Microsoft

Exam Questions PL-100

Microsoft Power Platform App Maker

NEW QUESTION 1
- (Topic 4)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
A company is deploying Microsoft Power Platform components to streamline a job candidate screening process.
The human resources (HR) representatives of the company plan to attend school career fairs. The HR representatives must qualify and enter potential job candidates into a Power Apps app. The HR representatives must enter the following information for each candidate:

Field name	Data type	Criteria for follow up
Name	Text	No
Degree	Text	Yes
First available hire date	Date	Yes
Initial impression	Integer 0-10	Yes
Resume	Picture	No
Not currently viable	Boolean	Yes
Follow up	Boolean	NA

If a candidate is currently unqualified for a job position but would eventually qualify based on follow-up criteria, the follow-up checkbox must be selected or cleared in the system immediately.
The company plans to create a similar Power Apps app that will contain the same business use case, but for internal employees and promotions.
You need to create a Power Apps app solution to automatically mark the candidate for follow up.
Proposed solution: Use a Common Data Service workflow with a PowerQuery on the data entity.
Does the solution meet the goal?

A. Yes
B. No

Answer: A

Explanation:
Process (Workflow) table/entity reference is a set of logical rules that define the steps necessary to automate a specific business process, task, or set of actions to be performed.
Common Data Service workflow support: Filter triggers based on which attributes change - You can control which field changes trigger your automated flows. For example, trigger your flow only when the status field changes while ignoring all other fields that may change.
Reference:
https://docs.microsoft.com/en-us/business-applications-release-notes/april19/microsoft-

NEW QUESTION 2
- (Topic 4)
You create a Power Platform solution. Solution data is stored in a variety of documented cloud services.
You must also be able to connect to one or more industry data sources. You need to configure the data sources.
What should you do?

A. Create a business process flow.
B. Create a data policy template.
C. Create a UI flow.
D. Use an existing data connector.

Answer: D

Explanation:
In Power Apps, add a data connection to an existing canvas app or to an app that you're building from scratch. Your app can connect to SharePoint, Common Data Service, Salesforce, OneDrive, or many other data sources.
Note:
Add data source
* 1. In the center pane, select connect to data to open the Data pane.
* 2. Select Add data source.
* 3. If the list of connections includes the one that you want, select it to add it to the app. Otherwise, skip to the next step.
* 4. Select New connection to display a list of connections.
* 5. In the search bar, type or paste the first few letters of the connection you want, and then select the connection when it appears.
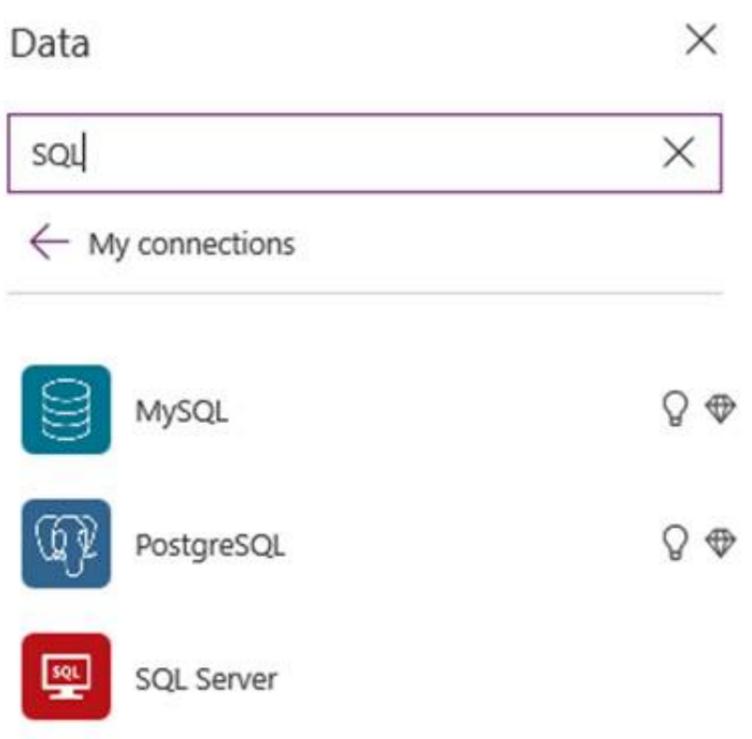

* 6. Select Create to both create the connection and add it to your app.
Reference:
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/add-data-connection

NEW QUESTION 3
DRAG DROP - (Topic 4)
You create multiple apps as part of an unmanaged solution. You need to move the apps to another environment.
You need to pick the appropriate solution type for each requirement.
Which types of solutions should you create? To answer, drag the appropriate solution types to the correct requirements. Each solution type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:

Box 1: Unmanaged
Unmanaged Solution: The beginning state of solution is the unmanaged solution state. During this phase, you can add, edit, update, remove, delete, and test any of the components of the solution.
Box 2: Unmanaged
Box 3: Managed
Managed Solution: A managed solution is a finalized solution that can be distributed and installed. They are created by exporting an unmanaged solution by setting restrictions to prevent any further customizations. The whole point of Managed is locking down the Component states so they cannot be edited. Deleting the Managed Solution will remove all its customisations as well as data contained. Managed Solutions become read only once deployed so they cannot be manipulated.

NEW QUESTION 4
DRAG DROP - (Topic 4)
DRAG DROP
You are designing a new model-driven app for salespeople at a company.
The company requires that all new line-of-business apps must use a much native functionality as possible to avoid having developers maintain code.
You need to determine how to implement the app s business logic.
Which method should you use? To answer, drag the appropriate methods to the correct
requirements. Each method may be used once, more than once, or not at all. You may
NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:

Methods		Answer Area		Requirement	Method
Business rules				Validate the postal code format based on the state or province entered by a user.	Business rules
Power Automate flows				Ensure that the app can communicate with other business applications by using existing connectors.	Power Automate flows
Business process flows					

NEW QUESTION 5
DRAG DROP - (Topic 4)
A company has 500 products. Each product is referenced by a product ID. Each product belongs to one of eight product categories.
You are creating an app to manage requests for new products.
The product categories will never change. Categories are defined in the column itself, not in a separate table. The data must be structured in a way that does not allow for misspellings.
Only two new tables should be created in Microsoft Dataverse:
? Products: Holds the products that can be requested.
? Requests: Holds the requests for the product ID and quantity. The products are filtered by product category.
You need to identify the data types to use when building the table columns in Dataverse.
Which data type should you use? To answer, drag the appropriate data types to the correct requirements. Each data type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Data types		Answer Area		
Lookup		Scenario		Data types
Choice		Create a column in the Products table that displays the category of the product		Data type
Text		Create a column in the Products table for the product ID of the product		Data type
		Create a column in the Requests table that allows the user to select form a list of available products		Data type

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Text
Text columns can contain text characters. This column type has several format options that will change the presentation of the text.
Box 2: Lookup
When you create a new lookup column you are creating a new Many-to-One (N:1) table relationship between the table you're working with and the Target Row Type defined for the lookup.
Box 3: Choice
You can customize forms (main, quick create, and quick view) and email templates by adding multi-select columns that are called Choices. When you add a choices column, you can specify multiple values that will be available for users to select. When users fill out the form, they can select one, multiple, or all the values displayed in a drop-down list.

NEW QUESTION 6
HOTSPOT - (Topic 4)
You create a canvas app for a service company.
Using the Tree view, you navigate to the ViewServices screen. The screen contains a form named DetailForm1 that only contains Label controls. You add the People icon to the header of the ViewServices screen as shown below:
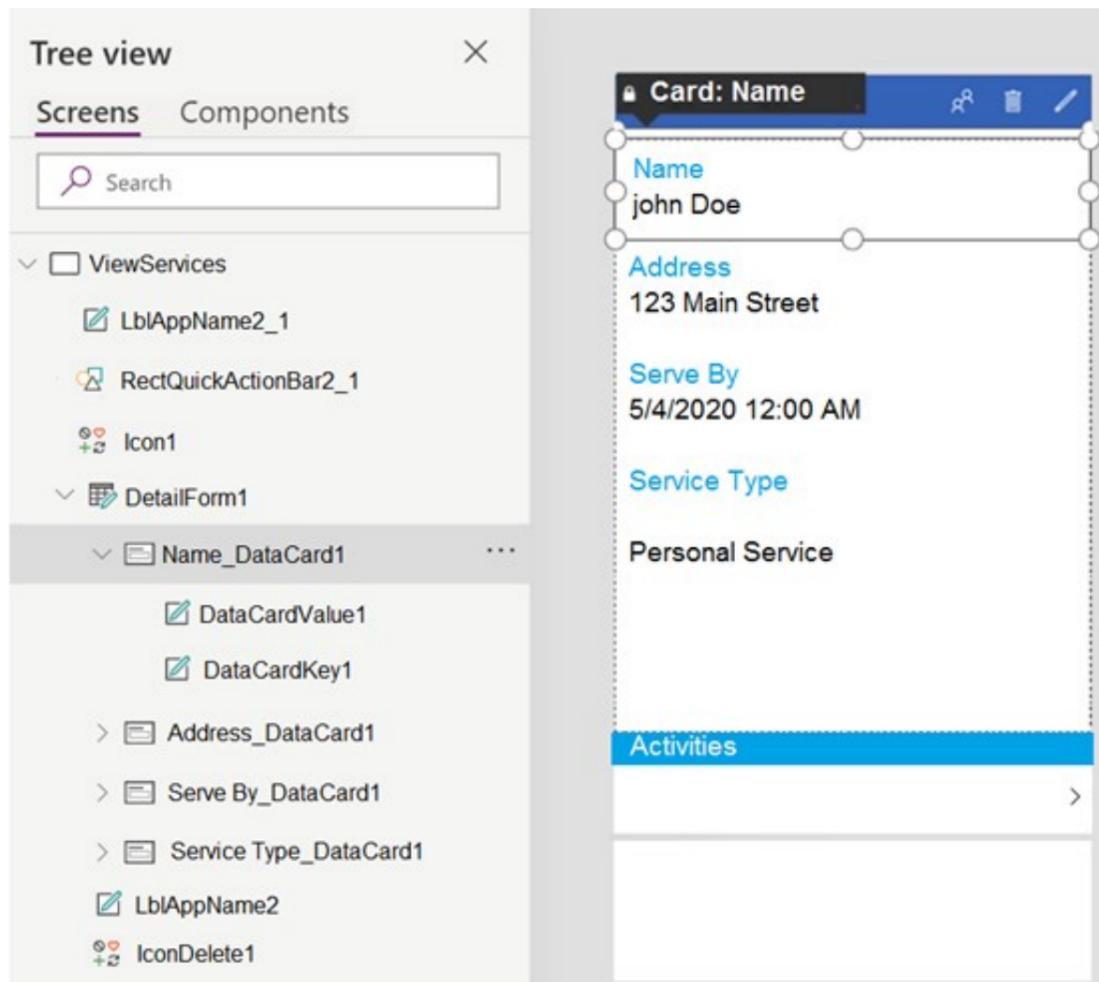

When you select the icon a new Activity form opens. You must set the value of the Name field on the new Activity form to the value of the name field from DetailForm1.
Use the drop-down menus to select the answer choice that answers each question based on the information presented in the graphic.
NOTE: Each correct selection is worth one point.

Which formula must you enter in the Name field on the Activity form to default the Name from DetailForm1?

▼
Name_DataCard1.Default
Name_DateCardKey1.Default
Name_DataCardValue1.Default

Which action should you perform on the People icon?

▼
In the On Select property, set the Activity form to Edit mode.
In the On Select property, set the Activity form to View mode.
Move the icon to the Activity form and set the On Select property to the Activity screen.
Move the icon to the DetailForm1 and set the On Select property to open the Activity screen.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Name_DataCardValue1.Default
Box 2: Move the icon to the Activity form and set the On Select property to the Activity screen.
The Select function simulates a select action on a control as if the user had clicked or
tapped the control. As a result, the OnSelect formula on the target control is evaluated.

NEW QUESTION 7
- (Topic 4)
You are creating a canvas app that displays a list of accounts.
Users must be able to select an account and view details for the account. The app must include a feature that brings the user back to the list of accounts.
You add a blank screen named Screen_Accounts and add a gallery named Gallery_Accounts to the screen. You set the data source of Gallery_Accounts to Accounts and add another blank screen named Screen_AccountDetail.
You need to complete the app.
What are two possible ways to achieve the goal? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.

A. Add an edit form to Screen_AccountDetail and set the Default Mode of the form to Vie
B. Set the OnSelect property of Gallery_Accounts to Navigate(Screen_AccountDetail).Set the data source of the form to Account
C. Set the Item property of the form to Selected.Add a back icon on Screen_AccountDetail and set its OnSelect property to Navigate(Screen_Accounts).
D. Add an edit form to Screen_AccountDetail and set the Default Mode of the form to Vie
E. Set the OnSelect property of Gallery_Accounts to Navigate(Screen_AccountDetail).Set the data source of the form to Accounts.Set the Item property of the form to First(Accounts).Add a back icon on Screen_AccountDetail and set its OnSelect property to Navigate(Screen_Accounts).
F. Add an edit form to Screen_AccountDetail and set the Default Mode of the form to Ne
G. Set the OnSelect property of Gallery_Accounts to Navigate(Screen_AccountDetail).Set the data source of the form to Account
H. Set the Item property of the form to Selected.Add a back icon on Screen_AccountDetail and set its OnSelect property to Navigate(Screen_Accounts).

I. Add a display form to Screen_AccountDetail.Set the data source of the form to Account
J. Set the Item property of the form to Selected.Add a back icon on Screen_AccountDetail and set its OnSelect property to Navigate(Screen_Accounts).

Answer: AD

Explanation:
Reference:
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function-form

NEW QUESTION 8
- (Topic 4)
A large construction company has 120 departments. Each department has a Microsoft Teams channel.
The company creates training content for each department. All training content for a department is hosted in the channel for that department You must create a chatbot for the company that helps employees find relevant training. Employees must not be able to modify the chatbot.
You need to create the chatbot
Which three actions should you perform"* Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.

A. Create a bot for each departmental channel.
B. Create one training bot for organization-wide deployment.
C. Create an entity for each department
D. Create a topic for each department.
E. Create a topic for each trade.

