# Microsoft 365 Copilot and Agent Administration Fundamentals (beta)

<https://www.certleader.com/AB-900-dumps.html>

**NEW QUESTION 1**

Your company requires that all Microsoft SharePoint sites have a minimum of two owners. You need to ensure that sites that have less than two owners are marked as read-only if the sites are NOT remediated. What should you configure in the SharePoint admin center?

- A. Site-level access restriction
- B. Data access governance reports
- C. Site lifecycle management
- D. Block download policy for SharePoint and OneDrive

**Answer: C**

**NEW QUESTION 2**

You plan to create an agent in the Microsoft 365 Copilot app to solve a business issue. What are two reasons to create the agent? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. You need to group related chats into a Copilot notebook.
- B. You need to use a custom AI model.
- C. You need to use a custom set of instructions that differ from those of the chat experience.
- D. You need to reason over a specific website.

**Answer: CD**

**NEW QUESTION 3**

FILL IN THE BLANK

Select the answer that correctly completes the sentence.

Answer Area

You can use the  Microsoft Purview solution to find all the content that relates to the term "Project Falcon" in the emails exchanged by two users.

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

eDiscovery

**NEW QUESTION 4**

Your organization has a Microsoft 365 E5 subscription. You need to prevent users from sharing corporate financial data to external users. What should you use?

- A. retention labels
- B. data loss prevention (DLP) policies
- C. rote groups
- D. insider risk management policies

**Answer: B**

**NEW QUESTION 5**

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE Each correct selection is worth one point

Answer Area

Statements	Yes	No
A site member of a Microsoft SharePoint site can invite users to access the content in the site.	<input type="radio"/>	<input type="radio"/>
A site owner of a Microsoft SharePoint site can add Microsoft 365 groups as site members.	<input type="radio"/>	<input type="radio"/>
A site owner of a Microsoft SharePoint site can remove another site owner from the site.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
A site member of a Microsoft SharePoint site can invite users to access the content in the site.	<input checked="" type="radio"/>	<input type="radio"/>
A site owner of a Microsoft SharePoint site can add Microsoft 365 groups as site members.	<input checked="" type="radio"/>	<input type="radio"/>
A site owner of a Microsoft SharePoint site can remove another site owner from the site.	<input checked="" type="radio"/>	<input type="radio"/>

**NEW QUESTION 6**

HOTSPOT

Select the answer that correctly completes the sentence.

Answer Area

In Microsoft Entra Privileged Identity Management (PIM), an administrator has made you eligible for the User Administrator role. Before you can create a user account, you must

▼

Activate the role

install the Microsoft Authenticator app.

request a license.

update your location information.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

In Microsoft Entra Privileged Identity Management (PIM), an administrator has made you eligible for the User Administrator role. Before you can create a user account, you must

▼

Activate the role

install the Microsoft Authenticator app.

request a license.

update your location information.

**NEW QUESTION 7**

Your organization has a Microsoft 365 subscription. All users are assigned a Microsoft 365 Copilot license. You need to prevent the users from generating images by using Copilot. What should you use?

- A. the Microsoft Defender portal
- B. the Microsoft Purview portal
- C. the Microsoft 365 admin center
- D. the Microsoft Entra admin center

**Answer:** C

**Explanation:**

The correct answer is C. the Microsoft 365 admin center. Microsoft Learn documents a specific Copilot image generation setting in the Microsoft 365 admin center under Copilot > Settings > Copilot actions > Copilot image generation. Microsoft states that when this scenario is allowed, users can ask Copilot to create, design, and edit images. When it is not allowed, Copilot does not generate images and instead responds with stock or brand images. This directly matches the requirement to prevent users from generating images by using Copilot.

The other options are incorrect because Microsoft does not document this control as being managed from Defender, Purview, or Entra for this scenario. Microsoft also separately notes that organizations can control access to Designer image generation through policy, but the admin experience for managing the Microsoft 365 Copilot scenario itself is explicitly surfaced in the Microsoft 365 admin center. Therefore, for an exam question focused on where an admin should go to disable image generation in Copilot, the best and documented answer is the Microsoft 365 admin center.

