.com email domain.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. From the Microsoft 365 admin center, add the fabrikam.com email domain.
- B. From the Exchange admin center, add an accepted domain for fabrikam.com.
- C. From the Microsoft 365 admin center, modify the organization profile.
- D. From the Exchange admin center, add a remote domain for fabrikam.com.
- E. From the Exchange Management Shell, create a script that runs the Set-Mailbox cmdlet.

Answer: AE

Explanation:

A: the first step is to add the Fabrikam.com domain to Microsoft 365. You would also need to verify the domain (verify that you own the domain).

E: create a script that runs the Set-Mailbox cmdlet to add an @fabrikam.com email address to each mailbox.

NEW QUESTION 156

- (Topic 5)

You have a Microsoft Exchange Online tenant that uses Microsoft Defender for Office 365. You create a new anti-phishing policy named Policy1.

You need to ensure that users are notified every five days about all the email messages quarantined by Policy1.

Which two actions should you perform? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. Modify the AdminOnlyAccessPolicy quarantine policy and assign the policy to Policy1.
- B. Modify the DefaultFullAccessPolicy quarantine policy and assign the policy to Policy1.
- C. Modify the global settings for quarantine policies.
- D. Add a custom quarantine policy and assign the policy to Policy1.
- E. Configure the User reported messages settings.

Answer: CD

NEW QUESTION 160

HOTSPOT - (Topic 5)

You have a Microsoft Exchange Online tenant.

You need to create a report to display messages that have a delivery status of Quarantined.

From the modern Exchange admin center, you create a new message trace.

How should you configure the message trace? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

NEW QUESTION 165

- (Topic 5)

You have two mailboxes named Mailbox1 and Mailbox2 that have the ProhibitSendReceiveQuota parameter set to 50 GB. From a Microsoft Exchange Online tenant, you run the following PowerShell command.

```
PS C:\> Get-Mailbox | Select-Object Alias, RecipientTypeDetails | FT -AutoSize
```

Alias	RecipientTypeDetails
-----	-----
Mailbox1	SharedMailbox
Mailbox2	RoomMailbox

You receive the license status of each mailbox and discover the configurations shown in the following table.

Alias	SKUAssigned
Mailbox1	False
Mailbox2	False

You need to increase the quota for Mailbox1 and Mailbox2. What should you do first?

- A. Assign a license to each mailbox.
- B. Convert each mailbox into an equipment mailbox.
- C. Enable an archive for each mailbox.
- D. Place both mailboxes on retention hold.

Answer: A

Explanation:

Shared and resource mailboxes don't require a license. However, without a license, these mailboxes are limited to 50 GB. To increase the mailbox size, an E3 or E5 license must be assigned. This will increase the mailbox to 100 GB.

<https://docs.microsoft.com/en-us/office365/servicedescriptions/exchange-online-service-description/exchange-online-limits>

NEW QUESTION 168

- (Topic 5)

You have a Microsoft 365 E5 subscription.

A user attempts to send an email message to an external recipient and receives the following error message: "Your message couldn't be delivered because you weren't recognized as a valid sender. The most common reason for this is that your email address is suspected of sending spam and it's no longer allowed to send messages outside of your organization. Contact your mail admin for assistance. Remote Server returned '550 5.1.8 Access denied, bad outbound sender'."

You need to ensure that the user send email to external recipients. What should you do?

- A. compliance management in the Exchange admin center
- B. Data loss prevention in the Security & Compliance admin center
- C. Threat management in the Security & Compliance admin center
- D. action center in the Exchange admin center

Answer: C

Explanation:

<http://automatica.com.au/2020/01/office-365-single-users-unable-to-send-email-access-denied-bad-outbound-sender-error/>

NEW QUESTION 170

HOTSPOT - (Topic 5)

You run several PowerShell commands as shown in the following exhibit.

PS C:\> Get-AddressListPolicy | Format-Table

Name	GlobalAddressList	AddressLists	OfflineAddressBook	RoomList
Fabrikam-ABP	\Fabrikam	\Fabrikam	\Fabrikam-OAB	\All Rooms
Contoso-ABP	\Contoso	\Contoso-IT, \Contoso-Marketing	\Contoso-OAB	\All Rooms

PS C:\> Get-GlobalAddressList | Format-Table

Name	RecipientFilter
Contoso	((Company -eq 'Contoso'))
Fabrikam	((Company -eq 'Fabrikam'))

PS C:\> Get-AddressList | Format-Table

Name	DisplayName	RecipientFilter
Contoso-Marketing	Contoso-Marketing	((Company -eq 'Contoso') -and (Department -eq 'Marketing'))
Fabrikam	Fabrikam	((Company -eq 'Fabrikam'))

PS C:\> Get-ADUser | Where Name -eq "James Smith" | Select Name, UserPrincipalName, Company, Department

Name	UserPrincipalName	Company	Department
James Smith	jsmith@contoso.com	Contoso	Marketing

PS C:\> Get-Mailbox | Where Name -eq "Executive Conference Room" | Select Name, Alias, Office, Database

Name	Alias	Office	Database
Executive Conference Room	executiveconferenceroom	Contoso	DB1

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.
NOTE: Each correct selection is worth one point.

James Smith will appear on the [answer choice] address list.

Contoso-IT

Contoso-Marketing

Fabrikam

The Executive Conference Room will appear in [answer choice].

Contoso-ABP only

Fabrikam-ABP only

Contoso-ABP and Fabrikam-ABP

none of the policies

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

James Smith will appear on the [answer choice] address list.

Contoso-IT

Contoso-Marketing

Fabrikam

The Executive Conference Room will appear in [answer choice].

Contoso-ABP only

Fabrikam-ABP only

Contoso-ABP and Fabrikam-ABP

none of the policies

NEW QUESTION 172

HOTSPOT - (Topic 5)

You have a Microsoft Exchange Server 2019 hybrid deployment.

You are migrating mailboxes from the on-premises organization to Exchange Online. From the Exchange admin center, you create a new migration batch that includes 25

mailboxes, and then you select Manual Complete the batch.

Later, you must complete the migration of a mailbox named user1@litware.com in the batch as soon as possible. You discover that the status of the migration batch is Syncing, but the status of the move request for user1@litware.com is Synced.

You need to complete the migration of the user1@litware.com mailbox to Exchange Online as soon as possible.
How should you complete the command? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

<div><div></div><div>Set-MoveRequest</div><div>Set-MigrationBatch</div><div>Set-MigrationConfig</div></div>	-Identity "user1@litware.com"	<div><div></div><div>-CompleteAfter(Get-Date)</div><div>-SuspendWhenReadyToComplete \$false</div><div>-PreventCompletion \$false</div></div>
---	-------------------------------	--

Resume-MoveRequest -Identity "user1@litware.com"

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

<div><div></div><div>Set-MoveRequest</div><div>Set-MigrationBatch</div><div>Set-MigrationConfig</div></div>	-Identity "user1@litware.com"	<div><div></div><div>-CompleteAfter(Get-Date)</div><div>-SuspendWhenReadyToComplete \$false</div><div>-PreventCompletion \$false</div></div>
---	-------------------------------	--

Resume-MoveRequest -Identity "user1@litware.com"

NEW QUESTION 173

- (Topic 5)

You have a Microsoft Exchange Online tenant.
You plan to use a third-party service to archive all the email messages that are sent and received by the Exchange mailboxes.
You need to copy all the sent and received messages automatically to the third-party service.
What should you configure?

- A. a content search
B. a retention policy
C. an archive policy
D. a journal rule

Answer: D

NEW QUESTION 175

- (Topic 5)

Your company has a Microsoft Exchange Server 2019 organization that contains two servers in a database availability group (DAG).
The customer service department at the company uses public folders to receive customer communications.
Only users in the customer service department can read items in the folders.
For a new customer, you create a mail-enabled public folder that has the default settings. The customer reports that when she sends an email message to the email address of the public folder, she receives a non-delivery report (NDR). You need to ensure that the public folder can receive email.
Which public permissions should you configure in Microsoft Outlook?

