- D. Microsoft Defender for Office 365

Answer: B

Explanation:

Microsoft Secure Score for Devices

? Artikel

? 12.05.2022

? 3 Minuten Lesedauer Applies to:

? Microsoft Defender for Endpoint Plan 2

? Microsoft Defender Vulnerability Management

? Microsoft 365 Defender

Some information relates to pre-released product which may be substantially modified before it's commercially released. Microsoft makes no warranties, express or implied, with respect to the information provided here.

To sign up for the Defender Vulnerability Management public preview or if you have any questions, contact us (mdvmtrial@microsoft.com).

Already have Microsoft Defender for Endpoint P2? Sign up for a free trial of the Defender Vulnerability Management Add-on.

Configuration score is now part of vulnerability management as Microsoft Secure Score for Devices.

Your score for devices is visible in the Defender Vulnerability Management dashboard of the Microsoft 365 Defender portal. A higher Microsoft Secure Score for Devices means your endpoints are more resilient from cybersecurity threat attacks. It reflects the collective security configuration state of your devices across the following categories:

? Application

? Operating system

? Network

? Accounts

? Security controls

Select a category to go to the Security recommendations page and view the relevant recommendations.

Turn on the Microsoft Secure Score connector

Forward Microsoft Defender for Endpoint signals, giving Microsoft Secure Score visibility into the device security posture. Forwarded data is stored and processed in the same location as your Microsoft Secure Score data.

Changes might take up to a few hours to reflect in the dashboard.

? In the navigation pane, go to Settings > Endpoints > General > Advanced features

? Scroll down to Microsoft Secure Score and toggle the setting to On.

? Select Save preferences. How it works

Microsoft Secure Score for Devices currently supports configurations set via Group Policy. Due to the current partial Intune support, configurations which might have been set through Intune might show up as misconfigured. Contact your IT Administrator to verify the actual configuration status in case your organization is using Intune for secure configuration management.

The data in the Microsoft Secure Score for Devices card is the product of meticulous and ongoing vulnerability discovery process. It is aggregated with configuration discovery assessments that continuously:

? Compare collected configurations to the collected benchmarks to discover misconfigured assets

? Map configurations to vulnerabilities that can be remediated or partially remediated (risk reduction)

? Collect and maintain best practice configuration benchmarks (vendors, security feeds, internal research teams)

? Collect and monitor changes of security control configuration state from all assets

NEW QUESTION 54

Which Microsoft 365 compliance center feature can you use to identify all the documents on a Microsoft SharePoint Online site that contain a specific key word?

- A. Audit
- B. Compliance Manager
- C. Content Search

Answer: A

Explanation:

Microsoft Purview Compliance Manager is a feature in the Microsoft Purview compliance portal that helps you manage your organization's compliance requirements with greater ease and convenience. Compliance Manager can help you throughout your compliance journey, from taking inventory of your data protection risks to managing the complexities of implementing controls, staying current with regulations and certifications, and reporting to auditors.

Watch the video below to learn how Compliance Manager can help simplify how your organization manages compliance:

Compliance Manager helps simplify compliance and reduce risk by providing:

? Pre-built assessments for common industry and regional standards and regulations, or custom assessments to meet your unique compliance needs (available assessments depend on your licensing agreement; learn more).

? Workflow capabilities to help you efficiently complete your risk assessments through a single tool.

? Detailed step-by-step guidance on suggested improvement actions to help you

comply with the standards and regulations that are most relevant for your organization. For actions that are managed by Microsoft, you'll see implementation details and audit results.

? A risk-based compliance score to help you understand your compliance posture by measuring your progress in completing improvement actions.