**NEW QUESTION 8**

**HOTSPOT**

You are evaluating Microsoft Purview solutions.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
A Communication Compliance policy can detect inappropriate text in Microsoft Teams messages.	<input type="radio"/>	<input type="radio"/>
A Communication Compliance policy can detect offensive language in Microsoft 365 Copilot prompts.	<input type="radio"/>	<input type="radio"/>
A Communication Compliance policy can be used to retain email messages for 10 years.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Statements	Yes	No
A Communication Compliance policy can detect inappropriate text in Microsoft Teams messages.	<input checked="" type="radio"/>	<input type="radio"/>
A Communication Compliance policy can detect offensive language in Microsoft 365 Copilot prompts.	<input checked="" type="radio"/>	<input type="radio"/>
A Communication Compliance policy can be used to retain email messages for 10 years.	<input type="radio"/>	<input checked="" type="radio"/>

**NEW QUESTION 9**

**HOTSPOT**

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point

Answer Area

Statements	Yes	No
Users can use Microsoft 365 Copilot anonymously.	<input type="radio"/>	<input type="radio"/>
Administrators can allow the self-service purchase of Microsoft 365 Copilot licenses.	<input type="radio"/>	<input type="radio"/>
Microsoft 365 Copilot licenses can be assigned to Microsoft Entra ID guest users from other organizations.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
Users can use Microsoft 365 Copilot anonymously.	<input type="radio"/>	<input checked="" type="radio"/>
Administrators can allow the self-service purchase of Microsoft 365 Copilot licenses.	<input checked="" type="radio"/>	<input type="radio"/>
Microsoft 365 Copilot licenses can be assigned to Microsoft Entra ID guest users from other organizations.	<input type="radio"/>	<input checked="" type="radio"/>

**NEW QUESTION 10**

HOTSPOT

Select the answer that correctly completes the sentence.

Answer Area

Statements	Yes	No
Prompts and responses issued by users in Microsoft 365 Copilot are used by Microsoft to train models.	<input type="radio"/>	<input type="radio"/>
Content retrieved by using Microsoft Graph is used by Microsoft to train models.	<input type="radio"/>	<input type="radio"/>
Microsoft 365 Copilot honors the security permissions in your Microsoft 365 subscription.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
Prompts and responses issued by users in Microsoft 365 Copilot are used by Microsoft to train models.	<input type="radio"/>	<input checked="" type="radio"/>
Content retrieved by using Microsoft Graph is used by Microsoft to train models.	<input type="radio"/>	<input checked="" type="radio"/>
Microsoft 365 Copilot honors the security permissions in your Microsoft 365 subscription.	<input checked="" type="radio"/>	<input type="radio"/>

**NEW QUESTION 10**

Your company has a written compliance policy that requires all emails be retained for seven years, and then permanently deleted. Which Microsoft Purview solution should you use?

- A. Information Protection
- B. Insider Risk Management
- C. Data Loss Prevention
- D. Data Lifecycle Management

**Answer:** D

**Explanation:**

The correct answer is D. Data Lifecycle Management. Microsoft Learn states that Microsoft Purview retention policies and retention labels, managed under Data Lifecycle Management, support three core outcomes: retain-only, delete-only, and retain and then delete. The requirement in this question is exact: keep email for seven years and then permanently delete it. That is a textbook retain and then delete retention configuration, which Microsoft documents as part of Purview's retention capabilities. Microsoft also recommends using Microsoft 365 retention policies and labels for retaining and deleting emails rather than relying on older Exchange-only approaches in most modern compliance scenarios.

The other options do not meet the requirement. Information Protection focuses on labeling and protecting sensitive information. Insider Risk Management is used to detect and investigate risky user behavior. Data Loss Prevention helps prevent inappropriate sharing or exfiltration of sensitive data. None of those are designed to enforce a timed seven-year retention period followed by automatic permanent deletion. The Microsoft Purview solution explicitly built for that lifecycle requirement is Data Lifecycle Management.

**NEW QUESTION 11**

**HOTSPOT**

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE Each correct selection is worth one point.

**Answer Area**

Statements	Yes	No
Microsoft 365 Copilot honors Microsoft Purview sensitivity labels.	<input type="radio"/>	<input type="radio"/>
Microsoft 365 Copilot ignores Microsoft Purview data loss prevention (DLP) policies.	<input type="radio"/>	<input type="radio"/>
Microsoft 365 Copilot honors existing Microsoft 365 permissions.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

**Answer Area**

Statements	Yes	No
Microsoft 365 Copilot honors Microsoft Purview sensitivity labels.	<input checked="" type="radio"/>	<input type="radio"/>
Microsoft 365 Copilot ignores Microsoft Purview data loss prevention (DLP) policies.	<input type="radio"/>	<input checked="" type="radio"/>
Microsoft 365 Copilot honors existing Microsoft 365 permissions.	<input checked="" type="radio"/>	<input type="radio"/>

**NEW QUESTION 13**

Your organization has a Microsoft 365 E5 subscription. You create a Microsoft Purview sensitivity label named Label1. You need to ensure that users can apply Label1 to files in Microsoft 365. What should you use?