- A. Grant the Author permission to the Default group
B. Grant the Author permission to the Anonymous group
C. Grant the Create items permission to the Anonymous group
D. Grant the Create items permission to the Default group

Answer: C

Explanation:

Reference:

<https://docs.microsoft.com/en-us/exchange/collaboration/public-folders/mail-enable-or-disable?view=exchserver-2019>

NEW QUESTION 179

SIMULATION - (Topic 5)

SIMULATION

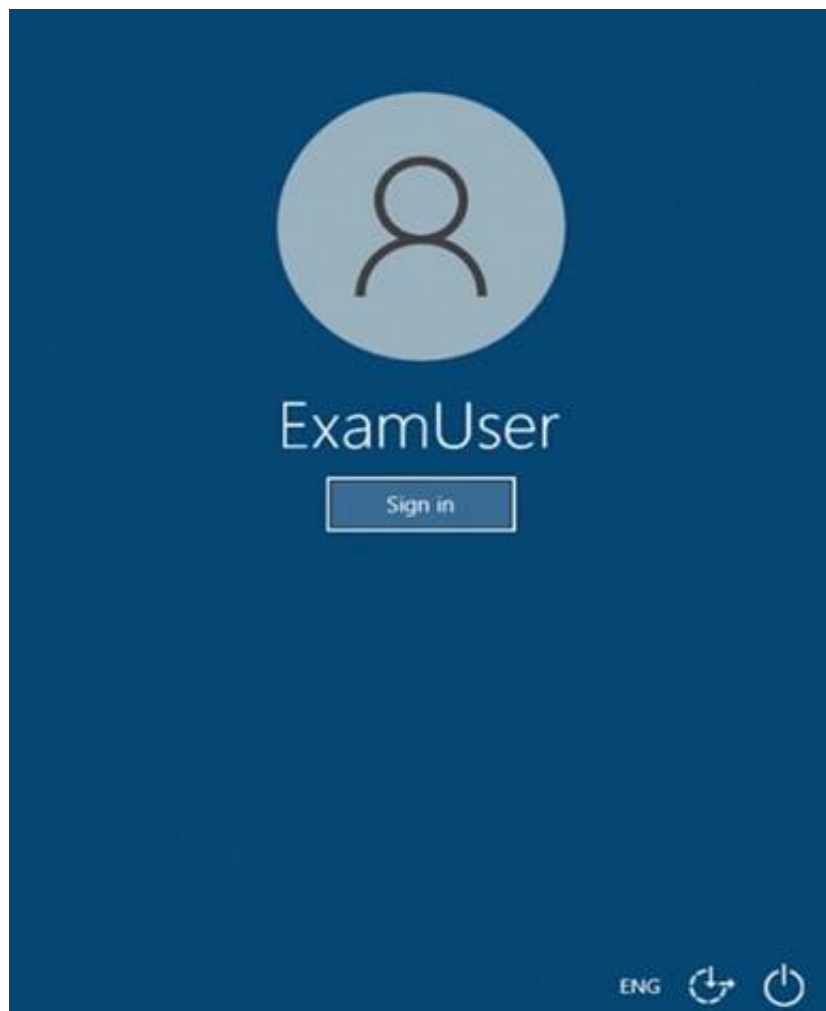

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Use the following login credentials as needed:

To enter your username, place your cursor in the Sign in box and click on the username below.

To enter your password, place your cursor in the Enter password box and click on the password below.

Microsoft 365 Username: admin@abc.com

Microsoft 365 Password: xxxxxx

If the Microsoft 365 portal does not load successfully in the browser, press CTRL-K to reload the portal in a new browser tab.

The following information is for technical support purposes only.

Lab Instance: XXXXXX

You need to ensure that a notification email is sent to compliance@constoso.com when a user marks an email message as Not Junk in Microsoft Outlook.

To complete this task, sign in to the Microsoft 365 admin center.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Go to the Microsoft 365 Defender portal and under Mail & collaboration select Policies & rules > Alert policy.

? An alert policy consists of the following settings and conditions.

- Activity the alert is tracking. You create a policy to track an activity or in some cases a few related activities, such as sharing a file with an external user by sharing it, assigning access permissions, or creating an anonymous link. When a user performs the activity defined by the policy, an alert is triggered based on the alert threshold settings.

- Activity conditions. For most activities, you can define additional conditions that must be met to trigger an alert. Common conditions include IP addresses (so that an alert is triggered when the user performs the activity on a computer with a specific IP address or within an IP address range), whether an alert is triggered if a specific user or users perform that activity, and whether the activity is performed on a specific file name or URL. You can also configure a condition that triggers an alert when the activity is performed by any user in your organization. The available conditions are dependent on the selected activity.

? You can also define user tags as a condition of an alert policy. This results in the alerts triggered by the policy to include the context of the impacted user. You can use system user tags or custom user tags.

- When the alert is triggered. You can configure a setting that defines how often an activity can occur before an alert is triggered. This allows you to set up a policy to generate an alert every time an activity matches the policy conditions, when a certain threshold is exceeded, or when the occurrence of the activity the alert is tracking becomes unusual for your organization.

? If you select the setting based on unusual activity, Microsoft establishes a baseline value that defines the normal frequency for the selected activity. It takes up to seven days to establish this baseline, during which alerts won't be generated. After the baseline is established, an alert is triggered when the frequency of the activity tracked by the alert policy greatly exceeds the baseline value. For auditing-related activities (such as file and folder activities), you can establish a baseline based on a single user or based on all users in your organization; for malware-related activities, you can establish a baseline based on a single malware family, a single recipient, or all messages in your organization.

- Alert category. To help with tracking and managing the alerts generated by a policy, you can assign one of the following categories to a policy.

- Data loss prevention
- Information governance
- Mail flow
- Permissions
- Threat management
- Others

? When an activity occurs that matches the conditions of the alert policy, the alert that's generated is tagged with the category defined in this setting. This allows you to track and manage alerts that have the same category setting on the Alerts page in the compliance center because you can sort and filter alerts based on category.

- Alert severity. Similar to the alert category, you assign a severity attribute (Low, Medium, High, or Informational) to alert policies. Like the alert category, when an activity occurs that matches the conditions of the alert policy, the alert that's generated is tagged with the same severity level that's set for the alert policy. Again, this allows you to track and manage alerts that have the same severity setting on the Alerts page. For example, you can filter the list of alerts so that only alerts with a High severity are displayed.

- Email notifications. You can set up the policy so that email notifications are sent (or not sent) to a list of users when an alert is triggered. You can also set a daily notification limit so that once the maximum number of notifications has been reached, no more notifications are sent for the alert during that day. In addition to

email notifications, you or other administrators can view the alerts that are triggered by a policy on the Alerts page. Consider enabling email notifications for alert policies of a specific category or that have a higher severity setting.

NEW QUESTION 181

- (Topic 5)

You discover that Policy1 failed to apply to the Executives group.

You need to ensure that Policy1 is applied to all the members of the Executives group. What should you do?

- A. Increase the priority of Policy1.
- B. Decrease the priority of Strict Preset Security Policy.
- C. Remove the Executives group from the Strict protection preset security policy.
- D. Modify the Strict protection preset security policy to match Policy? and assign the Strict protection preset security policy to contoso.com.

Answer: C

Explanation:

Preset security policies are policies that provide a centralized location for applying all of the recommended spam, malware, and phishing policies to users at once¹

. The policy settings are not configurable and are set by Microsoft based on best practice¹s

. There are two types of preset security policies: Standard protection and Strict protection¹

. Standard protection is a baseline protection profile that's suitable for most user¹s. Strict protection is a more aggressive protection profile for selected users who are high value targets or priority users¹.

If you want to apply Policy1 to the Executives group, you need to remove them from the Strict protection preset security policy first. Otherwise, the preset security policy will take precedence over Policy1 and prevent it from being applied².

To remove the Executives group from the Strict protection preset security policy, you can follow these steps²:

? Login to the Microsoft Security portal at <https://security.microsoft.com>.

? On the left nav, under Email & collaboration, select Policies & rules.

? Select Threat policies.