Answer: BCD

NEW QUESTION 9
HOTSPOT - (Topic 4)
HOTSPOT
A company is creating an app to manage project status reports.
Users will update a series of controls and click a submit button. The submit button will calculate a risk score for the project and return to the previous screen with that risk score. The risk score will be used in two different forms.
You need to create the formula on the button click. To answer, select the appropriate option in the answer area NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 10
DRAG DROP - (Topic 4)
A company uses a canvas app.
The finance team and sales team require access to the canvas app. You must perform the following actions:
• Add members of the sales team to the app as users.
• Add members of the finance team to the app as co-owners.
The app must be shareable with current and future team members.

You need to request creation of group types for team members. This must enable sharing of the app with the least amount of effort.
Which group types should you request? To answer, drag the appropriate group types to the correct activities. Each group type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 10
- (Topic 4)
You create a canvas app.
You need to make the app available to other people in your company.
What are two possible ways to achieve the goal? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.

A. Grant access to individual users in your company.
B. Share the app with a Microsoft Exchange distribution list.
C. Grant access to a Microsoft Teams team.
D. Share the app with a Microsoft Azure Active Directory security group.

Answer: AD

Explanation:
After you build a canvas app that addresses a business need, specify which users in your organization can run the app and which can modify and even reshare it.
Specify each user by name, or specify a security group in Azure Active Directory.
Reference:
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/share-app

NEW QUESTION 12
DRAG DROP - (Topic 4)
You ate designing an app to track time off for employees. Employee data, including employee ID number, is stored in an existing data source used by other apps.
Employees must be able to look up their employee ID number and enter time-off start and end dates in the app.
You need to configure the elements of the data source.
Which data elements should you use? To answer, drag the appropriate data elements to the correct data. Each data element may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 16
DRAG DROP - (Topic 4)
You create an app with multiple screens.

Test users report that the size and type of gallery displayed on each screen are different. You must improve the consistency for the app screens.
You need to create a reusable gallery that displays information based on the current record.
Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.
NOTE: More than one order of answer choices is correct. You will receive credit for any of the correct orders you select.

Actions

Add a gallery control.
Add an input property.
Create a component.
Add a screen.
Create a form.
Add an output property.

Answer Area

A. Mastered
B. Not Mastered

Answer: A

Explanation:
- Create a component
- Add an input property
- Add a gallery control
From https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/create-component step 10 and 11

NEW QUESTION 20
- (Topic 4)
You are using Test Studio to test a Power Apps canvas app. You need to ensure that the app conforms to several use cases. What should you do first?

A. Save the app to the cloud.
B. Create test cases for each requirement.
C. Save the app to your computer.
D. Create a test suite.
E. Record test cases for each requirement.

Answer: D

Explanation:
Create a test suite.
By default, a test suite and test case are created for you in Test Studio. Test suites are used to organize your test cases.
Reference:
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/working-with-test-studio

NEW QUESTION 24
DRAG DROP - (Topic 4)
You are an app and report maker. You provide visualizations for two departments in an organization.
Each department requires department-specific visualizations:

Department	Requirement
Department1	Provide unstructured answers to free text survey questions.
Department2	Chart real-time data in columns that groups complaints by category, urgency, and status.

You need to create the visualizations.
Which chart type should you use? To answer, drag the appropriate chart type to the correct requirements. Each chart type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Chart types

Multi-series
Tag
Stacked column

Requirement	Chart type
Unstructured answers to free text survey questions.	
Real-time column chart that groups complaints by category, urgency, and status.	

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Tag
Box 2: Multi-series
Multi-series charts: Charts that display data with multiple series values mapped to a single category value.

NEW QUESTION 25
- (Topic 4)
You create a dashboard in Power BI. You share the dashboard with the sales team. Sales team members report that they can see information for the entire company. You need to ensure that the team is able to see only data for their team.
Where must you configure this restriction?

A. Dashboard
B. Report
C. Dataset
D. Settings

Answer: C

Explanation:
Restrict access to the dataset.
Note: Another way of setting access is through manage permission in the dashboard, report, or dataset. If you share a dashboard, by default the report and the dataset will also be shared as read-only for users.
Reference:
https://radacad.com/dashboard-sharing-and-manage-permissions-in-power-bi-simple-but- useful

NEW QUESTION 30
HOTSPOT - (Topic 4)
A company uses a model-driven app. You create a Power BI sales report.
The executive of the company wants all users to see tiles from the report in the model- driven app.
You need to ensure all users can see the tiles.
What should you do? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Step	Setting
Allow addition of Power BI visualization tiles.	Power Platform Environment settings / Power Apps settings / Power BI Service settings / Power BI Desktop settings
Add tiles to a dashboard.	Create a personal dashboard / Create a Power BI dashboard. / Create a system dashboard.
Allow users to view tiles.	Share tile and share dashboard. / Share report and share dashboard. / Share tile and publish dashboard. / Share report and publish dashboard.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Power Platform Environment settings
Before users can embed Power BI visualizations on personal dashboards, the organization-wide setting must be enabled.
? In the Power Platform admin center, select an environment.
? Select Settings > Product > Features.
? Under Embedded content set Power BI visualization embedding to On to enable or Off to disable.
? Select Save.
Box 2: Create a personal dashboard
You can embed Power BI tiles on your personal dashboard.
? Open your app and go to Dashboards.
? Select an existing personal dashboard or select New to create one.
? On the dashboard, select an area where you want the tile to appear, and then select Power BI Tile on the toolbar.
? Add new Power BI tile.
? In the Power BI Tile dialog, select the workspace and then select the Power BI tile that you want to display on your dashboard. Select Enable for mobile if you want to make the tile available for Dynamics 365 for tablets and Dynamics 365 for phones.
? Select another area of the dashboard and repeat this step to add another Power BI tile, or other component, such as a chart or list, to your dashboard.
? Select Save to save your dashboard.

Box 3: Share report and share dashboard.
To share your personal dashboard that contains Power BI visualizations you must
same credentials and appropriate level of access in both services. To share your personal dashboard in your app, go to Dashboards. In the list of dashboards, select the personal dashboard you want, and then select SHARE DASHBOARD.

NEW QUESTION 34
- (Topic 4)
A company receives its marketing campaign performance report as a Microsoft Excel file. The company stores the file in Microsoft SharePoint.
A user updates the Excel file daily with updated data.
The company needs a solution that automatically displays the latest analytics.
You need to create a basic report that contains pie charts that display the most profitable channels.
You need to propose the right solution.
Solution: Model-driven application using native charts. Does the solution meet the goal?

A. Yes

Answer: B

NEW QUESTION 35
- (Topic 4)
You create an app with multiple screens.
Test users report that the size and type of gallery displayed on each screen are different. You must improve the consistency for the app screens.
You need to create a reusable gallery that displays information based on the current record.
Which three actions should you perform?
NOTE: Each correct selection is worth one point.

A. Add a gallery control
B. Add an input property
C. Create a component
D. Create a form
E. Add a screen
F. Add an output property

Answer: ABC

Explanation:
Reference:
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/add-gallery https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/create-component

NEW QUESTION 40
DRAG DROP - (Topic 4)
DRAG DROP
A company is creating Power Apps apps for their customer service team.
You must create a final released solution to export to their test environment that cannot be changed in the new environment.
You need to determine the types of solutions to use.
Which type of solution should you use? To answer, drag the appropriate solution types to the correct conditions. Each solution type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Unmanaged
Unmanaged solutions are used in development environments while you make changes to your application.
Box 2: Managed
Managed solutions are used to deploy to any environment that isn't a development environment for that solution.

NEW QUESTION 44
- (Topic 4)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You build a canvas app for a manufacturing company. The company receives parts and materials from many vendors. You create a form to collect information from packing slips.
Receivers must be able to take a picture of packing slips to receive materials instead of manually entering data in the app.

You need to ensure that users can scan packing slip information into the form. Proposed solution: Use a Category classification model.
Does the solution meet the goal?

A. Yes
B. No

Answer: B

Explanation:
A Category classification model categorizes text by its meaning. Reference:
https://knowledgefrommanish.com/powerplatform/ai-builder-entity-extraction-ai-model/

NEW QUESTION 45
DRAG DROP - (Topic 4)
DRAG DROP
A company uses Microsoft Power Platform. Users create charts based on specific needs in
You create a solution in a development environment. You rebuild personal charts of the users inside the solution. All charts must appear on one page.
You need to create a single page that includes all charts without switching to classic. Which three steps should you perform in sequence? To answer, move the appropriate
actions from the list of actions to the answer area and arrange them in the correct order.

A. Mastered
B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 47
HOTSPOT - (Topic 4)
HOTSPOT
A company uses Power Apps. The company has a model-driven app that accesses a Microsoft Dataverse table. The app is shared with all users who all have the Basic User security role.
You must prevent the users from running and sharing the app.
What should you do? To answer, select the appropriate options in the answer area NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 49
DRAG DROP - (Topic 4)
DRAG DROP
A commercial bakery uses an inventory system to track ingredients consumed in their production line. The workers use iPads to interact with the system and reserve the ingredients for the next batch. Data from the system is extracted as a .csv file.
You need to create a Power BI report from the extracted data by using only an iPad. Which five actions should you perform in sequence? To answer, move the appropriate
actions from the list of actions to the answer area and arrange them in the correct order.

A. Mastered
B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 54
- (Topic 4)
A company receives its marketing campaign performance report as a Microsoft Excel file. The company stores the file in Microsoft SharePoint.
A user updates the Excel file daily with updated data.
The company needs a solution that automatically displays the latest analytics.
You need to create a basic report that contains pie charts that display the most profitable channels.
You need to propose the right solution.
Solution: Microsoft Power Apps canvas app having an Excel file imported into the app and Pie chart control.
Does the solution meet the goal?

A. Yes
B. No

Answer: A

NEW QUESTION 56
DRAG DROP - (Topic 4)
You are designing a data model for a new app. The app will be supported by two tables. TableA will contain data that is unique to your industry. TableB will provide access to readonly data from an Azure SQL database.
You need to configure the tables.
Which table type should you use? To answer, drag the appropriate table types to the correct tables. Each table type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 59
HOTSPOT - (Topic 4)
A company uses Microsoft Dataverse to store holiday employee request data.

An HR manager needs a report that displays overview information about the employee requests.
You need to design a report that visualizes request data over time and type.
Which Microsoft Power BI functionalities should you use to complete each step? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer Area

Step	Functionality
Create additional relationships between tables	Model view ▼
	Model view
	Data view
	Report view
Change the data type of a column	Data view ▼
	Model view
	Data view
	Report view
Design visuals	Report view ▼
	Model view
	Data view
	Report view
Choose data for import	Navigator ▼
	Data view
	Report view
	Navigator

A. Mastered
B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 62
DRAG DROP - (Topic 4)
A company is building multiple Power Apps apps to support a mobile sales team. The apps must all share a common control that has custom properties.
You need to create a solution for the apps.
Which objects should you use? To answer, drag the appropriate objects to the correct to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Objects	Requirement	Object
Entity	Reuse the custom control for multiple canvas apps.	
Component		
Component library	Receive input data through a custom property.	
Component framework		

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Component library
Components are reusable building blocks for canvas apps so that app makers can create custom controls to use inside an app, or across apps using a component library. Components can use advanced features such as custom properties and enable complex capabilities.
By creating a component library, app makers easily share and update one or more components with other makers.
Component libraries are containers of component definitions that make it easy to: Discover and search components.
Publish updates.
Notify app makers of available component updates.
Box 2: Component
A component can receive input values and emit data if you create one or more custom properties.

NEW QUESTION 67
- (Topic 4)
A company has hundreds of warehouses. You are developing an app for the shipping department at the company. The app must be able to provide the warehouse address for shipments. You need to create the warehouse field on the app form. Which field type should you use?

A. Lookup
B. Choice
C. Choices
D. Text

Answer: A

NEW QUESTION 72
- (Topic 4)
A company plans to roll out several Power Apps apps to multiple business units across international operations.
The apps must be managed through an application lifecycle management (ALM) solution to provide a consistent and predictable use experience. All changes to the app must be traceable and documented in a single location. You must be able to revert to a previous version of an app. The app release cycles must be as streamlined as possible.
You need to create an application for the apps.
Which two tools should you use? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.

A. Microsoft Azure DevOps
B. Microsoft Visual Studio
C. Lifecycle Services
D. AppSource
E. Common Data Service

Answer: AD

Explanation:
A: DevOps is the combining of two historically disparate disciplines: software development
and IT operations. The primary goal of DevOps is to shorten the software development lifecycle and provide continuous integration and continuous delivery (CI/CD) with high software quality. You can use Power Apps build tools to automate common build and deployment tasks related to Power Apps if your DevOps platform is Azure DevOps.
D: Microsoft AppSource is now embedded in the Dynamics 365 home page and throughout the common navigation. It now includes a private gallery of apps available to you within your company. Select Get more apps from the home page or task pane, and navigate to the My Organization tab to see apps that are available to you.
Reference:
https://docs.microsoft.com/en-us/power-platform/alm/devops-build-tools https://docs.microsoft.com/en-us/powerapps/user/app-source

NEW QUESTION 75
HOTSPOT - (Topic 3)
You need to implement the student attendance requirements.
What should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Requirement	Table type or ownership
Cooking class ownership	User owned by instructors ▼
	User owned by students
	User owned by instructors
	User owned by chefs
	Organization owned
Student attendance	Appointment ▼
	Task
	Appointment
	Custom activity
	Recurring appointment

A. Mastered

B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 80
- (Topic 3)
You need to resolve the instructor's issue and ensure that the same issue does not occur again. What should you use?

A. Gallery
B. Combo box
C. Custom component
D. Choices

Answer: D

NEW QUESTION 81
DRAG DROP - (Topic 3)
You need to select a design approach for the required features.
Which app type should you use? To answer, drag the appropriate app types to the correct requirements. Each app type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 82
HOTSPOT - (Topic 2)
You need to resolve the issues found during testing.
Which option should you use? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is /worth one point.