- A. an auto-labeling policy
- B. a trainable classifier
- C. a retention label policy
- D. a sensitivity label policy

**Answer:** D

**Explanation:**

The correct answer is D. a sensitivity label policy. In Microsoft Purview, creating a sensitivity label by itself does not make it available to users. Microsoft Learn states that after you create sensitivity labels, you must publish them by creating a label policy so that users and groups can see and apply those labels in Microsoft 365 apps and services. Publishing controls which labels are available and to whom they are shown. This is why a sensitivity label policy is required to ensure that users can apply Label1 to files.

The other options do not meet the requirement. Auto-labeling policies apply labels automatically when content matches conditions, but they are not the primary mechanism for simply making a label available for user selection. A trainable classifier is used to identify content categories, not to publish a label. A retention label policy publishes retention labels for records and lifecycle purposes, which is different from sensitivity labeling for classification and protection. Therefore, the correct Microsoft-documented method to let users apply Label1 to files is to publish it using a sensitivity label policy.

**NEW QUESTION 14**

HOTSPOT

Select the answer that correctly completes the sentence.

Answer Area

When you need to add a domain to a Microsoft 365 subscription, you must verify the domain by

adding a public DNS record.

confirming your business address.

Uploading a certificate

uploading a webpage.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Answer Area

When you need to add a domain to a Microsoft 365 subscription, you must verify the domain by

adding a public DNS record.

confirming your business address.

Uploading a certificate

uploading a webpage.

**NEW QUESTION 17**

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Zero Trust requires an Azure subscription.	<input type="radio"/>	<input type="radio"/>
Zero Trust is a security strategy, NOT a specific product.	<input type="radio"/>	<input type="radio"/>
From the Microsoft 365 admin center, you can enable Zero Trust for your organization.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Answer Area

Statements	Yes	No
Zero Trust requires an Azure subscription.	<input type="radio"/>	<input checked="" type="radio"/>
Zero Trust is a security strategy, NOT a specific product.	<input checked="" type="radio"/>	<input type="radio"/>
From the Microsoft 365 admin center, you can enable Zero Trust for your organization.	<input type="radio"/>	<input checked="" type="radio"/>

**NEW QUESTION 22**

Which statement accurately describes authorization in Microsoft 365?

- A. a process to validate an identity from an external system
- B. a process to verify whether an identity is who or what they claim to be
- C. a process to verify whether an identity is allowed to access a resource

D. a process to require additional authentication methods before an identity can access resources

Answer: C

**NEW QUESTION 23**

A user named User1 is responsible for quarterly sales reporting.

User1 needs to identify performance trends, generate visual insights, and create a summary of anomalies across multiple files that contain various datasets. What should you use

- A. the Researcher agent in Microsoft 365 Copilot
- B. Microsoft 365 Copilot Search
- C. Copilot in Excel
- D. the Analyst agent in Microsoft 365 Copilot

Answer: D

**NEW QUESTION 24**

HOTSPOT

Select the answer that correctly completes the sentence.

Answer Area

Microsoft Purview sensitivity labels can be applied to

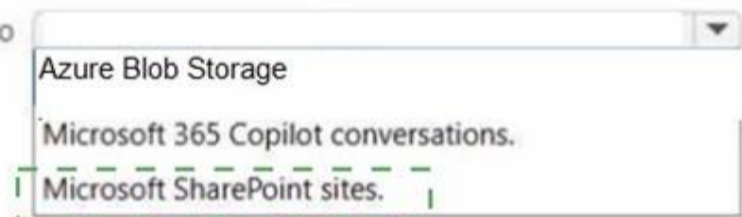

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Microsoft Purview sensitivity labels can be applied to

**NEW QUESTION 29**

You are reviewing your company's security policies as part of a Zero Trust strategy. Which statement accurately describes the Zero Trust principles?

- A. Zero Trust assumes breach and verifies each request.
- B. Zero Trust enhances the user experience by minimizing authentication prompts.
- C. Zero Trust removes the need to regularly review and adjust access permissions.
- D. Zero Trust treats all requests from your corporate network as trustworthy.