? Select Preset Security Policies underneath the Templated policies heading

? Select Manage underneath the Strict protection preset.

? Select Specific recipients and remove the Executives group from the list of recipients.

? Select Save.

NEW QUESTION 182

- (Topic 5)

You have a hybrid deployment between a Microsoft Exchange Online tenant and an on- premises Exchange Server 2019 organization. Users report that email messages between the Exchange Server organization and the Exchange Online tenant are undelivered. You install and enable a new certificate from a different trusted certification authority (CA). You need to ensure that mail flow between Exchange Server and Exchange Online is restored. Which two PowerShell cmdlets should you run? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. Set-SendConnector
- B. Set-IntraOrganizationConnector
- C. Update-Hybridconfiguration
- D. Set-ReceiveConnector

Answer: CD

NEW QUESTION 185

HOTSPOT - (Topic 5)

You have a Microsoft Exchange Server 2019 hybrid deployment named contoso.com. You are preparing to migrate several user mailboxes to Microsoft 365.

You have an on-premises Mailbox server named server1.contoso.com. You need to create a migration endpoint.

How should you complete the command? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

New-MigrationEndpoint -Name MEP1

	▼
-Autodiscover	
-ExchangeRemoteMove	
-SkipVerification	
-TestMailbox	

	▼
-DomainController	
-RemoteServer	
-RPCProxyServer	
-SourceMailboxLegacyDN	

server1.contoso.com

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

New-MigrationEndpoint -Name MEP1

-Autodiscover

-ExchangeRemoteMove

-SkipVerification

-TestMailbox

-DomainController

-RemoteServer

-RPCProxyServer

-SourceMailboxLegacyDN

server1.contoso.com

NEW QUESTION 190
HOTSPOT - (Topic 5)
You have an Exchange Online tenant that has the anti-spam settings configured as shown in the following exhibit.

Standard settings

On

Standard

Spam action	Move message to Junk Email folder
Mark bulk email as spam	On
Bulk threshold	7
Mark NDR backscatter as spam	Off
Safety Tips	On
Bulk email	Move message to Junk Email folder
Phishing email	Quarantine message

To change these settings or add new ones, switch to custom settings

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.
NOTE: Each correct selection is worth one point.

Users will see safety tips when they access their mailbox from [answer choice].

Outlook on the web only

Microsoft Outlook 2019 only

Microsoft Outlook 2019 and Outlook on the web

To reduce the amount of bulk email delivered to the Inbox folders of users, you must [answer choice].

modify Spam action

increase the value of Bulk threshold

decrease the value of Bulk threshold

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Users will see safety tips when they access their mailbox from [answer choice].

Outlook on the web only

Microsoft Outlook 2019 only

Microsoft Outlook 2019 and Outlook on the web

To reduce the amount of bulk email delivered to the Inbox folders of users, you must [answer choice].

modify Spam action

increase the value of Bulk threshold

decrease the value of Bulk threshold

NEW QUESTION 193
- (Topic 5)
You have a Microsoft Exchange Online tenant that contains a user named User1. User1 reports that an email message marked as high priority was undelivered. You need to trace the email messages sent by User1 during the last 15 days. The solution must include the Delivery Priority property of the messages. Which report should you use?

- A. Enhanced summary
- B. Summary
- C. Extended
- D. Outbound messages

Answer: A

NEW QUESTION 195

HOTSPOT - (Topic 5)

You have a Microsoft Exchange Online tenant.

You need to add a custom domain named contoso.com that meets the following requirements:

- « All email messages from the internet must first be filtered by a third-party cloud service before being delivered to Exchange Online.
- « Recipient email systems must validate the messaging server for contoso.com)

Which type of DNS record should you use for each requirement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

All email messages from the internet must first be filtered by a third-party cloud service before being delivered to Exchange Online:

 CNAME
 MX
 SPF TXT
 SRV

Recipient email systems must validate the messaging server for contoso.com:

 CNAME
 MX
 SPF TXT
 SRV

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

? For the requirement that all email messages from the internet must first be filtered by a third-party cloud service before being delivered to Exchange Online, you should use an MX record1. An MX record specifies the mail server that is responsible for accepting email messages on behalf of your domain1. You need to configure your MX record to point to the third-party cloud service's mail server, and then configure the third-party cloud service to forward email messages to Exchange Online1.

? For the requirement that recipient email systems must validate the messaging server for contoso.com, you should use an SPF TXT record2. An SPF TXT record is a type of DNS record that identifies which mail servers are authorized to send email on behalf of your domain2. It helps prevent spoofing and phishing by verifying the sender's IP address against the list of authorized IP addresses in your SPF TXT record2. You need to configure your SPF TXT record to include both the third-party cloud service and Exchange Online as authorized senders for your domain2.

NEW QUESTION 198

- (Topic 5)

You have a Microsoft Exchange Online tenant. All users have Exchange Online mailboxes.

Your company has 10 projectors that are used by 30 managers.

You need to recommend a solution to manage the availability and scheduling of the projectors. The solution must NOT require additional Microsoft 365 licenses.

What Exchange Online object should you recommend creating for each projector?

- A. a public folder
- B. a distribution list
- C. a user mailbox
- D. a resource mailbox

Answer: D

Explanation:

Resource mailboxes are for the scheduling of resources such as projectors. They do not require a license.

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/admin/manage/room-and-equipment-mailboxes?view=o365-worldwide>

NEW QUESTION 202

HOTSPOT - (Topic 5)

HOTSPOT

You have a Microsoft Exchange Online tenant.

The Exchange organization has the following configurations.

```
PS C:\> Get-OrganizationConfig | Format-list Name,Oauth*,Activity*,Basic*,Is*

Name: M365x643293.onmicrosoft.com
OAuth2ClientProfileEnabled           : False

IsTenantInGracePeriod                  : False
IsDehydrated                           : True
IsValid                               : True
```

The Azure Active Directory (Azure AD) Sign-ins report is shown in the following table.

User	Application	Status	Client app	Conditional access	Authentication requirement
User1	Microsoft Office	Success	Mobile Apps and Desktop clients	Not Applied	Single-factor authentication
User1	Office 365 Exchange Online	Success	Offline Address Book	Not Applied	Single-factor authentication
User1	Office 365 Exchange Online	Success	MAPI Over Http	Not Applied	Single-factor authentication
User3	Microsoft Office	Success	Mobile Apps and Desktop clients	Not Applied	Single-factor authentication
User3	Office 365 Exchange Online	Success	Offline Address Book	Not Applied	Single-factor authentication
User3	Office 365 Exchange Online	Success	Autodiscover	Not Applied	Single-factor authentication
User2	Microsoft Office	Success	Mobile Apps and Desktop clients	Not Applied	Single-factor authentication

The Outlook Connection Status for User1 is shown in the following exhibit.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
 NOTE: Each correct selection is worth one point.

Statements	Yes	No
Microsoft Outlook connection of User1 uses Basic authentication	<input type="radio"/>	<input type="radio"/>
Modern Authentication is enabled	<input type="radio"/>	<input type="radio"/>
User3 uses the Microsoft Authenticator App to authenticate the Exchange Online	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