Issue	Option
Testers see all time entries.	Hierarchical security / Security group / Security role
Testers are able to edit existing time entries.	Control property / Field-level security / Security role
Managers cannot see required information.	Access team template / Field-level security / Hierarchical security

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Graphical user interface, text, application, email Description automatically generated
Box 1: Security role
Scenario: Employees must only be able to access their own time tracking records from the app.
Testers report that they can see time entries in the Time Tracker app, not just their own.
Box 2: Field-level security
Scenario: Employees must only be able to modify time records for the current and previous day.
Testers report that they can edit any existing time entries.
Box 3: Hierarchical security
You use field security tables to apply field-level security, which restricts field access to specified users and teams.

NEW QUESTION 87
- (Topic 2)
You need to connect to the data source for the Job Setup app. What should you do?

A. Configure a scheduled synchronization with the Common Data Service database
B. Configure SQL Server database permissions
C. Create a stored procedure that retrieves time records for a specific employee
D. Configure an on-premises data gateway

Answer: D

Explanation:
Scenario: The Job Setup entity must store its data in the existing on-premises SQL Server instance.
The on-premises data gateway acts as a bridge to provide quick and secure data transfer between onpremises data (data that isn't in the cloud) and several Microsoft cloud services. These cloud services include Power BI, Power Apps, Power Automate, Azure Analysis Services, and Azure Logic Apps. By using a gateway, organizations can keep databases and other data sources on their on-premises networks, yet securely use that on-premises data in cloud services.
Reference:
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/gateway-reference

NEW QUESTION 88
- (Topic 2)
You need to implement the change requested by the operations manager. Which control should you use?
BF70D5D

A. Camera
B. Shape
C. Add picture
D. Image

Answer: D

Explanation:
Scenario: The operations manager asks that the time tracking app display the employee's photo once they have scanned their badge.
Image control in Power Apps is a control that shows an image from, for example, a local file or a data source.
Reference:
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/controls/control-image

NEW QUESTION 89
- (Topic 1)
You need to resolve the issue for User1.
What should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Option
Submit a status report.	▼
	Dynamics 365 mobile app
	Power Apps Studio
	Power Apps mobile app
	Azure mobile app
Edit an existing status report.	▼
	Azure SQL Database
	Connector
	SQL Lite DB
	Collections

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Graphical user interface, text, application Description automatically generated
Box 1: Power Apps mobile app Scenario:
User1 often works in a warehouse that does not have internet connectivity. User1 needs to edit an existing status report and submit a new status report.
The app must be able to run both online and offline. If the mobile device on which the app runs is connected to the internet, the app must immediately submit the status report.
You can build offline capabilities in your PowerApps app so your app users can access some data or save some data even when they don't have an internet connection.
Box 2: Connector
Scenario: Azure SQL Database is used to store other data
Use the SQL Server connector to connect to SQL Server, in either Azure or an on- premises database, so that you can manage your data with create, read, update, and delete operations.

NEW QUESTION 90
- (Topic 1)
You publish the first version of the app and solution on November 1, 2020. You need to create the version numbers for the app and the solution.
Which version numbers should you use? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Versions

Version 1
1.0.0.0
1.20.11.1
20.11.1.1

Answer Area

Object	Version
Solution	Version
App	Version

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: 1.0.0.0
When identifying versions of the app solution, all dependencies, entities, and user interfaces components must be identified to avoid any unintentional issues caused by reverting individual components to a previous version.
A solution's version has the following format: major.minor.build.revision. An update must have a higher major, minor, build or revision number than the parent solution. For example, for a base solution version 3.1.5.7, a small update could be a version 3.1.5.8 or a slightly more signficant update could have version 3.1.7.0. A substantially more significant update could be version 3.2.0.0.
Box 2: 20.11.1.1
Scenario:
? You must use the following version control numbering scheme:
- Major: The last two digits of the year the app is packaged
- Minor: Two digits that represent the month when the app is packaged

- Build: A number that is incremented to represent significant changes to the app
- Revision: The incremented revision for a package
New versions of the application must completely replace previous versions of the app.

NEW QUESTION 91
- (Topic 1)
You need to configure functionality for submitting status reports. What should you do?

A. Determine whether the application is offline when a user selects submit button and call the Sec () function.
B. Determine whether the application is offline when the app load
C. Use the SaveDaca () function in the OnSelect property.
D. Determine whether the application is offline when a user selects the submit button and call the SaveDaca () function.
E. Determine whether the application is offline when the app load
F. Use the LoadDaca () function in the Submit button.

Answer: C

Explanation:
Scenario: The app must be able to run both online and offline. If the mobile device on which the app runs is connected to the internet, the app must immediately submit the status report.
When data is submitted offline, the data must be stored in the app until the app is back online.
Mobile users often need to be productive even when they have limited or no connectivity. LoadData and SaveData combine to form a simple mechanism to store small amounts of data on a local device. By using these functions, you can add simple offline capabilities to your app.
The SaveData function stores a collection for later use under a name.
The LoadData function reloads a collection by name that was previously saved with SaveData. You can't use this function to load a collection from another source.
Reference:
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function-

NEW QUESTION 92
- (Topic 1)
You need to provide the app to Tailwind Traders. What should you do?

A. Within Managed Properties, set the value of the Allow customizations option to tru
B. Export the app as a managed solution.
C. Use the Share App feature.
D. Within Managed Properties, set the value of the Allow customizations option to fals
E. Export the app as a managed solution.
F. Within Managed Properties, set the value of the Allow customizations option to fals
G. Export the app as an unmanaged solution.

Answer: C

Explanation:
Scenario: The completed app and all supporting components must be provided to Tailwind Traders. Tailwind Traders must not be able to make changes to any of the components.
Managed Solution: A managed solution is a finalized solution that can be distributed and installed. They are created by exporting an unmanaged solution by setting restrictions to prevent any further customizations. The whole point of Managed is locking down the Component states so they cannot be edited. Deleting the Managed Solution will remove all its customisations as well as data contained. Managed Solutions become read only once deployed so they cannot be manipulated.
Reference:
https://powerusers.microsoft.com/t5/Power-Apps-Pro-Dev-ISV/Managed-vs-Unmanaged/td-p/495685

NEW QUESTION 96
- (Topic 4)
A company is consolidating communications processes by using Microsoft Teams and Microsoft Power Platform technologies.
A Power Automate flow monitors social media channels to identify high-impact trends. When the Power Automate flow identifies the trends, consistently formatted and
standardized feedback must be collected from the channel members within Teams.
You need to streamline the Power Automate and Teams communication process.
What should you use?

A. AI Builder
B. Common Data Service business process flows
C. Adaptive cards
D. Integrated approval flows

Answer: A

Explanation:
"Microsoft Power Platform and AI Builder components allowed us to quickly deliver an innovative and well-integrated solution within our Dynamics 365 platform for our marketing and sales business partners. The platform is a game-changer in this new world of rapid app delivery."
Jim Parker: Web and Collaboration Services Manager
Reference:
https://customers.microsoft.com/en-au/story/810656-hexion-manufacturing-power-platform

NEW QUESTION 100
- (Topic 4)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are creating a canvas app that displays a list of accounts. Users must be able to select an account and view details for the account. The app must include a feature that brings the user back to the list of accounts.

You add a blank screen named Screen_Accounts and add a gallery named and add another blank screen named Screen_AccountDetail.

You need to complete the app. Solution:

? Add an edit form to Screen_AccountDetail and set the Default Mode of the form to View.
? Set the OnSelect property of Gallery_Accounts to Navigate(Screen_AccountDetail).
? Set the data source of the form to Accounts.
? Set the Item property of the form to Selected.
? Add a back icon on Screen_AccountDetail and set its OnSelect property to Navigate(Screen_Accounts).

Does the solution meet the goal?

A. Yes
B. No

Answer: A

Explanation:

View, edit, or create an item, save the contents, and reset the controls in an Edit form control.
FormMode.View: The form is populated with an existing record but the user cannot modify the values of the fields.
This function is often invoked from the OnSelect formula of a Button or Image control.
Reference:
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function-form

NEW QUESTION 101

- (Topic 4)
You need to set the value for a global variable named RunningTotal to 5 and navigate to the previous screen named MainScreen.
Which formula should you use?

A. UpdateContext({ RunningTotal: 5 }); Navigate(MainScreen, ScreenTransition.Cover, RunningTotal);
B. If(Value(TextBox1.Text) >= 0, (Set(RunningTotal, 5); Back();), Color.Green)
C. UpdateContext({ RunningTotal:5 }); Back()
D. Set(RunningTotal, 5); Back();

Answer: D

Explanation:

You set the value of the global variable with the Set function. Set(MyVar, 1) sets the global variable MyVar to a value of 1.
Use the Back and Navigate function to change which screen is displayed. Reference:
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/working-with-variables
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function- navigate

NEW QUESTION 104

- (Topic 4)
A company uses Microsoft Power Platform. You create a solution with components You deploy the solution in the production environment Users report issues with a process. You open the last imported solution. You need to troubleshoot the issue. What should you view?

A. Solution dependencies
B. Solution classic view
C. History

Answer: D

NEW QUESTION 106

HOTSPOT - (Topic 4)
A company creates a Power Apps app that allows service representatives to record information about on-site client visits. Service representatives perform a one-hour site visit with each client each quarter.
Service representatives use the app to perform the following activities:
? View their scheduled visits for the day.
? Record notes from service visits.
? Schedule service technicians for issues uncovered during site visits.
? Scan and upload service quote forms to a folder named Service Quote folder on
Microsoft OneDrive once the customer has signed a service quote.
Service quotes that are over $10,000 are aut omatically sent to the service manager for review and approval.
Visits that are not closed at the end of the day are automatically moved to the following day unless it is the last day of the quarter. All client visits not performed for the quarter are escalated to the service manager for follow-up.
You need to create flows to meet the requirements.
Which type of flows should you use? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Requirement	Type of flow
Move client visits not completed for the day.	▼ Scheduled flow Automated flow Adaptive card flow Team flow
Approve service quote.	▼ Automated flow Button flow Scheduled flow Team flow

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Adaptive card flow
Adaptive Cards are a platform-agnostic method of sharing and displaying blocks of information without the complexity of customizing CSS or HTML to render them.
Directing content to Teams channels:
Post your own adaptive card as the Flow bot to a channel
This action posts an adaptive card as a Flow bot to a specific Teams channel. In this case, you will be prompted for Teams instance, and a channel where the card will be posted. The flow-maker will have to have access to the Teams instance in order to post an adaptive card there. In this case, only URL buttons function by redirecting to the URL configured within the flow.
Box 2: Button flow
Create a button flow to run routine tasks by simply tapping a button. Customize your flow by allowing the user to provide specific details that will be used when the flow runs.

NEW QUESTION 110
DRAG DROP - (Topic 4)
A company stores sales orders in a Microsoft Excel workbook. The company stores customer data in a SQL Server database.
You must import the data into a Microsoft Dataverse instance. You need to define the mapping for the migration.
Which component should you use? To answer, drag the appropriate components to the correct data type. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Components
Column
Table
Row
Data source

Answer Area

Data	Component
Excel data	Component
Customer data	Component
Customer identifier	Component
Product data	Component

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Table
Box 2: Data source Box 3: Column
Box 4: Row

NEW QUESTION 112
HOTSPOT - (Topic 4)
The managers in an organization use a model-driven app. The app should display only one dashboard named Corporate Data.
The managers observe that several dashboards are displayed.
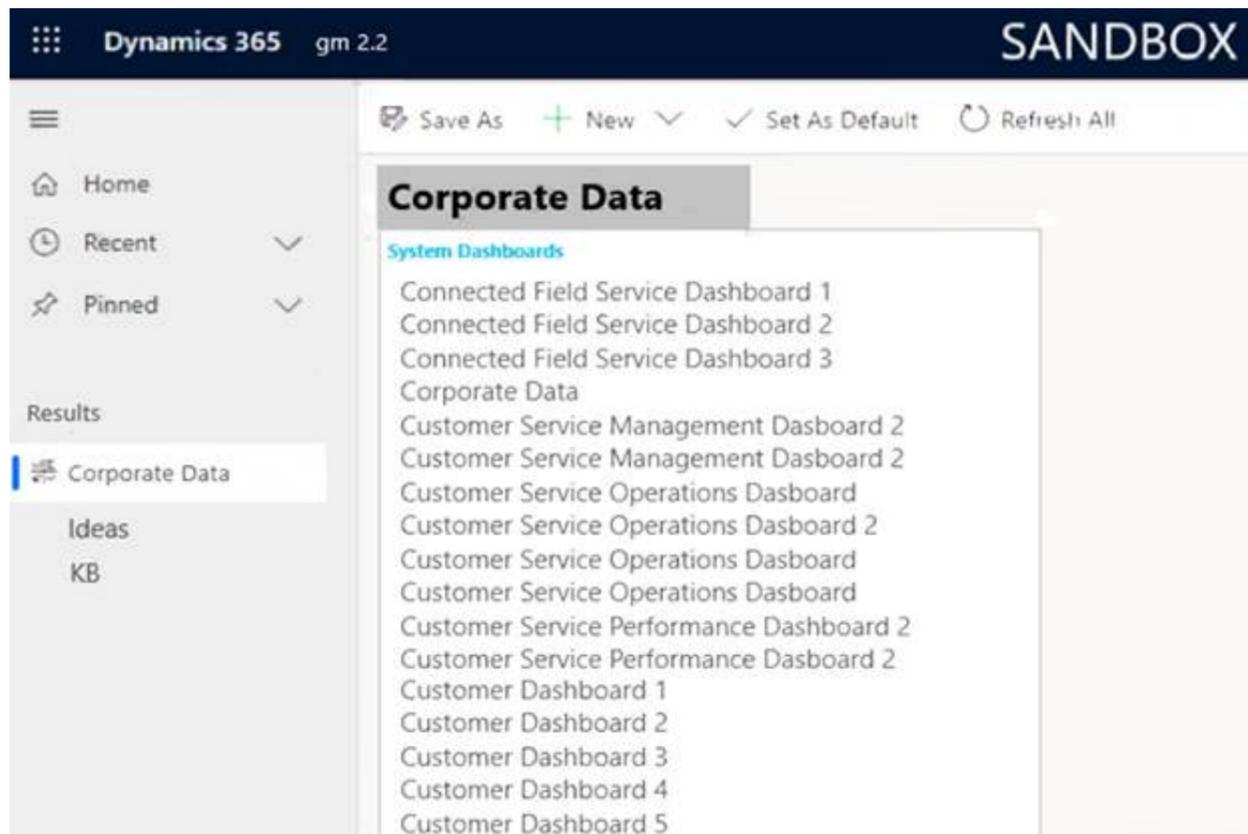

Use the drop-down menus to select the answer choice that answers each question based on the information presented in the graphic.
NOTE: Each correct selection is worth one point.