Answer: A

**NEW QUESTION 32**

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
To use Microsoft 365 Copilot Chat to reason over web data, you need a Microsoft 365 Copilot license.	<input type="radio"/>	<input type="radio"/>
To use the Researcher agent in Microsoft 365 Copilot, you need a Microsoft 365 Copilot license.	<input type="radio"/>	<input type="radio"/>
To add an agent in the Microsoft 365 Copilot app, you need a Microsoft 365 Copilot license.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Statements	Yes	No
To use Microsoft 365 Copilot Chat to reason over web data, you need a Microsoft 365 Copilot license.	<input type="radio"/>	<input checked="" type="radio"/>
To use the Researcher agent in Microsoft 365 Copilot, you need a Microsoft 365 Copilot license.	<input checked="" type="radio"/>	<input type="radio"/>
To add an agent in the Microsoft 365 Copilot app, you need a Microsoft 365 Copilot license.	<input type="radio"/>	<input checked="" type="radio"/>

**NEW QUESTION 34**

Your organization has a Microsoft 365 subscription. You need to review the impact of a recent phishing incident that targeted email users. What should you use?

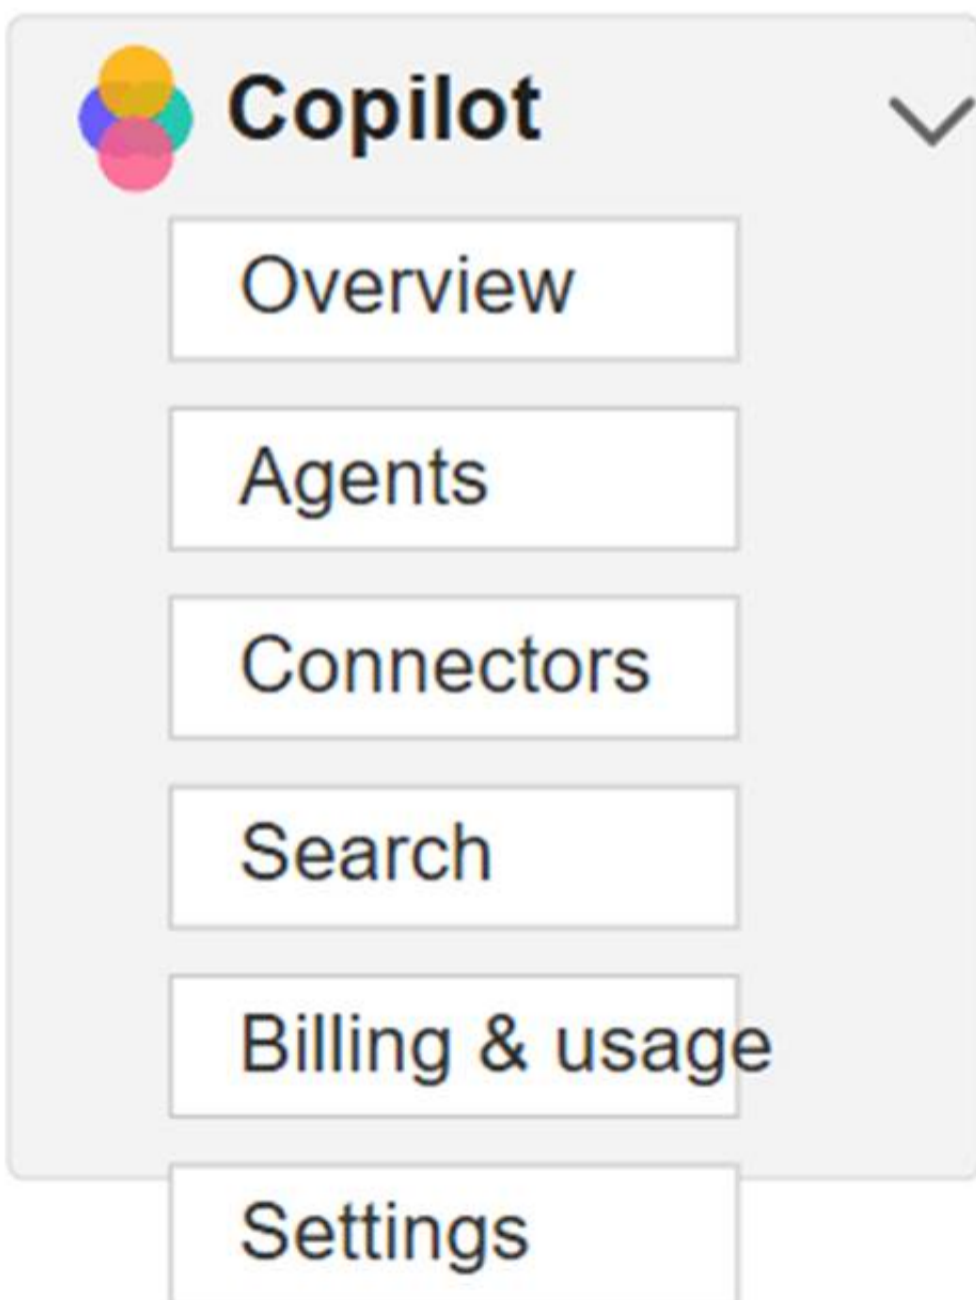

- A. the Microsoft Defender portal
- B. the Microsoft 365 admin center
- C. the Microsoft Entra admin center
- D. the Microsoft Exchange admin center