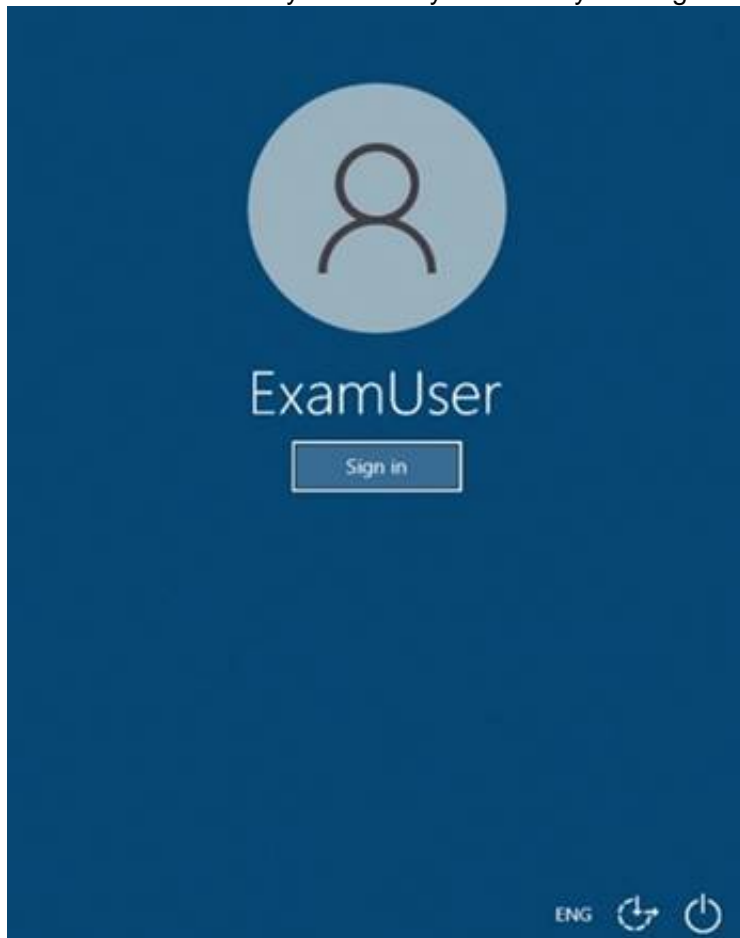

Explanation:

Box 1: Yes
 The authentication in the Outlook Connection Status exhibit is “Clear”. This means that Basic authentication is being used.
 Box 2: No
 In the first exhibit, the OAuth2ClientProfileEnabled parameter is False. This means that Modern Authentication is not enabled. A value of True means that Modern Authentication is enabled.
 Box 3: No
 The Authentication Requirement for User3 in the second exhibit is Single-factor authentication. This means that the Microsoft Authenticator App is not being used.

NEW QUESTION 207

SIMULATION - (Topic 5)
 Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.
 When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.
 Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.
 Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each

lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided. Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Use the following login credentials as needed:

To enter your username, place your cursor in the Sign in box and click on the username below.

To enter your password, place your cursor in the Enter password box and click on the password below.

Microsoft 365 Username: admin@abc.com

Microsoft 365 Password: xxxxxx

If the Microsoft 365 portal does not load successfully in the browser, press CTRL-K to reload the portal in a new browser tab.

The following information is for technical support purposes only.

Lab Instance: XXXXXX

You need to ensure that a user named Miriam Graham has the required rights to create new recipients by using the Exchange Online admin center. Miriam must be prevented from managing recipients. The solution must use the principle of least privilege. To complete this task, sign in to the Microsoft 365 admin center.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

? From the Microsoft 365 admin center dashboard, go to Admin > Exchange.

? In the Exchange admin center, go to Roles > Admin roles, select the Recipient Management role group.

? In Assigned section, add Miriam Graham to the role group.

? When you're finished, click Save.

NEW QUESTION 212

- (Topic 5)

You have a Microsoft Exchange Online tenant named contoso.com.

The Exchange configuration contains the following public folder hierarchy:

- Support
- Messages
- Calendar

You create a distribution list named HelpDesk@contoso.com.

You need to add the Messages public folder to the HelpDesk distribution list. What should you do first?

- A. Mail-enable the Support public folder
- B. Create a new public folder mailbox
- C. Mail-enable the Messages public folder
- D. Upgrade HelpDesk to a Microsoft 365 group

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/exchange/collaboration/public-folders/mail-enable-or-disable?view=exchserver-2019>

NEW QUESTION 213

- (Topic 5)

You have a Microsoft Exchange Server 2019 organization.

You need to ensure that a user named User1 can prevent mailbox content from being deleted if the content contains the words Fabrikam and Confidential.

What should you do?

- A. Add User1 to the Organization Management management role group.
- B. Add User1 to the Records Management management role group.

- C. Assign the mailbox Search and Mailbox Import Export
- D. Assign the Mailbox Search and Legal Hold management roles to User1.

Answer: D

Explanation:

References:
<https://docs.microsoft.com/en-us/exchange/policy-and-compliance/holds/holds?view=exchserver-2019>

NEW QUESTION 214

HOTSPOT - (Topic 5)

You have a Microsoft Exchange Server 2019 hybrid deployment. You use Advanced Threat Protection (ATP). You have safe attachments policies configured as shown in the following table.

Name	Action	Action On Error	Enable redirect
Policy1	Dynamic Delivery	Enabled	Enabled
Policy2	Block	Enabled	Disabled

You have the users shown in the following table.

Name	Location	Safe attachments policy
User1	On-premises	Policy1
User2	Exchange Online	Policy2
User3	Exchange Online	None
User4	Exchange Online	Policy1

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
 NOTE: Each correct selection is worth one point.

Statements	Yes	No
If User1 receives an email message that contains an attachment, the message will be delivered immediately with a placeholder file. The attachment will be reattached if no malware is detected.	<input type="radio"/>	<input type="radio"/>
If User2 receives an email message that has detected malware, the message will be placed in quarantine.	<input type="radio"/>	<input type="radio"/>
If User4 receives an email message that contains an attachment, and then forwards the message to User3 before attachment scanning is complete, User3 will receive the attachment after the initial attachment scanning is complete.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: No
 Dynamic Delivery cannot make changes to on-premise mailboxes after the message has been delivered.
 Box 2: Yes
 Policy2 applies to User2. Policy2 has a block action so the message will be placed in quarantine.
 Box 3: No
 User3 does not have a policy assigned so the attachment will be forwarded without being scanned.

NEW QUESTION 215

- (Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
 After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
 You have a Microsoft Exchange Online tenant that contains 1,000 mailboxes.
 All the users in the sales department at your company are in a group named Sales.
 The company is implementing a new policy to restrict the use of email attachments for the users in the Sales group.
 You need to prevent all email messages that contain attachments from being delivered to the users in the Sales group.
 Solution: You modify the Exchange Online Protection (EOP) settings. Does this meet the goal?

- A. Yes

B. No

Answer: B

Explanation:

You can block common attachments (attachments commonly used as malware) in EOP but not all attachments as required in this question. Instead, you should create a mail flow rule. Reference:
<https://docs.microsoft.com/en-us/exchange/security-and-compliance/mail-flow-rules/common-attachmentblocking-scenarios>

NEW QUESTION 216

- (Topic 5)

You have a Microsoft Exchange Online tenant that contains 1,000 user mailboxes and 10 main enabled users. The mail-enabled users have email addresses in two SMTP domains named fabrikam.com and contoso.com.

You need to convert the mail-enabled users into user mailboxes. What should you do first?

- A. Add the users to an Office 365 group.
- B. Assign a license to each user.
- C. Remove the remote domains of fabrikam.com and contoso.com
- D. Modify the email forwarding settings of each user.

Answer: C

Explanation:

You need to remove the remote domains first then assign a license to the user account.

NEW QUESTION 217

- (Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has an Exchange Online tenant that contains 2,000 mailboxes.

A partner company named Fabrikam, Inc. uses a third-party messaging solution. The outbound SMTP server for Fabrikam uses an IP address of 131.107.2.22.

You discover that several email messages from the fabrikam.com domain are erroneously marked as spam.

You need to ensure that all the email messages sent from the fabrikam.com domain are delivered successfully to the user mailboxes of your company.

Solution: You create a spam filter policy. Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

Add Fabrikam.com to the 'Domain allow list' in a spam filter policy.

NEW QUESTION 219

- (Topic 5)

You have a Microsoft Exchange Server 2019 organization.

A compliance manager plans to create retention policies for the mailboxes of executive users. The policies will move specific emails to an archive mailbox.

You need to create an archive mailbox for each executive user. What should you do?

- A. Run the New-Mailbox cmdlet-
- B. Enable mailbox journaling.
- C. Enable In-Place Archiving for each mailbox.
- D. Run the set-Mailbox cmdlet.

Answer: C

Explanation:

<https://docs.microsoft.com/en-us/exchange/policy-and-compliance/in-place-archiving/in-place-archiving?view=exchserver-2019>

NEW QUESTION 224

HOTSPOT - (Topic 5)

Your network contains an Active Directory forest named contoso.com.