How do you remove all the dashboards from the list of dashboards displayed? ▼

| Open the model-driven app in the app designer and clear all dashboard check boxes except the Corporate Data dashboard. |
| Open the site map in the sitemap designer and clear all dashboard check boxes except the Corporate Data subarea except for the Corporate Data dashboard. |
| Open the solution and delete all dashboards from the solution except for the Corporate Data dashboard. |

You need to remove the Ideas dashboard from the navigation bar. What should you do? ▼

| Open the model-driven app in the app designer and clear the check box for the ideas dashboard |
| Open the site map in the sitemap designer and delete the Ideas dashboard from the Results group |
| Open the solutions and delete all the Ideas dashboards from the solution |

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Table
Description automatically generated
Box 1: Open the model-driven app in the app designer.
* 1. On the app designer canvas, select the Dashboards tile.
On the app designer canvas, the right pane shows dashboards that are available in the default solution.
* 2. Clearing the corresponding check box.
Box 2: Open the site map in the sitemap designer and delete the Ideas dashboard from the Results group
Site maps define the manner by which users move between tables in a model-driven app.

NEW QUESTION 113
- (Topic 4)
A company uses Microsoft Power Apps.
You need to create a canvas app to display a Microsoft Power BI report. The report must use the context of a selected record in the app. Data in a Power BI control must be filtered to display the context of the selected record.
You need to propose the right solution.
Solution: Add Power Apps to Power BI using Power Apps for Power BI visualization. Does the solution meet the goal?

A. Yes
B. No

Answer: A

NEW QUESTION 115
DRAG DROP - (Topic 4)
A call center manager monitors incoming phone calls. The manager analyzes the performance of phone reps by using a custom view. The view contains a custom field named Phone call Duration in Minutes.
The call center manager must present an Excel spreadsheet daily to upper management. The spreadsheet must contain the call center performance for further trending analysis and corrective actions.
You need to create the spreadsheet.
Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions   **Answer Area**

| Create a pivot table, and then use the Phone call Duration in Minutes field as a category area and the Rep field as a series |

| Create a pivot table, and then use the Phone Rep field as a category and the Phone call Duration in Minutes field as a series |

| Set the formula for phone call duration in minutes to Average and add a pie chart linked the pivot table |

| Export the custom view to an Excel dynamic spreadsheet |

| Export the custom view to an Excel dynamic pivot table |

| Save the spreadsheet and upload it back to the system |

| Export the custom view to an Excel template |

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Timeline
Description automatically generated with low confidence
Step 1: Export the custom view to an Excel dynamic pivot table
You can export app data to an Office Excel PivotTable to see patterns and trends in data. An Excel PivotTable is a great way to summarize, analyze, explore, and present your app data.
Step 2: Create a pivot table, and then use the Phone Rep field as a category and the Phone call Duration in Minutes as field as series
Step 3: Set the formula for phone call duration in minutes to Average and add a pie chart linked to the pivot table
Step 4: Save the spreadsheet and upload it back to the system.

NEW QUESTION 117
- (Topic 4)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You are developing a model-driven app that uses a Common Data Service database. App users will have a variety of different security roles.
Development and testing must be performed using production data. Multiple testers must be used at each testing stage.
You need to provision and configure new environments for development and testing. Solution:
? Provision sandbox environments named S1 and S2.
? Copy the production environment to both S1 and S2.
? Use S1 for development and S2 for testing.
Does the solution meet the goal?

A. Yes
B. No

Answer: A

Explanation:
A sandbox environment is any non-production environment of Microsoft Dataverse. Isolated from production, a sandbox environment is the place to safely develop and test application changes with low risk.
Reference:
https://docs.microsoft.com/en-us/power-platform/admin/environments-overview

NEW QUESTION 118
- (Topic 4)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You build a canvas app for a manufacturing company. The company receives parts and materials from many vendors. You create a form to collect information from packing slips.
Receivers must be able to take a picture of packing slips to receive materials instead of manually entering data in the app.
You need to ensure that users can scan packing slip information into the form. Proposed solution: Use an Entity Extraction model.
Does the solution meet the goal?

A. Yes
B. No

Answer: B

Explanation:

AI Builder entity extraction models recognize specific data in the text that you target based on your business needs.
The model identifies key elements in the text and then classifies them into predefined categories. This can help you transform unstructured data into structured data that's machine-readable. You can then apply processing to retrieve information, extract facts, and answer questions.
Note: Create a canvas app and add the text recognizer AI Builder component to your screen. This component takes a photo or loads an image from the local device, and then processes it to detect and extract text based on the text recognition prebuilt model. If it detects text in the image, the component outputs the text and identifies the instances by showing a rectangle for each instance in the image.
Reference:
https://knowledgefrommanish.com/powerplatform/ai-builder-entity-extraction-ai-model/
https://docs.microsoft.com/en-us/ai-builder/prebuilt-text-recognizer-component-in- powerapps

NEW QUESTION 123
- (Topic 4)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
A company is deploying Microsoft Power Platform components to streamline a job candidate screening process.
The human resources (HR) representatives of the company plan to attend school career fairs. The HR representatives must qualify and enter potential job candidates into a Power Apps app. The HR representatives must enter the following information for each candidate:

Field name	Data type	Criteria for follow up
Name	Text	No
Degree	Text	Yes
First available hire date	Date	Yes
Initial impression	Integer 0-10	Yes
Resume	Picture	No
Not currently viable	Boolean	Yes
Follow up	Boolean	NA

If a candidate is currently unqualified for a job position but would eventually qualify based on follow-up criteria, the follow-up checkbox must be selected or cleared in the system immediately.
The company plans to create a similar Power Apps app that will contain the same business use case, but for internal employees and promotions.
You need to create a Power Apps app solution to automatically mark the candidate for follow up.
Proposed solution: Create a business rule on the appropriate data entity with a scope of entity.
Does the solution meet the goal?

A. Yes
B. No

Answer: B

Explanation:
Instead use Common Data Service workflow with a PowerQuery on the data entity.
Note: Process (Workflow) table/entity reference is a set of logical rules that define the steps necessary to automate a specific business process, task, or set of actions to be performed. Common Data Service workflow support: Filter triggers based on which attributes change - You can control which field changes trigger your automated flows. For example, trigger your flow only when the status field changes while ignoring all other fields that may change.
Reference:
https://docs.microsoft.com/en-us/business-applications-release-notes/april19/microsoft-

NEW QUESTION 127
- (Topic 4)
You create a custom table as part of a solution in the development environment. You deploy major version solutions as managed solutions to production. The organization does not allow new solutions to be created in the production environment.
When a minor update is made to a column length, users cannot enter entire values. You need to allow users to enter entire values in the column.
Solution: Update the column length in the production environment. Does the solution meet the goal?

A. Yes
B. No

Answer: B

NEW QUESTION 132
DRAG DROP - (Topic 4)
You create the following apps for a company that provides financial guidance services: a model-driven app for financial advisers that work in the company's offices and a canvas app for remote financial advisers.
You need to create business rules for a custom counselling entity used by all financial advisers.
Who will be affected by the business rules?
To answer, drag the appropriate financial adviser types to the correct business rules. Each financial adviser type may be used once, more than once, or not at all. You may need to drag the split bat between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Financial adviser types	Answer Area	
Office-based financial advisers only	**Business rule**	**Financial adviser type**
Remote financial advisers only	Set a field value with the scope set to Entity	Financial adviser type
Office-based and remote financial advisers	Clear a field value with the scope set to All Forms	Financial adviser type
	Set visibility of a field with the scope set to Entity	Financial adviser type

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Office-based and remote financial advisers
Model driven apps can use all actions available on business rules, however not all business rule actions are available for canvas apps at this time.
Box 2: Office-based financial advisers only
If you're building a Canvas app, you must use table as the scope (not All forms, not a specific form)
Box 3: Office-based financial advisers only
The following actions are not available on Canvas apps :
Show or hide columns Enable or disable columns
Create business recommendations based on business intelligence.

NEW QUESTION 137
DRAG DROP - (Topic 4)
DRAG DROP
You are creating a model-driven app.
You must create new components to ensure data from related records can be displayed on a record form.
You need to select the component types.
Which component types should you use? To answer, drag the appropriate component types to the correct data. Each component type may be used once, more than once, or not at all. You may need to drag the spirt bar between panes or scroll to view/ content.
NOTE: Each correct selection is worth one point.

Component types	Answer Area		
Card form		**Data**	**Component type**
System view		Columns from a single record found in a lookup	
Public view		List of related records	
Quick view form			

A. Mastered
B. Not Mastered

Answer: A

Explanation:

Component types	Answer Area		
Card form		**Data**	**Component type**
System view		Columns from a single record found in a lookup	System view
Public view		List of related records	Public view
Quick view form			

NEW QUESTION 139
HOTSPOT - (Topic 4)
A company uses two SQL Server environments and two Common Data Service environments.
The company policy states that only specific administrators can create environments. SQL Server and Common Data Service groups must be distinct.
You need to assign security access.
What should you assign? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Role	Security access
Admin users for SQL environments	Environment Maker / Environment Admin / System Administrator and Environment Security group / Power Platform Administrator and Environment Security group
Admin users for Common Data Service environments	Environment Maker / Environment Admin / Global Administrator / System Administrator
Users that create Common Data Service apps	System Customizer / Environment Maker / Environment Admin / System Administrator
Users that create SQL apps	System Customizer / Environment Maker / Environment Admin / System Administrator

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: System Administrator and Environment Security group Security model for the databases
When a database is created, the users who have environment roles assigned to them, will continue to maintain those privileges.
Users with Environment Admin role are now assigned to System Administrator role. Users with Environment Maker continue to possess the same role.
Box 2: Environment Admin
TheEnvironment Adminrole can perform all administrative actions on an environment, including the following:
? Add or remove a user from either the Environment Admin or Environment Maker role.
Box 3: Environment Maker
Environment Maker: Can create new resources associated with an environment, including apps, connections, custom APIs, gateways, and flows using Microsoft Power Automate. However, this role doesn't have any privileges to access data within an environment. More information:
Box 4: System Customizer
System Customizer: Has full permission to customize the environment. However, users with this role can only view records for environment entities that they create.

NEW QUESTION 143
- (Topic 4)
A company has ten sales regions. Each salesperson is assigned to one region. You create a set of five standard views that all salespeople will use.
Sales users only want to see information for their own region. Sales users must call sales
leads within a week of receiving a lead.
You need to recommend a solution for sales users.
Which two actions will you recommend? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

A. Instruct users to create personal views that filter by region.
B. Instruct users to filter the view by region.
C. Configure the definition for each view to sort by region.
D. Configure the definition for each view to filter by region.

Answer: BD

NEW QUESTION 147
HOTSPOT - (Topic 4)
You create a Power Automate cloud flow that runs when a user creates a Microsoft Dataverse lead record.
The cloud flow must update a custom score column on the lead record based on other column values. The flow must perform the following activities:
• Update the Microsoft Dataverse record.
• Evaluate whether the Microsoft Dataverse record should be updated. You need to configure the flow components.
Which components should you use? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer Area

Requirement	Component
Update the Microsoft Dataverse record.	Action ▼ **Action** Trigger Function
Evaluate whether the Microsoft Dataverse record should be updated.	Condition ▼ Action **Condition** Data operation

A. Mastered
B. Not Mastered

Answer: A

Explanation:

Answer Area

Requirement	Component
Update the Microsoft Dataverse record.	Action ▼
Evaluate whether the Microsoft Dataverse record should be updated.	Condition ▼

NEW QUESTION 149
HOTSPOT - (Topic 4)
A production line app maker at a manufacturing company creates a canvas app that looks for available inventory in a SQL database. The production line workers use the inventory app across all work centers.
The production line workers report the following app issues from the shop floor:
? The app reports a delegation warning.
? Voice command functionality is unreliable.
You have minimal information about the issues. You are not allowed to enter the production facility.
You need to troubleshoot the issues.
How should you troubleshoot the issues? To answer, select the appropriate options in the answer area.

Issue	Action
The app reports a delegation warning.	▼ Use the LookUp function Check the number of items in the collection Check the number of dataset items
Voice command functionality is unreliable.	▼ Use the App checker/Runtime feature Use the Advanced Tools/Monitor feature Use the App checker/Accessibility feature Use Advanced Tools/Performance feature

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Check the number of items in the collection
If the data in your data source exceeds 500 records and a function can't be delegated, Power Apps might not be able to retrieve all of the data, and your app may have wrong results.
Note: Delegation is where the expressiveness of Power Apps formulas meets the need to minimize data moving over the network. In short, Power Apps will delegate the processing of data to the data source, rather than moving the data to the app for processing locally.
Box 2: Use the Advanced Tools/Monitor feature
Monitor is available by default for all canvas apps. Using Monitor, you can trace events as they occur in a canvas app during the authoring experience in Power Apps Studio, or you can use Monitor to debug the published version of a canvas app.
Example: Consider the scenario where an app has been deployed, and the initial version of the app experiences performance degradation. The app also intermittently generates errors with no clear pattern. Loading data in the app succeeds most of the time, but fails sometimes.
When you check Monitor, you see data operations as expected. However, you also see several responses that have HTTP status code 429, indicating that there have been too many requests in a specific timeframe.

NEW QUESTION 154
DRAG DROP - (Topic 4)
DRAG DROP
You develop Microsoft Power Platform solutions for Contoso, Ltd You create a Power Virtual Agents chatbot in a Microsoft Teams team.
You need to make the chatbot available to all users in your organization.
Which three actions should you perform in sequence? To answer, move all actions from the list of actions to the answer area and arrange them m the correct

order.