**Answer:** A

**NEW QUESTION 35**

**HOTSPOT**

You need to ensure that users can use an external system as a knowledge source for custom Microsoft 365 Copilot agents. What should you configure in the Microsoft 365 admin center? To answer, select the appropriate settings in the answer area.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

The correct answer is Connectors. Microsoft documents that Microsoft 365 Copilot connectors are used to bring external, line-of-business data into Microsoft 365 Copilot so users can search, reason over, and act on content from non-Microsoft systems. Microsoft also states that admins must enable and configure Copilot connectors in the Microsoft 365 admin center, and once configured, those connectors can be selected as knowledge sources for custom agents. This directly matches the requirement to let users use an external system as a knowledge source for custom Microsoft 365 Copilot agents. This is why the hotspot in the Copilot area should be set to Connectors, not Overview, Agents, Search, Billing & usage, or Settings. Overview provides status information, Agents is for agent management, Search is for Microsoft Search experiences, and Billing & usage is for metering and consumption tracking. The specific admin feature that enables external enterprise data sources for agent grounding is Connectors. Microsoft further explains that configured connectors can expose external knowledge securely and respect source-level permissions when used in agent scenarios.

**NEW QUESTION 40**

**HOTSPOT**

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

**Answer Area**

Statements	Yes	No
You can use a Microsoft Entra security group to assign permissions to Microsoft Entra ID resources.	<input type="radio"/>	<input type="radio"/>
You can use a Microsoft Entra security group to assign Microsoft 365 licenses.	<input type="radio"/>	<input type="radio"/>
You can use a Microsoft Entra security group to assign permissions to Microsoft Exchange mailboxes.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

**Answer Area**

Statements	Yes	No
You can use a Microsoft Entra security group to assign permissions to Microsoft Entra ID resources.	<input checked="" type="radio"/>	<input type="radio"/>
You can use a Microsoft Entra security group to assign Microsoft 365 licenses.	<input checked="" type="radio"/>	<input type="radio"/>
You can use a Microsoft Entra security group to assign permissions to Microsoft Exchange mailboxes.	<input type="radio"/>	<input checked="" type="radio"/>

**NEW QUESTION 41**

**HOTSPOT**

You open the Microsoft Entra admin center as shown in the following exhibit.

12 recommendations found

Priority	Recommendation	Required licenses	Release type	Secure Score points
Low	Use least privileged administrative roles	Microsoft Entra ID Free	Generally available	1/1
Low	Designate more than one global admin	Microsoft Entra ID Free	Generally available	1/1
Medium	Enable password hash sync if hybrid	Microsoft Entra ID Free	Generally available	0/5
High	Do not expire passwords	Microsoft Entra ID Free	Generally available	8/8
High	Ensure all users can complete multifactor authentication	Microsoft Entra ID Free	Generally available	0.82/9
Medium	Do not allow users to grant consent to unreliable applications	Microsoft Entra ID Free	Generally available	0/4
High	Enable policy to block legacy authentication	Microsoft Entra ID Free	Generally available	0.73/8
High	Require multifactor authentication for administrative roles	Microsoft Entra ID Free	Generally available	0/10

Use the drop-down menus to select the answer choice that completes the statement based on the information presented in the graphic.

**Answer Area**

Resolving the [answer choice] recommendation will improve the Identity Secure Score the most.

- Do not expire passwords
- Use least privileged administrative roles
- Enable policy to block legacy authentication
- Required multifactor authentication for administrative roles

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

**Answer Area**

Resolving the [answer choice] recommendation will improve the Identity Secure Score the most.

- Do not expire passwords
- Use least privileged administrative roles
- Enable policy to block legacy authentication
- Required multifactor authentication for administrative roles

**NEW QUESTION 44**

**HOTSPOT**

Your organization has a Microsoft 365 subscription.

The HR department at your company asks for a copy of all the recent files that were modified by a user named User1.

What should you use in the Microsoft Purview portal? To answer, select the appropriate solutions in the answer area.