You plan to implement Microsoft 365 and use Microsoft Exchange Online services.

You need to ensure that all client computers can use Autodiscover to connect to Microsoft 365.

Which record should you create? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Record Type: ▼

Host(A)
Alias(CNAME)
Text(TXT)

Target: ▼

autodiscover.contoso.com
autodiscover.outlook.com
autodiscover.office365.com

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Record Type: ▼

Host(A)
Alias(CNAME)
Text(TXT)

Target: ▼

autodiscover.contoso.com
autodiscover.outlook.com
autodiscover.office365.com

NEW QUESTION 229

- (Topic 5)

You have a Microsoft Exchange Server 2019 hybrid deployment that contains the public folders shown in the following table.

Name	Structure	Mail-enabled
PF1	Hierarchical	Yes
PF2	Flat	No
PF3	Flat	Yes

You plan to migrate the public folders to Exchange Online to improve the collaboration options available to users. Which public folders can be migrated to Office 365 groups without losing the folders' existing functionality?

- A. PF2 and PF3 only
- B. PF2 only
- C. PF1 and PF2 only
- D. PF1 only
- E. PF3 only

Answer: A

Explanation:

Not PF1. Office 365 groups are 'flat' so you would lose the folder hierarchy.

Reference:

<https://docs.microsoft.com/en-us/exchange/collaboration/public-folders/migrate-to-microsoft-365-groups?view=exchserver-2019>

NEW QUESTION 231

- (Topic 5)

You have an on-premises Microsoft Exchange Server 2019 organization. You plan to configure the environment to support a hybrid deployment.

You need to ensure that you can migrate mailboxes from the on-premises organization to Exchange Online.

Which two ports should be open between Exchange Online and the on-premises organization? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. 25
- B. 80

- C. 143
- D. 389
- E. 443
- F. 993

Answer: AE

Explanation:

Reference:

<https://docs.microsoft.com/en-us/exchange/hybrid-deployment-prerequisites#hybrid-deployment-protocolsports-and-endpoints>

NEW QUESTION 234

- (Topic 5)

You have a Microsoft Exchange Online tenant that contains 1,000 users.

A user recently sent an email message that was never received by a recipient on the internet. From the Exchange admin center, you successfully run a message trace but cannot see the message in the trace.

What is the most likely reason why the message fails to appear in the message trace?

- A. The user addressed the message to multiple internal and external receipts
- B. The user encrypted the email message.
- C. Your administrative user account requires additional rights.
- D. The message is in the user's Outbox folder.

Answer: D

NEW QUESTION 238

HOTSPOT - (Topic 5)

You have a Microsoft Exchange Online tenant that uses Microsoft Defender for Office 365.

Users report that a domain named contoso.com sent them phishing email messages that contain URLs.

You need to ensure that the messages are identified as phishing. The solution must ensure that contoso.com and all its subdomains and paths are matched.

How should you complete the PowerShell command? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

New-TenantAllowBlockListItems

New-EOPProtectionPolicyRule

New-ProtectionServicePolicy

New-TenantAllowBlockListItems

New-TenantAllowBlockListSpoofItems

-Listtype URL -Entries

*.contoso.com

*.contoso.com

NEW QUESTION 241

HOTSPOT - (Topic 5)

You have a Microsoft Exchange Online tenant.

Users report that they cannot view attachments from Outlook on the web from their home computer.

The Outlook Web App policy has the following settings.

ClassicAttachmentsEnabled	: True
ReferenceAttachmentsEnabled	: True
SaveAttachmentsToCloudEnabled	: True
MessagePreviewDisabled	: False
ForceWebReadyDocumentViewingFirstOnPublicComputers	: False
ForceWebReadyDocumentViewingFirstOnPrivateComputers	: False
ActionForUnknownFileAndMIMETypes	: Block
OWALightEnabled	: False
ForceSaveAttachmentFilteringEnabled	: False
ConditionalAccessPolicy	: ReadOnlyPlusAttachmentsBlocked

You need to ensure that the users can view attachments when they access Outlook on the web from their home computer.

How should you complete the command? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Set-OWAMailboxPolicy -identity OwaMailboxPolicy-Default		
-ActionForUnknownFileAndMIMETypes		Allow
-ConditionalAccessPolicy		False
-ForceWebReadyDocumentViewingFirstOnPublicComputers		ForceSave
-MessagePreviewsDisabled		ReadOnly
-OWALightEnabled		True

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Table Description automatically generated with medium confidence

NEW QUESTION 244

- (Topic 5)

You have a Microsoft Exchange Online tenant that contains a public folder named PF1.

You need to ensure that email sent to pf1@contoso.com is posted to PF1. What should you do?

- A. Create a shared mailbox.
- B. Mail-enable the public folder.
- C. Create a public folder mailbox.
- D. Create a mail flow rule.

Answer: B

NEW QUESTION 245

- (Topic 5)

You have a Microsoft Exchange Server 2019 hybrid deployment.

You migrate public folders from on-premises to Exchange Online by using the batch migration process.

After the batch migration completes, additional public folders are created on-premises. You need to migrate the new on-premises public folders to Exchange Online.

What should you do?

- A. Export the contents of the folders to a PST file, and then import the PST files by using Outlook PST export.
- B. Create a new public folder migration batch that contains only the new folders.
- C. Repeat the original batch migration process and add the new folders to the migration batch.

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/exchange/collaboration/public-folders/migrate-to-exchange-online?view=exchserver-2019>

NEW QUESTION 248

- (Topic 5)

You have a Microsoft Exchange Server 2019 organization.

You need to ensure that all email is retained for one year, and then moved to an archive mailbox.

What should you use?

- A. a default policy tag
- B. a data loss prevention (DLP) policy
- C. a personal tag
- D. a retention policy tag

Answer: A

Explanation:

<https://docs.microsoft.com/en-us/exchange/policy-and-compliance/mrm/retention-tags-and-retention-policies?view=exchserver-2019>

NEW QUESTION 252

- (Topic 5)

You have a hybrid deployment between a Microsoft Exchange Online tenant and an on-premises Exchange Server 2019 organization.

The tenant uses an email domain named @contoso.com.

You recently purchased an email domain named fabrikam.com.

You need to ensure that all the users in the tenant can receive email messages by using the @fabrikam.com email domain. The solution must ensure that the users can continue to receive email by using the @contoso.com email domain.

Which three actions should you perform? Each correct answer presents part of the solution. NOTE; Each correct selection is worth one point.

- A. From Azure AD Connect add a domain for fabrikam.com.
- B. From the on-premises Exchange admin center, add an accepted domain for fabrikam.com.
- C. From the Exchange Management Shell, create a script that runs the
- D. From the Microsoft 365 admin center, verify the fabrikam.com email domain
- E. From the on-premises Exchange admin center, modify the email address policy
- F. From the Microsoft 365 admin center, add the fabrikam.com email domain.

Answer: BDE

NEW QUESTION 256

DRAG DROP - (Topic 5)

You have a Microsoft 365 subscription that contains two groups named Group1 and Group 2. The members of the groups perform the tasks shown in the following table.

Name	Task
Group1	Manage mail flow rules, anti-spam policies, and quarantined messages.
Group2	Manage data loss prevention (DLP) policies and quarantine.

You need to add Group1 and Group2 to role groups. The solution must use the principle of least privilege. To which role group should you add each group? To answer, drag the appropriate role groups to the correct groups. Each role group may be used once, more than once, or not at all You may need to drag the split bar between panes or scroll to view content.

Role groups

Compliance Management

Organization Management

Security Operator

Hygiene Management

Records Management

Group1:

Group2:

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 258

HOTSPOT - (Topic 5)

You have a Microsoft 365 ES subscription that contains a Microsoft Exchange Online tenant. You plan to use a mailbox named Mailbox1 to store user-reported malicious email messages. You need to configure Microsoft Defender for Office 365 to meet the following requirements:
+ Configure Mailbox1 as a SecOps mailbox.
+ Create a policy that has zero-hour auto purge (ZAP) for infected email disabled for Mailbox1.
Which two settings should you configure? To answer, select the appropriate settings in the answer area.