A. Mastered
B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 156
DRAG DROP - (Topic 4)
You are designing a canvas app.
You need to select user interface controls to include in the app.
Which control should you use? To answer, drag the appropriate controls to the correct requirements. Each control may be used once, more than once, or not at all.
You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: List box
A List Box control always shows all available choices (unlike a Drop down control) and in which the user can choose more than one item at a time (unlike a Radio control).
Box 2: Combo box
A Combo box control allows you to search for items you will select. The search is performed server-side on the SearchField property so performance is not affected by large data sources.
Single or multi-select mode is configured via the SelectMultiple property.
When searching for items to select, for each item you can choose to show a single data value, two values, or a picture and two values (Person) by modifying the Layout settings in the Data pane.

NEW QUESTION 161
DRAG DROP - (Topic 4)
You are creating entities in a Common Data Service database to capture sales data. You create an entity named Sales that includes the following fields:

Field	Description
SalesPerson	The name of the salesperson who made the sale
Quantity	The number of units sold
Rate	The sale price per unit
GrossAmount	A value obtained by multiplaying the Quantity times the Rate. This value is for display purposes only
DiscountAmount	An amount that a salesperson enters into the app to discount a sale
NetAmount	A value obtained by subtracting the DiscountAmount from the GrossAmount

You create a new entity that includes a field named TotalSales. The field is used to capture the aggregated sales for each salesperson.
You need to configure the fields for the entities.
Which field types should you use? To answer, drag the appropriate field types to the correct field names. Each field type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Field types

Rollup
Calculated
Simple

Answer Area

Field name	Field type
GrossAmount	Field type
DiscountAmount	Field type
TotalSales	Field type

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Calculated
Calculated columns are calculated in real-time when they are retrieved. Calculated columns can be composed using different data types. For example, an Integer calculated column may reference values from Decimal or Currency columns.
Box 2: Simple
A simple column isn't defined as a calculated or rollup column.
Box 3: Rollup
Because rollup columns persist in the database, they can be used for filtering or sorting just like regular columns.

NEW QUESTION 165
DRAG DROP - (Topic 4)
You use Microsoft Dynamics 365 Sales.
Business processes must use data from multiple applications. You need to implement the correct type of automation.
Which flow type should you use? To answer, drag the appropriate flow types to the correct application types. Each flow type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Flow Types

cloud flow
desktop flow
business process flow

Answer Area

Application Type	Flow Type
Update a record after it was created as part of a sales process	
Extract a list of prices from a competitor's website	

A. Mastered
B. Not Mastered

Answer: A

Explanation:

Flow Types

cloud flow
desktop flow
business process flow

Answer Area

Application Type	Flow Type
Update a record after it was created as part of a sales process	business process flow
Extract a list of prices from a competitor's website	cloud flow

NEW QUESTION 168
- (Topic 4)
A company uses Microsoft Power Apps.
You need to create a canvas app to display a Microsoft Power BI report. The report must use the context of a selected record in the app. Data in a Power BI control must be filtered to display the context of the selected record.
You need to propose the right solution.
Solution: Add a slicer to a Power BI element on the screen where data is selected. Does the solution meet the goal?

A. Yes
B. No

Answer: B

NEW QUESTION 172

- (Topic 4)
A company delivers products to multiple communities. The company creates a canvas app
connected to a Common Data Service database. The app tracks communities to see where
Drivers must enter delivery information on a form that uses an entity named Delivery. Depot staff must enter information on a pick-up form that uses an entity named Pick-up. Each form contains a community field that is based on a shared list across both forms.
You need to create the community field. Which type of field should you create?

A. local option set
B. text
C. global option set
D. text area

Answer: C

Explanation:
Can use a global option set, no need to use localized option sets.
Note: In PowerApps Option set is one of the field types you can use in your Entity. The information type that Option Set stores is a list of text values. And here comes the Option Set advantage – once you define its text values you can centrally managed it. Reference:
https://powerapps.microsoft.com/en-us/blog/option-sets-and-many-to-many-relationships-for-canvas-apps/

NEW QUESTION 174
- (Topic 4)
You create a canvas app that uses the following resources:
• Power Automate cloud flow
• Custom connector
• Microsoft Dataverse customization
• Connection
You need to export the app as a package to move the app to a different environment. Which resource type will be exported with the app?

A. Custom connector
B. Connection
C. Microsoft Dataverse customization
D. Power Automate cloud flow

Answer: D

NEW QUESTION 175
- (Topic 4)
You create a canvas app.
You need to ensure that there are no screen reader issues in the app.
Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

A. Mastered
B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 180
- (Topic 4)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You are creating a canvas app.
You need to automatically detect bicycles in pictures taken with the camera.
Proposed solution:
? Create a Category Classification custom model in AI Builder.
? Train the model with pictures of bicycles and then publish the trained model.
? Add the Object Detector control to your canvas app.

Does the solution meet the goal?

A. Yes
B. No

Answer: B

Explanation:
Instead create an Object Detection custom model Reference:
https://docs.microsoft.com/en-us/ai-builder/prediction-overview https://docs.microsoft.com/en-us/ai-builder/object-detector-component-in-powerapps

NEW QUESTION 184
DRAG DROP - (Topic 4)
You have an existing Power Apps environment.
You need to create a Common Data Service database for the environment.
Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

| Select **Create my database** |
| Configure currency and language settings |
| Configure database collation settings |
| Set the environment type to **Production** |
| Select an existing environment |

Answer Area

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Step 1: Select an existing environment Add a database in the admin center:
* 1. In the admin center, in the left navigation pane, select Environments.
* 2. Select the environment to which you want to add the database.
Step 2: Select Create my database
* 3. Select + Add database
Step 3: Configure currency and language settings
* 4. Enter the following, and then select Add.

Setting	Description
Language	The default language for this environment.
Currency	The base currency used for reporting.
Enable Dynamics 365 apps	Select **Yes** and make a selection to automatically deploy apps such as Dynamics 365 Sales and Dynamics 365 Customer Service.
Deploy sample apps and data	Select **Yes** to include sample apps and data. Sample data gives you something to experiment with as you learn. You must select **No** for **Enable Dynamics 365 apps** for this setting to appear.
Security group	Select a security group to restrict access to this environment.

NEW QUESTION 185
- (Topic 4)
A company is onboarding new workers to the Microsoft Power Platform.
A user reports an access issue with a Power Apps app. The user provides no additional information about the access issue.
You need to troubleshoot the app and data security configurations for the user. Which tool should you use?

A. Azure AD Security review
B. User information page
C. Accessibility checker
D. Run diagnostics

Answer: D

Explanation:
User access diagnostic tool in the Power Platform admin center:
Several factors influence user access in a Microsoft Dataverse environment. To help administrators with diagnosing user access to an environment and reasons for access or no access, the new "Run diagnostics" feature in the Power Platform admin center provides basic access diagnostics for individual users in the environment. The feature helps to detect potential causes to user sign-in and other issues and suggests potential mitigations.
Reference:
https://docs.microsoft.com/en-us/power-platform/admin/troubleshooting-user-needs-read-write-access-organization

NEW QUESTION 190
- (Topic 4)
A company uses data loss prevention (DLP) policies. You have a Power Automate flow that posts Twitter mentions into a Microsoft SharePoint list.
You are not able to activate the flow. You need to troubleshoot the issue.
What are two possible reasons why you cannot activate the flow? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.

A. You are not assigned the Power Platform Admin role.
B. You placed all connectors into the Business group within the DLP policy.
C. You placed all connectors into the Non-Business group within the DLP policy.
D. You are not assigned the Environment Admin role.

Answer: BD

Explanation:
Reference:
https://docs.microsoft.com/en-us/power-platform/admin/wp-data-loss-prevention

NEW QUESTION 194
- (Topic 4)
You are creating an app for a company. You need to evaluate the default solution.
Which two behaviors should you expect from the default solution? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.

A. You can change the prefix of the publisher of the default solution
B. If you create a Power Automate flow in a solution, the flow uses the prefix defined in thepublisherin the publisher
C. You can change the version number of the default solution

Answer: AC

Explanation:
https://docs.microsoft.com/en-us/dynamics365/customerengagement/on-premises/customize/use-solutions-for-your-customizations?view=op-9-1

NEW QUESTION 198
DRAG DROP - (Topic 4)
You have a canvas app that uses multiple inputs for calculations.
You must use Test Studio to create automated tests and confirm that the app works as expected.
You need to organize your test scenarios into a hierarchy.
In which order should you create the objects? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Step 1: Test suites

By default, a test suite and test case are created for you in Test Studio. Test suites are used to organize your test cases. An app can contain one or more test suites.
Step 2: Test cases
Depending on how you want to organize or group your tests, you can create multiple test cases in a test suite. Each case can test a specific feature or a subset of functionalities in your app.
Step 3: Test steps Step 4: Test assertions
A test case consists of test steps that contain actions. Test actions are written using Power
Apps expressions that perform a task. You can use the recorder to automatically generate the test steps as you interact with your app. After you record, you can update the test case, add new steps, delete steps, and write test assertions to validate the result of your test.

NEW QUESTION 203
- (Topic 4)
You are an app maker.
You want to create apps and track customizations as part of the default solution. You need to determine the impact of performing the work in the default solution. What should you conclude?

A. The default solution does not contain all components and customizations from all solutions in the environment.
B. The prefix used when creating components as part of the default solution can be set to a specific value.
C. The default solution cannot be exported and distributed to another environment.

Answer: C

Explanation:
Default Solution. This is a special solution that contains all components in the system. The default solution is useful for discovering all the components and configurations in your system.
Why you shouldn't use the default solutions to manage customizations
There are a few reasons why you shouldn't create apps and make customizations in either of the default solutions:
? The default solution can't be exported; therefore, you can't distribute the default solution to another environment.
The default solution contains all components and customizations from all solutions in the environment.
By default, all enabled users can create apps and customize components in the Common Data Services Default Solution.
It's difficult to locate or identify the customizations you've made in the environment by using either default solution.
When you use either default solution to create components, you'll also use the default publisher assigned to the solution. This often results in the wrong publisher prefix being applied to some components.
Reference:
https://docs.microsoft.com/en-us/power-platform/alm/use-solutions-for-your-customizations

NEW QUESTION 205
DRAG DROP - (Topic 4)
DRAG DROP
A company is migrating to a new Microsoft 365 tenant. You create an expense
You need to move the latest version of the canvas app and cloud flow to the new tenant. Which three actions should you perform in sequence? To answer, move the appropriate
actions from the list of actions to the answer area and arrange them in the correct order.

A. Mastered
B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 206
- (Topic 4)
You have a Power Platform solution that uses Common Data Service. You need to secure all fields that support field-level security.
Which field can you secure?

A. createdon
B. accountid
C. owninguser
D. cr7b_accountid

Answer: D

Explanation:
Which fields can be secured?
Although most attributes can be secured, there are system attributes, such as IDs, timestamps, and record tracking attributes, that can't. Below are a few examples of attributes that can't be enabled for field security.
ownerid, processid, stageid, accountid, contactid createdby, modifiedby, OwningTeam, OwningUser createdon, EntityImage_Timestamp, modifiedon, OnHoldTime, overriddencreatedon statecode, statuscode
Reference:
https://docs.microsoft.com/en-us/power-platform/admin/field-level-security

NEW QUESTION 209
HOTSPOT - (Topic 4)
HOTSPOT
You are designing edit forms to dismay individual records selected from a list m a canvas app.
The control layout must respond to a variety of screen sizes and orientations that demonstrate the following behaviors:
• Automatically resize and arrange controls from top to bottom
• Maintain the original position of the controls.
• Require no additional property changes. You need to select the layout type.
Which layouts should you use? To answer, select the appropriate options in the answer area.

A. Mastered
B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 212
- (Topic 4)
A company is using Power Virtual Agents in Microsoft Teams to expose Microsoft Dataverse data to employees.
You create a chatbot that retrieves a list of customers by postal code from a Dataverse table. The chatbot will accept requests from a user and must connect to Dataverse to retrieve the data.
You need to connect the chatbot to the Dataverse table. What should you use?

A. Table
B. Power Apps
C. Microsoft Teams
D. Power Virtual Agents
E. Power Automate

Answer: C

Explanation:
Dataverse for Teams is the "lite" version of Dataverse. It is a low-code platform designed to build relatively simple (but still powerful) apps, using a user-friendly interface and remaining within Microsoft Teams. This new update means that users now have the possibility to create Power Apps apps, Power Automate flows and Power Virtual Agents bots without leaving the Teams platform.
Reference:
https://docs.microsoft.com/en-us/learn/paths/work-power-platform-teams/
https://docs.microsoft.com/en-us/learn/modules/create-chatbot-power-virtual-agents-dataverse-teams/5-call-action-pull-data

NEW QUESTION 213
- (Topic 4)
You are creating a model-driven app that allows users to create and edit a list of existing accounts.
You need to display a list of all active accounts. Which user interface components should you use?

A. view
B. gallery
C. data table
D. form

Answer: A

Explanation:
Imagine that you have a collection of data (such as a list sales orders, a set of service tickets, or a directory of contacts), and that you want to show this data in your Microsoft PowerApps app in a tabular format, where each column represents a field and each row represents a record. In the past, you might have been able to roughly simulate this visualization, although the process required some effort. However, we've been listening to your requests and are happy to announce that you can now quickly and easily achieve this very typical visualization by using the new Data table control that has been recently added to PowerApps.
Reference:
https://powerapps.microsoft.com/fr-fr/blog/introducing-the-data-table-control/

NEW QUESTION 218
HOTSPOT - (Topic 4)
Rangers in national parks report wildlife they encounter during patrols. The rangers record observations in a notebook when they are on patrol. The rangers manually enter observation data when they are in the office. You are designing an app that allows rangers to record their observations while they are on patrol. The wildlife is modeled as a custom table named Wildlife. The model has relationships to the annotation entity and to a custom entity named Wildlife Details. In the Wildlife Details entity, rangers capture more information as they observe an animal's habitat. When observing wildlife, rangers must indicate whether an animal requires medical attention. The app must synchronize and save data to Common Data Service when connectivity is available.
You need to design the app.
What should you do? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Enable the Wildlife entity and the annotation entity for mobile offline
Note: As part of the 2020 Wave 2 release, we made generally available offline capabilities for model driven apps for users of Power Apps. Makers and administrators can now configure apps to be available offline on a user's device, and users can continue to complete their tasks against the local cache on their phone even with intermittent or no network connectivity. When the network is re-established, the users' changes are seamlessly synchronized back to the cloud.
Box 2: Enable attachments on the Wildlife Details entity and enable Wildlife Details entity for mobile offline.
Box 3: Create a business process.
Business process flows. Ensure that people enter data consistently and follow the same steps every time they work in an app by creating a business process flow.
Note: Power Automate includes several types of processes, each designed for a different purpose:
? Automated flows. Create a flow that performs one or more tasks automatically
? Button flows.
? Scheduled flows. Create a flow that performs one or more tasks on a schedule such as once a day, on a specific date, or after a certain time.
? Business process flows. Ensure that people enter data consistently and follow the same steps every time they work in an app by creating a business process flow.
? Workflows and actions. Dynamics 365 customizers may be familiar with the classic Microsoft Dataverse processes, which are workflows and actions.

NEW QUESTION 219
- (Topic 4)
You create a model-driven app for a company. The app will be used to manage events that the company organizes.
The Events entity ownership type is set to User or team. Members of the marketing team are assigned the MarketingTeam security role. All privileges for the role are set to User access.
All employees must be able to view event records. Only members of the marketing team are permitted to create or edit event records. You create a role named OtherEmployees.
You need to configure the MarketingTeam and OtherEmployees security roles.
Which three actions should you perform? Each correct selection presents a part of the
NOTE: Each correct selection is worth one point.

A. Set the access level for the OtherEmployees security role to Organization for the Read permission.
B. Set the access level for the MarketingTeam security role to Organization for the Read permission.
C. Set the access level for the OtherEmployees security role to None Selected for the Read permission.
D. Set the access level for the MarketingTeam security role to None Selected for the Read permission.
E. Set the access level for the MarketingTeam security role to None Selected for the Create and White permission.
F. Set the access level for the OtherEmployees security role to None Selected for the Create and Write permission.

Answer: ABE

NEW QUESTION 222
- (Topic 4)
You create a Microsoft Power BI report with multiple visualizations displayed together. The report must be available to users in all security roles. You need to display the report in a model-driven app. What should you embed?

A. Power BI dashboard on a model-driven form.
B. Power BI tile on a model-driven form.
C. Power BI dashboard on a model-driven dashboard.
D. Power BI tile on a model-driven dashboard.

Answer: D

NEW QUESTION 227
- (Topic 4)
A company stores financial files in Microsoft SharePoint document libraries. When a user uploads a new file, the user's manager must approve the request. You need to design a cloud flow to meet The requirement.
Which three actions should you use? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

A. When a file is created trigger
B. Get direct reports action
C. Wait for an approval action
D. When an item or a file is modified trigger
E. When an item is created trigger
F. Assign manager action
G. Start and wait for an approval action
H. Get manager action

Answer: AFG

NEW QUESTION 228
- (Topic 4)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others
might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
A company is deploying Microsoft Power Platform components to streamline a job candidate screening process.
The human resources (HR) representatives of the company plan to attend school career fairs. The HR representatives must qualify and enter potential job candidates into a Power Apps app. The HR representatives must enter the following information for each candidate:

Field name	Data type	Criteria for follow up
Name	Text	No
Degree	Text	Yes
First available hire date	Date	Yes
Initial impression	Integer 0-10	Yes
Resume	Picture	No
Not currently viable	Boolean	Yes
Follow up	Boolean	NA

If a candidate is currently unqualified for a job position but would eventually qualify based on follow-up criteria, the follow-up checkbox must be selected or cleared in the system immediately.
The company plans to create a similar Power Apps app that will contain the same business use case, but for internal employees and promotions.
You need to create a Power Apps app solution to automatically mark the candidate for follow up.
Proposed solution: Create a Power Automate flow with conditions that use entered data as default data.
Does the solution meet the goal?

A. Yes
B. No

Answer: B

Explanation:
Instead use Common Data Service workflow with a PowerQuery on the data entity.
Note: Process (Workflow) table/entity reference is a set of logical rules that define the steps necessary to automate a specific business process, task, or set of
actions to be performed. Common Data Service workflow support: Filter triggers based on which attributes change - You can control which field changes trigger
your automated flows. For example, trigger your flow only when the status field changes while ignoring all other fields that may change.
Reference:
https://docs.microsoft.com/en-us/business-applications-release-notes/april19/microsoft-flow/automated-parity-classic-common-data-service-workflows

NEW QUESTION 232
- (Topic 4)
You work in a warehouse. You build an app for physical inventory counts that is used by different staff members. The typical count takes 14 hours.
The app has a warehouse screen with a gallery that contains the aisles in the warehouse. When a staff member selects an aisle record, another screen displays all the items stored in that aisle. The staff must know how long each aisle takes to do a physical inventory count.
You need to add logic to the app. What should you do?

A. Configure a timer control, add it to the aisle screen, and then reset it when exiting the aisle screen
B. Create and configure a stopwatch custom control, and then add it to the gallery
C. Create and configure a stopwatch custom component, and then add it to the aisle screen
D. Configure a timer control, add it to the gallery, and then reset it when the selection changes

Answer: C

Explanation:
Reference:
https://www.cdata.com/kb/tech/azuredatalake-odata-powerapps.rst

NEW QUESTION 233
- (Topic 4)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You build a canvas app for a manufacturing company. The company receives parts and materials from many vendors. You create a form to collect information from packing slips.
Receivers must be able to take a picture of packing slips to receive materials instead of manually entering data in the app.
You need to ensure that users can scan packing slip information into the form. Proposed solution: Use a Key Phrase Extraction model.
Does the solution meet the goal?

A. Yes
B. No

Answer: B

Explanation:
The key phrase extraction prebuilt model identifies the main points in a text document.
Reference:
https://docs.microsoft.com/en-us/ai-builder/prebuilt-key-phrase

NEW QUESTION 236
- (Topic 4)
You are creating a canvas app.
A small amount of tabular data must be available only to the app. The data must be available before user inter action.
You need to create the data source for this data. What should you do?

A. Use a formula to populate a table when the app starts.
B. Use the Excel Online connector to retrieve the data.
C. Create a Microsoft Dataverse table and use the Microsoft Dataverse connector.
D. Read the data from a file on the device.

Answer: B

NEW QUESTION 240
- (Topic 4)
You create an automated flow by using Power Automate. The flow appears under My Flows and is connected to the development environment. The development environment has a solution to move components into a production environment.
You need to ensure that you can transfer the flow to another environment. What should you do?

A. Add the flow to the default solution of the development environment and export as a managed solution.
B. Change the environment for the flow.
C. Add the flow to the existing solution.
D. Add the flow to the default solution of the production environment.

Answer: A

Explanation:
It is very normal for a developer to build the power automate in one environment and then export that automate & import it to another destination environment.
Exporting our Solution
After validating our flows work in our test environment, we now want to promote it to our production environment. We can export our solution by finding it in our Solutions experience, clicking on the …, selecting Export.
Reference:
https://flow.microsoft.com/en-us/blog/solutions-in-microsoft-flow/

NEW QUESTION 245
HOTSPOT - (Topic 4)
HOTSPOT
A company uses Power Apps and Microsoft Data verse. You need to perform the following activities:
* Create a model-driven app.

* Design navigation for the app
* Show an approval name field on the form if the amount is greater than $1,000.
Which features should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 248
HOTSPOT - (Topic 4)
A state planning department stores demographic data in a local SQL Server database.
The department uses a local report server to analyze the data for land development purposes.
You need to create a visual to display the demographic data.
Which component should you use? To answer, select the appropriate option in the answer area.
NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 249
DRAG DROP - (Topic 4)
You are designing a canvas app that will be used by all users including users who have
Which outcome is achieved by each action? To answer, drag the appropriate outcomes to the correct actions. Each outcome may be used once, more than once,

or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Outcomes	Answer Area		
Not visible to any users	**Action**		**Outcome**
Visible to sighted users only	Set the values for the X and Y properties of a control to move the control off-screen.		Outcome
Visible to screen-reader users only	Set the Color and other related properties of a control to transparent.		Outcome
Visible to both sighted and screen-reader users	Set the Height and Width properties of a control to **1**.		Outcome

A. Mastered
B. Not Mastered

Answer: A

Explanation:

Outcomes	Answer Area		
Not visible to any users	**Action**		**Outcome**
Visible to sighted users only	Set the values for the X and Y properties of a control to move the control off-screen.		Visible to sighted users only
Visible to screen-reader users only	Set the Color and other related properties of a control to transparent.		Visible to screen-reader users only
Visible to both sighted and screen-reader users	Set the Height and Width properties of a control to **1**.		Not visible to any users

NEW QUESTION 252
- (Topic 4)
A company uses Microsoft Teams. A coworker creates a chatbot. The coworker observes unexpected behavior with the chatbot. You need to troubleshoot the chatbot.
Which two actions should you recommend to the coworker? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.

A. Ask the coworker to assign you to the owner role for the team.
B. In Advanced tools, select Monitor.
C. Ask the coworker to add you to their team.
D. Select the chatbot and then select the Share button.

Answer: AB

NEW QUESTION 255
DRAG DROP - (Topic 4)
You are configuring a new Common Data Service environment by using the Power Apps Maker portal.
You need to create an entity that uses the prefix xyz.
Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
Create an entity in the new solution.	
Enter the entity Display Name and use the existing prefix.	
Add a new solution.	
Enter the entity Display Name and modify the prefix to **xyz**.	
Add a new publisher with the prefix **xyz**.	

A. Mastered
B. Not Mastered

Answer: A

Explanation:

Actions	Answer Area
Create an entity in the new solution.	Add a new publisher with the prefix **xyz**.
Enter the entity Display Name and use the existing prefix.	Add a new solution.
Add a new solution.	Create an entity in the new solution.
Enter the entity Display Name and modify the prefix to **xyz**.	Enter the entity Display Name and modify the prefix to **xyz**.
Add a new publisher with the prefix **xyz**.	

**NEW QUESTION 258**
HOTSPOT - (Topic 4)
You are developing an app for a package delivery company. Delivery team members will use the app on their phones. Distribution center team members will use a web-based version of the app that runs on tablet devices.

When a delivery person arrives at a location and the package recipient is present, the app must capture the recipient's signature. If the recipient is not available, the app must capture a picture of the drop-off location or the person receiving the package.

You need to design phone-based and web-based versions of the app.

Which app type and media control should you use? To answer, configure the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.
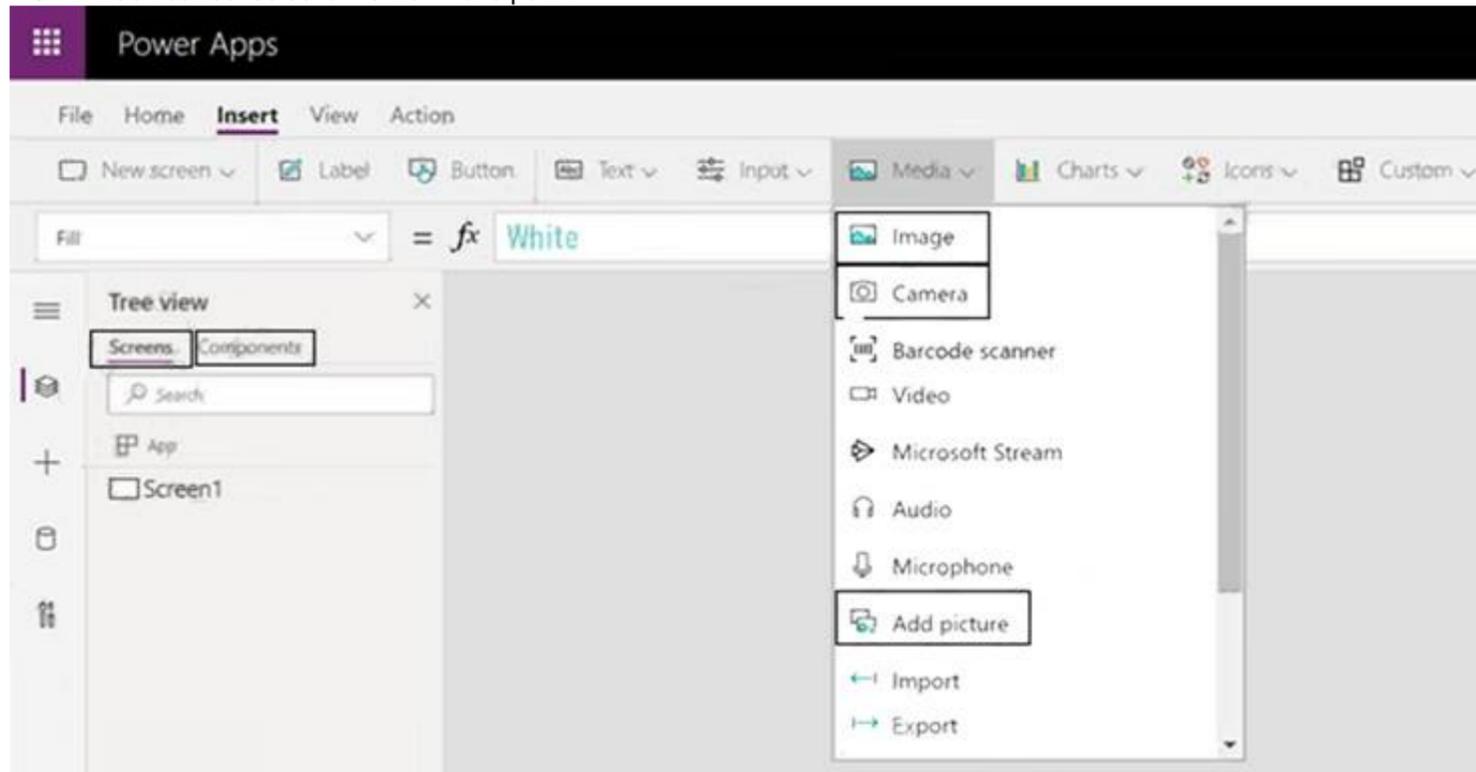

A. Mastered
B. Not Mastered

Answer: A

Explanation:
App Type: Screens
To insert the Camera control in your PowerApps program you can use the blank screen, and select Insert->Media->Camera.
Media Type: Camera
Use the Camera control to capture pictures with a device's camera. The device must have a camera and the user must authorize the app to use the camera.
Tap or select the camera control to capture a picture from the camera.
The most recently captured picture is available through the Photo property. With this property, the images can be:
? Viewed with the Image control. Use the Image control to view the captured image.
? Temporarily put in a variable or a collection.
? Stored in a database.
? Transmitted as a base64 encoded text string.

NEW QUESTION 260
- (Topic 4)
You create a canvas app named Hardware Order that suggests computer hardware to customers.
A value must be entered for the EmployeeID field when creating a new order if the value in the OrderType field does not contain the prefix test.
You need to configure the business rule.
Which two actions should you perform? Each correct answer presents part of the complete solution.
NOTE: Each correct selection is worth one point.

A. Set the scope of the business rule to Entity.
B. Add a Recommendation action and configure it to enter the order type.
C. Set the scope of the business rule to All Forms.
D. Use the following condition expression:(OrderType Does not begin with [test]) AND (Modified By Does not contain data)

Answer: AD

Explanation:
Reference:
https://docs.microsoft.com/en-us/powerapps/maker/common-data-service/data-platform-create-business-rule

NEW QUESTION 262
HOTSPOT - (Topic 4)
A user named Bill Jones creates a canvas app and shares it with other users in his company as shown in SharePowerUsers and ShareJimSmith exhibits. (Click the SharePowerUsers tab and the ShareJimSmith tab.)

Share Company App

Enter a name, email address, or Everyone

Shared with	Sort by Name ∨

BJ Bill Jones
Owner

JS Jim Smith
Co-owner ✕

✓ **PU** Power Users
User ✕

Power Users

This User can use this app

☐ Co-owner

Can use, edit, share app but not delete or change owner.

Data permissions ⓘ

Make sure your users have access to the data used in your app, including gateways,
APIs, connectors, and entities.

Share Company App

Enter a name, email address, or Everyone

Shared with	Sort by Name ∨

BJ Bill Jones
Owner

✓ **JS** Jim Smith
Co-owner ✕

PU Power Users
User ✕

Jim Smith

This User can use this app

☑ Co-owner

Can use, edit, share app but not delete or change owner.

Data permissions ⓘ

Make sure your users have access to the data used in your app, including gateways,
APIs, connectors, and entities.

There are multiple versions of the app. Users must only be able to run the most recently published version of the app as shown in the table below:

Version	Modified	Modified by	Power Apps release	Published	Version note
Version 4	09/05/2020 17:32	Bill Jones	3.20023.8		Changed fonts
Version 3	09/05/2020 17:30	Bill Jones	3.20023.8	Live	Changed business logic
Version 2	09/05/2020 17:22	Bill Jones	3.20023.8		Updated background color
Version 1	09/05/2020 17:20	Bill Jones	3.20023.8		

You need to ensure that sharing is configured correctly.
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

	Yes	No
Member of the Power Users group are able to publish version 4 of the canvas app.	○	○
When using the canvas app, a member of the Power Users group can see version 4.	○	○
If version 2 of the canvas app is restored, it will be labelled as the Live version.	○	○
If Jim Smith edits the canvas app he will be editing version 4.	○	○

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: No
They can only use the app.
Box 2: Yes
Box 3: No
You would need to publish Version 2 to make it live.
Note: If you want to publish the restored version, select Publish this version, and then select Publish this version when prompted to confirm.
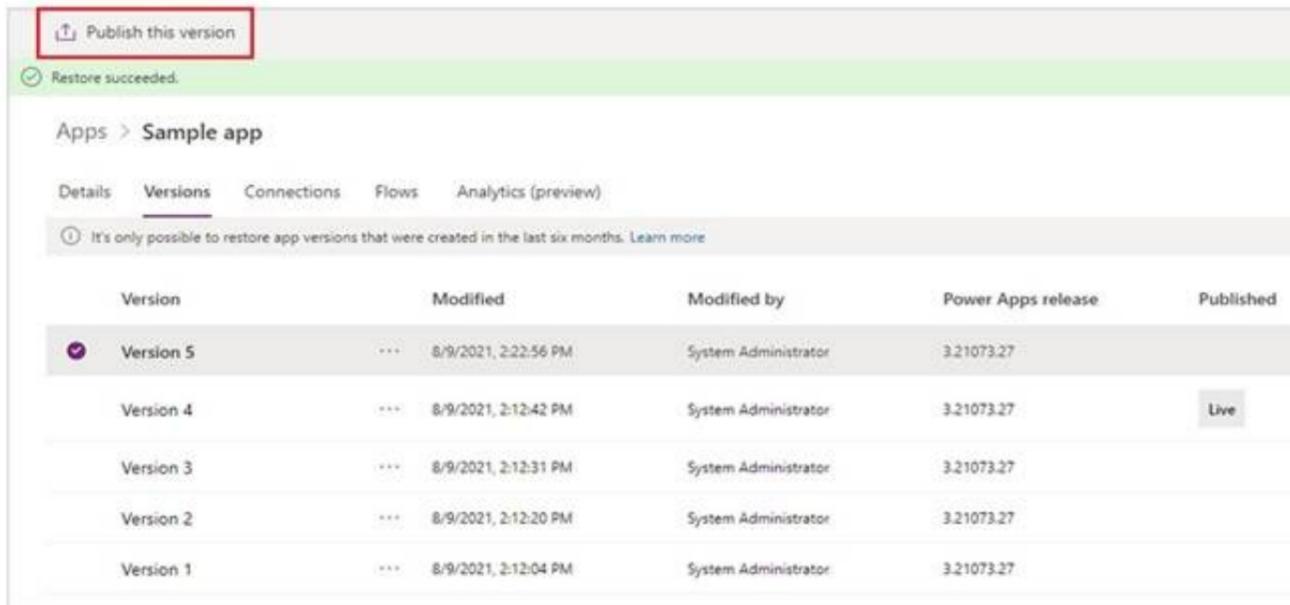

Notice the published restore version that shows up as Live.
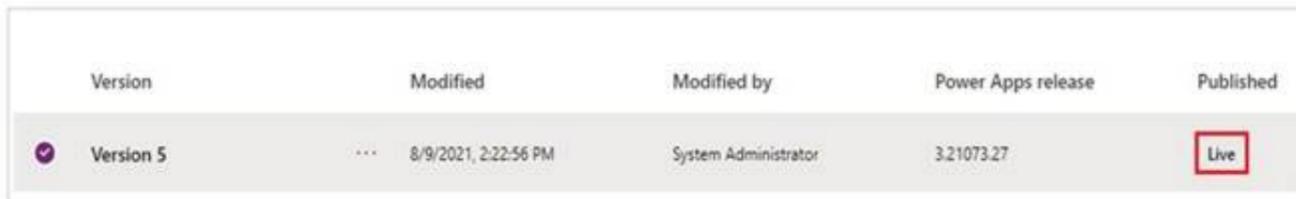

Box 4: Yes
The most recent version of any app is available only to those who have edit permissions for it.

NEW QUESTION 263
- (Topic 4)
Note: This question is part of a series of questions that present the same scenario.
Each question in the series contains a unique solution that might meet the stated might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You build a canvas app for a manufacturing company. The company receives parts and materials from many vendors. You create a form to collect information from packing slips.
Receivers must be able to take a picture of packing slips to receive materials instead of manually entering data in the app.
You need to ensure that users can scan packing slip information into the form. Proposed solution: Use a Text Recognition model.
Does the solution meet the goal?

A. Yes
B. No

Answer: A

Explanation:
Create a canvas app and add the text recognizer AI Builder component to your screen. This component takes a photo or loads an image from the local device, and then processes it to detect and extract text based on the text recognition prebuilt model. If it detects text in the image, the component outputs the text and identifies the instances by showing a rectangle for each instance in the image.
Reference:
https://docs.microsoft.com/en-us/ai-builder/prebuilt-text-recognizer-component-in- powerapps

NEW QUESTION 268
- (Topic 4)
You create a personal view.
You need to ensure that other users can access the view. What should you do?

A. Email the users a link to the view.
B. Set the view as the default view.
C. Share the view with the users.
D. Assign the view to the users.

Answer: C

NEW QUESTION 272
- (Topic 4)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
A company is deploying Microsoft Power Platform components to streamline a job candidate screening process.
The human resources (HR) representatives of the company plan to attend school career fairs. The HR representatives must qualify and enter potential job candidates into a Power Apps app. The HR representatives must enter the following information for each candidate:

Field name	Data type	Criteria for follow up
Name	Text	No
Degree	Text	Yes
First available hire date	Date	Yes
Initial impression	Integer 0-10	Yes
Resume	Picture	No
Not currently viable	Boolean	Yes
Follow up	Boolean	NA

If a candidate is currently unqualified for a job position but would eventually qualify based immediately.
The company plans to create a similar Power Apps app that will contain the same business use case, but for internal employees and promotions.
You need to create a Power Apps app solution to automatically mark the candidate for follow up.
Proposed solution: Create a custom action that has defined dataflows.
Does the solution meet the goal?

A. Yes
B. No

Answer: B

Explanation:
Instead use Common Data Service workflow with a PowerQuery on the data entity.
Note: Process (Workflow) table/entity reference is a set of logical rules that define the steps necessary to automate a specific business process, task, or set of actions to be performed. Common Data Service workflow support: Filter triggers based on which attributes change - You can control which field changes trigger your automated flows. For example, trigger your flow only when the status field changes while ignoring all other fields that may change.
Reference:
https://docs.microsoft.com/en-us/business-applications-release-notes/april19/microsoft-flow/automated-parity-classic-common-data-service-workflows

NEW QUESTION 274
- (Topic 4)
A company uses Microsoft platforms for all accessibility, compliance, and security auditing.
The auditing and compliance division of the company flags a newly created Power Apps canvas app due to accessibility issues. The app must be unpublished until it conforms to Microsoft accessibility requirements and recommendations.
You need to identify all accessibility issues for a solution. What should you use?

A. Microsoft Accessibility Conformance Reports
B. Microsoft Compliance Center
C. Power Apps Studio
D. Microsoft Accessibility Guides
E. Microsoft Visual Studio

Answer: C

Explanation:
? Find accessibility issues
? In the upper-right corner of Power Apps Studio, select the icon for the App checker.
? App checker icon.
? In the menu that appears, select Accessibility.
? A list of issues appears, sorted first by severity and then by screen.
? Select the arrow next to an item to show details about it.
? Accessibility checker details.
? Select the back arrow to return to the list of items.
? If you decide to address an issue, select it to open the affected property.
? After you change one or more properties, select Re-check to update the list of issues.
Reference:
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/accessibility-checker https://support.microsoft.com/en-us/accessibility/enterprise-answer-desk

NEW QUESTION 277
HOTSPOT - (Topic 4)
A company is creating new app for use by technicians.
Previous versions of the app do not render properly on tablets and phones. You need to ensure that the new app renders properly on all devices.
Which design element should you use? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Requirement	Design element
Create an app that does not specify a screen size in the design	▼ Phone form factor Tablet form factor Blank canvas app Model-driven app
Lock the screen size for an app that needs to be set to a specific resolution	▼ Aspect ratio Orientation Image positioning Display mode

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Tablet form factor Box 2: Aspect version
Customize a canvas app by changing its screen size.
? Sign in to Power Apps.
? Open the app to edit.
? Select Settings.
? Select Display.
? (Tablet apps only) Under Aspect ratio, perform either of these steps:
? Select the ratio that matches the target device for this app.
? Select Custom to set your own size, and then specify a width between 50 - 3840 and a height between 50 - 2160.
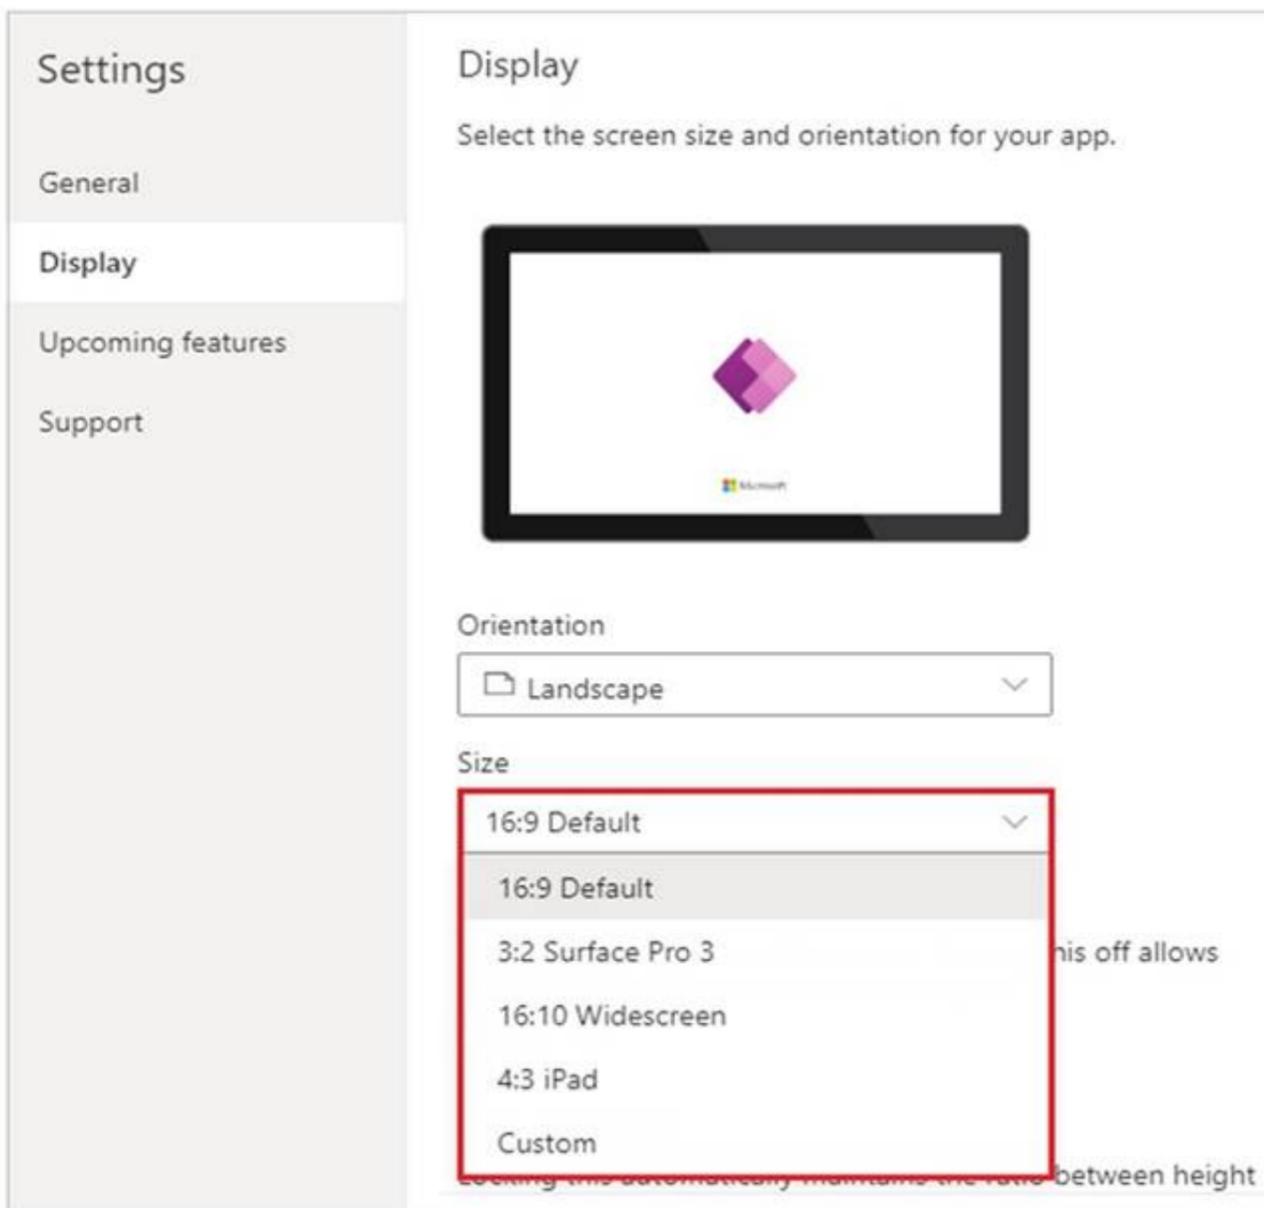