Policies

	Anti-phishing
	Anti-spam
	Anti-malware
	Safe Attachments
	Safe Links

Rules

	Tenant Allow/Block Lists
	DKIM
	Advanced delivery
	Enhanced filtering
	Quarantine policies

Others

	User reported message settings
	Evaluation mode

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Policies

 Anti-phishing

 Anti-spam

 Anti-malware

NEW QUESTION 262

HOTSPOT - (Topic 5)

You have a Microsoft Exchange Online tenant that contains three Azure Active Directory (Azure AD) security groups named Administrators, Managers, and Marketing. The tenant contains the users shown in the following table.

Name	Group membership
User1	Managers
User2	Marketing
User3	Administrators
User4	None

The tenant contains the resources shown in the following table.

Name	Type
ConferenceRoom1	Room
ConferenceRoom2	Room
Projector1	Equipment

ConferenceRoom1 has he following policy.

```
PS C:\> get-calendarprocessing "ConferenceRoom1"|fl Allb*,allr*,booking*,req*,res*
AllBookInPolicy      : False
AllRequestOutOfPolicy : False
AllRequestInPolicy   : False
BookInPolicy          : (/o=ExchangeLabs/ou=Exchange Administrative Group
                        (FYDIBOHF23SPDLT)/cn=Recipients/cn=7fddfd211974ea68d22dae2c891db02-Managers)
RequestOutOfPolicy    : {}
RequestInPolicy        : (/o=ExchangeLabs/ou=Exchange Administrative Group
                        (FYDIBOHF23SPDLT)/cn=Recipients/cn=03a5a93a90ad4296907830a3ec1a8f94-User2)
ResourceDelegates     : {User4}
```

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can book ConferenceRoom1 automatically without the approval of User4.	<input type="radio"/>	<input type="radio"/>
User2 can book ConferenceRoom1 automatically without the approval of User4.	<input type="radio"/>	<input type="radio"/>
User4 can book ConferenceRoom1 pending approval from User3.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Yes

The BookInPolicy allows the Managers group. User1 is in the Managers group so User 1 can book ConferenceRoom1 automatically without the approval of User4.

Box 2: No

The BookInPolicy allows the Managers group. User2 is not in the Managers group so User 2 cannot book ConferenceRoom1 automatically without the approval of User4.

Box 3: No

The RequestInPolicy does not include User4. Therefore, User3 is not allowed to request to book the meeting room either with or without approval.

NEW QUESTION 264

- (Topic 5)

You have a Microsoft Exchange Server 2019 organization. You purchase a Microsoft Office 365 E5 subscription.

You plan to implement Exchange Modern Hybrid and free/busy sharing.

Which two components should you configure for the planned implementations? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. a sharing policy
- B. a federation trust
- C. a relying party trust
- D. Active Directory Lightweight Directory Services (AD LDS)
- E. an organization relationship

Answer: BE

Explanation:

References:

<https://docs.microsoft.com/en-us/exchange/shared-free-busy>

NEW QUESTION 268

- (Topic 5)

You have a Microsoft 365 environment that contains 1,000 mailboxes.

You need to ensure that only an administrator named Admin1 can use the Exchange Management Shell to manage

What should you do?

- A. Create a conditional access policy and apply the policy to all users.
- B. For all users, run the set-user cmdlet and specify the -RemotePowershellEnabled parameter.
- C. Create a conditional access policy and apply the policy to Admin1.
- D. For Admin1, run the set-user cmdlet and specify the -RemotePowerShellEnabled parameter.

Answer: A

NEW QUESTION 271

- (Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft 365 E5 subscription.

You need to ensure that a user named User1 can review audit reports from the Microsoft 365 security center. User1 must be prevented from tracing messages from the Security admin center.

Solution: You assign the Security Reader role to User1. Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

Security Administrator can view the audit reports but cannot create a message trace.

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/security/office-365-security/message-trace-scc>

NEW QUESTION 276

- (Topic 5)

You have a Microsoft Exchange Online subscription for an email domain named contoso.com.

A partner company has an Exchange Online subscription for an email domain named fabrikam.com.

You need to prevent out-of-office messages sent by users in contoso.com from being sent to users in fabrikam.com.

What is the best way to achieve the goal from the Exchange admin center? More than one answer choice may achieve the goal. (Choose the best answer.)

- A. Create a connector
- B. Create a mail flow rule
- C. Create a remote domain
- D. Create an accepted domain

Answer: C

Explanation:

Reference:

<https://docs.microsoft.com/en-us/exchange/mail-flow-best-practices/remote-domains/remote-domains>

NEW QUESTION 278

- (Topic 5)

You have a Microsoft 365 subscription for a company named Fabrikam, Inc. The company uses an Exchange Online tenant that has an email domain named fabrikam.com.

Fabrikam works with a partner company Contoso, Ltd. that uses an email domain named contoso.com.

A new security policy at Contoso states that any email sent from partners to Contoso employees must use TLS encryption.

You need to ensure that email sent from Fabrikam to Contoso uses TLS. What should you create in the tenant?

- A. a new connector that specifies the contoso.com SMTP domain
- B. a remote domain named contoso.com
- C. a new connector that specifies the fabrikam.com SMTP domain
- D. a remote domain named fabrikam.com

Answer: A

Explanation:

Configure a Send connector in Fabrikam to point to Contoso.

NEW QUESTION 279

- (Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft Exchange Online tenant that contains 1,000 users.

A user named User1 receives a non-delivery report (NDR) when attempting to send an email message to an internal group named sales@contoso.com. The NDR contains the

following text: "5.7.1 Delivery not authorized."

You need to ensure that User1 can send email to sales@contoso.com successfully. Solution: You modify the properties of a mail flow rule

- A. Yes
- B. No

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/exchange/mail-flow-best-practices/non-delivery-reports-in-exchange-online/fix-error-code-550-5-7-1-in-exchange-online>

NEW QUESTION 283

- (Topic 5)

You have a Microsoft 365 subscription that contains two users named User1 and User2.

User1 reports to have received a suspicious email message that appears to have come from User2.

You identify that the message was sent by an external user impersonating User2. You need to block email that contains the email address of an impersonated sender. What should you configure?

- A. an anti-phishing policy
- B. a Tenant Allow/Block Lists rule
- C. an anti-spam policy
- D. an Enhanced filtering rule

Answer: B

NEW QUESTION 285

HOTSPOT - (Topic 5)

You have a Microsoft Exchange Server 2019 hybrid deployment. You have the on-premises mailboxes shown in the following table.

Name	Forwarding address
User1	User6
User2	None
User3	None
User4	None
User5	None
User6	None

You add the mailbox permissions shown in the following table.

Mailbox	Permission
User2	Send As for User4
User4	Full Access for User3
User6	Send on Behalf for User5

You plan to migrate the mailboxes to Exchange Online by using remote mailbox move requests. The mailboxes will be migrated according to the schedule shown in the following table.

Week	Mailbox
1	User1, User2, User3, User6
2	User4, User5

Mailboxes migrated the same week will have their mailbox move requests included in the same batch and will be cut over simultaneously.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
The mail forwarding settings of the User1 mailbox will be preserved automatically after the migration.	<input type="radio"/>	<input type="radio"/>
The permissions granted to the User4 mailbox for the User2 mailbox will be preserved automatically after the migration.	<input type="radio"/>	<input type="radio"/>
The permissions granted to the User3 mailbox for the User4 mailbox will be preserved automatically after the migration.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

NEW QUESTION 289

HOTSPOT - (Topic 5)

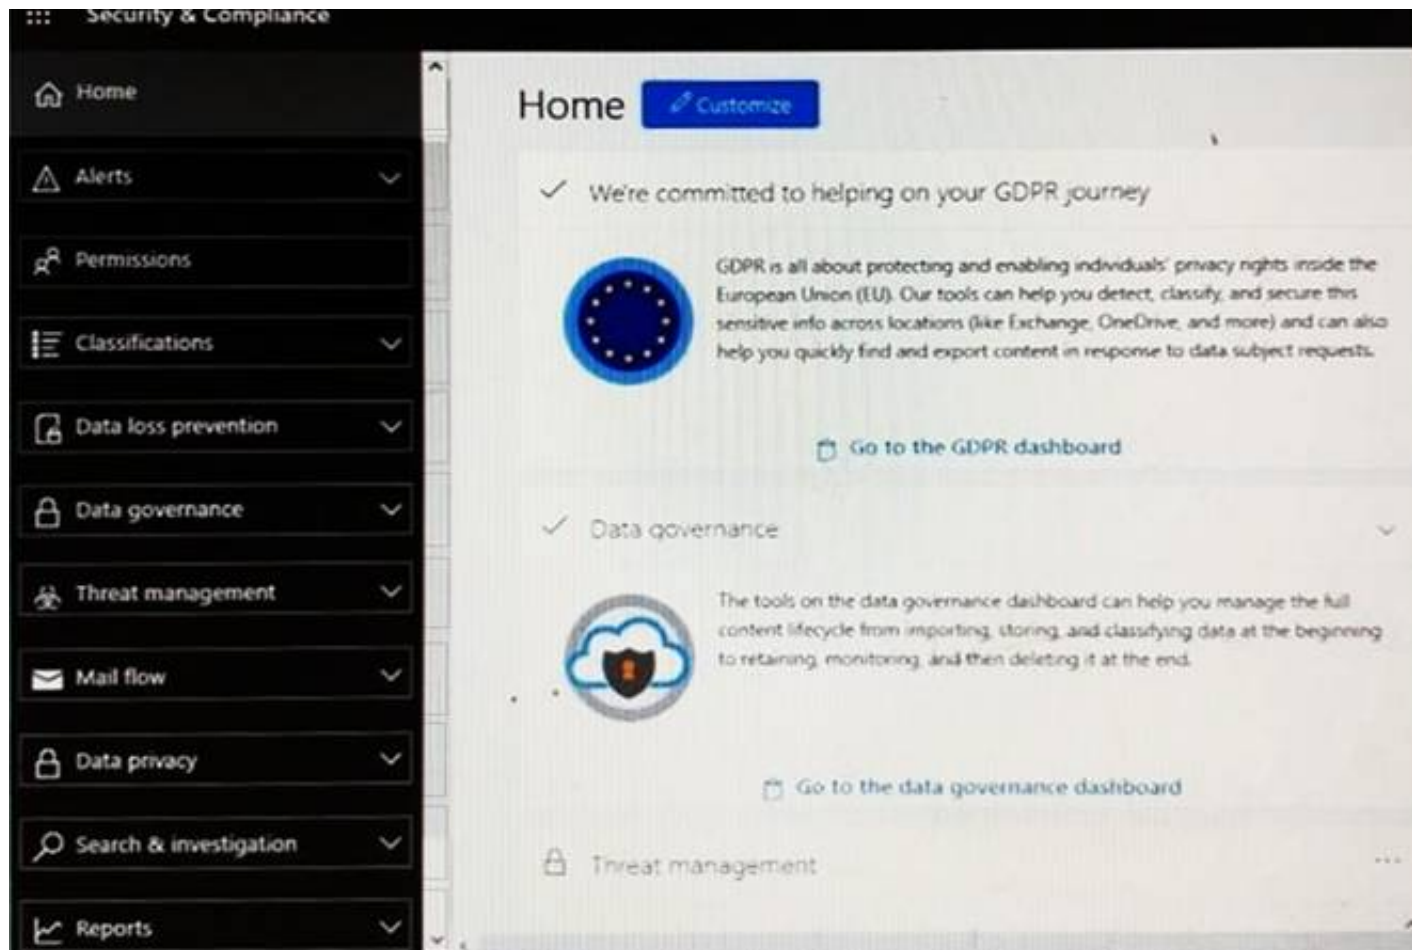

You manage a Microsoft Exchange Online subscription. You use Advanced Threat Protection (ATP).

A partner company sends daily invoices to your company. The invoices are always named AdatumInvoice.xlsx.

Some users report that sometimes they cannot find the invoices in their Inbox folder. You need to identify whether the invoices are identified as malicious by Microsoft 365.

Which two blades should you use? To answer, select the appropriate blades in the answer area.

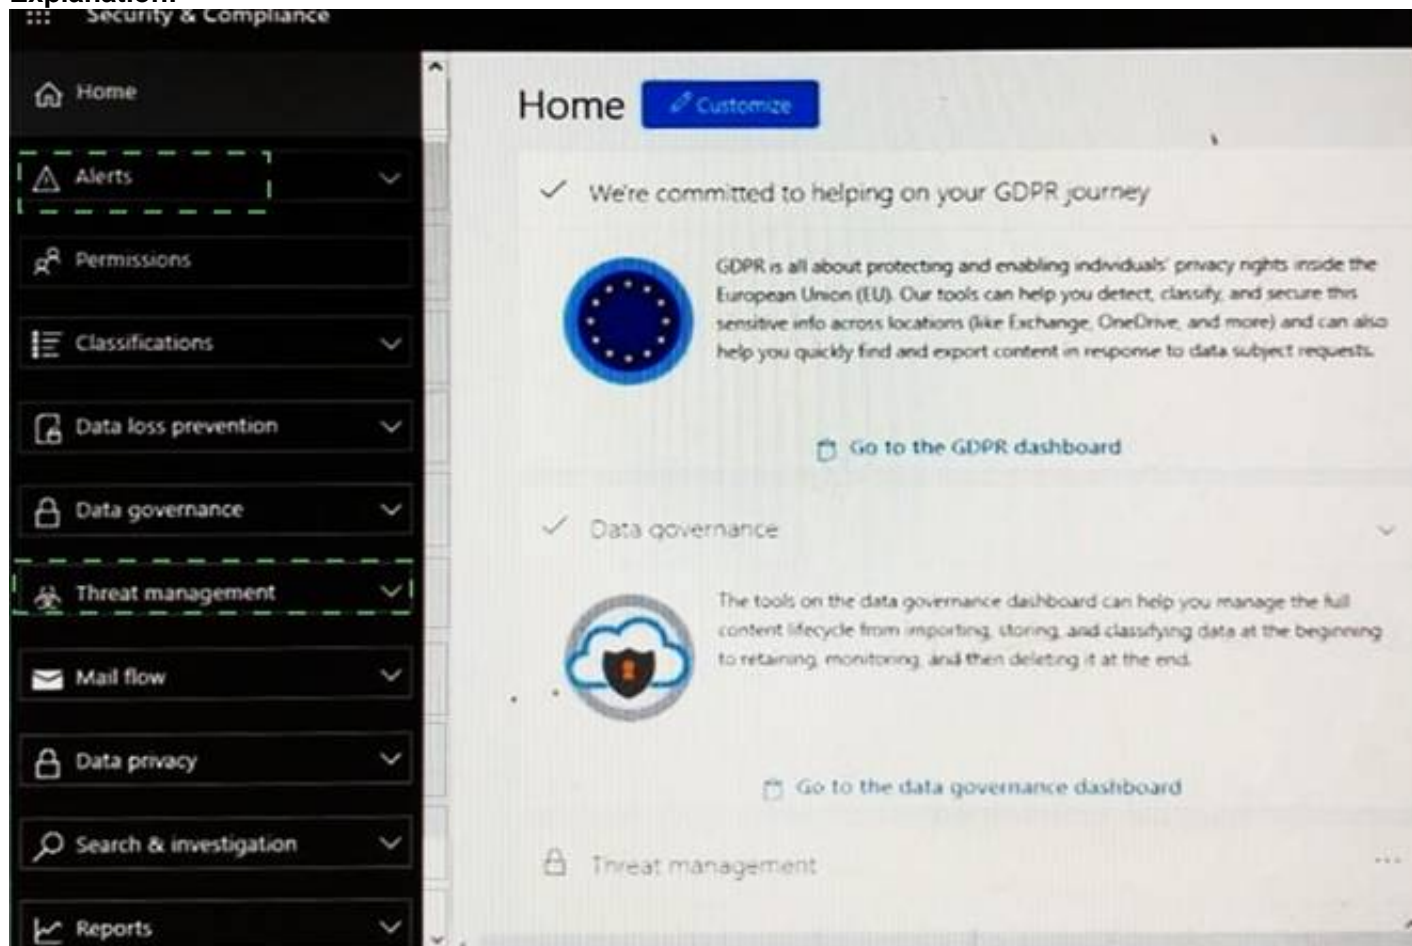

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 292

SIMULATION - (Topic 5)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Use the following login credentials as needed:

To enter your username, place your cursor in the Sign in box and click on the username below.