NEW QUESTION 279
- (Topic 4)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
A company has locations in multiple countries and regions across four continents. The company stores the total amount of each order in the local currency of the

country/region where the customer is located. The company stores the applicable
exchange rates in a custom US dollars (USD) exchange rate table.
You need to create a visualization that displays the total amount of orders by country/region in USD.
Proposed solution:
Create a custom calculated field of type currency on the order table that converts the order total to USD and displays the total amounts by region in a Power BI chart.
Does the solution meet the goal?

A. Yes

Answer: A

Explanation:
Instead use a calculated field.
Need to calculate the exchange rate in USD.
Calculated columns are calculated in real-time when they are retrieved. Reference:
https://docs.microsoft.com/en-us/powerapps/developer/data-platform/calculated-rollup- attributes

NEW QUESTION 282
HOTSPOT - (Topic 4)
A company is building a canvas app.
A user needs to understand which data they can make available for the 500 contacts that are present in the Contact table. All relevant data must be shown in the app. Single fields must show one record and grids must show multiple records. Only the primary fields for each related table should be shown for a contact.

Display name	Relationship name	Related table	Relationship type	Type	Customizable
Company Name	contact_customer_contacts	Contact	Many-to-one	Managed	Yes
Connected From	contact_connections1	Connection	One-to-many	Managed	Yes
Owning Team	Team_contacts	Team	Many-to-one	Standard	Yes

Use the drop-down menus to select the answer choice that answers each question based on the information presented in the graphic.
NOTE: Each correct selection is worth one point.

How should you design a screen to display the Connection table information for each contact in the Contacts table?

Use a grid for the Contact table and a grid for the Connection table
Use a single field for the Contact table and a grid for the Connection table
Use a grid for the Contact table and a single field for the Connection table
Use a single field for the Contact table and a single field for the Connection table

How should you design a screen to display the Team table information for each contact in the Contact table?

Use a grid for the Contact table and a grid for the Team table
Use a single field for the Contact table and a grid for the Team table
Use a grid for the Contact table and a single field for the Team table
Use a single field for the Contact table and a single field for the Team table

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Use a single field for Contact table and a grid for the Connection table The Contact table is on 1-side of the 1-to-many relation to the Connection table.
Box 2: Use a single field for Team table and a grid for the Connect table The Team table is on 1-side of the 1-to-many relation to Contact.

NEW QUESTION 287
DRAG DROP - (Topic 4)
The company is adding a multi-stream interactive dashboard to a model-driven app.
The company requires configuration of the dashboard to filter the table data based on modified accounts over the last month.
You need to configure the filters for the model-driven app dashboard.
Which configuration should you use? To answer, drag the appropriate locations to the correct requirements. Each configuration may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Configurations

Filter by

Table view

Filter table

Time frame

Answer Area

Requirement	Configuration
Configure visual filter attributes that the dashboard can use.	
Configure the field that the dashboard uses to filter the table data monthly.	

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Filter table
Filter Table: The visual filters and global filter attributes are based on this table.
Box 2: Filter By
Filter By: The column that the time frame filter applies to.

NEW QUESTION 288
HOTSPOT - (Topic 4)
HOTSPOT
Inspectors for a city building department use a Microsoft Teams channel, inspectors use SharePoint to view construction bylaws, rules, and regulations.
The city clerk email inspectors links to new bylaw proposal, inspectors vote on the proposals and provide additional feedback.
You need to demonstrate to the city clerk how they can automate the process
Which option should you use? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer Area

Flow element	Option
Type of flow.	Cloud flow Desktop flow Business process flow
Trigger type.	Manually trigger a flow. For a selected message in Microsoft Teams. For a selected file in SharePoint. When a flow is run from a business process flow.
Flow step to replace emailing the links.	Get changes for an item in SharePoint. Post an adaptive card to a channel and wait for a response. Post a choice of options to a user in Teams. Send an email with options.

A. Mastered
B. Not Mastered

Answer: A

Explanation:

Answer Area

Flow element	Option
Type of flow.	Cloud flow Desktop flow Business process flow
Trigger type.	Manually trigger a flow. For a selected message in Microsoft Teams. For a selected file in SharePoint. When a flow is run from a business process flow.
Flow step to replace emailing the links.	Get changes for an item in SharePoint. Post an adaptive card to a channel and wait for a response. Post a choice of options to a user in Teams. Send an email with options.

NEW QUESTION 292
- (Topic 4)
A company uses a canvas app to encourage employees to take reading breaks during their work schedule. The reading breaks are created automatically as Outlook tasks in the employees Outlook app. The app must trigger a Power Automate cloud flow when specific data is captured in the canvas app. You need to create and configure the flow. Which flow step should you configure first?

A. Flow button for mobile
B. Power Apps step with trigger conditions

C. New Microsoft Outlook task
D. Condition step

Answer: A

NEW QUESTION 296
DRAG DROP - (Topic 4)
DRAG DROP
You are designing several new Microsoft Power Platform apps for a company. You have the following requirements:
All apps must be able to run from the Power Apps mobile app.
You need to determine which app type to create for each department.
Which app type should you use? To answer, drag the appropriate app types to the correct departments. Each app type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
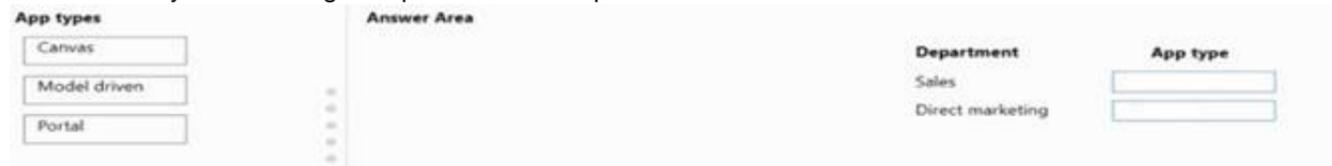

A. Mastered
B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 298
- (Topic 4)
A company is implementing the Microsoft Power Platform to assist with consolidation of onsite inspections and audits of retail stores. Currently, the data used by the retail store inspections is located across multiple systems.
The canvas app must use one database to view and record all data used in the inspection process.
You need to design the solution.
Which three capabilities should you implement? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.

A. Use an embedded access management framework for user security.
B. Execute real-time data operations against external data sources through virtual entities.
C. Store data used by a Power Apps app on both iOS and Android mobile platforms.
D. Use Azure Data Lake storage to host the transactional data.

Answer: BCE

Explanation:
B: Virtual tables (also known as virtual entities) enable the integration of data residing in external systems by seamlessly representing that data as tables in Microsoft Dataverse, without replication of data and often without custom coding.
CE: Authenticating to a Gen 1 DataLakeStore Account Gen 1 uses OAuth 2.0 in Azure AD for authentication.

https://www.cdata.com/kb/tech/azuredatalake-odata-powerapps.rst

NEW QUESTION 303
- (Topic 4)
You create a custom table as part of a solution in the development environment. You deploy major version solutions as managed solutions to production. The organization does not allow new solutions to be created in the production environment.
When a minor update is made to a column length, users cannot enter entire values. You need to allow users to enter entire values in the column.
Solution: Uninstall the most recent version of the solution from the production environment. Does the solution meet the goal?

A. Yes
B. No

Answer: B

NEW QUESTION 305
DRAG DROP - (Topic 4)
You are an app builder for a medical office. The medical office uses activities to book appointments and business process flows to track patient status. The cleaning staff wants the app to connect directly to a Microsoft Excel workbook to track cleaning tasks. The office does not have access to reporting tools including Power BI.
You need to create apps for the following groups of users. Apps must not require

Groups	Comments	Requirements
Reception area staff	Users will access the app only from desktop devices in the office.	Users must be able to access contacts and display activities as a doughnut chart.
Medical staff	Users will access the app from tablet devices.	Users must be able to access activities and business process flows.
Cleaning staff	Users will access the app only from mobile phone devices.	Users must be able to interact with a checklist to mark cleaning tasks as completed.

Which type of app should you build for each group? To answer, drag the appropriate app types to the correct groups. Each app type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

App types

| Canvas app |
| Model-driven app |
| Embedded canvas app |

Answer Area

Group	App type
Reception area staff	App type
Medical staff	App type
Cleaning staff	App type

A. Mastered
B. Not Mastered

Answer: A

Explanation:

App types

| Canvas app |
| Model-driven app |
| Embedded canvas app |

Answer Area

Group	App type
Reception area staff	Canvas app
Medical staff	Embedded canvas app
Cleaning staff	Model-driven app

NEW QUESTION 306
DRAG DROP - (Topic 4)
A company must use a Power Apps app custom control that is exported from a different canvas Power Apps app.
You need to insert the custom control into the Power Apps app.
Where should you complete the actions? To answer, drag the appropriate locations to the correct actions. Each location may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Objects

| Display | Screens |
| Components | |

Answer Area

Action	Location
Import a custom control from a file.	
Add an alignment to the custom control to display it in the middle of the Power Apps app screen.	

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Components
* 1. To add code components to a canvas app:
* 2. Navigate to Power Apps Studio.
* 3. Create a new canvas app or edit an existing app to which you want to add the code component.
* 4. Go to Insert > Custom > Import component.
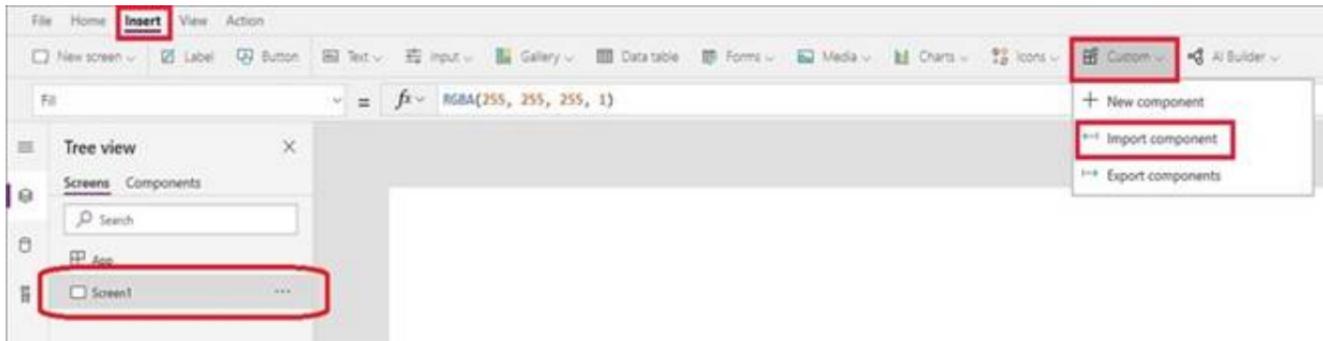

NEW QUESTION 307
DRAG DROP - (Topic 4)
DRAG DROP
A company uses Power Apps and Microsoft Dataverse.
The company has model driven apps across multiple Microsoft Dataverse environments in the same tenant. You must grant privileges to Power Apps makers to achieve the following:
• Share model-driven apps in multiple Microsoft Dataverse environments.
• Share model-driven apps in only one of the Microsoft Dataverse environments and view only table records that they create themselves.
You need to share the model-driven app with users by using the principle of least privilege. Which security role privilege should you grant for each requirement? To answer, drag the
appropriate security roles to the correct requirements. Each security the may be used once,
more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct answer is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 308
- (Topic 4)
You are creating a canvas app.
You need to display a limited list of choices to the end user. You must standardize the values and appearance of the list across all forms.
Which two actions should you perform? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.

A. Add a drop-down field in the app
B. Create a Global Option Set
C. Add a new business rule
D. Add a component to the component library

Answer: AB

Explanation:
A global Option Set can be shared across entities. Reference:
https://powerapps.microsoft.com/en-us/blog/option-sets-and-many-to-many-relationships-for-canvas-apps/