To enter your password, place your cursor in the Enter password box and click on the password below.

Microsoft 365 Username: admin@abc.com

Microsoft 365 Password: xxxxxx

If the Microsoft 365 portal does not load successfully in the browser, press CTRL-K to reload the portal in a new browser tab.

The following information is for technical support purposes only.

Lab Instance: XXXXXX

You need to prevent email messages from a domain named fabrikam.com from being delivered to the mailboxes of your organization.

To complete this task, sign in to the Microsoft 365 admin center.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

? In the Microsoft 365 Defender portal at <https://security.microsoft.com>, go to Email & Collaboration > Policies & Rules > Threat policies > Anti-spam in the Policies section. To go directly to the Anti-spam policies page, use <https://security.microsoft.com/antispam>.

? On the Anti-spam policies page, click Create policy and then select Inbound from the drop down list.

? The policy wizard opens. On the Name your policy page, configure these settings:

- Name: Enter a unique, descriptive name for the policy.
- Description: Enter an optional description for the policy. When you're finished, click Next.

? On the Users, groups, and domains page that appears, identify the internal recipients that the policy applies to (recipient conditions):

- Users: The specified mailboxes, mail users, or mail contacts in your organization.
- Groups: The specified distribution groups, mail-enabled security groups, or Microsoft 365 Groups in your organization.
- Domains: All recipients in the specified accepted domains in your organization.

Click in the appropriate box, start typing a value, and select the value that you want from the results. Repeat this process as many times as necessary. To remove an existing value, click remove x next to the value.

For users or groups, you can use most identifiers (name, display name, alias, email address, account name, etc.), but the corresponding display name is shown in the results. For users, enter an asterisk (*) by itself to see all available values.

Multiple values in the same condition use OR logic (for example, <recipient1> or <recipient2>). Different conditions use AND logic (for example, <recipient1> and <member of group 1>).

- Exclude these users, groups, and domains: To add exceptions for the internal recipients that the policy applies to (recipient exceptions), select this option and configure the exceptions. The settings and behavior are exactly like the conditions.

When you're finished, click Next.

? On the Bulk email threshold & spam properties page that appears, configure the following settings:

- Bulk email threshold: Specifies the bulk complaint level (BCL) of a message that triggers the specified action for the Bulk spam filtering verdict that you configure on the next page (greater than the specified value, not greater than or equal to). A higher value indicates the message is less desirable (more likely to resemble spam). The default value is 7. For more information, see Bulk complaint level (BCL) in EOP and What's the difference between junk email and bulk email?.
- By default, the PowerShell only setting MarkAsSpamBulkMail is On in anti-spam policies. This setting dramatically affects the results of a Bulk filtering verdict:
 - _ MarkAsSpamBulkMail is On: A BCL that's greater than the threshold is converted to an SCL 6 that corresponds to a filtering verdict of Spam, and the action for the Bulk filtering verdict is taken on the message.
 - _ MarkAsSpamBulkMail is Off: The message is stamped with the BCL, but no action is taken for a Bulk filtering verdict. In effect, the BCL threshold and Bulk filtering verdict action are irrelevant.
- Increase spam score, Mark as spam* and Test mode: Advanced Spam Filter (ASF) settings that are turned off by default.

The Contains specific languages and from these countries settings are not part of ASF.

- Contains specific languages: Click the box and select On or Off from the drop down list. If you turn it on, a box appears. Start typing the name of a language in the box. A filtered list of supported languages will appear. When you find the language that you're looking for, select it. Repeat this step as many times as necessary. To remove an existing value, click remove x next to the value.

- From these countries*: Click the box and select On or Off from the drop down list. If you turn it on, a box appears. Start typing the name of a country in the box. A filtered list of supported countries will appear. When you find the country that you're looking for, select it. Repeat this step as many times as necessary. To remove an existing value, click remove x

next to the value.

When you're finished, click Next.

? On the Actions page that appears, configure the following settings:

- Message actions: Select or review the action to take on messages based on the following spam filtering verdicts:

- _ Spam
- _ High confidence spam Phishing
- _ High confidence phishing Bulk

- Retain spam in quarantine for this many days: Specifies how long to keep the message in quarantine if you selected Quarantine message as the action for a spam filtering verdict. After the time period expires, the message is deleted, and is not recoverable. A valid value is from 1 to 30 days.

- Add this X-header text: This box is required and available only if you selected Add X- header as the action for a spam filtering verdict. The value you specify is the header field name that's added to the message header. The header fieldvalue is always This message appears to be spam.

- Prepend subject line with this text: This box is required and available only if you selected Prepend subject line with text as the action for a spam filtering verdict. Enter the text to add to the beginning of the message's subject line.

- Redirect to this email address: This box is required and available only if you selected the Redirect message to email address as the action for a spam filtering verdict. Enter the email address where you want to deliver the message. You can enter multiple values separated by semicolons (;).

- Enable safety Tips: By default, Safety Tips are enabled, but you can disable them by clearing the checkbox.

- Enable zero-hour auto purge (ZAP): ZAP detects and takes action on messages that have already been delivered to Exchange Online mailboxes.

ZAP is turned on by default. When ZAP is turned on, the following settings are available:

- _ Enable ZAP for phishing messages: By default, ZAP is enabled for phishing detections, but you can disable it by clearing the checkbox.
- _ Enable ZAP for spam messages: By default, ZAP is enabled for spam detections, but you can disable it by clearing the checkbox.

When you're finished, click Next.

? On the Allow & block list flyout that appears, you are able to configure message senders by email address or email domain that are allowed to skip spam filtering.

In the Allowed section, you can configure allowed senders and allowed domains. In the

Blocked section, you can add blocked senders and blocked domains. The steps to add entries to any of the lists are the same:

- _ Click the link for the list that you want to configure: Allowed >Senders: Click Manage (nn) sender(s). Allowed >Domains: Click Allow domains. Blocked

>Senders: Click Manage (nn) sender(s). Blocked >Domains: Click Block domains.

- _ In the flyout that appears, do the following steps: Click + Add senders oAr dd domains.

_ In the Add senders oAr dd domains flyout that appears, enter the sender's email address in the Sender box or the domain in theDomain box. As you're typing, the value appears below the box. When you're finished typing the email address or domain, select the value below the box.

- _ Repeat the previous step as many times as necessary. To remove an existing value, click remove x next to the value.

When you're finished, click Add senders oAr dd domains.

- Back on the main flyout, the senders or domains that you added are listed on the page. To remove an entry from this page, do the following steps:

- _ Select one or more entries from the list. You can also use the Search box to find values in the list.
- _ After you select at least one entry, the delete icon appears Click the delete icon to remove the selected entries

When you're finished, click Done.

Back on the Allow & block list page, clickNext when you're read to continue.

? On the Review page that appears, review your settings. You can select Edit in each section to modify the settings within the section. Or you can click Back or select the specific page in the wizard.

When you're finished, click Create.

? On the confirmation page that appears, click Done.

NEW QUESTION 297

- (Topic 5)

Note: This question is part of a series of questions that present the same scenario.

Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft Exchange Server 2019 organization that contains 200 mailboxes. You need to add a second email address to each mailbox. The address must have a

syntax that uses the first letter of each user's last name, followed by the user's first name,

and then @fabrikam.com.

Solution: You convert all the mailboxes to shared mailboxes, and then you run the Set-Mailbox cmdlet and specify the -EmailAddressPolicyEnabled \$true parameter.

Does this meet the goal?

A. Yes

B. No

Answer: B

Explanation:
